

# WAMBO.ORG | BENEFITS FOR BUYERS

wambo.org is the Global Fund's online procurement platform. It offers **quality health and non-health commodities** used by programs **to fight HIV, tuberculosis, malaria and COVID-19**. wambo.org is available to approved implementer organizations and governments in Global Fund-supported and transitioned countries, using **Global Fund, domestic, or other donor funding**.

## Value-for-money

The Global Fund actively engages in global markets for its key products. It aggregates order volumes to negotiate prices and delivery conditions, no matter the size of the order. The Global Fund offers **framework agreements** for **ARVs, RDTs, ACTs, LLINs, and PPE** and proactively monitors performance of its contracted suppliers.

## Quality assurance

All products meet the Global Fund's quality assurance framework, which is based on **international standards of quality** and compliance to ensure safety and efficacy.

## Efficient procurement

With competitive strategic sourcing done in advance, **buyers avoid tendering delays and procurement uncertainty** from having to run individual RFQs. This results in accelerated timelines, consistent and predictable market conditions, and delegated supplier performance management.

## Access

wambo.org hosts Global Fund and UN-partner framework agreement catalogues, as well as catalogues maintained by competitively-selected Procurement Services Agents (PSAs). Products can be **accessed regardless of funding source**, supporting **long-term program sustainability**.

## Transparency

The platform offers **real-time visibility into transaction and payment data** via reports and customizable views for all nominated users, with centralized communication channels.

## Auditability

wambo.org supports **tailored approval chains** per buyer, program and/or funding source, adapting to each organization's existing procurement processes. The platform offers **full tracking of decisions and changes** for auditability.

**wambo.org may not represent the best procurement channel for all buyers for all products.**

**Buyers are responsible for evaluating their options and selecting the procurement approach that best meets their needs.**
