Updates to the PR Reporting Process

Progress Update (PU)

2 July 2024
Session 1: 13:00-14:30

Implementation Oversight & Progress Update

1. General Overview: Implementation Oversight in 2024 and Beyond - recap
2. Progress Update (PU) content
3. Progress Update (PU) forms in the Partner Portal
4. Next steps and resources
5. Questions and Answers
6. Break ☕️
General Overview: Implementation Oversight in 2024 and Beyond
Addressing questions from the Pulse Check information session

The reporting requirements have been reduced considerably

- The PC is 80% smaller than the PU
- PU data points have reduced by over 30% from previous PU**
- PC data points have reduced by est. 40% from previous PC**
- PU 2 per year (instead of 4)*

*2 PCs per year per IP, instead of 4 previously (4 PCs if you have a regular IP and a C19RM IP).
**Approximate calculation of data points comparing for an average PC and PU for the same grant.
Addressing questions from the Pulse Check information session

- Data-driven decision-making allows for early intervention.
- More requirements from Board / donor constituencies; critical input to build the business case for the next replenishment.

1. Quarterly monitoring / analysis
   - Ongoing monitoring of cross-portfolio results
     - Quarterly monitoring of programmatic and financial and overall grant implementation progress (Pulse Checks, PU/DRs)
     - For CTs and second line teams

2. Reporting
   - Linking analysis with monitoring and oversight
     - Updates to Board and GF Senior Mgmt and external stakeholders
     - Analysis to support Country Portfolio Reviews and support IO
     - Quarterly Corporate Forecasting

3. Decision-making & guidance
   - Outputs of data and engagement
     - Insights to support Strategic Performance Reporting to the Board
     - Approval of risk mitigation strategies and risk acceptance
     - Engagement with implementers on bottlenecks, emerging risks, etc.
     - Managing cash needs at country level
Delivering on the Global Fund Strategy 2023-2028 through IO

Increasing data quality to enable the rapid generation, analysis and use of high-quality, disaggregated data.

Data validation rules to reduce errors during submission

Data correction to ensure accurate results

Reporting through Aggregate Data Exchange (ADEx)

Elementary indicators to reduce manual entry and increase quality
**Implementation Oversight (IO) key changes from 2024 (GC6 & GC7)**

**Improved Data Quality**

- **Data Quality Checks (DQC)**
  - Online data quality checks to ensure first-time right submission

- **Results Correction* from July**
  - Results from prior reporting periods can be updated within the same implementation year

- **ADEx** Integration*
  - Results feed directly from DHIS into the Partner Portal to reduce manual entry for a defined cohort of PRs

- **Elementary Indicators**
  - Single entry of common numerators and denominators to reduce repeated data entry, improving data consistency

*Impacting HI and Core portfolios only  **ADEx - Aggregate Data Exchange  DHIS – Data Health Information System

**Integrated Reporting***

Reducing from 4 Pulse Checks to 2 yearly per grant/IP:

- removing duplication

- Integrated reporting: Previously submitted results are displayed in subsequent reports

**New Reporting Flexibilities**

- **Submission by Section** from July
  - PRs can submit the Pulse Check and PU/DR section-by-section to allow for timely insights

**Systems Enhancements**

- **Reporting via Online Forms**
  - Phased transition to reporting through online PU/DR forms, including Financial Closure Reports

---

*New compared to PC release

---

**THE GLOBAL FUND**
**Implementation Oversight (IO) key changes from 2024 (GC6 & GC7)**

**Improved Data Quality**

Data Quality Checks (DQC)
- Online data quality checks to ensure first-time right submission

Results Correction* from July
- Results from prior reporting periods can be updated within the same implementation year

ADEx** Integration*
- Results feed directly from DHIS into the Partner Portal to reduce manual entry for a defined cohort of PRs

Elementary Indicators
- Single entry of common numerators and denominators to reduce repeated data entry, improving data consistency

**New Reporting Flexibilities**

Submission by Section from July
- PRs can submit the Pulse Check and PU/DR section-by-section to allow for timely insights

**Systems Enhancements**

Reporting via Online Forms
- Phased transition to reporting through online PU/DR forms, including Financial Closure Reports

**Integrated Reporting***

Reducing from 4 Pulse Checks to 2 yearly per grant/IP:
- Removing duplication

Integrated reporting:
- Previously submitted results are displayed in subsequent reports

*Impacting HI and Core portfolios only  **ADEx - Aggregated Data Exchange   DHIS – Data Health Information System
Data is automatically aggregated for integrated reporting across all forms

**Programmatic reporting section**
- Aggregation of results over the reporting periods (in PU, Q3 PC and PUDR) is automated based on cumulation type in the Performance Framework.
- Results-to-date are displayed on the Coverage indicator landing page.

**Financial reporting section**
- Each report is cumulative. Example: In Q3 reporting must include Q1-Q3.

---

<table>
<thead>
<tr>
<th></th>
<th>Q1</th>
<th>Q2</th>
<th>Q3</th>
<th>Q4</th>

<td></td>
</tr>
</tbody>
</table>

**Closure**
- Within 45 days of closure period

---

* For programmatic indicators that are reported on a quarterly basis.
** For programmatic indicators that are reported on a 6-month basis.
*** For programmatic indicators that are reported on an annual basis.
The overall reporting burden for PRs per IP is reduced thanks to the removal of two Pulse Checks per year

<table>
<thead>
<tr>

Closure
**Improved Data Quality**

Data Quality Checks (DQC)
Online data quality checks to ensure first-time right submission

Results Correction* from July
Results from prior reporting periods can be updated within the same implementation year

ADEx** Integration*
Results feed directly from DHIS into the Partner Portal to reduce manual entry for a defined cohort of PRs

Elementary Indicators
Single entry of common numerators and denominators to reduce repeated data entry, improving data consistency

---

**Integrated Reporting***

Reducing from 4 Pulse Checks to 2 yearly per grant/IP:

1. Q1
2. Q2 (removing duplication)
3. Q3
4. Q4

Integrated reporting: Previously submitted results are displayed in subsequent reports

---

**New Reporting Flexibilities**

Submission by Section from July
PRs can submit the Pulse Check and PU/DR section-by-section to allow for timely insights

---

**Systems Enhancements**

Reporting via Online Forms
Phased transition to reporting through online PU/DR forms, including Financial Closure Reports

---

*Impacting HI and Core portfolios only  **ADEx - Aggregated Data Exchange  DHIS – Data Health Information System
PR Reporting is fully online

3 ways to enter results:

1. **Direct entry** of data into online form *(recommended)*
2. Enter data into supporting Excel and **attach and import** data into the online form
3. **Copy/Paste** data from a working Excel into online form using Data Import Wizard for 4 financial tabs*

PRs are strongly encouraged to directly enter data into the online form.

A supporting Excel **cannot** be used for submission to the Global Fund.

Fully online process

1. **Access Partner Portal**
2. Enter data in **online form**
3. Complete data quality checks in the **online form**
4. Submit **online form** to the Global Fund

* Functionality on 4 financial tabs: Expenditure Report, Cash Reconciliation, Commitments & Obligations, SR Cash Reconciliation

**New compared to the Pulse Check**
**Improved Data Quality**

**Data Quality Checks (DQC)**
Online data quality checks to ensure first-time right submission

**Results Correction** from July
Results from prior reporting periods can be updated within the same implementation year

**ADEX Integration**
Results feed directly from DHIS into the Partner Portal to reduce manual entry for a defined cohort of PRs

**Elementary Indicators**
Single entry of common numerators and denominators to reduce repeated data entry, improving data consistency

---

**Integrated Reporting**

Reducing from 4 Pulse Checks to 2 yearly per grant/IP:

Integrated reporting: Previously submitted results are displayed in subsequent reports

*Impacting HI and Core portfolios only  **ADEX - Aggregate Data Exchange  DHIS – Data Health Information System

New compared to PC release

---

THE GLOBAL FUND
Results Correction

• From July 2024, coverage indicator results can be updated or corrected through the online PU/DR form.

• For example, results reported in the Q1 PC can be updated or corrected during the Q2 PU.

• Updates or corrections can be made within the same IP year.

• This new feature ensures more accurate reporting for the Global Fund to its donors.
**Implementation Oversight (IO) key changes from 2024 (GC6 & GC7)**

### Improved Data Quality
- **Data Quality Checks (DQC)**
  - Online data quality checks to ensure first-time right submission
- **Results Correction* from July**
  - Results from prior reporting periods can be updated within the same implementation year
- **ADEx** Integration*
  - Results feed directly from DHIS into the Partner Portal to reduce manual entry for a defined cohort of PRs
- **Elementary Indicators**
  - Single entry of common numerators and denominators to reduce repeated data entry, improving data consistency

### Integrated Reporting*
- Reducing from 4 Pulse Checks to 2 yearly per grant/IP:
  - Removing duplication

### New Reporting Flexibilities
- **Submission by Section** from July
  - PRs can submit the Pulse Check and PU/DR section-by-section to allow for timely insights

### Systems Enhancements
- **Reporting via Online Forms**
  - Phased transition to reporting through online PU/DR forms, including Financial Closure Reports

---

*Impacting HI and Core portfolios only  **ADEx - Aggregate Data Exchange  DHIS – Data Health Information System

---

**THE GLOBAL FUND**
Sectional submission for timely insights

Sections available for individual submission:

- Programmatic
- Financial
- PSCM & Grant Management

Sectional submission available:
- As of 30 June for PU
- As of 30 Sept for Final PU and PUDR

- From July 2024, the PU will be organized into three sections available for individual submission in Partner Portal; Programmatic, Financial and PSCM & Grant Management.

- The PR can submit each section when ready, allowing for results to be submitted to the Global Fund as quickly as possible for timely insights.

- Each section will have an individual status in Partner Portal so PRs have visibility on what is awaiting submission.

- The report is considered fully submitted to the Global Fund only once all sections have been submitted. The timeline for overall submission remains the same 45 days from the reporting period end date*.

*Portfolios categorized as Challenging Operating Environments have 60 days to submit the PU.

* Only appears with quarterly reported Outcome Indicators
** GC7 only

New compared to Pulse Check
PU requires reporting on indicators that are due for reporting on a quarterly and/or six-monthly basis as per the latest approved PF (including for C19RM).

Reporting periods are aligned to the IP start and end dates.

All indicator and WPTMs when due for reporting are prepopulated in the reporting form.

The approach and technical content of the PU remains same as in GC6.

* The term 'elementary indicator' refers to the numerators and denominators of the coverage indicators and their definitions are derived from the GC7 Indicator Guidance Sheets.
Programmatic Reporting – General Information

For quarterly reported indicators, provide Q2 results only. The result for these indicators will be aggregated at Q2 and Q4 by the Global Fund using the cumulation type assigned in the latest signed grant Performance Framework.

For six-monthly (semesterly) reported indicators, report the results for the specified six-month period.
Impact and Outcome indicators

- This is the data entry page for the **numerators [N]** and **denominators [D]** for the impact/outcome indicators in GC7 grants that require quarterly reporting (RSSH O-3 and HIV O-29)

- Users can also enter any comments related to the indicators being reported in the PU covering the following:
  - Explain performance, especially if over- or underperforming:
    - At national level
    - By implementation service provider (e.g., SR)
  - Describe the trends over time and compare to the same period last year
  - Describe planned mitigation actions to further strengthen implementation.
# Programmatic Reporting – Coverage Elementary Indicators

**GC7 only**

<table>
<thead>
<tr>
<th>Elementary indicators</th>
<th>Coverage Elementary indicators tab - online form</th>
<th>Benefits</th>
</tr>
</thead>
</table>
| • Elementary indicators are the **numerator** [N] and **denominator** [D] of the standard indicators in the latest Performance Framework.  
• They are used to construct the standard coverage indicators on the Coverage Indicators tab. | • The elementary indicators due for reporting are pre-populated on this tab.  
• Numerators and denominators are reported on separate lines.  
• Data entered only once for data elements that are common across indicators  
• Results reported in Q1 may be updated in Q2, if needed. Both Q1 and Q2 fields are editable. | ✓ Avoids duplicate data entry on the same data elements.  
✓ Eliminates errors.  
✓ Ensures consistent reporting. |

- There are no elementary indicators for GC6 Regular and C19RM grants as well as GC7 custom indicators.  
- The results for these indicators are reported through the Coverage Indicators tab (as in the current PU/DR).
Programmatic Reporting – Coverage Elementary Indicator tab

### Example

<table>
<thead>
<tr>
<th>Numerator [N]</th>
<th>Denominator [D]</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>100</td>
</tr>
</tbody>
</table>

### GC7 only

<table>
<thead>
<tr>
<th>El. Code</th>
<th>Elementary coverage indicator</th>
<th>Standard coverage indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>CM-1a [N]</td>
<td>Number of all suspected malaria cases that received a parasitological test at public sector health facilities</td>
<td>CM-1a: Proportion of suspected malaria cases that receive a parasitological test at <strong>public sector</strong> health facilities.</td>
</tr>
<tr>
<td>CM-1a [D]</td>
<td>Number of all suspected malaria cases that present at public sector health facilities</td>
<td>TCS-9: Percentage of people living with HIV and currently on antiretroviral therapy who are receiving multi month dispensing of antiretroviral medicine.</td>
</tr>
<tr>
<td>TCS-9 [N]</td>
<td>Number of people living with HIV and currently on ART who received 3 – 5 or &gt;6 months of ARV medicine at their most recent ARV medicine pick-up</td>
<td></td>
</tr>
<tr>
<td>TCS-1.1 [N]</td>
<td>Number of people on ART at the end of the reporting period</td>
<td>TCS-1.1: Percentage of people on ART among all people living with HIV at the end of the reporting period.</td>
</tr>
<tr>
<td>TCS-1.1 [D]</td>
<td>Estimated number of people living with HIV</td>
<td></td>
</tr>
</tbody>
</table>

The N and D values are used to automatically construct the standard coverage indicator result on the coverage indicator tab.*

---

One elementary indicator may be used multiple times to construct other standard coverage indicator results.

---

*Denominator results for interlinked indicators with sub-national geographies will be entered on the coverage indicator tab (see Annex slide 85 for more information).
## Programmatic Reporting - Coverage Indicators

### GC7 IP standard coverage indicators
- The results are auto-calculated from the elementary indicator results and auto-populated on the Coverage Indicators tab*.
- The aggregated results for Semester 1, as per the cumulation type in the latest performance framework, are visible but not editable on this page.

### GC7 IP custom coverage indicators
- There are no elementary indicators for GC7 custom indicators, GC6 and C19RM.
- The results for these indicators are reported directly through the Coverage Indicators tab.

### GC6 IP (regular & C19RM) coverage indicators
- The Coverage Indicators tab provides fields for Q1 and Q2 results for quarterly reported indicators and S1 results for indicators that are reported six-monthly.

### Achievement ratio
- The achievement ratio is calculated against the six-monthly target.

---

* Denominator results for interlinked indicators with sub-national geographies will be entered on this coverage indicator tab (see Annex slide 85 for more information).
## Work Plan Tracking Measures (WPTM)

### WPTMs For GC6, GC7 and C19RM grants

- WPTMs are prepopulated if the milestone/target end date falls within the PU reporting period.
- The PR is required to select one of the four status options for each WPTM (i.e., Not started, Started, Advanced, Completed). The score auto-populates based on the status selected.
- The PR provides a performance analysis on the progress made, commenting on the following:
  - Progress made and results achieved
  - Reasons for deviation from workplan activities and milestones, as applicable
  - Description of catch-up plans and any other contextual information

## Overview

Cash reconciliation captures relevant financial data to calculate the PR cash balance at the end of the reporting period.

<table>
<thead>
<tr>
<th>Q1</th>
<th>Q2</th>
<th>Q3</th>
<th>Q4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cash Rec</td>
<td>Cash Rec</td>
<td>Cash Rec</td>
<td>Cash Rec</td>
</tr>
</tbody>
</table>

The overall structure is harmonized across all four quarters through the existing PUDR PR Cash Reconciliation tab.

The Cash Reconciliation tab is replicated in each reporting quarter in the same way, with the exception of the FCR, where supplementary information on closing balances is now included.

Multiple funding source flow is being introduced to monitor cash inflows and outflows at various funding source levels.

A new section on refunds is incorporated to address triangulation variances at the time of the PUDR.

</tbody>
</table>

Variance between the bank statement and PR cash balance and bank reconciliation and PR cash balance is introduced. In case of variance, commentary is mandatory.

**Tips for 9.1:**
If the PR hold Global Fund funds in more than one account, a sum of all accounts should be entered in this field and the PR should attach the bank statement from all accounts.

**Tips for 9.2:**
This represents the bank balance as reported under line 9.1, which is adjusted for reconciling items, such as unpresented checks or bank charges not booked in the PR’s accounting. Bank reconciliation is also used for grants with comingled account.

**Tips for 9.4:**
This represents the difference between the bank reconciliation (9.2) and the reported PR cash balance (5.1). The variances between those two should be minimal. For example, petty cash.
Overview

Open advances are cash outflows for which no corresponding expenditure has been recognized by the PR.

- For Q1, Q2 and Q3 a simplified report on open advances is requested by funding sources.
- The detailed reconciliation of open advances will be requested in Q4.

<table>

</tr>
<tr>
<td>14.3 PR other advances (GDF, prepayments, etc.)</td>
<td></td>
<td></td>
<td></td>
<td>-</td>
</tr>
</tbody>
</table>

Open advances are entered by the PR by funding source and summed automatically.
The three-dimensional breakdown remains the same: cost group/cost input, module/interventions and implementing entities.

Costing Dimensions are populated based on the Full IP budget so that the PR can report on any expenditures that have been advanced compared to budget. In addition, it is possible to include costing dimensions that were not part of the original budget.

The PR only has to enter the expenditure for the current period by cost dimensional items. The cumulative expenditure is calculated based on the previous reported amounts (from previous PUDR).

Previous Global Fund validated expenditure breakdown is also provided to PR to help with their corrections.
Financial Reporting – Non-compliant Expenditures

In comparison to the GC6 PUDR template, section 10 on Non-compliant Expenditures has been simplified to only requesting the PRs to enter the non-compliant expenditures for the current reporting period and any commentary to that.

* Only appears with quarterly reported Outcome Indicators

** GC7 only
The PU has been revised to incorporate three new PSCM metrics*

1. Quantification and forecast timeliness and comprehensiveness
   - Enables timely initiation of the procurement process, order placement and arrival of products into the country.
   - **Timeliness:** Average number of days between planned date and actual forecast completion date for selected product categories.
   - **Comprehensiveness:** % of health product categories that were quantified during the reporting period from the total # of product categories selected for quantification and forecast.

2. Grant Procurement planning performance
   - PRs develop a procurement plan with details of health products, quantities, budgeted reference prices, order placement dates and procurement channels. The plan is ideally derived from a national plan resulting from the national quantification and forecast exercise.
   - **Procurement planning:** % of orders for selected tracer health products that are placed on time, as per the grant procurement plan, considering international/national lead times.

3. Stocked According to Plan (SATP)
   - PRs are required to maintain optimum health product stock levels as per the national guidelines for supply chain management and logistics.
   - **SATP:** % of the tracer health products whose stock status are within designated min/max stock levels, as per the central stock report.

- The requirement to report on the new metrics applies to **High Impact and Core portfolios for GC7 only.**
- Existing reporting requirements on PQR and Risk of Stock-out & Expiry apply to all applicable portfolios.
Grant Management Reporting - Grant and Risk Management

<table>
<thead>
<tr>
<th>Grant requirements</th>
<th>Mitigating actions and Management issues</th>
</tr>
</thead>
</table>
| • Grant requirements are prepopulated in the report.  
• The PR is required to select one of the three progress status options (Met, Not Started, In Progress) and comment on the implementation progress of each requirement. | • Key mitigating actions and/or management actions and their completion due dates are prepopulated in the report.  
• The PR is required to select one of the four progress status options (Completed, Delayed, On-track, Off-track) and comment on the implementation progress. If the progress status of a mitigating action is ‘Completed’, then the PR must provide a completion date. |
Grant Management Reporting - Self-assessment

PR Self-assessment

• The PR is required to provide a summary of the grant performance for the reporting period and a forward-looking assessment on the grant delivery by module.

• The PR signatory is not required to sign-off for the PU nor attach a signed report in the Partner Portal. The submitter of the online form instead needs to confirm that the information provided in the report is complete and accurate.
Progress Update in Partner Portal
1. PR completes and submits complete online PU form
   (option to submit each section individually before the final submission)

   PR to complete and submit form

2. LFA reviews & submits form in Partner Portal
   (option to submit each section individually before the full LFA submission)

3. Global Fund reviews financial section

4. Global Fund reviews programmatic information

5. Global Fund confirms PSCM and Grant Management information has been reviewed

Steps 3a, 3b, 3c. in parallel

Number of days after reporting period end:
- 45 days
- 15 days
- 20 days

For section(s) with LFA review:

For section(s) without LFA review:

LFA / Assurance Provider to review

Complete

1. PR completes and submits complete online PU form
   (option to submit each section individually before the final submission)

2. LFA reviews & submits form in Partner Portal
   (option to submit each section individually before the full LFA submission)

3. Global Fund reviews financial section

4. Global Fund reviews programmatic information

5. Global Fund confirms PSCM and Grant Management information has been reviewed

1 PRs are strongly encouraged to directly enter data into the online form. A supporting Excel is available for data collection & collaboration and can be imported into the online form. It cannot be used for submission to the Global Fund.

2 Calendar days; Portfolios categorized as Challenging Operating Environments have 60 days to submit the PU.

3 LFA or other Assurance Provider.

* Functionality on 2 financial tabs in PU; Expenditure Report, Cash Reconciliation
Data Quality Checks ensure PR submissions are accurate and complete upon submission

- Data Quality Checks are a set of automated actions that the system performs to flag irregularities. The checks support to:
  - Improve data quality by flagging potentially incorrect data
  - Prevent data entry errors
  - Improve data integrity and consistency
  - Speed up the review process of the submitted data by Global Fund

There are 2 types of checks in Partner Portal:

⚠️ **Error**
- Alerts when the data does not comply with validation rule
- Does not allow PR to submit until the error is corrected.
- Allows the system user to review and correct the data before submitting the form.

⚠️ **Warning**
- Flags the system user to check if the data captured is correct or contains a potential error.
- Requires a justification comment if the warning is overruled.
- Allows PR to proceed and submit.

Note: Only enter a ‘0’ when the result is zero. If the result is not (yet) available, leave the cell blank and provide a justification.

A full list of errors and warnings for each section will be included in the PR Reporting Handbook
Data Quality Checks – Examples of errors

Errors require the **correction** of values entered for users to proceed.

### Programmatic Error Messages

Click the down arrow to view all errors and warnings.

Coverage Elementary Indicator

- **Errors and Warnings**

  - **TBDT-1 [N]**: The result should not be blank. Enter a value or provide a justification.

  - **TBDT-4 [N]**: The result should not be blank. Enter a value or provide a justification.

  - **TBDT-2 [N]**: The result should not be blank. Enter a value or provide a justification.

  - **TBDT-2 [D]**: The result should not be blank. Enter a value or provide a justification.

  - **DRTB-2 [N]**: The result should not be blank. Enter a value or provide a justification.
How to navigate PUs in Partner Portal – Submit

In the submit tab the PR can see if the data quality check is required, or a summary of the errors/warnings.
How to navigate PUs in Partner Portal – Submit

Blue button allows the PR to submit the entire form (all sections) to the Global Fund

The PR can submit individual sections here
How to navigate PUs in Partner Portal – Submit

Clicking the down arrow expands the section to see a summary of each tab.

All finance tabs have been checked and have no errors/warnings – this section is ready to submit by clicking here.

The tabs in the PSCM & Grant Management section require data quality checks before submission.
Overview of Process and Statuses

PR Reporting

1. PR completes and submits complete online PU form³ (option to submit each section individually before the final submission)
   - PR to complete and submit form

2. LFA reviews & submits form in Partner Portal² (option to submit each section individually before the full LFA submission)
   - LFA / Assurance Provider to review

3. Global Fund reviews financial section
   - 45 days² after reporting period end
   - Complete

4. Global Fund reviews programmatic information
   - 15 days after PR submission (31 days if LFA review required)
   - Complete

5. Global Fund confirm PSCM and Grant Management information has been reviewed
   - Steps 3a, 3b, 3c. in parallel

Optional Steps 3a, 3b, 3c.

1. PRs are strongly encouraged to directly enter data into the online form. A supporting Excel is available for data collection & collaboration and can be imported into the online form. It cannot be used for submission to the Global Fund.

2. Calendar days; Portfolios categorized as Challenging Operating Environments have 60 days to submit the PU.

3. LFA or other Assurance Provider.
Notifications have been updated to deliver a transparent end-to-end overview for CTs, PRs and CCMs.

1. PR completes and submits complete online PU form (option to submit each section individually before the final submission).
2. LFA reviews & submits form in Partner Portal (option to submit each section individually before the full LFA submission).
3. Global Fund reviews Financial information and programmatic information to confirm PSCM and Grant Management information has been reviewed.

Reminders:
- To submit PU, 1 email per week starting from date of availability + 7 days if the form is not accessed.
- To submit PU 5 and 0 days before submission date.
- PU overdue, 1 day after submission due date, and then every 2 days past submission due date.

Steps 3a, 3b, 3c in parallel.

PU has been reviewed.

Complete.
Next steps and resources
Info sessions are planned to align with reporting timelines and corresponding system releases

There will be a series of online information sessions on the key changes for implementation oversight in 2024.

5 Questions and Answers
Questions and Answers

1. I believe most of us are working on the off-line (Excel) form for our internal validation and review process before entering (direct entry) to the portal. Is it possible for the Global Fund to provide the Excel version of the Portal template for us to work offline? This would be preferable for PRs to prepare and submit the report because the internal validation and review processes are vital for quality reporting.

2. Is there any Excel template in the Portal to work offline? Downloading (and later uploading the completed Excel PU form from the Portal has been very convenient rather than online data input.

There will be a supporting Excel file available to the PR (including internal review and validation process). Please note that the data will still need to be entered into the online form. This will then be subject to Data Quality Checks (DQC). If any warnings or errors are triggered, the PR can adjust/correct/clarify as needed before submitting the online form.
Questions and Answers

3. Is the PU going to be captured online as well, or only the PC?

Yes, the PU is available and must be completed online.

4. Countries classified as COE have 60 days to submit the PU after the reporting end date, which would mean end August for the PU as of 30 June 2024c. Can you confirm this, or does it need to be reconfirmed for each grant with the relevant GF CT?

The additional 15 days allowable for COEs is automatic but should be confirmed with the respective CT.
5. Can we save an offline version of our submitted PU for our record?

The pdf version of the submitted PU will be available for PRs to access and save for their records.

6. With the new arrangement of required reports (i.e. PC, PU/DR) per quarter, what is the position of Quarterly Financial Report (QFR)? Is it still required for preparation and submission?

The QFR is no longer required since GC6. The PC and PU/DR provide the Global Fund with the required information.
Questions and Answers

7. How about the disaggregation tabs we used to have in the offline Excel version? Will they be in the portal?

Disaggregation os not required to report in the PU, so there will not be a tab available for reporting. However, disaggregation will be reported at the time of PUDR.

8. Like Financial reporting, it would be helpful if the PRs have one Excel form for the programmatic reporting, as well as the copy-paste option in the online platform.

Thank you for feedback. The team will explore the options for expanding this functionality further.
Questions and Answers

9. Some of the impact/outcome indicators from GC6 are due in Jan-Jun 2024 (GC7). These are not included in the Performance Framework. How will the Global Fund collect these indicators due as these will not be in the Partner Portal for the PR to report on in GC7.

The results for impact/outcome indicators where the report due date is outside the grant implementation period are reported in the grant closure period in the Final PU. If the results are available past the grant closure, and the related interventions are supported by the new grant, these indicators are included in the new grant and the last available results are used to set the baselines in the new Performance Framework.
10. A survey was sent out recently by the Global Fund to PRs regarding the shift to online reporting. In our response, we indicated strongly that the offline template for reporting should be maintained because using the offline template makes the data collation and internal reviews easier for the PRs.

Thank you for sharing your feedback. This is valuable for us to have a better understanding of your team’s needs.
11. In the case of GC6 grants which ended on 31/12/2023 and which had a C19RM component continuing until the end of Dec 2025, which financial information will have to be included in the C19RM PU? Will it be only the C19RM financial information or is there an expectation that the GC6 final financial data (as per the GC6 FCR) will have to be included in this C19RM PU as well?

In the case where the regular grant ended on 31 December 2023 and C19RM is continuing, for the 30 June 2024, the FCR is required which will also include the relevant sections for C19RM reporting. There will be no separate C19RM PU for the finance parts. There is a requirement, however to complete a PU for the programmatic parts.
12. Does this mean that the signature page will no longer be necessary?

The signature page will only be required for the PUDR and Final PU (not the PU).

13. Will it be possible for 2-3 specialists to work online simultaneously and enter data in different sections?

Yes, it is possible for multiple users to work on the same section simultaneously. Please note, however, it’s possible for one user to overwrite the data from another user when working in the same cell at the same time. The user who enters the data last will be saved in that circumstance.
14. For non-compliant expenditures, is it the cost questioned by the LFA or the disallowed cost as mentioned in the Management Letter sent by the CT?

Non-compliant expenditure in section 10 relates to the reporting period. The PR shall report the non-compliant expenditure identified either within their own records or at the SRs. LFAs and CT will have their separate section for the same.

15. Please provide clear guidance on a situation where GC6 bank statements are used for the GC7. That is, FCR transactions and the new grant are being operated through same bank accounts - the issue surrounding the reporting cash balances.

The separation of transactions and balances will have to be done in the Bank reconciliation statement or alternatively through a reconciliation statement that can be attached in section 9.
16. For which portfolios is LFA review required?
For Finance, there is no LFA review for the PU. However, the CTs will devise its assurance plan to determine what reviews will be done during the grant life cycle. (The PU is not required for Focused portfolios).

17. It would be very useful if the Global Fund could provide the guidelines on how to fill in the online form (including what kind of data is to be entered) as the Global Fund used to have the PU/DR Guidelines.
Detailed guidelines on how to complete the form will be provided.
Questions and Answers

18. Will there be character limits in the comments sections? Will there be a self-assessment section?

The limit has been set to 10,000 characters. There is a self-assessment section available in the PU.

19. Can a section submitted earlier still be revisited/edited before the final submission of the PU?

No. Once the section is submitted to the Global Fund, it can no longer be corrected by the PR and it is considered as final.
Questions and Answers

20. Can the whole PU be imported and then extraction done for all sheets or is it sheet by sheet?

PRs will be able to download the supporting Excel which will contain all sections required for reporting. The information captured in the supporting Excel will be imported for all tabs.

21. Is the supporting Excel mentioned the same as the existing PU template?

The supporting Excel will be quite similar to the previous Excel version, however, please note there have been changes made to the reporting requirements. Only the new supporting Excel downloaded from Partner Portal will be compatible for import. Do not use copies of prior templates.
22. In cases where the PR is not able to submit the online PU within the established deadline for submission, what is the procedure to extend the deadline?

The deadline for PU submission is 45 (calendar) days. If any issues are experienced in the Partner Portal, the PR is encouraged to contact the Country Support team at country.support@theglobalfund.org. The team can be also contacted via the Partner Portal in the ‘Help’ tab.

23. Can sections be updated/corrected after uploading?

The information in the section can be updated after the Excel has been imported. Once the section / form is submitted to the Global Fund, it can no longer be corrected by the PR and it is considered as final.
Questions and Answers

24. Are there formula links and error warnings present on the offline (Excel) form, similar to the PUDR offline (Excel) form?

The formula calculations will be enabled in Excel. Please note, however, that the PR cannot submit the supporting Excel. The data will need to be either entered or imported into the online form and data quality checks run prior to the submission to the Global Fund.

25. What are the support arrangements for PRs using this online tool? Who should be contacted if something is unclear or if there are error messages during the submission?

In case of issues experienced in the Partner Portal, the PR is encouraged to contact Country Support team at country.support@theglobalfund.org. The support team can be also contacted via the Partner Portal in the ‘Help’ tab.
Questions and Answers

26. After submitting a section or the full form, is it possible to correct data and resubmit?

Once the section or full form has been submitted to the Global Fund, the section/form is locked from further editing.

27. What about the sign-off by the Head of Agency? Is this step no longer required for the online submission?

The sign-off page will only be required for the PUDR and Final PU.
28. If the PR enters data directly into the form (the first out of 3 methods), is there a way to export all the data entered in Excel (or other format) for a final check before submission?

The PRs will be able to download a supporting Excel for data entry only. Once the PR submits the form, the pdf with the submitted information will be available.

29. When do we expect to receive the notification of the PUs being available online?

The PR will receive an automatic notification informing that the PU is available in the Partner Portal.
In the meanwhile, we strongly recommend that you check whether your team has at least two Submitters defined in Grant Entity Data (GED) to ensure your team can complete and submit the form swiftly.
30. How long does it take for the LFA to review submissions and provide feedback, if any?

The LFAs has 20 (calendar) days to complete its review.

31. Is it possible to have multiple accounts with different access rights: for data entry and for submission?

One user cannot have Submitter and Editor rights at the same time. Please note that: the user with Editor rights can edit the information; the user with Submitter rights can Edit and Submit the form to the Global Fund.

We strongly encourage PRs to define at least two Submitters in Grant Entity Data (GED) to ensure swift completion and submission of the sections / form.
32. The CCM lacks access to the online PU/DR and PC. How do you plan to ensure CCMs have access to these forms?

Thank you for your feedback. The CCM Chair, Vice Chair and Civil Society Representatives will be informed once the submission has taken place. We are exploring options to further expand access to the Partner Portal.

33. Are there any specific times the Portal opens and closes. If yes, what is the procedure that the PR need to follow to update the report if there are any corrections to make?

The Partner Portal is accessible 24h/7 and the PR can access the PU form once it has been shared by the Global Fund. In case of issues experienced in the Partner Portal, the PR is encouraged to contact Country Support team at country.support@theglobalfund.org. The support team can also be contacted via the Partner Portal in the ‘Help’ tab.
Questions and Answers

34. When are you planning to send us the Excel template for both PU and FCR?

A preview of the required PU and FCR content is available on the website (English only). Note that PRs will receive notifications to access and complete online forms in the Partner Portal once the reporting period ends. The PR will then be able to download the supporting Excel from Partner Portal.

35. What is the submission deadline for the PU? Is there any change due to these new changes.

The submission deadline for PU is 45 days.
Questions and Answers

36. Can we have a demo of how the disaggregation data will be entered in the PUDR report?

The demo for the data disaggregation entry in the PUDR will be available in Q3 2024.

37. To which extent will the PU be auditable (by LFA/External Auditors)?

The assurance scope for the PU review is determined by the Country Team, specifically tailored to the portfolio context and needs.

For Finance: there is no LFA review for the PU. However, the CT will devise its assurance plan to determine what reviews will be done during the grant life cycle. There will be LFA reviews for FCRs as of 30 June 2024.
38. Regarding the first PU for GC7 grant, should the Expenditure Report compare the annual budget to the semi-annual expenditure?

The annual budget will be prepopulated in the online form. It’s meant to serve as information and insight on absorption. It’s an indication of how much of the annual budget was spent at the 6-month mark.

39. GC7 Budget was developed on an annual basis and does not have a quarterly budget. How should the explanation of the variance be done since we do not have a periodic budget to compare with periodic expenditures?

The variance explanation for the PU is meant to provide insights on the progress towards the year's objectives and budget. At the PUDR and FCR stage, the explanations need to be provided on a cumulative basis only and will be in respect of variances of ±15%.
Questions and Answers

40. For C19RM that will be included in the FCR and that is continuing, will its subsequent financial report be cumulative of the expenses reported in the FCR?

Yes, but for the C19RM portion only.

41. Can the PU and PUDR be reported on in a continuous manner for coverage indicators? This would aid the effective progress monitoring.

The PU and PUDR will follow the current approach for reporting. PRs will, however, have the possibility to update the Q1 results at the PU submission stage, and to update the Q1, Q2 and Q3 results at the PUDR submission stage. For indicators that are reported semi-annually, they can update the S1 results at Q4 when submitting the PUDR.
42. The FCR basically focuses on commitments recorded in the 2023 PU. There is a need to provide guidance on the applicable rate FX rate to apply when documenting the FCR, especially when there is a change in the FX rate after the last PU.

At the time of the Last PU, the commitments are translated at the closing rate of the reporting period. In the FCR, commitments are recalculated using the rate at the date of transaction. The difference then needs to be recorded in the FCR (Expenditures). In addition, the Commitments & Obligation Listing will provide the opportunity to update the information, as relevant.
Data Quality Checks ensure PR submissions are accurate and complete upon submission

- Data Quality Checks are a set of automated actions that the system performs to flag irregularities. The checks support to:
  - Improve data quality by flagging potentially incorrect data
  - Prevent data entry errors
  - Improve data integrity and consistency
  - Speed up the review process of the submitted data by Global Fund

There are 2 types of checks in Partner Portal:

**Error**
- Alerts when the data does not comply with validation rule
- Does not allow PR to submit until the error is corrected.
- Allows the system user to review and correct the data before submitting the form.

**Warning**
- Flags the system user to check if the data captured is correct or contains a potential error.
- Requires a justification comment if the warning is overruled.
- Allows PR to proceed and submit.

Note: Only enter a ‘0’ when the result is zero. If the result is not (yet) available, leave the cell blank and provide a justification.
Errors require the **correction** of values entered for users to proceed.
