

**Pooled Procurement Mechanism Reference Pricing: RDTs**

The Global Fund has entered into long-term agreements with manufacturers of Rapid Diagnostic Tests (RDTs) to secure lower sustainable prices and ensure a consistent, reliable and timely supply of the entire range of RDTs. The reference prices listed are targets for the Global Fund Pooled Procurement Mechanism to deliver health products at or below. Use these reference prices for budgeting purposes. Actual prices for a grant depend on the timing of orders by Principal Recipients and meeting volume thresholds through pooled volumes. Actual prices will be charged to the grant. Different price bands for HIV professional RDTs are provided to help countries decide on their testing algorithms. Non-optimal products or pack sizes, and outlier prices have been removed from this reference price list. Pricing is available upon request if these items are QA eligible and commercially available.

**HIV Rapid Diagnostic Tests - Professional**
