

# Category and Product-level Procurement and Delivery Planning Guide – Health and non-health products

## Indicative Lead Times

28<sup>th</sup> April 2021 (the latest version)

This document lays out indicative lead-times for planning purposes for key health products, including Covid-19, HIV, malaria, and non-health products, for the Global Fund's Pooled Procurement Mechanism (PPM). This information may also be useful as a reference for other procurement channels.

**Procurement and delivery lead-time** corresponds to the time from making a procurement request through to delivery in-country and assumes that there are no financing or other challenges that may delay confirming an order. Countries where importation approvals are complex or where the green-light to ship is long should add the necessary additional weeks to these lead-times.

This information is provided at the category and the detailed product level and is indicative based on current market knowledge to assure on-time delivery and best value procurement in terms of product and freight costs.

This lead-time document is updated regularly and can be found on the [Global Fund's website](#).

A similar lead-time guide for TB products is available on [StopTB Partnership's Global Drug Facility's website](#).

Non-health	For non-health products lead-time significantly varies, for more details please refer to specific product lead-times below.																		

\* Broad product selection available in wambo.org. Programs should plan with minimum 7 months procurement and delivery timeline as lead times vary widely depending on product availability at time of order confirmation.

\*\* Dependent on procurement volumes, country importation requirements and manufacturer production schedules. Actual lead times will be confirmed at time of order confirmation. For planning purposes, please factor in minimum 7 months' timeline.

\*\*\* Wide variation – please consult detailed product-level guidance

## COVID-19

**\*Procurement and delivery lead-time** corresponds to the time from making a procurement request through to delivery in-country and assumes that there are no financing or other challenges that may delay confirming an order. Countries where importation approvals are complex or where the green-light to ship is long should add the necessary additional weeks to these lead-times.

This information is provided at the category and the detailed product level and is indicative based on current market knowledge to assure on-time delivery and best value procurement in terms of product and freight costs.

In the coming weeks, we will add further sub-categories to the table below in order to provide more precise planning information.
