Note to External Readers

This Operational Policy Manual is a compilation of Global Fund operational policies and procedures relating to grant life cycle processes. The Operational Policy Notes (OPNs) and Operational Procedures contained in the Manual are based on policies approved by the Global Fund Board and grant life cycle management approaches developed by the Global Fund Secretariat.

The OPNs and Procedures are updated, as necessary, to reflect changes in grant life cycle management policies and approaches. The Global Fund reserves the right to interpret the OPNs and Procedures set out in the Operational Policy Manual.

Questions relating to their application to specific Global Fund-supported programs should be addressed to the relevant Fund Portfolio Managers.

Questions of a general nature that are not program-specific should be addressed to: operationalefficiency@theglobalfund.org.
Table of Contents

**Introduction**

**Section 1: Access to Global Fund Financing**

1.1 [OPN on Design and Review of Funding Requests (2020-2022 Allocation Cycle)]

1.2 [Operational Procedures on Design and Review of Funding Requests (2020-2022 Allocation Cycle)]

1.3 [OPN on Make, Approve and Sign Grants (2020-2022 Allocation Cycle)]

1.4 [Operational Procedures on Make, Approve and Sign Grants (2020-2022 Allocation Cycle)]

1.5 [OPN on Challenging Operating Environments (COEs)]

1.6 [OPN on Support Costs/Indirect Cost Recovery (ICR) Policy for Non-Governmental Organizations]

1.7 [OPN on Additional Safeguards Policy]

1.8 [OPN on Country Coordinating Mechanism Funding]

1.9 [OPN on Private Sector Co-payment Mechanism for ACTs]

1.10 [OPN on Co-financing]

1.11 [OPN on Grant Entity Data]

1.12 [Operational Procedures on Grant Entity Data]

**Section 2: Grant Implementation**

2.1. [OPN on Oversee Implementation and Monitor Performance]

2.2. [Operational Procedures on Oversee Implementation and Monitor Performance]

2.3. [OPN on Annual Funding Decisions and Disbursements]

2.4. [Operational Procedures on Annual Funding Decisions and Disbursements]

2.5. [OPN on Grant Revisions]

2.6. [OPN on Pooled Procurement Mechanism]

2.7. [Operational Procedures on OPN on Pooled Procurement Mechanism]

2.8. [OPN on Implementing the Quality Assurance Policies for Pharmaceutical, Diagnostics and Other Health Products]

2.9. [OPN on Supplier Misconduct]

2.10. [OPN on Risk Management across the Grant Lifecycle]

**Section 3: Implementation Period Reconciliation and Grant Closure**

3.1 [OPN on Implementation Period Reconciliation and Grant Closure (for 2014-2016 allocation period and thereafter)]

3.2 [Operational Procedures on Implementation Period Reconciliation and Grant Closure (for 2014-2016 allocation period and thereafter)]

3.3 [OPN on Grant Closure (for grants financed prior to the 2014-2016 allocation period)]
Introduction

This Operational Policy Manual is a compilation of Global Fund Operational Policy Notes (OPN) and Operational Procedures relating to grant life cycle processes.

For each grant life cycle process, the OPNs define principles, rules and requirements while Operational Procedures provide the detailed step-by-step guidance to operationalize the rules and requirements. The OPNs and Operational Procedures go through an internal review and approval process before they are issued.

The rules and requirements as well as procedures are differentiated based on portfolio category (high impact, core and focused) in line with the Global Fund differentiation framework. The portfolio categorization exercise is undertaken for each allocation cycle based on the amount of country allocation and disease burden. The portfolio categorization for the 2020-2022 allocation period is presented below.
### 2020-2022 Allocation Cycle: Portfolio Categorization - Country and Multi-country

**FOCUSED**

| 4. Belize | 22. Iran (Islamic Republic) | 40. Serbia |
| 9. Colombia | 27. Lao PDR | 45. Timor-Leste |
| 11. Costa Rica | 29. Mauritania | 47. Turkmenistan |
| 14. Dominican Republic | 32. Mongolia |  |
| 15. Ecuador | 33. Montenegro |  |
| 16. Egypt | 34. Morocco |  |
| 17. El Salvador | 35. Nicaragua |  |
| 18. Gabon | 36. Paraguay |  |

- Multi-country Western Pacific
- Multi-country Caribbean

**CORE**

| 1. Afghanistan | 16. Lesotho |
| 2. Angola | 17. Liberia |
| 7. Congo (Brazzaville) | 22. Papua New Guinea |
| 8. Eritrea | 23. Rwanda |
| 10. Georgia | 25. Sierra Leone |
| 12. Guatemala | 27. South Sudan |
| 14. Guinea Bissau | 29. Togo |
| 15. Haiti | 30. Ukraine |

**HIGH IMPACT**

| 1. Bangladesh | 15. Myanmar |
| 3. Cambodia | 17. Pakistan |
| 4. Cameroon | 18. Philippines |
| 5. Congo DR | 19. South Africa |
| 6. Côte d’Ivoire | 20. Tanzania |
| 7. Ethiopia | (including Zanzibar) |
| 8. Ghana | 9. India |
| 10. Indonesia | 21. Thailand |
| 12. Malawi | 23. Viet Nam |

- Multi-country categorization only covers combined allocation multi-country programs. Regional grants funded from the 2020-2022 Multi-country Modality (Catalytic Investments) will be categorized following approval of allocation for each grant and based on the categorization criteria for multi-country portfolios. Exceptions to the categorization criteria to be approved by EGMC.
- Countries eligible but not receiving 2020-2022 allocation not categorized.
- Cameroon and Malawi categorized as High Impact but located in AME.

**Regional Artemisinin-resistance Initiative**
An applicant submits a funding request to the Secretariat reflective of the allocation from the Global Fund, its national strategy, and the outputs of an extensive multi-sectorial country dialogue process among the applicant, technical partners, donors (including the Secretariat) and civil-society organizations. Once the funding request is reviewed by the TRP, the grant-making process begins.

The Country Team enters into negotiations with the PRs and CCM to develop disbursement-ready grants that are submitted to the Grant Approvals Committee for review and recommendation to the Global Fund Board.
OVERALL OBJECTIVES

1. Funding requests that are designed well and are reviewed effectively help the Global Fund achieve maximum impact, in line with Global Fund’s 2017-2022 Strategy: Investing to End Epidemics (Global Fund Strategy)\(^1\) and efforts to strengthen impact in the 2020-2022 allocation period.

2. The Funding Request Design and Review process is guided by the Global Fund Framework Document, the Global Fund Strategy, the Sustainability, Transition and Co-Financing Policy, the Technical Review Panel’s (TRP) terms of reference, and the following core differentiation principles approved by the Board’s Strategy Committee:

a. **Differentiated level of independent review:** The TRP will engage in the independent assessment of all funding requests, but with a high degree of differentiation in scope and depth of the assessment.

b. **Country ownership:** The process for design and review of funding requests builds on national systems and strategies, domestic co-financing and engagement of in-country stakeholders, including key and vulnerable populations, communities and civil society.

c. **Tailored process for funding request development and review:** The basis, scope and nature of the funding request design and review processes will (i) be evidence-informed, building on the challenges, results and impact of previous implementation periods; (ii) be tailored to the different contexts in which countries operate, including but not limited to evolving epidemiology, challenging operating environments, sustainability and transition considerations, multicountry approaches and fiduciary and programmatic risk and (iii) take into consideration national systems and national health strategy plans.

d. **Simplification and refocusing on implementation:** The process for design and review of funding requests should facilitate effective investment and use of Global Fund resources to achieve the highest impact in line with the Global Fund Strategy, recognizing the need to balance the time spent developing and reviewing funding requests versus the time spent implementing grants.

e. **Focused and timely program revision for greater impact:** The process for design and review of funding requests, including the TRP review, encourages and facilitates efforts to achieve greater strategic focus and impact through program revision throughout the grant lifecycle, as appropriate.

f. **Streamlining and refocusing on key information for decision making:** Documentation requirements are tailored to elicit essential information needed to facilitate effective review and decision-making with respect to funding requests, including consistency across the portfolio or categories of the portfolio, building on existing national and portfolio information.

**OPERATIONAL POLICY**

3. This Operational Policy Note (OPN) defines the rules and requirements for accessing the country allocation for the 2020-2022 allocation period onwards. For guidance on other sources of funding, please refer to Annex 1 and other relevant guidance.

---

2 The TRP will assess funding requests with a differentiated lens instead of a standardized “one-size-fits-all” approach (for example, for programs in challenging operating environments, countries in transition, etc.)

3 As defined in the [Global Fund Key Populations Action Plan 2014 – 2017](#)

4 This includes applicants that will access funding through combined country allocations (e.g. MER, RAI, etc.).
I. Notify the Applicant on Allocation and Application Approach

4. The Global Fund’s Eligibility Policy sets forth eligibility criteria to determine which country components may qualify to receive an allocation from the Global Fund. The eligibility list is published on a yearly basis and is available on the Global Fund website.

5. Eligible applicants receiving an allocation will be notified through the allocation letter with the following information: i) allocation amount for eligible disease components; ii) type of applicant and approach to Country Coordinating Mechanisms’ (CCM) eligibility screening; iii) the application approach; iv) guidance on co-financing requirements and commitments; and v) other information relevant to the country/component. The Global Fund will also share any additional specific guidance to enable the applicant to proceed with the funding request development and submission. The main elements of the allocation letter are detailed below and in the Procedures on the Design and Review of Funding Requests:

Provide Guidance on Country Allocation

6. **Country Allocation.** This is the initial upper ceiling of funding made available by the Global Fund for each eligible country across all eligible disease components for the applicable allocation cycle, in line with the Allocation Methodology. This funding may be

---

* Eligibility to receive an allocation does not guarantee allocation or funding.

* The 2020 Eligibility List determines which country components are eligible for an allocation for the 2020-2022 allocation period.

* Such as allocation-related decisions or outcomes that have intended implications around use of funds (e.g. funding for continuation of essential services, or if countries are expected to be on a continued trajectory for significant reductions in allocations), and any other relevant information.
supplemented by other sources of funds (please see Annex 1), or may be reduced, for example, due to outstanding recoveries\(^9\) in extraordinary circumstances, or if co-financing commitments from the previous allocation period have not been met. Unused funding from the previous allocation period (e.g. undisbursed funds, in-country cash balances, cash balances at a procurement agent level), and any recovered funds relating to disbursements made with grant funds arising from the previous allocation period cannot increase a country allocation. Please see the Global Fund Guidelines for Grant Budgeting for further details.

7. **Timeframe to Access Allocation**\(^10\). For each country, the allocation for eligible components\(^11\) can be accessed, jointly with other components or separately by each component, once per allocation period. The associated grant must be approved by the Board prior to the end of the allocation period (e.g., by 31 December 2022 for the 2020-2022 allocation period)\(^12\). The implementation of grants should, generally, be aligned with country planning cycles, as appropriate. Applicants must consider the end date of their existing Allocation Utilization Period (AUP) and adequately plan for the submission of the funding request, registration for a TRP window, and subsequent grant-making timelines in order to complete the full process well ahead of the end of the AUP.

8. **Timeframe to Use Allocation.** The AUP is the period\(^13\) (usually three years) during which the country allocation per disease component can be utilized to implement a grant. For grants continuing to the next allocation period, the AUP starts the day after the existing grant(s) ends. Any extension to grants from the previous cycle will consume funds and time from the new AUP and reduce the remaining duration and funding for the next grant. If the AUP is shorter than what is communicated in the allocation letter, the allocation funding available for the new grant(s) related to the same disease component is adjusted proportionately.

\(^9\) Refer to the OPN on Recovery of Grant Funds (for Global Fund Secretariat internal use only).
\(^10\) Portions of the allocation may be used earlier than at the start of a new implementation period (for example through the extension of the previous implementation period or advance payments).
\(^11\) Eligibility to receive an allocation does not guarantee allocation or funding.
\(^13\) Variations from the three-year standard period may be allowed for joint funding requests from Focused countries/applicants where start and end dates for the different grant components are misaligned, and in other circumstances on an exceptional basis. These will be communicated to concerned applicants through the allocation letter.
Define Type of Applicant and Eligibility Screening Approach

9. **Types of Applicants.** An applicant is the entity that requests financing from the Global Fund on behalf of a country or a group of countries. Applicants for Global Fund funding\textsuperscript{14} are:

   a. **Country Coordinating Mechanism (CCM).** This is a country-level public-private partnership whose role is, among others, to 1) coordinate the development of funding requests to the Global Fund for relevant program(s) based on priority needs at the national level and 2) oversee the implementation of program activities. CCMs must meet at minimum the CCM Eligibility Requirements.

   b. **Non-Country Coordinating Mechanism (Non-CCM).** In exceptional situations, the CCM in a certain country may not be in the position to carry out its core functions or to fulfill the eligibility requirements. In these cases, a non-CCM applicant submits the funding request. For further details on such situations, see the Country Coordinating Mechanism Policy Including Principles and Requirements.

   c. **Regional Coordinating Mechanism (RCM).** This is a multi-country regional-level public-private partnership and whose role is, among others, to 1) coordinate the development of the funding request(s) to the Global Fund for relevant program(s) based on priority needs at the regional level and 2) oversee the implementation of program activities.

   d. **Regional Organization (RO).** This is an entity with independent legal personality that is not a United Nations agency or a multilateral or bilateral organization, which can demonstrate broad regional stakeholder consultation and involvement, including, but not limited to, the endorsement by each CCM of the countries included in the relevant Program, and whose role is, among others, to 1)
coordinate the development of the funding request(s) to the Global Fund for relevant program(s) based on priority needs at the regional level and 2) oversee the implementation of program activities.

10. **Differentiated Screening for CCM Eligibility Requirements 1 and 2.** There is a differentiated review of CCM eligibility requirements 1 and 2 (please refer to paragraph 23). Country components considered to have higher risk of non-compliance\(^5\) with regards to meeting CCM eligibility criteria would therefore require greater scrutiny and in-depth review. Others will undergo a light screening. The determination of the appropriate level of screening for compliance with eligibility requirements 1 and 2 is made by the Compliance Review Panel.

**Determine Funding Request and Review Approach**

11. **Differentiated Application and Review Approaches.** In order to accommodate the diverse portfolio needs with a view of a continuum from one allocation period to the next, there will be different types of funding request and review approaches during the 2020-2022 allocation period. Based on agreed differentiation triggers, the Grant Approvals Committee (GAC) will determine the most suitable type of funding request and corresponding review approach for each country component, which will be communicated to the applicant in the allocation letter. The types of application and review approaches are the following:

i. **Tailored Request and Review.** It is aimed at better accommodating for specific objective(s). It includes the following:

   a. **Tailored for Transition:** Country components that: i) are receiving transition funding\(^6\); or ii) are projected to move to high income; or iii) previously received transition funding and have become re-eligible and received an allocation; or iv) are using a transition workplan as the basis of their funding request; or v) are requested by the Global Fund to submit a tailored for transition funding request because of contextual considerations\(^7\).

   b. **Tailored for NSP:** Country components invited by the Global Fund to apply using their NSP as the primary application source. The invitation will be based on defined criteria that include, but are not restricted to, risk levels, country motivation to apply for funding using their NSP, alignment between country planning and Global Fund allocation cycles, etc.

   c. **Tailored for Focused Portfolios:** Country components categorized as Focused as per the Global Fund differentiation framework, that are not selected to use the Tailored for NSP or Tailored for Transition approaches.

ii. **Program Continuation**\(^8\). The program continuation approach focuses on continuing program implementation, including promotion of on-going program

---

\(^5\) Higher risk of non-compliance may be linked to reports provided by Country Teams, country stakeholders, CRG and/or CCM Hub, etc. indicating potential issues with regards to meeting CCM eligibility requirements (e.g. inclusiveness, lack of transparency in the selection of the Principal Recipient, conflict of interest issues, etc.) and therefore an in-depth scrutiny is recommended at the moment of the funding request submission.

\(^6\) Countries or components funded under an existing grant that become ineligible may receive funding for up to one additional allocation period following their change in eligibility (Transition Funding), as detailed in the Eligibility Policy.

\(^7\) Instances where the Global Fund may make such request are countries projected to become high income countries in the next few years, countries where the Global Fund determines that the country should account better for transition preparedness in their funding applications and other circumstances. See the Sustainability, Transition and Co-Financing Policy, GF/B35/04, and the Guidance on Transition, Sustainability and Co-Financing of Programs Supported by the Global Fund (STC Guidance).

\(^8\) Unlike in the previous funding cycle, Prioritized Above Allocation Request (PAAR) must be submitted at the same time as the Program Continuation request.
monitoring and evaluation activities, with the possibility of processing a program revision as needed during grant implementation. Identified country components (based on criteria to be determined by the GAC) can access the allocation through a streamlined process for program continuation, which significantly reduces the level of effort by the applicant, the Secretariat and the TRP during the application and review stage.

iii. **Full Request and Review.** This is aimed at comprehensive overall review of a country’s investment approach and strategic priorities and applies to the following country components:

a. High Impact and Core country components that are not eligible for Program Continuation.

b. High Impact and Core country components that are not invited to submit a tailored for National Health and Disease-Specific Strategic Plan (NSP) application.

12. The applicant may propose to change the application and review approach based on the outcome of in-country discussions. If the applicant decides to change the application approach communicated in the allocation letter, this needs to be discussed and agreed with the Global Fund Secretariat. The figure below provides the rules for changes to the application and review approach:

![Image 1. Possible Opt-Ins and Opt-Outs for the Request and Review Approaches as Determined by the Global Fund Secretariat.](image)

**II. Develop and Submit the Funding Request**

Following the receipt of the allocation letter, applicants start developing the funding request to access their allocation. The funding request development process entails the following elements:

**Continue Country Dialogue**

---

For multicountry applicants, the dialogue must take place at the regional level and involve stakeholders from countries included in the funding request.
13. An ongoing inclusive country dialogue process must form part of the grant lifecycle, from funding request development and throughout implementation. The findings and conclusions of this ongoing dialogue should be reflected in the submitted funding request. Prospective Principal Recipients are involved in the development of the funding request in order to ensure the resulting request can be implemented. It is also expected that meaningful community engagement is ensured throughout the grant lifecycle including during the differentiated funding request processes, grant-making and oversight of grant implementation. The Global Fund Secretariat shares with the applicant implementation issues that need to be addressed in the funding request, as well as relevant regional and country analysis with the aim of informing the country dialogue process to prioritize highest impact interventions based on epidemiological context and guidance from technical partners, and clarifying relevant policies and processes.

14. **Support to Country Dialogue:** Support to country dialogue in preparation for a funding request submission should be addressed at the country level with support from in-country technical partners and using existing CCM funding resources. In some cases, there are needs for additional technical support or advocacy during country dialogue processes. Where applicants cannot identify the needed technical support, they can liaise with the Global Fund Country Team to discuss possible options.

15. In qualifying cases where additional funding is needed to support a meaningful country dialogue and an inclusive funding request, the applicant and the Country Team may explore one of the below options:
   a. The Community, Rights and Gender Strategic Initiative to provide technical assistance to support the engagement of civil society, key populations, people living with or affected by the diseases, and women’s networks and organizations, independently or in partnership with the CCM.
   b. Reprogramming of savings from existing grants (OPN on Grant Revisions) to support country dialogue up to a maximum amount of US$ 150,000 (per component). Global Fund grant funds, however, cannot be used to cover the costs for a consultant or technical assistance to draft or write a funding request, as has always been the case for Global Fund financing.

**Decide on Program Split**

16. When applicable, and before the submission of the first funding request, the applicant must confirm or propose a revision to the program split communicated in the allocation letter. While doing so, the applicant must be mindful of the following:
   a. Applicants must confirm or propose their revised program split no later than at the time of submitting their first funding request by completing the Program Split Confirmation Template (shared with the allocation letter) and provide a strong

---

20 In countries faced by acute or protracted emergencies as well as refugee influx, relevant humanitarian partners should contribute to the country dialogue and share humanitarian needs and perspectives.
21 At least 15% of the CCM Funding Agreement amount has to be allocated to support constituency engagement for non-governmental sector activities, including civil society and key population groups, and to promote and improve the quality of stakeholder participation.
22 Civil society and community organizations interested in applying for technical cooperation under the community, rights and gender strategic initiative can contact CRGTA@theglobalfund.org for more information.
23 It is critical that countries invest in cross-cutting RSSH and community systems strengthening to improve health outcomes. The funding designated to cross-cutting RSSH interventions does not need to be documented in the program split unless a standalone RSSH funding request is planned.
24 Applicants receiving an allocation for only one disease component do not need to perform this step.
justification and supporting documentation for changes proposed to the original program split, as relevant.

b. The Secretariat will transparently communicate in the allocation letter where allocation-related decisions or outcomes have intended implications around use of funds through the qualitative adjustment process and closely monitor any changes to the program split for those components.

c. Where possible, the Country Team should be involved in the program split discussions to ensure a robust, inclusive process and a clear rationale underlying the CCM’s proposed program split.

d. The Global Fund Secretariat’s approval of the program split is mandatory and must be obtained before the TRP reviews the applicant’s first funding request. The review and approval processes follow the below rules:

<table>
<thead>
<tr>
<th>Program Split</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change to component’s allocation is &gt; than 15% and &gt; US$ 5 million</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, and TAP. Allocation Team should also be consulted where such changes counter the intended direction of a component’s allocation under the allocation methodology.</td>
</tr>
<tr>
<td>Change moves component below the estimated cost of continuing essential services</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, TAP and Allocation Team.</td>
</tr>
<tr>
<td>Change impacts a qualitative adjustment to a component’s allocation that was intended for a specific use of funds25</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, TAP and Allocation Team.</td>
</tr>
<tr>
<td>Any other change</td>
<td>FPM, based on Country Team’s discussion with RFM and DH.</td>
</tr>
</tbody>
</table>

17. Applicants have the flexibility to request a revision the program split multiple times and reallocate funds to other disease components or to a standalone RSSH funding request. Such revisions can be done during the funding request stage or during grant-making.

18. Revisions to the program split for a particular component are no longer possible after the grants for such component have been recommended for Board approval by the GAC. Unused allocation amounts from a disease component whose grants have undergone GAC recommendation can be reallocated to a different component with grants that have not yet been approved by GAC.

Develop and Submit Funding Request

19. At this stage, applicants develop their funding requests, ensuring they are strategically focused on the most impactful program areas and interventions by population and geography to maximize progress in ending the 3 epidemics and building (as relevant) Resilient and Sustainable Systems for Health (RSSH) with the available resources. When developing the funding request, applicants should be mindful of the below elements:

---

25 Countries requiring escalated review under this criteria will be identified by the Allocation Team and communicated to relevant Country Teams.
a. **Alignment with National Strategies.** The Global Fund will look for alignment to NSPs that provide the overall strategic direction for a country’s health and disease specific programs over a defined period of time.

b. **Implementers.** At the funding request stage, based on an open and transparent process, the applicant must determine and nominate to the Global Fund the Principal Recipient(s) for the program(s)\(^\text{26}\). Based on the nomination, the Country Team must initiate the required capacity assessment for the nominated Principal Recipient, if applicable (see *OPN on Risk Management*). The applicant should also identify potential Sub-Recipients, as early as possible, to avoid delays in the implementation of the program. For more details, please refer to the *Guidelines on Implementers of Global Fund Grants*. If the program is continuing with the same Principal Recipient to the next allocation period, the implementation arrangements’ map must be submitted during the funding request stage, highlighting any changes. If the Principal Recipient is changing, then an implementation arrangements’ map can be submitted later, during the grant-making stage.

c. **Currency.** The funding request and the resulting grant may be denominated in either US dollars or Euros and must be fixed for the relevant grant implementation period. The currency is communicated in the allocation letter.

d. **Compliance with the Sustainability, Transition and Co-Financing Policy and Related Requirements.**

- **Focus of Application:** All funding requests and resulting grants must comply with the focus of application requirements. These are the requirements that govern how Global Fund financing can be used, and which interventions the applicant can request to be funded from the Global Fund. Application focus requirements are differentiated according to a country’s income classification. Please refer to the *STC Policy* for further information.
- **Co-Financing:** All funding requests and resulting grants must comply with the co-financing requirements set forth in the *STC Policy*. For detailed guidance on the co-financing requirements, please refer to the *STC Guidance Note, OPN on Co-Financing* and the allocation letter.
- **Transition Planning and Preparedness:** In line with the *STC Policy*, the Global Fund encourages all Upper-Middle-Income countries, regardless of their disease burden, and Upper Lower-Middle-Income countries with components that have moderate disease burden to proactively prepare for the transition from Global Fund financing and integrate transition considerations and strengthen transition preparedness through Global Fund funding requests. To support advanced planning, a list of country components projected to transition fully from Global Fund financing in the next three allocation cycles due to improvements in income classification and based on current eligibility criteria is published on a yearly basis. These projections are an additional resource for the Secretariat and countries to consider as part of overall sustainability and transition planning and preparedness.
- **Strengthening Sustainability:** The STC Policy emphasizes the importance of strengthening sustainability across the entire Global Fund portfolio. While specific activities and focus areas will vary and depend heavily on country context, the Global Fund encourages all countries to gradually strengthen the sustainability of Global Fund financed programs and interventions. More details are available in the *STC Guidance Note*.  

---

\(^{26}\) The Global Fund recommends that the applicant implements dual track financing (DTF), i.e. nominate a Principal Recipient from both the government and non-government sectors for the implementation of the program.

\(^{27}\) Except in instances where a portfolio is managed under the *Additional Safeguard Policy* and the selection of the Principal Recipient is one of the safeguards invoked for the portfolio.
e. **Resilient and Sustainable Systems for Health.** Building resilient and sustainable systems for health (RSSH) is important to ensure people have access to effective and efficient services through well-functioning and responsive health and community systems. Strengthening systems for health is critical to attain universal health coverage, sustain gains, find efficiencies and accelerate the end of the epidemics. Applicants are strongly encouraged to discuss RSSH needs at the beginning of the country dialogue and develop a funding request that addresses common systems constraints faced by disease programs. They can present their RSSH request within a disease-specific funding request or as a standalone RSSH funding request. However, applicants are encouraged to include their entire RSSH request with the first funding request submitted to the Global Fund. When requesting funding for RSSH interventions (e.g. governance, health financing, health management systems, etc.) applicants should consider opportunities for integration across diseases and the broader health system, as integration attains more efficient and sustainable investments and enables the delivery of people-centered health services.

f. **Challenging Operating Environments.** The [OPN on Challenging Operating Environments](#) (COEs) provides the overall guidance on Global Fund adaptive engagement to ensure access to essential services and/or maximize coverage and impact in such contexts, based on the principles of flexibility, partnerships and innovation.

g. **Streamlining Grant Portfolios and Operations.** The Global Fund encourages applicants to streamline grant portfolios and operations and generate efficiencies and increase the impact of investments. This may include joint funding requests, including two or more components with a single Principal Recipient. This is particularly relevant in countries with smaller allocations, such as in Focused countries. In instances where there is a misalignment between grant start and end dates for two different components, specific guidance will be provided to the applicant in the allocation letter.

h. **Leveraging Joint Investments.** The Global Fund encourages investments through joint platforms to address high-priority areas at the country, or sub-regional levels. Such joint investments leverage the capabilities of development finance institutions with proven track-record, as well as additional funding to maximize the impact in the fight against the diseases and achieve universal health coverage, and health system sustainability. Joint investments are encouraged across the portfolios, and particularly in Focused portfolios to catalyze additional resources and achieve larger scale and more sustainable impact where the Global Fund’s investments are relatively small.

i. **Considering Payment for Results’ Models.** The Global Fund encourages differentiating grant management models, in order to simplify processes, improve results and reward good performers. This means 1) designing simplified grants, linked to impact and outcomes, rather than inputs, 2) enhancing country leadership in the response against the diseases to pave the way for smooth and successful transitions, and 3) ensuring more strategic engagement in support of national program priorities. Payment for results models can be considered in specific circumstances, across well-performing programs and implementers with robust and effective in-country systems. Such differentiated models must be discussed and agreed with the Global Fund Secretariat at the time of designing the funding request and cannot be implemented in the absence of a pre-approval. (Link to guidance is forthcoming).

---

28 GF/B35/DP09.
29 Portfolios facing acute or protracted emergencies may be considered for a pre-shaped application approach. This approach will be used in extreme cases only and will entail an active engagement between the Global Fund Secretariat and in-country partners to define the most effective way to achieve the strategic priority.
30 Applicants can contact their relevant Country Teams for additional information on the different Payment for Results models.
j. **Lessons Learned, Evaluations, Results and Key Risks.** The applicant is expected to consider lessons learned, challenges, results and impact achieved during the previous implementation period, including findings and recommendations of national program reviews and evaluations of program and data quality assessments, as well as impact assessments\(^{31}\). As part of the early stages of the funding request development, Country Teams will share and discuss with applicants key risks and capacity issues identified during the previous implementation period that impact or may impact the ability of implementers to achieve expected program goals, key objectives and results. The applicant must articulate in the funding request how they will build on the lessons learned and what strategic areas need to be strengthened. Drawing on these assessments, they will specify how each of the key risks, identified in the application, will be addressed (please refer to the [OPN on Risk Management](#)).

k. **Progress on Issues Raised by TRP and GAC in the Previous Allocation Period.** The applicant must consider key issues raised by the TRP and GAC during the previous allocation period if applicable and demonstrate how these issues have been addressed and/or will be addressed in the current allocation period.

l. **Prioritized Above Allocation Request (PAAR).** Applicants are required to submit the PAAR with the funding request. This is to ensure a comprehensive and meaningful review of the PAAR within the context of the funding request. However, before completing the PAAR, applicants must ensure that the most critical modules and interventions for their program are covered within the allocation amount. The TRP reviews the PAAR and determines which part of it constitutes Unfunded Quality Demand (UQD). These activities are included in a public UQD register for potential future funding from either the Global Fund (e.g. efficiencies from the grant or Portfolio Optimization), or external sources (e.g. private sector contributions, debt swap agreements, etc.). Throughout the implementation of the grant, the Secretariat may allow or request applicants to submit an updated PAAR for TRP review, if there is a realistic expectation of other sources of funds becoming available\(^{32}\).

20. **Application Package.** Applicants must ensure submitting all mandatory documents relevant for their application to be deemed complete and eligible for review by the TRP. The application package must be submitted within the deadline set for the applicable TRP review window and is comprised of the following:

<table>
<thead>
<tr>
<th>Document</th>
<th>Full Review</th>
<th>Tailored to NSP</th>
<th>Tailored to Transition</th>
<th>Tailored to Focused Portfolios</th>
<th>Program Continuation</th>
</tr>
</thead>
<tbody>
<tr>

<td>•</td>
</tr>
</tbody>
</table>

\(^{31}\) Findings and conclusions following any audits or investigations by the Office of the Inspector General of the Global Fund, should also be considered. For countries applying through the tailored transition approach, specific attention should be paid to the lessons learned related to sustainability gaps and challenges to the transition of Global Fund financed interventions to domestic sources of funding.

\(^{32}\) The applicant must reach out to the Country Team if they are considering submitting an update to PAAR. The Country Team will advise, following consultations within the Secretariat, whether to proceed or not.

*Grant-making documents can be downloaded by the Country Teams as soon as the funding request documents are submitted to the Global Fund. This is meant to help the Principal Recipient advance in completing the grant-making documents and avoid delays in signing.

### III. Review of Applicant’s CCM Eligibility and Funding Request

21. To ensure applications are complete and applicants are compliant with the CCM eligibility requirements, where relevant, and that funding requests are recommended for funding based on technical merit, the Global Fund Secretariat and TRP members will screen and review the applications for completeness, compliance with CCM eligibility requirements and technical soundness, respectively.

**Screen for Completeness and Consistency**

22. After the submission of the funding request, the Global Fund Secretariat performs completeness and consistency checks. The applicant has a limited window to provide

---

33 PAARs are required with the funding request.
34 Only for applicants who are requesting funding to cover Health Products and/or associated management costs. For Focused portfolios, the Health Product Management Template is not required.
35 Updated Implement Arrangements Map, only if the program is continuing with the same Principal Recipient to the next allocation period.
clarifications and missing information in response to clarification requests from the Secretariat.

Assess Compliance with the CCM Eligibility Requirements

23. When the applicant is a CCM or a RCM, the Global Fund Secretariat will assess the application to ensure compliance with the following CCM Eligibility Requirements:
   a. **Requirement 1:** The Global Fund requires all CCMs to:
      i. Coordinate the development of all funding requests through transparent and documented processes that engage a broad range of stakeholders, including CCM members and non-members, in the solicitation and the review of activities to be included in the funding request; and
      i. Clearly document efforts to engage key populations in the development of funding requests.
   b. **Requirement 2:** The Global Fund requires all CCMs to:
      i. Nominate one or more Principal Recipient(s) at the time of submission of the funding request(s);
      ii. Document a transparent process for the nomination of all new and continuing Principal Recipient(s) based on clearly defined and objective criteria; and
      iii. Document the management of any conflicts of interest that may affect the Principal Recipient(s) nomination process.

24. **Non-CCM and RO Applications**. Applications submitted by Non-CCMs and ROs need to comply with the overall principle of inclusiveness, as appropriate, given the Country or multicountry context.

25. **Differentiated Screening of CCM Eligibility Requirements 1 and 2.** Upon receiving a funding request, the Secretariat conducts a screening for CCM Eligibility Requirements 1 and 2 in accordance with the screening approach communicated in the allocation letter.

26. Following the eligibility assessment, CCMs may be considered in one of the following categories:
   a. **Compliant:** This is in instances where the applicant fully complies with the eligibility requirements and relevant indicators.
   b. **Compliant with Issues:** This is in instances where some indicators are not fully met, but the applicant demonstrates credible intent to comply.
   c. **Indeterminate Compliant:** This is in instances where further information is required to make an assessment.
   d. **Non-Compliant:** This is in instances where most or all of the eligibility criteria indicators are not met.

27. Instances where the applicant is deemed, “Indeterminate Compliant” or “Non-Compliant” will be escalated to the Compliance Review Panel who will assess the findings and recommendations made by the A2F department and make a final decision, i.e.:
   a. whether the funding request will be shared with the TRP for review with specific recommendations to be met by the CCM at the time of grant making; or
   b. whether the funding request will be rejected and sent back to the applicant with clear recommendations on how to comply with the eligibility requirements before resubmitting at a subsequent TRP window.

---

36 Except in instances where a portfolio is managed under the [Additional Safeguard Policy](#) and the selection of the Principal Recipient is one of the safeguards invoked for the portfolio.

37 Please refer to the [Country Coordinating Mechanism Policy Including Principles and Requirements](#).
TRP Review and Recommendation

28. **TRP Review.** In line with the criteria specified in their Terms of Reference, the TRP reviews the funding request received from the applicant and provides an independent assessment on the strategic focus, technical soundness and potential for impact of the proposed program to ensure the Global Fund’s investments are positioned for the highest impact in line with Global Fund Strategy.

29. Country Teams may provide additional contextual analysis or considerations to inform the TRP review. The Secretariat analysis will be captured in a differentiated Secretariat Briefing Note. This input is intended to be an upfront and objective presentation of the Secretariat’s analysis of the proposed investment and an overview of contextual information. It is not intended to influence the TRP’s independent review of the application.

30. The results of the TRP review are captured in the TRP Review and Recommendation Form which is used to communicate recommendations to the applicant, Secretariat, and the Board. The form also lists issues identified during the review of the funding request and provides corresponding actions.

31. The TRP may provide two (2) outcomes following their review of funding requests:
   a. **Proceed to grant-making.** Where the funding request is deemed technically sound and strategically focused, the TRP shall recommend to the Global Fund Secretariat and Board that the applicant proceeds to grant-making. The TRP may issue recommendations to the applicant to be cleared either by the TRP or the Secretariat during grant-making or during grant implementation. Funding requests that are “recommended for grant-making with issues to be cleared by the TRP,” go through the TRP clarifications process. The TRP clarifications process is an engagement between the TRP and the applicant, which allows the TRP to ensure that important technical concerns identified during the review of the funding request are addressed to the satisfaction of the TRP during grant-making or implementation.
   b. **Further iteration required.** The TRP decides that the funding request is not ready to advance to grant-making and requires further iteration before resubmission for another TRP review.

GAC Review

32. GAC Review during the funding request stage is conducted on an as-needed basis in line with the GAC review criteria and terms of reference. It may be requested by a Country Team or the GAC Secretariat at any time after the TRP review. For some portfolios, a GAC discussion may be needed to:
   a. Provide strategic steer for critical management concerns for and during grant-making.
   b. Award funding additional to the allocations, such as matching funds from catalytic investments based on TRP recommendations; including taking investment decisions in line with priorities for portfolio optimization, private sector contributions and financing items on the UQD register.

---

38 In certain instances, the TRP may be engaged at an earlier stage of the process and before the submission of the application, to help shape the funding request. This may be particularly relevant in instances where innovative financing elements are being explored or joint investments with other financing institutions are sought.

39 Currently under revision. The OPN will be updated to reflect the revised GAC TORs, once approved, in line with efforts to strengthen impact in the next cycle of grants.
c. Revise or determine the upper ceiling for grant-making, as applicable, including recommending adjustments due to non-realization of government commitments in the previous allocation period.

33. GAC review following a TRP review should not prevent the start of grant-making unless the nature of the steer needed from GAC is integral to commencing grant negotiations.

34. **TRP and/or GAC Issues and Clarifications:** The applicant and the Country Team must ensure that required clarifications or actions are addressed and are fed into the grant-making process in line with the set timelines. At the end of the grant-making process, the Country Team must report to the GAC how TRP and/or GAC issues were addressed through the Final Grant Making Review Form. Please refer to the OPN on Grant Making and Signing (OPN and link forthcoming).

Annex 1. Sources of Funding

Subject to the eligibility criteria specific to each source of funding, applicants may receive funding from the following sources during the funding request design and submission:

a. **Funding for Country Allocations:** These funds are apportioned to countries in line with the Board-approved Eligibility Policy and Allocation Methodology\(^{40}\).

b. **Catalytic Investments:** The Board may approve a portion of resources in addition to country allocations in order to address issues which cannot be adequately addressed by the country allocations alone\(^{41}\):

i. **Matching Funds.** These funds are available to selected countries to incentivize the investment of a country allocation in key strategic priorities. Matching funds will be communicated in the allocation letter and matching funds requests will be reviewed along with the allocation funding request. For more details refer to Instructions and Guidance for Matching Funds Applications.

ii. **Multicountry Funding.** These funds are available to target a limited number of key, strategic multi-country priorities deemed critical to meet the aims of the Global Fund Strategy and not able to be addressed through country allocations alone. Catalytic funding for a multicountry approach may be the only source of funding for the program, or may be provided in addition to funding provided from the country allocations of constituent country components. Certain multicountry programs may also be comprised fully of the combined allocations of constituent country components\(^{42}\). In any case, close coordination between national programs and the implementation of multicountry initiatives must be demonstrated. For more details, please refer to Guidance on Multicountry Funding Applications.

iii. **Strategic Initiatives.** These limited funds are available for centrally managed approaches for strategic areas that cannot be addressed through country allocations due to their cross-cutting, innovative or off-cycle nature, but are critical to ensure country allocations deliver against the Global Fund Strategy (e.g., the Emergency Fund, and funding to strengthen community and civil society engagement). These are not covered by this OPN.

c. **External Complementary Restricted Financial Contributions:** These include contributions by eligible Global Fund donors including corporations, foundations, High Net Worth Individuals and a limited number of authorized public mechanisms i.e. UNITAID and Debt2Health. This type of funding is restricted towards investments listed in the UQD Register, effectively resulting in additional or complementary amounts of funding to Board-approved grants. Please refer to the Policy on Restricted Financial Contributions and the procedures that guide how to access these types of funds once they have been secured.

Design and Review of Funding Requests

Issued on: 28 February 2022
Approved by: Executive Grant Management Committee
Process Owner: Access to Funding Department

For COVID-19 related deviations to the Operational Procedures on Design and Review of Funding Requests, please refer to the following:

1. COVID-19 Operational Flexibilities: Internal Guidance Document
2. C19RM Operational Procedures (Internal)

Relevant Operational Policies and Guidance Documents:

• OPN on Design and Review of Funding Requests
• Country Coordinating Mechanism Policy Including Principles and Requirements
• Guidelines on Implementers of Global Fund Grants
• Guidelines for Grant Budgeting

1. This document provides procedural guidance on the different process steps that constitute an integral part of the design and review of funding requests for the 2020-2022 allocation period.

2. Regardless of the applicable funding request and review approach, Country Teams should refer to the relevant section of the Operational Procedures below for guidance on the applicable process:

I. Notify the Applicant on Allocation and Application Approach

II. Develop and Submit the Funding Request

III. Review the Applicant's Eligibility and Funding Request

IV. Update the Prioritized Above Allocation Request

43 Unless specified in these Procedures, capitalized terms are defined in the OPN on Design and Review of Funding Requests.
3. **Process.** In advance of the 2020-2022 allocation period, the Global Fund Secretariat prepares and shares a customized allocation letter with eligible applicants. The allocation letter will cover important information as described below, and shall constitute a reference document for the development of the funding request.

<table>

**Develop and Submit Funding Request and Application Package**\(^{45}\)

---

\(^{44}\) Shared with the allocation letter.

\(^{45}\) Grant-making documents can be downloaded by the Country Teams as soon as the funding request documents are submitted to the Global Fund. This is meant to help the Principal Recipient advance in completing the grant-making documents and avoid delays in signing.
III. REVIEW THE APPLICANT’S ELIGIBILITY AND FUNDING REQUEST

5. **Process.** Funding requests submitted to the Global Fund are evaluated for technical merit and strategic focus by an independent group of experts, the TRP. The TRP assesses funding requests for strategic focus, technical soundness and potential for impact in accordance with the Global Fund strategy and guidance from the Board. To ensure the TRP has access to complete documentation prior to undertaking their review, and that applicants are compliant with the CCM eligibility requirements, where relevant, the Global Fund Secretariat undertakes a screening process prior to the TRP’s review.

</tr>
</thead>
</table>

**IV. UPDATE THE PRIORITIZED ABOVE ALLOCATION REQUEST (PAAR)**

6. As per the [OPN on Design and Review of Funding Requests](#), throughout grant implementation, the Secretariat may allow or request applicants to submit an updated PAAR.

7. The graph below shows an overview of the PAAR process:

---

46 Currently under revision. The procedures will be updated to reflect the revised GAC TORs, once approved, in line with efforts to strengthen impact in the next cycle of grants.
8. Updates to the PAAR can be triggered by any of the following instances:

   i. PAAR update due to TRP recommendations

   ii. PAAR update due to sources of funding becoming available:
       a. Portfolio optimization
       b. External financial contributions
       c. Foreign exchange savings

---

47 For more information, please refer to the Guidance on Portfolio Optimization (link forthcoming).

48 For more information, please refer to the Framework on Private Sector Engagement and Policy on Restricted Financial Contributions (PRFC).

49 For more information, please refer to the Guidelines for Grant Budgeting.
9. Updates to the PAAR<sup>50</sup> may consist of i) new activities that were not included in the initial PAAR request and consequently were not reviewed and approved by the TRP and added to the UQD register for the funding cycle or, ii) increases to the initial amount recommended for interventions/activities that are already on the UQD register.

### i. PAAR UPDATE DUE TO TRP RECOMMENDATIONS

<table>
<thead>
<tr>
<th>Key Outputs</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>TRP Review of Funding Request and PAAR</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1. TRP recommendation to shift activities from PAAR to be funded from allocation and/or deprioritize activities from allocation and move them to the PAAR</td>
<td>During a TRP review window</td>
<td>Recommendation by:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• TRP Review Group</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Approved by:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Assigned member of TRP Leadership</td>
</tr>
<tr>
<td><strong>Revise the PAAR</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2. PAAR revised to address TRP recommendation</td>
<td>After TRP Leadership approval and during the grant-making process</td>
<td>• A2F, Applicant Support Team revises the PAAR request as per the TRP recommendation and in consultation with the Country Team&lt;sup&gt;51&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

<sup>50</sup> ‘PAAR Updates’ should not be confused with ‘PAAR Iterations’, i.e. PAARs that were not recommended by the TRP and where the applicant needs to submit a new revised PAAR for TRP review and recommendation for the activities to be approved and placed on the UQD.

<sup>51</sup> The Country Team addresses with the applicant the revisions emanating from the TRP recommendations that concern the budget during the grant-making process.
### ii. PAAR UPDATE DUE TO SOURCES OF FUNDING BECOMING AVAILABLE

<table>

**Notify the Applicant**

| 5. Applicant notified of the outcome of the TRP Review of the PAAR Update | On average, 5 working days from the receipt of the TRP Leadership sign-off | • Country Team |

---

56 Where possible, the same Review Group that undertook the review of the initial Funding Request and PAAR submission will be called upon to review the PAAR Update request.

57 For guidance on processing additional funding revisions associated with funding the UQD, please refer to the **OPN on Grant Revisions**.
MONITORING AND REPORTING

10. The design and review of funding request processes will be monitored by the Access to Funding Department.

11. The following data points will be monitored:

   a. Number of funding requests registered, submitted, reviewed, recommended for grant-making by review window and cumulatively;

   b. Application approaches used;

   c. Number of funding requests iterated;

   d. Amounts recommended for funding by the TRP from the allocation;

   e. Amounts requested and recommended by the TRP for catalytic matching funds and multicountry requests;

   f. Amounts requested for above allocation, and interventions and amounts recommended as UQD;

   g. Number of days from the submission of the funding request to notifying the applicant of the outcome (broken down as follows: number of days from submission to TRP review meeting, TRP review meeting to finalization of form, finalization of form to notifying the applicant);

   h. Number and types of issues raised by the TRP during their review;

   i. Number of PAARs updated;

   j. Triggers for the PAAR Updates;

   k. Updated UQD Register and financing of UQD; and

   l. TRP observations and lessons learned from the different review windows.
Key Performance Indicators for Grant-Making

PRs and Country Teams are expected to meet the following grant-making key performance indicators:

- Grants are submitted to GAC within six months from the relative Funding Request submission to the TRP; and
- The Grant Confirmation is signed at least one month before the (new) IP start date.

OVERALL OBJECTIVE

35. Grant-making is the process of translating the funding request, including recommendations from the Technical Review Panel (TRP) and the Grant Approvals Committee (GAC), as relevant, into quality grants that are (1) disbursement-ready for GAC recommendation and Board approval, and (2) implementation-ready at Implementation Period (IP) start date.

<table>
<thead>

</tr>
</tbody>
</table>

\(^{58}\) Unless defined in this Operational Policy Note or the context otherwise requires, all capitalized terms used in this Operational Policy Note shall have the same meaning set out in the Global Fund Grant Regulations (2014).

\(^{59}\) A quality grant is defined as a grant positioned to effectively deliver its strategic objectives and achieve the targeted impact as reviewed by the Technical Review Panel (TRP) and as approved by the Global Fund Board.

\(^{60}\) As defined in Annex 1.

\(^{61}\) Throughout this OPN, references to CCM include any Regional Coordinating Mechanism (RCM), Regional Organization (RO) or other applicant, as applicable.

\(^{62}\) Excluding preparatory activities required to be undertaken prior to Implementation Period start date.
i. early identification and contracting of PR human resources;  
ii. early identification and contracting of Sub-recipients;  
iii. early identification and contracting of Suppliers of health products and critical services; and  
iv. an agreed implementation work plan for year one of the Implementation Period.

36. Disbursement readiness and implementation readiness facilitate (i) timely implementation of Program activities from start date of the Implementation Period; (ii) continuity of programs across Implementation Periods, and (iii) high absorption of funds in the first year of implementation.

The grant-making diagram below identifies key steps of this process with associated timelines:

---

**OPERATIONAL POLICY**

37. This Operational Policy Note (OPN) applies to grants financed under the 2020-2022 allocation period and thereafter. The OPN on Access to Funding, Grant Making and Approval issued on 4 December 2017 applies to grants financed prior to the 2020-2022 allocation period.

38. This OPN defines the differentiated rules and requirements for the grant-making stage for country and multi-country grants (any multi-country specific rules and requirements are listed in a dedicated section).

---

63 Such as warehousing or distribution services that need to be in place without a break in contract. Where required, CTs ensure the early identification and contracting of fiscal or fiduciary agents.  
64 The Global Fund does not have a prescribed template for the implementation work plan.
A. PLAN

39. Robust planning and preparation, incorporating lessons learned, are crucial to ensure timely grant-making.

Accelerate Grant-making

40. The Global Fund expects the CT, CCM, PR and Local Fund Agent (LFA) to exploit all available opportunities to accelerate the grant-making process by the most efficient means possible. A key element in accelerating grant-making and producing quality grants is a strong collaboration between the CCM and PR to develop detailed grant documents as early as possible during the funding request stage prior to submission to the TRP. Key documents to be developed at this stage are:

i. Performance Framework;
ii. Detailed and Summary Budget;
iii. Health Product Management Template (HPMT); and
iv. Implementation Arrangement Map.

41. Early work on grant-making will reduce the overall time from funding request to grant signing, and allow the PR and the CT additional time to ensure implementation readiness before the Implementation Period start date.

42. Early work on grant-making is considered for all portfolios with specific grants strongly recommended by the Global Fund Secretariat to follow this approach. These grants (“accelerated grant-making cohort”) have demonstrated good programmatic and financial performance, with continuing PRs and no foreseen material programmatic changes for the new allocation period.

43. The defined cohort of grants will be subject to streamlined document requirements for GAC recommendation (see Annex 1 of this OPN) and, in most cases, will not receive TRP clarifications to be addressed during grant-making.

---

65 Demonstrated good grant performance (A1, A2, B1) during the 2017-2019 allocation period based on the most recent grant rating.
66 Good absorption scores and expenditure rates based on criteria used for Key Performance Indicator (KPI) reporting and the Qualitative Adjustment process.
67 As defined in the OPN on Grant Revisions, and confirmed by the Country Team with the Technical Advisors.
Agree on Deliverables and Timelines

44. It is strongly recommended that the Global Fund CT, CCM, PR and LFA plan early for the grant-making deliverables, key milestones (e.g., GAC recommendation) and timelines as part of the planning for the funding request. The grant-making project plan will also cover the time required to undertake preparation activities to ensure implementation readiness.

45. The grant-making project plan is to be agreed as early as possible and no later than the date of receipt of the TRP recommendations, to guide the grant-making process and ensure that the translation of the funding request into a disbursement-ready and implementation-ready grant occurs in a timely manner.

46. Annex 1 to this OPN provides an overview of the differentiated grant-making deliverables based on portfolio categorization and other considerations (e.g., multicountry grants, challenging operating environments, payment for results). The CT will apply differentiated requirements accordingly.

47. As part of the planning, the engagement and inputs from relevant in-country stakeholders, the Global Fund Secretariat teams and LFA must be defined. LFA services are tailored according to the assurance needs of the CT using relevant LFA tools and guidelines.

48. The grant-making diagram within this document provides the standard timeline for completion of each grant-making phase. CTs and PRs use these timelines in their planning and negotiation. For all grants, signing of the Grant Confirmation by all parties occurs at least one month before the new Implementation Period start date, but ideally two months in advance, to allow critical time for PRs to undertake preparatory measures to ensure implementation readiness.

Confirm Resourcing

49. For continuing grants, the CT and PR will determine if additional PR human resources are needed to support grant-making, noting that implementation of the existing grant and Implementation Period reconciliation activities will overlap. Should the PR require additional human resources to support grant-making, funds from the existing grants may be used subject to Global Fund approval and processed through a grant revision (see OPN on Grant Revisions). For new PRs or existing PRs implementing a grant in a different disease component, the CT and PR will determine if resources are required for PR capacity building and start-up activities and apply for advance payment accordingly. (See section on Apply for Advance Payment of this OPN).

Complete Capacity Assessment (if applicable)

50. A capacity assessment is required for:
   i. all new PRs who have not previously implemented a grant for the disease component; and
   ii. existing PRs who will be implementing new activities for which their capacity has not been previously assessed (e.g. a PR previously implemented LLIN campaigns and will now also implement case management activities).

51. Outside of the two mandatory situations described above, a Country Team may also conduct a capacity assessment for an existing PR if necessary to manage risks. The OPN on Risk Management provides the process for determining if a capacity assessment is required for a nominated PR.

52. Capacity Assessments are initiated immediately after the funding request is submitted to the TRP and completed prior to the receipt of TRP recommendations. Based on the capacity assessment and the recommendation of the Country Team, the Regional
Manager/Department Head, will decide to accept or reject the nominated PR prior to proceeding to grant-making. In the event that a nominated PR is rejected, a request for the nomination of an alternative PR will be made to the relevant CCM and another capacity assessment will be conducted as required.

53. While the assessment of Sub-recipient (SR) capacities is a PR responsibility, the Global Fund reserves the right to undertake such capacity assessment in unique circumstances. (see OPN on Additional Safeguards Policy)

**Complete Grant Entity Data**

54. Grant Entity Data (formerly Master Data) includes data and information required to process grant documentation and disbursements. The successful execution of a grant is underpinned by the timely input of up-to-date Grant Entity Data for each PR, LFA, CCM, and third-party organization into the dedicated Global Fund Partner Portal. See Master Data Guidance Notes.

55. During grant-making, the following information will be provided to and validated by the Global Fund:

   i. **PR, CCM, LFA and/or Third-Party information;** containing critical entity information, including name, type and address of the organization and contact details.

   ii. **PR and/or Third-Party Banking Information;** containing the bank account details, including name, address, account holder name and routing requirements.

   iii. **PR, CCM, and LFA Signatory Information;** containing authorized Signatories for legally-binding agreements and disbursement requests and/or representative for notices (including name and job title), together with a certified specimen signature.

56. **Due diligence screening.** As part of the Grant Entity Data process, the Global Fund conducts a due diligence screening of key grant stakeholders against (a) international terrorism, and (b) sanctions lists. Signature of the Grant Confirmation cannot proceed until due diligence clearance is received from the Global Fund.

**B. NEGOTIATE**

57. During the negotiate phase all grant documents required prior to GAC review are completed and TRP clarifications due at grant-making are addressed, resulting in a finalized disbursement-ready grant for submission to GAC.

---

68 For High Impact Departments.
69 To be replaced by OPN on Grant Entity Data (forthcoming)
70 Certified Specimen Signature is provided on a template letter which is shared by the Country Team.
Request GAC Steer or Decision (if applicable)

58. As indicated in the *OPN on Design and Review Funding Request*, CTs, GAC or partners\(^71\) may request a GAC review\(^72\) at any time before or after the TRP review based on certain pre-identified triggers, including but not limited to risk, need for strategic or operational steer, size of investment or strategic priorities. For some portfolios, a GAC discussion may be needed to:

i. Provide strategic steer for critical management concerns for and during grant-making;

ii. Award funding additional to the allocations, such as matching funds from catalytic investments based on TRP recommendations; including taking investment decisions in line with priorities for portfolio optimization, private sector contributions and financing items on the unfunded quality demand (UQD) register; and

iii. Revise or determine the upper ceiling for grant-making, as applicable, including recommending adjustments due to non-realization of government commitments in the previous allocation period.

59. GAC steer following a TRP review does not prevent the start of grant-making unless the nature of the steer needed from GAC is integral to commencing negotiations.

Finalize Grant Documents

60. The development of grant documents starts during the funding request stage and continues into grant-making. The final grant documents are developed and reviewed by the PR, CT and LFA in an iterative manner to arrive to final grant documents that are:

i. accurate and clear to ensure quality and timely implementation, monitoring and reporting for the next Implementation Period;

ii. streamlined\(^73\), in that they respond to the need for detail without becoming overly complex and difficult to report against;

---

\(^{71}\) Technical and donor partners that participate in the GAC.

\(^{72}\) Refer to the GAC Terms of Reference.

\(^{73}\) CTs and PRs are expected to use flexibilities available to simplify grant documents such as budget and performance frameworks for focused portfolios.
iii. aligned with the funding request that has been reviewed and recommended by the TRP (including required clarifications);

iv. aligned and consistent with one another (especially the key documents being the Performance Framework, Detailed and Summary Budget, Health Product Management Template and Grant Confirmation); and

v. compliant with relevant Global Fund policies, guidelines and templates as applicable.

61. **Reinvesting efficiencies identified during grant-making.** During the grant-making stage, CTs will work with PRs and LFAs, as applicable, to ensure resources are invested to maximize impact and achieve efficiency. Based on interventions recommended by the TRP for the UQD register, the PR will define specific activities and capture them in the Detailed Budget (see *Instruction for Completing the Detailed Budget Template*). Any efficiencies identified during grant-making can be reinvested to fund these UQD activities or in line with TRP recommendations. The reinvestment of foreign exchange savings during grant-making is subject to the *Guidelines on Grant Budgeting*. The inclusion of new activities that constitutes a material programmatic change to the TRP-recommended funding request will require re-submission for TRP review.

62. Under the Sustainability, Transition & Co-Financing (STC) policy, all countries are strongly encouraged to strengthen attention to sustainability in their national planning, programs and grant design. During grant-making, all CTs are required consider the major challenges and risk to sustainability and work with PRs to incorporate mitigating actions in grant design, such as grant requirements, management actions, and co-financing commitments, and or relevant technical assistance. Specifically, for all Upper Middle-Income Countries (UMIC) and Lower Middle-Income Countries (LMIC) with “Not High” disease burden, CTs will work with PRs to address sustainability and transition considerations and consider investing efficiencies identified during grant-making in activities designed to strengthen transition preparedness. For more information on the Global Fund’s overall approach to STC, see *Sustainability, Transition and Co-Financing Guidance Note*.

**Address TRP Clarifications**

63. The CCM, PR and CT will collaborate to ensure that time-bound TRP clarifications, required to be addressed during grant-making, are completed and reflected in the final grant documents. The CT will report on status of completion (i.e., met, in progress, delayed, not started) to the GAC. Outstanding (i.e., all unmet) TRP clarifications (including clarifications to be addressed during implementation) are captured in the Integrated Risk Management Module and followed-up during grant implementation.

**Agree on Co-financing Commitments**

64. To achieve lasting impact, increased domestic financing of health and the three diseases is essential to meeting targets and goals included in national strategies. Global Fund co-financing requirements encourage progressive increases in overall health spending and gradual domestic uptake of key program costs, including those financed by the Global Fund. Specific co-financing commitments that help address strategic sustainability and/or transition challenges will be agreed between the Global Fund and the Grantee during grant-making. See *OPN on Co-Financing* for more details on these requirements.

**Identify Residual Risks and Mitigating Actions**

---

74 As defined in the *OPN on Grant Revisions* to be determined by the CT and Technical Advisors.
The initial risk assessment performed during the funding request stage is further developed during grant-making, based on a completed capacity assessment and known risks and gaps (as applicable), and review of grant documents. Risks and capacity gaps that are required to be addressed as part of the design of the grant and implementation arrangements must be reflected in the finalization of grant documents.

Key residual risks, capacity gaps and mitigating actions are required to be reported to the GAC. Depending on criticality, the Country Team will decide if mitigating actions will be captured (i) as legally-binding grant requirements in the Grant Confirmation to address a critical risk or issue related to program implementation, or (ii) as management actions to be communicated in a Notification Letter upon completion of grant-making, and monitored during implementation for other non-critical risks/issues.

**Update UQD Register**

The UQD Register must be updated by the CT to add activities arising from the prioritized above allocation request (PAAR), or remove activities that are funded using efficiencies, catalytic investments or portfolio optimization. This information will be updated as necessary throughout the grant-lifecycle.

**Agree on Audit Arrangements**

During grant-making and prior to signing the Grant Confirmation, the CT and PR agree on audit arrangements such as the type and scope of audit, overall approach to selection and approval of the auditor. The auditor should be selected within three months from grant signing. (see [Guidelines for Annual Audit of Global Fund Grants](#))

**Ensure Implementation Readiness**

In addition to approval and signature of a disbursement-ready grant, the four principal criteria of implementation readiness are as follows:

i. **early identification and contracting of PR human resources.** The PR will define the staffing structure and identify /select PR staff with approved Terms of Reference (ToRs) and contracts. PR staff contracts can be signed immediately after Global Fund Board approval of the grant (subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014))75. For PRs continuing to the next Implementation Period, this would entail updating already existing ToRs and extending contracts of well-performing staff76 into the next Implementation Period. The Global Fund does not require a competitive re-selection of well-performing staff for each Implementation Period, provided the re-selection of staff is in compliance with the Global Fund Grant Regulations (2014) and other applicable laws and regulations.

ii. **early identification and contracting of SRs.** Based on the defined implementation arrangements, the PR will select the SRs with approved ToRs and contracts. Contracts can be signed immediately after the Global Fund Board approves the grant, subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014)77. The Global Fund does not require competitive re-selection of existing SR(s) if they have demonstrated good performance and there is no change in the programmatic areas of work in the new Implementation Period, and providing the re-selection of the SR is in compliance

---

75 As incorporated into the Framework Agreement with the Grantee.
76 As determined by the Principal Recipient.
77 As incorporated into the Framework Agreement with the Grantee.
with the Global Fund Grant Regulations (2014) and other applicable laws and regulations.

iii. **early identification and contracting of Suppliers for health products and critical services**. For grants requiring procurement of health products and critical services for the first year of implementation, the PR will initiate the procurement process immediately after TRP recommendation of the grant. Early procurement of health products requires approval by the Global Fund (see *Annex 2 on Advance Payment Mechanism*) and procurement may be done through the (i) Pooled Procurement Mechanism (see *OPN on Pooled Procurement Mechanism*), or (ii) the PR's own procurement process, if the PR cannot register with PPM.

For PRs using PPM, it is expected that the PPM purchase requisition has been completed by the PR and approved by the Global Fund by the Implementation Period start date.

For PRs procuring through their own processes, it is expected that Suppliers are selected with approved ToRs and contracts. Contracts can be signed immediately after the Global Fund Board approves the grant, subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014).

iv. **agreed implementation work plan for year one of the Implementation Period.** The CT and PR will agree on an implementation work plan, including fully defined implementation arrangements for the first year of implementation which details the planned activities, timelines and assigned responsibilities to deliver the agreed targets in the Performance Framework and in line with the Detailed Budget.

70. **The CT’s role in achieving implementation readiness.** PRs are primarily responsible for achieving implementation readiness at the Implementation Period start date. CTs have a crucial role in assisting PRs to achieve this objective and are expected to use the Implementation Readiness Checklist to help better understand bottlenecks to implementation readiness for PRs and carry out a final assessment prior to the Implementation Period start date. The CT will work with the PR to identify support mechanisms, as appropriate, depending on the PR type and its circumstances. (see *Annex 2 on Advance Payment Mechanism*).

**Apply for Advance Payment (if applicable)**

71. To support PRs in completing grant-making with minimal delay, certain expenditures may be financed prior to the signing of the Grant Confirmation, subject to the conditions detailed in *Annex 2 on Advance Payment Mechanism*. Advance payments are limited to two types of activities with unique eligibility requirements: (1) capacity building and start-up activities, and (2) health product procurement. If these advance payments are not available (because the eligibility requirements are not fulfilled), certain exceptionally-approved, limited activities may be financed by the PR (see *Annex 2 for more detail*).

---

78 Such as fiscal/fiduciary agents, and in cases where warehousing or distribution services that need to be in place without a break in contract.
79 As incorporated into the Framework Agreement with the Grantee
C. APPROVE

GAC Recommendation

72. The CT summarizes the outcomes of grant-making into the Grant-Making Final Review Form. On behalf of the CT, the Fund Portfolio Manager certifies that the final grant is disbursement-ready (as defined in the Overall Objectives section of this OPN) and confirms that all CT members, Risk Specialist\(^8\) and other relevant teams have reviewed and endorsed the grant documents based on their areas of responsibilities. Areas of disagreement among CT members and other teams will be resolved per the escalation procedure defined in the Country Team Approach. Any unresolved critical issues that impact the disbursement readiness of the grant are captured in the Grant-Making Final Review Form.

73. Prior to submission to GAC, the Regional Manager or Department Head\(^1\) reviews the outcomes of grant-making and confirms the disbursement-readiness of the grant. The Regional Finance Manager provides confirmation of the grant financial information and a pre-approval of the first annual funding decision for the grant provided this is processed within 30 days of signature of the Grant Confirmation.

74. The GAC will make the final determination of disbursement readiness in line with its Terms of Reference, which includes the responsibility to review grant targets as they relate to the Global Fund Strategy targets and the relevant co-financing commitments.

75. Based on its review, the GAC may (a) recommend the grant, if deemed disbursement-ready, for the Global Fund Board’s approval; (b) refer the proposed grant back to the CT for revision or adjustments in response to GAC comments and critical issues observed; or (c) refer the proposed grant back to the TRP if there are material programmatic changes to the TRP-recommended funding request as a result of grant-making. The GAC may also recommend further actions for follow-up during grant implementation.

\(^8\) Risk Specialist reviews only for core and high impact portfolios.
\(^1\) For High Impact Departments
\(^2\) Based on material programmatic changes defined in the OPN on Grant Revisions to be determined by CT and Technical Advisors.
Global Fund Board Approval

76. Board approval of disbursement-ready grants is requested via an electronic report in which the Global Fund Secretariat will present the scope of interventions and investments agreed by the Global Fund Secretariat for the grant. The Board approves the grants on a no-objection basis over a 10-working-day voting period.

77. For each grant, the Board approves funding for each country disease component, and its constituent grants.

Plan for Implementation Reconciliation or Grant Closure

78. In parallel with grant-making and approximately six months before the end-date of the current Implementation Period, the CT and the PR are required to also initiate the reconciliation of Implementation Period or closure process for expiring grants. See OPN on Implementation Period Reconciliation and Grant Closure

D. SIGN

Sign Grant Confirmation

79. The signed Grant Confirmation is the legal instrument that, together with the Framework Agreement (where applicable), forms the basis of the contractual obligations between the Global Fund and the PR.

80. Following Board approval, a Grant Confirmation is signed for each grant. The Grant Confirmation is signed as soon as possible after Board approval and no later than 1 month before the IP start date. The document is signed by the PR (or Grantee) followed by acknowledgement of the CCM Chair or Vice-Chair and the Civil Society Representative. Once the signature and acknowledgements are received, the Global Fund will sign. Global Fund signature follows the Delegations of Signature Authority (as amended from time to time).

83 Ideally, the Grant Confirmation is signed two months before the IP start date.
E. GET READY

81. Following signature of the Grant Confirmation, the PR and CT will continue to collaborate to ensure implementation readiness of the grant and process the first annual funding decision.

Confirm Implementation Readiness

82. Prior to Implementation Period start date, the CT will assess the overall status of implementation readiness of each grant. In the event that implementation readiness is not achieved, the CT and the PR will define time-bound mitigating actions for each grant to address the outstanding issues.

Process First Annual Funding Decision and Disbursement

83. Processing of the first annual funding decision and disbursement is completed after the Grant Confirmation is signed, taking into account the pre-approval by the Regional Finance Manager (prior to submission to GAC) for AFD processed within 30 days from Grant Confirmation signature (see the OPN Annual Funding Decisions and Disbursements).

84. The first disbursement release is based on cash requirements in line with the approved budget.

SPECIFIC MULTICOUNTRY CONSIDERATIONS

85. Multicountry grants refer to (i) grants financed through combined country allocations (e.g. Multicountry Western Pacific and Multicountry Caribbean), and (ii) regional grants financed through the Catalytic Investments – Multicountry Modality. Multicountry grants generally follow the grant-making approach and requirements defined above with the following specific considerations.
86. For multicountry grants, reference to CCM includes engagement of the Regional Organization (if applicable), Regional Coordinating Mechanism (RCM) and CCM representatives of all countries included within the grant.

87. During planning, relevant stakeholder engagement will include all countries that form part of the grant application and also PRs of existing Global Fund grants in the countries. The tailoring of LFA services will take into account the legal and political considerations and logistics of cross-border implementation.

88. The capacity assessment for multicountry grants will assess, among others, (1) the legal capacity of the PR (and subsequently, any SR) to operate in all jurisdictions covered by the grant, and (2) the PR’s and any SR’s ability to effectively manage a grant across multiple jurisdictions.

89. For multicountry grants financed under the Multicountry Catalytic Investments, the updated Programmatic Table, the updated Funding Landscape Table and Monitoring and Evaluation (M&E) plan are not required as part of grant-making.

90. Required co-financing commitments for multicountry grants are defined in the *OPN on Co-Financing*.

**Notes:**

1. For **focused portfolios**: (i) the Performance Frameworks is recommended to have limited number of indicators (e.g., 1-5 impact/outcome and 3-5 coverage indicators, approximately 6-8 in total) covering only the key program area/modules supported by the grant. (see Guidelines on Developing and Reviewing Performance Frameworks - forthcoming), and (ii) the Summary and Detailed Budget will use broad categories by intervention and cost-groupings unless instructed otherwise by the Country Team (see Guidelines on Grant Budgeting).

2. For **multicountry grants financed under the Catalytic Investments - Multicountry modality**, the Updated Programmatic Table, the Updated Funding Landscape Table and M&E plan are not required.

3. The **PfR modality** includes Results-based Financing (RBF) grants, Activity-based Contracts, Incentive Payments (see Guidelines on Grant Budgeting). (i) For RBF grants, the Performance Framework is recommended to have limited indicators (e.g., 1-5 indicators and/or workplan tracking measures); (ii) For all grants with a PfR element, the Summary and Detailed Budget must be in accordance with the Guidelines on Grant Budgeting (if applicable); (iii) For all grants with a PfR element, the payment scheme for the PfR element is developed as part of the program design and is expected to be submitted with the Summary and Detailed Budget; (iv) For RBF grants, the HPM Template is not required. For guidance on how to integrate PfR into the grant lifecycle, please refer to Best Practice Guidance on Payment for Results (forthcoming).

4. For **challenging operating environments**, the CT may request to have a Summary and Detailed Budget and HPM Template (if required) for 18 months with the budget for the remainder of the Implementation Period being displayed as a lump sum to be detailed further by month 15 of implementation. The Summary and Detailed Budget can be adjusted through an Implementation Letter (IL). Please refer to the OPN on Challenging Operating Environment on the process for requesting this flexibility.

5. Quality assurance of the Performance Frameworks: all Performance Frameworks must undergo an in-depth review at Grant-making using Performance Framework Quality Assurance approach and checklist.

6. These are internal Global Fund Secretariat documents.

---

² For continuing PRs, if the M&E plan is not updated by grant signing, the CT ensures that the PR updates the plan within an agreed timeframe for submission before the end of the first year of the implementation period. For new PRs, if the M&E plan is not finalized by grant signing, an approval exception must be requested.
Annex 2. ADVANCE PAYMENT MECHANISM

1. Advance payment refers to the approval and funding of specific activities prior to signature of the Grant Confirmation. Approved advance payment activities are funded either through:

   i. **advance by the PR or CCM.** The PR or CCM uses its own resources, which will be reimbursed from Grant Funds after the Grant Confirmation is signed; or
   
   ii. **advance by the Global Fund.** A transfer of funds by the Global Fund which will be deducted from Grant Funds after the Grant Confirmation is signed.

2. Advance payments are intended for use on an exceptional, last-resort basis only when the following criteria is met to the satisfaction of the relevant approval authority following review by the CT:

   i. the nominated PR meets the requirements for eligible Global Fund implementers and has been accepted by the Global Fund (based on capacity assessment, as applicable);
   
   ii. there is a high likelihood that the grant will be approved by the Global Fund Board, and the Grant Confirmation signed with the PR;

   iii. the request is for funding eligible activities (as described below);
   
   iv. if the advance payment request is rejected (a), in the case of eligible capacity-building and start-up activities, there is a high likelihood that there will be significant delays in completing grant-making and a risk of not achieving disbursement readiness and implementation readiness, and (b) in the case of eligible health product procurement, there is a risk of treatment disruption; and

   v. no other source of funding is available, including from partners, strategic initiatives or funding made available through grant revision\(^{86}\) of existing grants (in-country cash balances will be taken into consideration when assessing the availability of funding).

3. A PR may request advance payment after TRP recommendation to proceed to grant-making has been received, and is responsible for preparing and submitting the advance payment request and supporting documentation. No advance of funds by the Global Fund is permitted prior to approval of such request, nor will any expenditures incurred prior to such approval be reimbursed from Grant Funds.

4. Advance payments are limited to **two types of activities** with distinct eligibility requirements: (1) capacity building and start-up activities and (2) health product procurement:

<table>
<thead>
<tr>
<th>Category</th>
<th>Eligible PRs</th>
<th>Eligible Activities</th>
<th>Maximum Amount</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. PR Capacity Building and Start-Up Activities; to expedite grant-making to</td>

<td>US$ 500,000</td>
<td>Up to US$ 200,000, approval by: Regional Manager/Department Head, and Regional</td>
</tr>
</tbody>
</table>

\(^{86}\) This refers to allowable use of savings from existing grants to support (i) country dialogue during funding request and grant-making, if applicable (see [OPN on Design and Review of Funding Requests](#)) and (ii) additional staff resources to support grant-making for continuing PRs, if applicable (see Section on Confirm Resourcing).
facilitate program start with minimal delay

<table>
<thead>
<tr>

</tr>
<tr>
<td></td>
<td>Over US $1,000,000 approval by: Head of Grant Management Division and Chief Financial Officer, with notifications to GAC.</td>
</tr>
</tbody>
</table>

5. Following approval of the request for advance payment, the Global Fund will issue an agreement to the PR in accordance with the Global Fund Delegations of Signature Authority.

6. The PR is required to include the approved grant-making activities in the final grant budget. If advance payment utilizes the PR's own resources, the funds will be reimbursed from Grant Funds following grant signing. The relevant expenditures will be reimbursed to the PR as part of the first annual funding decision, see OPN on Annual Funding Decisions and Disbursements.

7. If the Global Fund determines that a grant agreement will not be signed with the PR, any funds advanced by the Global Fund will be deducted from the country's disease allocation.

8. If the above advance payment mechanisms are not available (e.g. because the PR does not qualify as an eligible PR and/or the activity to be covered is not an eligible activity) and the PR is able to finance specific activities from its own funds prior to grant signature, then the Global Fund can issue a PR Financing Agreement to confirm its willingness to reimburse the PR from grant funds, as part of the first annual funding decision, following signature of the grant. For use of this option, the following criteria must be met:

   i. The PR is an eligible Global Fund implementer;

---

87 PRs that will undertake advance procurement through the Pooled Procurement Mechanism (PPM) must follow the approval process defined in the OPN on Pooled Procurement Mechanism.
ii. Activities to be financed by the PR are limited and necessary to ensure continuity of a TRP-recommended program, and the CT is certain that the activities to be financed will be included in the final grant budget;

iii. The PR includes the activities in the final grant budget;

iv. There is a high likelihood of Board approval of the grant;

v. Approval by the Regional Manager/Department Head, Regional Finance Manager/PST Manager, and Deputy General Counsel, Grant Management; and

vi. The PR agrees that if the grant agreement is not signed, any funds advanced by the PR will not be reimbursed.
**Key Performance Indicators for Grant-Making**

PRs and Country Teams are expected to meet the following grant-making key performance indicators:

- Grants are submitted to GAC within six months from the relative Funding Request submission to the TRP; and
- The Grant Confirmation is signed at least one month before the (new) IP start date.

### PURPOSE

1. These Operational Procedures provide guidance on process steps during grant-making and applies to grants financed during the 2020-2022 allocation period and onwards.

2. Whereas the Operational Policy Note (OPN) on Make, Approve and Sign Grants includes a dedicated section for multicountry grants, the specific considerations for multicountry grants within this Operational Procedures are contained within each grant-making phase, as relevant.

3. The grant-making steps are outlined in the following graph with associated timelines:
PLAN

Planning for grant-making is required to take place concurrently to the planning for the funding request, as soon as a country receives the allocation letter from the Global Fund.

During this phase, the Global Fund Secretariat, including the Country Team (CT), the Country Coordinating Mechanism\(^88\) (CCM), the Principal Recipient (PR), and the Local Fund Agent (LFA) collaborate in the following areas:

<table>
<thead>
<tr>
<th><strong>Step</strong></th>
<th><strong>Responsible Parties</strong></th>

</tr>
</tbody>
</table>

*Resources: \*OPN on Risk Management across the Grant Lifecycle

*For multicountry grants, the capacity assessment will assess, among others, (i) the legal capacity of the PR (and subsequently, any Sub-recipient) to operate in all jurisdictions covered by the grant, and (ii) the PR’s and any SR’s ability to effectively manage a grant across multiple jurisdictions.*

*Review by:*  
- Finance Specialist reviews the LFA findings and recommendations on financial management and recommends to the FPM on PR capacity in this area. For focused portfolios, the PST Specialist reviews the capacity assessment only if the LFA raises major financial management issues (FPM informs PST if this is the case).  
- HPM Specialist reviews the LFA findings and recommendations on HPM management and recommends to the FPM on PR capacity in this area.  
- Public Health Monitoring and Evaluation (PHME) Specialist reviews the LFA findings and recommendations on M&E and recommends to the FPM on the nominated PR capacity in this area.  
- FPM reviews the LFA findings and recommendations on governance, reviews the recommendations of CT Specialists in the other functional areas, and makes a final recommendation to the Regional Manager/Department Head\(^{92}\) whether to accept or reject the nominated PR.

*Approval by:* Regional Manager/Department Head\(^{92}\) decides to accept or reject nominated PR based on the above.

FPM captures the decision in the Integrated Risk Management Module and attach evidence of the above approval (e.g., email approval).

---

\(^{92}\) In this document, Department Head refers to the Department Head for relevant High Impact Department.

ANNEX 1:
MONITORING AND REPORTING

91. The grant-making processes will be monitored by the Grant Portfolio Solutions and Support Department.

92. The following data points will be monitored:

- Process completion status for each grant-making step as per the OPN.
- Grant-making timelines:
  - time between funding request submission and TRP recommendations;
  - time between funding request submission and grant submission to GAC;
  - time between Global Fund signature of Grant Confirmation and Implementation Period start date;
  - time between Global Fund signature of Grant Confirmation and first Annual Funding Decision;
  - time between Purchase Order approval and the Implementation Period start date.
- Number and type of TRP clarifications required to be addressed during grant-making.
- First time right submission to GAC.
- Purchase Order initiation prior to GAC submission.
- Implementation readiness status prior to Implementation Period start date.

---

The current proxy for identifying potentially implementation-ready grants is measuring the time between Global Fund signature of Grant Confirmation and Implementation Period start date.
Challenging Operating Environments

**Issued on:** 16 January 2017  
**Issued by:** Grant Management Division  
**Approved by:** Executive Grant Management Committee

### OVERALL OBJECTIVES

1. In April 2016, the Global Fund Board approved the Policy on Challenging Operating Environments (COEs) to provide overall guidance on future Global Fund engagement in such contexts, based on the principles of flexibility, partnerships and innovation. COEs are critical to the Global Fund mission as they account for a third of the global disease burden and a third of Global Fund investments. However, COE portfolios often face heightened programmatic and implementation challenges. A differentiated approach is hence needed to increase the impact of Global Fund investments in COEs.

2. The objective of this Operational Policy Note (OPN) is to provide operational guidance including flexibilities for Country Teams to manage COE portfolios in an agile and timely manner, within the principles defined in the approved COE policy.

3. Flexibilities are not limited to those described in this OPN. Additional flexibilities to the Board or Secretariat policies may be granted through EGMC normal approval channels to ensure an adequate response in these environments, in accordance with Global Fund policies and processes.

4. Categorization as a COE does not automatically guarantee eligibility for a flexibility. Country Teams need to obtain EGMC approval for the package of portfolio management flexibilities proposed for each COE portfolio through a memo. COE portfolios that are categorized as “High Impact” under the Global Fund differentiation framework will be generally managed following the standard approach for High Impact portfolios as defined in relevant OPNs.

5. This OPN will continue to be updated based on lessons learned and best practices.

### PRINCIPLES AND POLICIES

**Principles**

6. The approach for managing COE portfolios is guided by the following principles defined in the COE policy with the aim to maximize access to essential services and/or coverage:

   - **Flexibility.** The grant management approach will be tailored to each COE context, with the types of flexibilities differing based on each situation. Flexibilities should increase impact through enhanced grant design, implementation, management and assurance. They should allow for greater responsiveness and timeliness of Global Fund investments, reduce administrative burden for implementing partners and Country Teams, and facilitate more effective service delivery to populations in need.

---

*GF/B35/DP09*
• **Partnerships.** The Global Fund will optimize the types of partners in COEs to address implementation weaknesses and strengthen grant performance. Given that the Global Fund does not have in-country presence, operational collaboration with development, humanitarian, private sector and non-traditional partners are essential for impact especially in COEs.

• **Innovations.** New approaches will be encouraged throughout the grant cycle in order to maximize results in COEs.

### COE Classification

7. **COEs** refer to countries or unstable parts of countries or regions, characterized by weak governance, poor access to health services, limited capacity and fragility due to man-made or natural crises. COEs may be experiencing either acute or chronic instability which will be considered in tailoring the country approach (see Annex 1).

8. The Global Fund classifies COEs based on an external risk index (ERI). The ERI is a composite index that is derived by compiling data from 10 authoritative indices and is updated annually by the Risk Department.

9. The ERI categorization drives the classification of a portfolio under COEs. The list is based on the countries under the “very high risk” category of the ERI. Depending on emerging needs, ad-hoc adjustments can be made to the COE portfolios list, in line with the ERI updates and other contextual factors during the allocation period. For instance, countries facing an emergency situation can also be classified as a COE. An emergency is defined as an event or a series of events which has resulted in a critical threat to the health, safety, security or well-being of a large group of people. It can be the result of an armed conflict and coup-d’état, natural disasters, epidemics or famine, and often involves population displacement. Moreover, countries recovering from acute emergencies but continuing to face critical threats may, on a case-by-case basis, continue to be classified by the Secretariat as a COE.

10. The list of country portfolio classified as COE is determined for every allocation period and reviewed annually with the possibility to add countries based on updates to the ERI and emergency status by the Executive Grant Management Committee (EGMC). Once a country is categorized as COE, it will remain in the list for the corresponding allocation period.

11. The Operational Policy Hub in the Grant Management Division, working closely with the Risk Department and the Policy Hub, is responsible for defining the list of countries classified as COEs. Potential additions to the COE list can be triggered by the Country Team, the Operational Policy Hub or the Risk Department.

---

105 The 10 indices used to establish the ERI are: The Fragile States Index (Fund for Peace); INFORM Index (Inter-Agency Standing Committee Task Team for Preparedness and Resilience); Global Peace Index (Institute for Economics and Peace); UN’s Safety & Security Index; Ease of Doing Business Index (World Bank); and five of the six World Bank Governance Indices (Voice and Accountability Index, Government Effectiveness Index, Regulatory Quality Index, Rule of Law Index; and Control of Corruption Index).

106 Annex 2 will be revised based on updates to the COE list.
PORTFOLIO ANALYSIS AND OPERATIONAL STRATEGY

Overall Management Approach

13. Given governance and capacity challenges in COEs, the overall engagement approach for a particular country will be determined by the Country Team, who will define an operational strategy for the portfolio that shall be tailored to achieving impact within the context and needs of the COE based on an analysis of the portfolio. The portfolio analysis and operational strategy will be reviewed by a Secretariat advisory committee\(^7\) and approved by EGMC, prior to its application.

14. Each Country Team managing a COE portfolio shall undertake a portfolio analysis to define a strategic approach for the portfolio management. The portfolio analysis and operational strategy will cover, to the extent possible, the following:
   - Country and epidemiological context;
   - Lessons learned from past implementation;
   - Portfolio risks and challenges;
   - Potential areas for Global Fund investment for the next allocation period (what is the impact that the country needs to achieve in a COE and how can the investment be best focused to achieve that?);
   - Potential activities that may not be achieved given the country context;
   - Proposed implementation arrangements;
   - Proposed policy flexibilities for the portfolio.

15. Ideally, the Country Team should prepare the portfolio analysis and operational strategy before the initiation of the country dialogue and funding request development process, namely if the Country Team is planning to access flexibilities at the country dialogue and funding request stages. In case the Country Team is not able to finalize the portfolio analysis and operational strategy within this timeline, an extension of the timeline may be considered on a case-by-case basis.

16. The portfolio analysis and operational strategy can serve as the Global Fund engagement and investment approach in a COE during the next allocation period. Changes to the EGMC-approved operational strategy will require EGMC approval again, if the changes are deemed material. Materiality will be determined by the Country Team, in consultation with the advisory committee.

DIFFERENTIATED APPROACH THROUGH GRANT LIFECYCLE

17. This section captures differentiated approaches and flexibilities that may be applied for COE portfolios depending on the context. As indicated in the section above, a Secretariat advisory committee will review and advise on the tailored approach, before submitting to EGMC for final approval. Additional flexibilities may be accessed at any point in time through the normal EGMC approval channels. Examples of such flexibilities are summarized below:

\(^7\) The advisory committee membership and ToRs will be defined soon.
18. **Sources of Funding.** Global Fund financing for COEs is provided through country allocations. Under exceptional circumstances, funding may be provided to COEs through the Emergency Fund\(^\text{108}\).

19. **Eligibility for Allocation.** To be able to access an allocation, a country should be eligible to receive Global Fund financing as defined in the [Global Fund Eligibility Policy](#). Country components with existing grants that would otherwise be ineligible to receive an allocation and apply for funding under the Eligibility Policy due to either disease burden or income level, will be eligible to continue to receive an allocation as long as their country remains classified as a COE. The application of this flexibility to a particular COE should be requested by the relevant Country Team and approved by the EGMC, prior to the country allocation exercise which is undertaken every three (3) years.

20. **Use of the Allocation.** In situations of significant cross-border displacement, the funding allocated by the Global Fund to a host country can be used to cover services and access to medicines and health commodities for the populations seeking refuge in the host country, in addition to providing services for the host population. The funding allocation from the country of origin may also be used for services in the relevant country hosting displaced populations from the country of origin, including where the host country is not eligible for Global Fund financing, taking into account whether:
   - The host country lacks the capacity and resources to deliver the necessary services through their national health systems; and
   - The provision of services for populations remaining in the country of origin continue, wherever possible.

The use of a country’s allocation for supporting displaced populations in a host country is determined on a case-by-case basis by the EGMC.

21. **Country Dialogue.** The manner in which country dialogue is conducted may be differentiated in COEs, including how to engage relevant stakeholders appropriately given the context. The country should, however, ensure the principle of striving for partner and stakeholder engagement is achieved as optimally as possible within the prevailing context.

22. **CCM and Non-CCM Arrangements.** Country Coordinating Mechanisms (CCMs) are central to the Global Fund’s commitment to country ownership and participatory decision-making processes. Where possible, this multi-stakeholder partnership at the country level should be the main body to develop and submit grant proposals to the Global Fund based on priority needs and oversee the progress during implementation.

23. COE Countries that historically applied through CCMs that wish to continue doing so, may benefit from a lighter review of compliance with the CCM requirements provided they have a track record of compliance with these requirements, as demonstrated by previous Eligibility and Performance Assessment (EPA) results. As such, those CCMs may submit simplified supporting documentation to confirm compliance with CCM requirements. The CCM EPA conducted on an annual basis to determine the level of functionality of a CCM may also be tailored to the context to focus on self-assessment and light review (see [CCM Eligibility and Performance Assessment Guidelines](#)).

24. The Global Fund Framework document states that the Global Fund will consider proposals arising from partnerships in circumstances such as (i) where there is no legitimate

---

\(^{108}\) As noted in the COE Policy, the Emergency Fund is expected to be used for funding beyond COE country allocations to support activities that cannot be funded through the reprogramming of existing grants during emergency situations. In such circumstances, Country Teams will consider charging back to a grant funded by the country allocation to replenish the Emergency Fund.
government; (ii) where there is conflict, or natural disasters; (iii) countries that suppress or have not established partnership with civil society and non-government organizations.

25. In exceptional circumstances, alternative governance arrangements will be coordinated by the Global Fund, on a case-by-case basis, depending on the context of the COE and may include partner coordination mechanisms such as health clusters or use of one integrated regional grant management platform.

26. Application Channel. In accessing the allocation, COEs will be subject to any of the following application channels:

<table>
<thead>
<tr>
<th>Program Continuation</th>
<th>Components with no material change needed or with less than 2 years of implementation under an existing grant (High Impact country components may be considered on a case-by-case basis).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tailored Review</td>
<td>Components involving material changes, in line with the OPN on Grant Revisions</td>
</tr>
<tr>
<td>Full Review</td>
<td>Components in COEs categorized as High Impact</td>
</tr>
</tbody>
</table>

Each application channel follows a distinct process with its specific set of application materials. The Grant Approvals Committee (GAC) and the TRP decides on the application track for each of the disease component. For further details on these processes, please refer to the OPN on Access to Funding and Grant Making.

In its review of funding requests from COEs, the Technical Review Panel (TRP) will tailor their standard review criteria on a case-by-case basis, by applying considerations and flexibilities as appropriate to the specific COE context.

27. Funding Request and Program Designs
   a. Funding requests to use the allocation shall be based on the country’s National Strategic Plan or Health Recovery Plan, if available and updated, capturing the most current context and epidemiology of the COE.
   
   b. Global Fund investments in COEs aim to increase coverage of HIV, TB and malaria preventive and therapeutic services, to reach key and vulnerable populations, and maximize efficiency in existing country partnerships. Investments in COEs also aim to build resilience through stronger community and health systems; and to address gender-related and human rights barriers to services. During emergencies, the scope of Global Fund investments may be more limited, aiming to provide continuity of essential treatment and prevention services for people affected by the three diseases, as well as to help identify, prevent and contain outbreaks. During recovery, the scope of Global Fund investments may be more expansive and support countries rebuild health and community systems. For additional information on focusing and tailoring investments in COEs, please refer to the Guidance Notes on HIV, Tuberculosis, Malaria and Resilient and Sustainable Systems for Health (RSSH) in COEs (links forthcoming).
   
   c. Global Fund investments shall be tailored to the specific context, with flexibility to rapidly respond to the changing environments. As part of their funding request, COE portfolios, in countries facing crisis and emergencies, may indicate their emergency preparedness plans, if available, i.e., define the minimum or altered scope that will be implemented if circumstances deteriorate, including the triggers for shifting to an emergency plan. Where such plans do not exist, Country Teams will work with in-country stakeholders and partners in COE portfolios to identify potential suitable

---

109 This was the approach followed for the Middle East Regional Grant.
110 In line with the OPN on Grant Revisions – Link forthcoming.
options to implement the grants when situations escalate, namely in acute emergency and volatile settings.

d. Where there are weak capacities in program management, the program should be simplified to ensure operational feasibility. Country Teams may also explore innovative program designs and grant management approaches such as:

- Consolidating three disease components into one grant for synergy and operational efficiency, if the Principal Recipient has a relatively strong capacity to manage and coordinate activities across multiple components;
- Payment for results where data quality is sufficient and routine results monitoring and verification are possible;
- Direct payment from the Global Fund to identified service providers as part of a payment for results contractual framework;
- Participating in pooled funding with other donors if this ensures a more coordinated and synergistic response and reduces transaction costs, provided adequate measures are in place to ensure appropriate access and audit rights are maintained, including attribution and traceability of Global Fund funding.

28. Implementation Arrangements

a. In COE countries managed under the Additional Safeguard Policy (ASP), the Global Fund may directly appoint the Principal Recipient and/or Sub-Recipients and/or Service Providers which are best placed to implement the grant given the country circumstances. During implementation, Country Teams will continue to adjust implementation arrangements as necessary to address operational bottlenecks, including changing the Principal Recipient, or recommending the Principal Recipient to discontinue working with one or more Sub-Recipients, if their performance was deemed unsatisfactory. For COE countries that are managed under ASP, Country Teams may consider one of the organizations pre-qualified under the Emergency Fund following a competitive tender process.

b. To address weaknesses in project implementation capacities in COEs, service contract arrangements may be applied to support and build capacity of implementers in project, financial, procurement and supply chain management. This includes the flexibility for Country Teams to appoint a combination of fiscal, fiduciary or procurement agents for specific programs, as required. Such arrangements will not only ensure achievement of project objectives but also build the capacity of implementers.

29. Co-Financing Requirement. COEs may be exempt from meeting the co-financing requirement. Such an exception may be granted if the country experiences a protracted emergency, or in situations where a transitional government is in place, and where partners and/or the government shared with the Global Fund an official and substantiated communication confirming the country’s inability to meet the co-financing requirement. Exceptions to the co-financing requirement are approved by the Head of Grant Management Division.

30. Grant Documents

a. Performance Framework. The Performance Framework for COE portfolios may be tailored to the context and simplified (i.e., include a limited number of indicators, in line with the Performance Framework simplification guidelines for the Focused portfolios or work plan tracking measures). Indicators and targets should be realistic in acute emergencies with volatile and rapidly changing context, and more ambitious in chronic instability situations. Country Teams should work closely with their Public Health and Monitoring and Evaluation (PHME) Specialists, the Monitoring, Evaluation and Country Analysis (MECA) Team and selected implementers to
determine the indicators and targets to be included in the Performance Framework given the context.

b. **Monitoring and Evaluation (M&E) Plan.** In acute emergencies and unstable contexts, the M&E plan and any subsequent updates should focus on critical components such as: 1) the indicators, data collection methods and reporting; 2) the identified needs for strengthening capacity and Strategic Information, where possible as part of health systems strengthening; and 3) analysis of available data and possible surveys, studies and assessments to further generate data to improve situational awareness and programs.

c. **Budget.** In COEs, and as part of the differentiated approach provided for in the *Guidelines for Grant Budgeting* for low value grants (below US$ 15 million), implementers are authorized and strongly encouraged to budget and report using the broad categories by interventions and cost groupings.

In some instances, where the context is volatile and long-term planning is difficult, COE implementers shall be allowed to submit a budget, with quarterly details only for the first 18 months (i.e. 12 months execution period and 6 months of buffer period to allow for the processing of the first Annual Funding Decision) and annual budget for the remaining periods. The quarterly budgeting breakdown for the remaining period will be submitted with the PU/DR and finalized when processing the next Annual Funding Decision. An Implementation Letter (IL) will then be signed to detail the budget for the remaining periods upon agreement.

d. **List of Health Products, Quantities and Related Costs.** Where appropriate, COE implementers shall provide detailed information on the health products to be procured on a quarterly basis through the Global Fund financing for a period of 18 months only and annual estimate for the rest of the implementation period. The subsequent quarterly forecasting can be finalized through the annual updating of the procurement forecast. This is a good practice to ensure the forecast is adjusted to correspond to the changing situation and the most updated circumstances in-country.

**GRANT IMPLEMENTATION**

31. COEs will generally follow the defined grant implementation approach for the portfolio category that they fall under in the differentiation framework (focused, core and high impact). The Overview of Grant Implementation provides a summary of the grant implementation approach that is applicable for each portfolio category. Flexibilities outside of the defined grant implementation approach may be applied for COEs.

32. **Reporting**

a. A semi-annual progress report will be generally applicable only to COEs in Core and High Impact portfolios using the Global Fund Progress Update template. Recognizing capacity challenges in data collection and reporting in COEs, the due date of semi-annual reporting will be 60 days after reporting period, instead of the usual 45 days.

b. In emergency situations, the Country Team may decide to focus reporting on selected indicators that are relevant for tracking. This will be determined in consultation with the MECA Team. In such case, the remaining indicators will be deactivated for the relevant period, hence not affecting the grant rating. Such revisions will be documented through amending the Grant Agreement.
c. In case of pooled funding with other donors, reporting and annual funding decision timelines should align with the defined reporting and reviews for the program agreed among donors.

d. In compelling circumstances, the Global Fund may at its own discretion accept alternative, suitable and appropriate financial and programmatic reporting for the purposes of assessing progress where it is impossible for the implementer to submit the standard Global Fund reports. Such alternative reports may include available reports from another project, program or development partner with relevant information that the Global Fund can use to assess the progress of its programs.

33. **Monitoring and Evaluation**
   a. Monitoring and evaluation arrangements should be tailored to best enable impact. Programmatic assurance providers could be expanded outside of the traditional service providers especially when there is poor accessibility to certain areas. The Country Team should consider alternative service provider approaches when Local Fund Agents do not have access to certain service sites in some geographic regions. For example, the Country Team may plan for grant budgets to remunerate service providers for M&E verification and assurance work.
   
b. COEs shall follow the approach for program and data quality assurance as defined in the *OPN on Program and Data Quality*. The OPN allows for customization to the country context to best respond to the situation and the identified program and data quality risks in the country. For example, in acute situations, Country Teams may opt for spot checks whenever the access permits. Other possibilities may include triangulation of different data sources and real-time data from partners on the ground, where possible, to verify the program quality, instead of using LFA/service providers reviews in such settings.

34. **Procurement and Supply Chain Management**
   a. The Country Team should conduct a thorough assessment of the Principal Recipient’s procurement capacity. Principal Recipients deemed to have weak capacities in procurement may be registered to the Pooled Procurement Mechanism (PPM), or use a recognized procurement agent.
   
b. In areas of difficult access or where supply chain management and governance are poor, Country Teams may opt for contracting established supply chain management agents or services acceptable to the Global Fund, such as humanitarian agencies to manage the transfer of goods and commodities financed with grant funds until they reach the target populations.

35. **Financial Management**
   a. Where the Principal Recipient systems are weak, the Country Team may outsource financial management, in its entirety, to fiscal agents (i.e. private consultancy and accounting firms), or use fiscal/payment agents to monitor payments. In such cases, the Country Team should ensure to include in the grants’ budget a provision to strengthen the Principal Recipient’s financial management capacity.
   
a. On an annual basis, and in accordance with the Grant Agreement, the transactions and balances of Principal Recipients and Sub-Recipients have to be audited, as well as at the closure of the grant. Depending on the context and the Principal Recipient, the auditor may have up to six (6) months after the end of the reporting period to submit the audit report, instead of the usual three (3) months.
36. **Grant Revisions**

   a. Grants implemented in COEs experiencing high volatility and rapidly changing environments require regular revision to the approved grants to quickly address the changing situation. In such cases, all COE portfolios, including in Focused countries, will be allowed to submit programmatic revision requests any time during the grant implementation, if warranted by the program context. The OPN on Grant Revisions ([Link Forthcoming](#)) has several built-in flexibilities to support regular programmatic revisions for COEs.

   b. Adjustments that are purely budgetary and that do not affect the performance framework are governed by the Global Fund’s [Guidelines for Grant Budgeting](#), and shall follow the approval process defined for the relevant thresholds.

   c. In some acute emergency situations where one Principal Recipient in a certain country is not absorbing funding, the Country Team may authorize shifting activities and budgets from one Principal Recipient to another for the same approved application with the approval of the Regional Manager or Department Head (please see OPN on Grant Revisions – [Link Forthcoming](#)).

   d. Where an emergency preparedness plan was included and approved as part of the funding request, the program may shift to the emergency plan when the triggers are met. This shift will be approved by the Department Head and will not require a review by the TRP. If the emergency plan changes materially, as determined by the Country Team in consultation with the advisory committee, by the time it is triggered or if the plan was not initially reviewed by the TRP at the time of the funding request, TRP review will be required.

**RISK MANAGEMENT APPROACH FOR COEs**

37. Risk management should be informed by the Board, Strategy, Investment and Impact Committee (SIIC)\(^{111}\) and TERG conclusions\(^{112}\) that “among the multiple risks, the main risk for the Global Fund in fragile states is operational: the risk of not achieving its mission, due to not reaching key affected populations with priority services and thus not achieving impact in the three diseases.”

38. Risk analysis for COEs shall be conducted through the portfolio analysis and operational strategy discussed above. Portfolio risks will be captured in a Key Risk Matrix which will clearly define the key risks preventing achievement of impact, as well as the controls and risk mitigation measures to help address and overcome those risks.

39. On an annual basis, or whenever the context changes, the Country Team will update the Key Risk Matrix and assurance plan and present an update to a Secretariat advisory committee. Updates to the portfolio risk profile that result in significant changes to the operational strategy and the program’s implementation modalities should be presented to a Secretariat advisory committee.

**PARTNERSHIP AND TECHNICAL SUPPORT**

40. Partnerships are central to an effective engagement in COEs. As part of the portfolio analysis and operational strategy, Country Team should undertake a mapping of existing in-country partners. This mapping exercise will facilitate Country Teams work in further defining how these partnerships could be leveraged to strengthen in-country governance,
enhance service delivery and improve technical assistance, to increase the effectiveness and efficiency of the grants implementation.

41. **Strengthening in-country governance.** Country Team should leverage existing in country coordination and partnerships mechanisms whenever possible, including meaningful engagement of national key stakeholders and communities in decision making and oversight. Linkages with health, logistics, protection, gender-based violence and other clusters/sectors, where applicable, should be made both at national and global levels to improve coordination and foster integrated approaches during emergencies.

42. **Enhancing service delivery.** To enhance service delivery, the Country Team will work closely with national stakeholders and relevant partners to ensure coordination and harmonization of the suggested interventions and implementation approaches. Country Teams should explore the involvement of non-traditional implementation partners such as civil society organization and communities and the private sector, particularly in settings where public health services are primarily provided by the informal sector.

43. **Improving technical assistance.** Country Teams will collaborate with academic institutions, technical partners, civil society organizations, and other relevant actors with expertise in COEs to provide medium to long-term support and capacity building for COEs such as project management, monitoring and evaluation, data collection and reporting, financial management and supply chain management. Country Teams should also link with existing rosters of COEs specialists which can be mobilized to provide short term technical assistance to implementers. Capacity building initiatives may be supported through the Global Fund grants and partners’ support and commitment shall be formalized at the approval of the grant.

**ROLES AND RESPONSIBILITIES**

44. **Oversight.** Within the Secretariat, the EGMC oversees the implementation of the differentiated approach for COEs, including the flexibilities for each COE.

45. **Secretariat advisory committee.** This committee will review the portfolio analysis and operational strategies submitted by Country Teams, advise on best approaches before the tailored strategies and flexibilities are submitted to EGMC for approval. It will be open to relevant external humanitarian partners on ad-hoc basis.

46. **Country Teams.** Led by the Fund Portfolio Manager, the Country Team is primarily responsible for defining and implementing a tailored operational strategy for each COE portfolio they manage.

47. **Support to COEs.** Several teams within the Secretariat provide support to Country Teams in managing COE portfolios:

| COE Support Team | - Support Country Teams in accessing proposed flexibilities  
|                  | - Map relevant partners  
<p>|                  | - Compile and share best practices and innovative solutions in implementing program activities in COEs |
| TAP (MECA and Disease and HSS Advisors) | - Provide guidance on focus of Global Fund investments in COEs |</p>

Annex 1. Characteristics of Acute Emergency and Chronic Instability Settings

| **Acute Emergency** | • Ongoing humanitarian crises due to armed conflict, emerging disease threats or outbreaks or natural disasters.  
|                     | • Volatile security situation, with large numbers of internally displaced persons and/or refugees or other persons of concern  
|                     | • Health system significantly destroyed or overwhelmed by crisis  
|                     | • Major constraints to accessing certain areas and populations due to crisis  
|                     | • Rapidly evolving context, hence significant challenges with data representativeness, timeliness and availability  
|                     | • Disease strategic plans not available or are not a reliable reflection of the context and evolving epidemiology  
|                     | • CCM is not functional or is not well placed to coordinate country disease response in the crisis.  
|                     | • National entities may lack legitimacy, and capacity to implement including systems to ensure adequate fiduciary control and accountability |
| **Chronic instability** | • Precarious security situation relating to periodic political strife, governance change or weak leadership or localized conflicts  
|                     | • Accessibility challenges due to insecurity  
|                     | • Protracted economic crisis, low political will, and high levels of corruption  
|                     | • Health system weak and/or is in the process of rehabilitation  
|                     | • Service coverage levels are low  
|                     | • Data collection and analysis systems are weak or not established in certain cases  
|                     | • Disease strategic plans are not available or not robust  
|                     | • Coordination is led by a provisional stakeholder coordination forum; or CCM was only recently revived, or has long-standing challenges with respect to leadership, inclusiveness and transparency of decision-making  
|                     | • National entities have low capacity for implementation, with sustained weak performance |
**Annex 2. List of COE countries – as of January 2017**

The list below is valid for the 2017-2019 allocation period. Countries identified as challenging operating environments are enumerated below under their respective portfolio categorization following the differentiation framework:

<table>
<thead>
<tr>
<th>Focused</th>
<th>Core</th>
<th>High Impact</th>
</tr>
</thead>
<tbody>
<tr>
<td>Iraq</td>
<td>Afghanistan</td>
<td>Congo (Democratic Republic)</td>

Annex 3. Tailoring LFA/Assurance Services in Challenging Operating Environments

The below guidance outlines some key principles and considerations for engaging assurance providers, and specifically LFAs, in COEs and for tailoring their assurance work.

<table>
<thead>
<tr>
<th>Engaging assurance providers, including LFAs, in Challenging Operating Environments (COEs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The volatile nature of many crises and the continuously changing context in which grants are being implemented in many COEs, but also the distinct architecture of these countries’ grants and implementation arrangements require risk management and assurance responses that are flexible and tailor-made to each country specific situation.</td>
</tr>
<tr>
<td>2. The management of a COE portfolio does not necessarily require more assurance work but rather smart assurance approaches that are rigorous and yet adapted to the challenges presented in the given country and grant context.</td>
</tr>
<tr>
<td>3. Important considerations to take into account when defining the scope and nature of assurance, including the LFA role are:</td>
</tr>
<tr>
<td>(i) the complexity of the grants/country environment;</td>
</tr>
<tr>
<td>(ii) the volume of funding, scope and geographical coverage of program activities;</td>
</tr>
<tr>
<td>(iii) the capacity and performance of the country systems and implementers;</td>
</tr>
<tr>
<td>(iv) historical grant performance;</td>
</tr>
<tr>
<td>(v) the risk levels and prioritized mitigation actions</td>
</tr>
<tr>
<td>(vi) Global Fund Country Team resources and capacity;</td>
</tr>
<tr>
<td>(vii) Availability and capacity of partners/assurance providers in country</td>
</tr>
<tr>
<td>(viii) Reliance on partners’ work;</td>
</tr>
<tr>
<td>(ix) Effectiveness of implementers’ controls and/or risk mitigating mechanisms</td>
</tr>
<tr>
<td>(x) Existence of early warning systems</td>
</tr>
<tr>
<td>(xi) LFAs having adequate access to PR/SR information and program locations;</td>
</tr>
<tr>
<td>(xii) Security to operate in country.</td>
</tr>
<tr>
<td>4. As far as available and appropriate, the Country Team may need to use various assurance providers in country to allow for a timely and adequate response to the crisis. The LFA can be one such assurance provider and important source of information.</td>
</tr>
<tr>
<td>5. The LFA’s ability to operate as much as possible in country is critical to managing the COE. This, however, may not always be feasible. The Country Team should assess and discuss with the LFA whether the latter is able to execute the Country Team’s tailored assurance plan that guides the LFA work. In cases where the LFA cannot access certain areas of the country or restricts its staff from travelling to the country due to security concerns, the Country Team may need to consider using partner agencies or contracting other independent assurance providers that are well versed in operating in insecure/COE environments to undertake required verification tasks in country complementing LFA routine desk reviews. In addition to working with the LFA and other assurance providers, as relevant, the Country Team should coordinate closely with the PRs (particularly where these are international agencies such as MSF, Save the Children, IRC etc.) to devise an assurance plan that builds on the PRs’ institutional experience in operating in COEs.</td>
</tr>
<tr>
<td>6. The nature of the crisis and associated risks/mitigations, which drive the assurance responses vary greatly from country to country. Hence, the management of risks in COEs is based on a flexible application of and differentiated country-specific approach to assurance requirements and controls, including LFA services.</td>
</tr>
</tbody>
</table>
7. This means that based on its risk analysis the Country Team has full flexibility to adapt the level of LFA verification and the scope of LFA service Terms of References to the needs of the COE portfolio. For some COEs this may result in a significant reduction of the LFA scope of work while in others a shift of focus of LFA work may be required, depending on the Country Team’s consideration of the above listed factors (points 3 above).

8. For instance, settings with programs of very limited scope (e.g. only focus on treatment), a small number of implementation locations or beneficiaries and trusted implementers with a good track record may require only a limited involvement of an LFA, e.g. spot checks to address specific risks.

9. In other settings with weak implementation capacities and more complex programs, e.g. including large procurement and wide geographical coverage with limited or no access to sites, tighter fiduciary and programmatic controls are likely to be required. Here, the Country Team may decide to engage the LFA in more regular financial, programmatic and procurement checks, particular in countries where reliable information from partners/other assurance providers is not available.

10. Where feasible, the Country Team may also choose to use the LFA, or another country-based assurance provider in the absence of the LFA in country, as one of the resources for early warning as part of the ongoing monitoring of the situation and to act as the ear on the ground to be able to inform the Country Team as timely as possible of any issues/risks that require mitigation and management. Such information, for instance, can inform the reprogramming of grants as the implementation adapts to the evolving situation in country. In order for the LFA to provide up-to-date information to the Country Team it is critical that it engages regularly with relevant actors in country under the guidance of the Country Team.

11. As it determines the assurance strategy and plan for the grant portfolio, the Country Team should from the start seek the advice and closely consult with the Regional Manager/Department Head and the Regional Finance Manager for finance-related matters to ensure there is a shared understanding of the risks to adapt to and of the operational requirements to mitigate them. Further, the outcomes from the review of the portfolio by the Operational Risk Committee, and updated assurance plans are opportunities for making course corrections to the assurance activities based on the prioritized risks and mitigations.

12. The Country Team’s close communication, timely information sharing, planning and coordination with all relevant assurance providers, including the LFA, are key to setting expectations and managing programs in COEs. This, for instance, can comprise regular joint briefings from risk monitoring and updates to action plans and risk maps.

**Competencies of LFAs operating in COEs**

13. While most of the below competencies are expected of LFAs in any setting, they are of particular importance for LFAs operating in COEs:

- Experience in providing LFA services in COE countries;
- Good understanding of the national health system, government processes and procedures; incl. Ministries of Finance and other aid / governing bodies;
- Good intelligence insight with regards to the Ministry of Health and Government;
- Good intelligence on partner environment - organizations and entities involved in the fight against the three diseases in the country
- Previous experience in the country where services are proposed or at least three key staff (Team Leader, Finance and Programmatic/M&E Expert) have minimum one year experience in the country context and have been performing ground work;
- Ability to be flexible and adaptable upon requests from the Country Team, including making staff available as and when required, and able to adjust under changing workload;
✓ Able to move around the country according to security protocols; and open to building partnerships for areas which may not be accessible due to security protocols;
✓ Able to manage Country Team requests within the proposed timelines, able to provide high quality and practical reviews and propose solutions based on experience with the country context;
✓ LFAs have their own security protocols or base the security protocols on professional security organization.

### Examples of tailoring LFA services in COEs

14. The following examples may serve as guidance to the Country Teams when determining the LFA scope of work for COEs (this list is not exhaustive):

(i) In the case of COEs where LFAs are limited in the services they can provide due to their travel and security policies restricting their staff from travelling to and within certain COE countries, engaging vetted organizations could be considered to provide assurance services in country, as needed, to complement LFA routine desk work.

(ii) The Country Team may consider to host workshops with the PR, CCM and LFA outside the country, e.g. at the GF in Geneva, to discuss roles and responsibilities, including how reporting and risk would be managed. This can help to set expectations and resolve blockages.

(iii) Where the LFA has no access to a country, the Country Team may consider flying the PR to the neighbouring country for PU/DR reviews or other verification activities.

(iv) Moreover, if the LFA is unable to operate in the country, the Country Team may consider financing a consultant (e.g. emergency health professionals) on the ground to monitor risks and follow grant implementation. This may be done through close cooperation and sharing of such resources with partner organisations, such as UNHCR or ICRC.

(v) In some COEs, the Country Team may consider investing in alternative data collection methods that ensures the greatest reliable information, e.g. using cell phones.

(vi) The Country Team may need to review the staffing of the LFA team and discuss the required competencies for the given COE context with the LFA to ensure competent and experienced experts are in place who are well versed in operating in challenging environments.

### Important considerations for tailoring LFA services in COEs

15. When considering the level and scope of engagement of LFAs in COEs the following needs to be taken into account:

(i) The flexible tailor-made approach to defining the LFA role in a given COE requires close coordination and timely planning with the LFA and relevant actors internally to ensure that required LFA resources are available when needed.

(ii) Depending on the severity of the crisis, as a last resort the LFA may have to relocate some or all of its staff, either to other safer parts of the country or to a neighboring country. While an in-country presence of the LFA is preferable, the LFA’s own risk management procedures to ensure the wellbeing of its staff need to be acknowledged and respected. While the LFA would not be able to perform certain...
tasks, such as spot checks, it may still be requested to perform other desk-based reviews and to keep itself abreast of the latest developments in country. At the same time, the Country Team needs to explore which, if any, other entities in country could assist with providing some assurance tasks, e.g. local NGOs.

(iii) In cases where unforeseen events in the country require significantly more LFA work than was originally included in the annual work plan/LFA budget the Country Team should consult the Regional Manager/Department Head, Regional Finance Manager and the LFA Coordination Team to decide on next steps.

(iv) In some security sensitive COEs the LFAs’ costs for providing security to their staff in country can be substantial. Such costs are normally covered by the LFA budget under Other Direct Costs (ODC). However, before agreeing to include such costs in the LFA budget, the Country Team should request the LFA for a breakdown of security related costs and consult the Regional Manager/Department Head, Sourcing and the LFA Coordination Team.
Support Costs and Indirect Cost Recovery (ICR) Policy for Non-Governmental Organizations

Issue Date: 13 March 2015
Purpose: To define the policy and principles related to Support Costs/Indirect Cost Recovery (ICR) for non-governmental organizations.

OVERALL OBJECTIVES

1. International non-governmental organizations (INGOs) implementing programs funded by Global Fund grants may request to include funds in their budgets to compensate for services that are provided by their headquarters, regional offices and/or parent organization (together referred to as “Headquarters” in this policy). Headquarters are generally located outside the country where the grant is implemented and support the in-country office of the organization to fulfill their activities and meet the grant’s objectives. This may be the case either when the Grant Agreement is signed directly by the in-country office or when it is signed by the Headquarters while the program is implemented by the local office.

2. The Global Fund encourages the development of in-country capacity and strives to ensure optimal allocation of resources to service delivery and maintaining the overall level of administrative costs at a minimum level.

3. Local non-governmental organizations (local NGOs) are generally expected and strongly encouraged to include all costs associated with the implementation of program activities as direct charges to the grant. In exceptional circumstances as indicated in the Global Fund guidelines for grant budgeting and reporting, and at the sole discretion of the Global Fund, where a local NGO is implementing programs and activities supported by several donors and has the financial system and capacity to demonstrate transparent cost recovery\(^\text{113}\), the Global Fund at its sole discretion may authorize the relevant local NGO to charge a percentage of direct costs as ICR.

POLICY AND PRINCIPLES

4. This policy does not apply to UN agencies\(^\text{114}\) for which separate arrangements for ICR apply.

5. The in-country common costs of implementing entities (e.g. salaries, office rent, utilities, security, etc.) related to the management and administration of Global Fund programs should generally be charged directly to the grant “as direct costs” and are not affected by this policy.

6. Funding for support costs and ICR shall not be applied when a financial management intermediary (i.e. a “fiduciary agent” or “fiscal agent”) is appointed to oversee and verify expenditures of grant funds, unless there is a prior approval of the Grant Approvals Committee.

---

\(^{113}\) This may include a clear audit trail on cost recovery mechanisms that are in place and subject to independent external audit review.

\(^{114}\) If a UN agency is selected as an implementer for a grant financed under the Emergency Fund, they must comply with this policy on indirect cost recovery.
7. The maximum rates which an eligible non-governmental organization may charge to support costs/ICR under Global Fund grant agreements and grant extensions signed are established in Annexes 1 and 2 of this OPN. However, where an organization is currently charging rates on Global Fund grants which are below or above the maximum rates established in Annexes 1 and 2, but in accordance with the approved budgets, these rates may be maintained until the end of the current implementation period. Any requests for support costs funding via ICR under a new implementation period or grant extension must be in accordance with this policy.

8. In the event the nomination of the Principal Recipient (PR) is not finalized at the time of Concept Note development and approval (as permitted under Global Fund policies and procedures), support costs/ICR costs of eligible PRs may be incorporated in the grant-making budget within the limits of the total funding ceiling. The budgetary implications of such costs should be disclosed to the CCM before submitting the final grant-making budget to the Global Fund.

9. If the Global Fund at its sole discretion approves funding for support costs/ICR, the Global Fund may include a special condition in the relevant Grant Agreement to specify terms such as the applicable rates, approved budget, description of services to be covered or other terms it may deem appropriate in accordance with this policy.

10. Each PR that receives funding for support costs or ICR is required to acknowledge and agree in the relevant Grant Agreement that it shall use such funding only in compliance with the Global Fund’s policy and principles on Support Costs/ICR for non-governmental organizations and any conditions relating thereto in the Grant Agreement.

11. The support costs/ICR may be used exclusively to finance the following activities in support of the program:
   a) accounting, treasury management, reporting support and internal audit;
   b) human resources administration support;
   c) procurement services
   d) management support and oversight;
   e) legal support;
   f) IT support; and
   g) routine technical assistance and capacity building of in-country staff and structures

12. The PR shall ensure that support costs/ICR generated from grant funds are not used for fundraising, marketing, or for costs related to the development of Concept Notes.

13. All funds generated and costs charged will form part of the organization’s Annual Financial Statements which will be subject to external audit. In the event that this is part of the Statutory Financial Statements, a copy of the audit report for the organization as a whole may be requested by the Global Fund. The audit report and auditor opinion should be submitted no later than six (6) months following the end of the organization’s regular fiscal year.

14. Accepting support costs commits the Headquarters organization to providing timely support to the country office for the effective and efficient implementation of grant activities and reporting. It is also expected that should weaknesses be identified in the management and administration of the grant by the country office, the Headquarters services or entity (in the case of local NGO) would implement appropriate and/or recommended actions in a timely manner.

---

115 The Global Fund at its sole discretion may in exceptional circumstances approve the use of such funds to support the country dialogue and Concept Note process
116 The Annual Financial Statement referred to in this OPN for purposes of support costs/ICR may be an integral annex in the Global Fund grant external audit or the Statutory Financial Statements of the Principal Recipient.
15. The organization commits to providing the Global Fund with all the necessary information to allow the Global Fund to confirm that funds have been charged to the grant in accordance with the approved budget (including any budgetary adjustments as per section 3.5.1 of the Guidelines for Grant Budgeting) and to confirm that the Headquarters have provided any agreed services (when applicable).

16. The disbursement of funding for support costs/ICR by the Global Fund will follow the Global Fund’s standard annual funding and disbursement procedures and may be charged to the grant in proportion of the actual expenditures incurred.

17. Support costs/ICR will be considered eligible expenditures when charged to the grant based on actual expenditures and disbursement to Sub-Recipients (SRs) made by the PR. For SRs, the eligibility is based on actual expenditures.

18. In the event that a PR charges SR disbursements to a grant as support costs eligible for ICR, but the services not rendered by the SR, the SR shall refund in full the disbursed amounts to the PR. The PR shall be required to make an adjustment to ICR in its accounts based on amount refunded by the SR and the original rates applied.

19. Any support costs/ICR charges on accrued expenses and/or budget will be considered as ineligible expenditures by the Global Fund.

International Non-Governmental Organizations (INGO) Implementers

20. Eligible implementers, whose legal structure, reporting line and historical relationships demonstrate strong Headquarters involvement in their operations, may request financing for the support they receive from their Headquarters to be included in the Global Fund’s grant budget.

21. Costs related to the Headquarters’ own public relations, marketing and fundraising activities are not eligible for funding.

22. The percentage-based charge is designed to contribute to costs incurred by the Headquarters of an INGO and therefore costs related to the Regional Office or Headquarters should not be budgeted as direct costs in the grant. In certain instances based on the operational structure of the INGO, the Global Fund at its own discretion may approve charging limited costs incurred at the Regional Office or Headquarters level as direct costs under the grants.

23. In cases where the PR identifies an activity which would be undertaken in the most cost-efficient way by an employee of the INGO Headquarters office, these costs may be included as direct costs in the grant budget, provided that they are not part of the services to be provided against the payment of the ICR/support costs. The PR should provide justification demonstrating value-for-money, efficiency in the execution of activities using Headquarters staff, the nature of the activity, deliverable, costs, and the expected outcome. Such direct costs should be classified as “consultants” and managed using internal invoicing mechanisms and not considered as human resources costs.

24. Some INGOs may have a robust mechanism of charging local administrative costs using a “shared-costs” approach. Shared costs can be defined as expenses that can be allocated to two or more funding sources (government, the Global Fund, other donors etc.) or different Global Fund grants on the basis of shared benefits and administrative efficiency. Such mechanisms should be clearly outlined in the framework agreement to be considered as eligible expenditure under Global Fund grants. Section 2.6 of the Guidelines for Grant Budgeting. Provide additional information on the “shared-cost” concept.
Local Non-Governmental Organizations (NGO) Implementers

25. Percentage-based ICR is generally not applicable when the Global Fund is the main funder\textsuperscript{117} of the NGO’s operations.

26. Local NGOs implementing programs and projects for multiple donors are encouraged for the purpose of the Global Fund budgeting and expenditure reporting, to apply a cost sharing methodology across the different funders based on the principles in section 2.6 of the Guideline s for Grant Budgeting.

27. The same assumptions and methodology used for apportionment of budgets of shared activities in the latest approved budget should be applied for expenditure apportionment. The actual shared costs expended and reported to the Global Fund should be based on the actual expenditures incurred by the implementer and not the budgeted amount.

28. In the event the provisions in paragraph 26 create additional administrative burden and inefficiencies in the management of shared-costs, local NGOs with the appropriate financial management capacity may be allowed to charge a percentage-based support costs/ICR. The Global Fund in approving this mechanism expects a proportional reduction in direct costs charged to the grant for administrative overhead to avoid duplication of costs for the same purposes.

RESPONSIBILITIES & PROCESSES

Responsibilities

29. The Principal Recipient:
   a) includes in the request for funding for support costs/ICR in the budget submitted to the Global Fund as part of the concept note and/or grant-making budget. The rates applied shall be in accordance with the Global Fund rates in effect as described in Annexes 1 or 2 for new grant agreements and grant extensions signed from 18 December 2014;
   b) provides the Secretariat with a narrative description of the services to be provided by Headquarters and/or the services that will charged as ICR as part of the grant-making documents when support costs/ICR provisions are not included in the signed framework agreement. In the event of any exceptional requests for Headquarters related direct costs for an individual grant, the narrative description shall be updated to ensure it is specific to the country context and grant implementation needs;
   c) integrates in the Annual Financial Report (AFR)\textsuperscript{118} that include support costs/ICR charged to the grant, both at the PR and SR level. These amounts for each grant could be included in available annexes to the AFR by disclosing the calculations; and
   d) submits to the Global Fund a copy of the Annual Financial Statements for the organization no later than six months following the end of the organization’s fiscal year. All funds generated and costs charged will form part of the organization’s Annual Financial Statements which will be subject to external audit.

30. The Country Coordinating Mechanism endorses the budget submitted in the concept note including the support costs or ICR. In the event that support costs/ICR costs was not included in the concept note submission, the Principal Recipient is expected to inform the Country Coordination Mechanism on the implication of such changes in the overall budget.

\textsuperscript{117} The Global Fund annual budget represent 70% or more of the implementers (PR or SR) operations.

\textsuperscript{118} Enhanced Financial Report for grants that are not part of the new funding model.
31. The **Local Fund Agent**, as requested by the country team:
   a) ensures that the budgeted support costs/ICR are within the maximum upper ceiling defined in Annexes 1 or 2;
   b) verifies on a regular basis that rates charged to the grant are in accordance with the agreed rates per the detailed budget; and
   c) assesses the NGO implementers (including INGO) capacity to perform transactions falling under their responsibility may be done on an annual basis. This assessment shall not be done by the LFA for each grant-making involving this organization but may be mandated by the Global Fund once a year or more frequently as necessary with the view to inform all relevant grant-makings, confirm that any agreed services to be provided by the NGO implementers (including INGO) have been performed, and assess any relevant issues related to the ongoing implementation of grants managed by this organization. The assessment will be coordinated by the Global Fund LFA team.

32. The **Country Team**:
   a) reviews the request for ICR in the budget submitted by the PR and the recommendations of the LFA (if applicable);
   b) notifies the PR of the outcome of the concept note review, including the budget; and
   c) verifies that rates charged to the grant are in accordance with the agreed rates in the detailed budget.

ANNEX 1: Maximum Headquarters Support Costs/ICR Applicable to International NGOs (INGO) Implementing Global Fund grants.

These rates are the maximum that may be applied to any eligible INGO requesting Headquarters support costs/ICR for new grant agreements or grant extensions signed from December 18, 2014

<table>
<thead>
<tr>
<th>Entity</th>
<th>Type of Cost</th>
<th>Maximum Percentage Rates</th>
<th>Indicative guidance on the application of rates in the budget</th>
</tr>
</thead>
</table>
| INGO Principal Recipient (PR) | Health Products\(^{119}\) | 3% | • Where a procurement agent is used, the maximum rate that can be applied is 1%.  
• If the SR is procuring directly, the PR may only charge a maximum of 1% on the value of the procurement in addition to a maximum of 3% which may be charged by an INGO SR and 2% by NGO SR |
| | | | |
| All other Direct costs incurred by the PR | | 7% | |
| | Funds managed by Sub Recipients | 5% | • The PR may charge up to a maximum of 5% on SR direct costs.  
• If the SR is also an INGO claiming ICR, the SR may charge up to a maximum of 5% on their own direct costs, and the PR may charge a maximum of 2% on the SR direct costs (the calculation should exclude the SR ICR)  
• If the SR is NGO claiming ICR, the SR may charge up to a maximum of 3% on their own direct costs, and the PR may charge a maximum of 4% on the SR direct costs (the calculation should exclude the SR ICR) |
| INGO Sub Recipient | Health Products\(^1\) | 3% | • Where a procurement agent is contracted by the SR, the maximum rate that can be applied is 1%.  
• If the PR is managing the procurement, the SR is not entitled to charge any overheads on these amounts. |
| | | | |
| All other Direct costs incurred by the SR | | 5% | |
| Additional Safeguard Countries | All Rates remain the same with the following exceptions  
• The PR may charge up to a maximum of 7% on SR direct costs.  
• If the SR is also an INGO claiming ICR, the SR may charge up to a maximum of 7% on their own direct costs, and the PR may charge a |

\(^{119}\) All costs included in the cost categories Health Products-Pharmaceutical Products (category 4), Health Products - Non-Pharmaceuticals (category 5), Health Products – Equipment (Category 6), and cost input 7.2.
maximum of 3% on the SR direct costs (the calculation should exclude the SR ICR).

- If the SR is an NGO claiming ICR, the SR may charge up to a maximum of 5% on their own direct costs, and the PR may charge a maximum of 5% on the SR direct costs (the calculation should exclude the SR ICR).
- Where an INGO is an SR of a UN agency, they may charge up to 7% on their own direct costs.
- If a fiscal agent is contracted, no ICR should be paid to the PR.

| Direct Costs from Headquarters | • The percentage based fee is designed to contribute to costs incurred by the Regional or Headquarters of an INGO and therefore no direct costs related to the Regional Office or Headquarters should be budgeted in the grant, unless approved as part of the Framework agreement signed with the Global Fund.
- However, in cases where the PR requests to directly charge a limited number of costs incurred at Headquarters level or where the Global Fund has requested the Headquarters to provide a specific service to the Country (e.g. more than 1 internal audit per year from the Headquarters), the PR should provide sufficient justification as to why the costs are not part of the normal Regional or Headquarters support to the grant. Requests for inclusion of these costs should normally be addressed during the grant making process and should include a detailed description of the activity, a detailed budget for the activity, and a confirmation that none of the related costs are included in the indirect costs of the Headquarters and the services specified. |
| CALCULATION NOTE: | • The PR charge on funds managed by SRs should be exclusive of the percentage based charges applied by the SR.
• These rates may only be charged to the grant based on actual cash expenditure and disbursement to SRs. Therefore they may not be charged based on accrued expenses. |
ANNEX 2: Maximum ICR Applicable to Local NGOs (NGO) Implementing Global Fund grants.

*These rates are the maximum that may be applied to any eligible INGO requesting Headquarters support costs/ICR for new grant agreements or grant extensions signed from December 18, 2014*

<sup>2,6</sup> All costs included in the cost categories Health Products-Pharmaceutical Products (category 4), Health Products - Non-Pharmaceuticals (category 5), Health Products – Equipment (Category 6), and cost input 7.2.
| **If the SR is an NGO claiming ICR, the SR may charge up to a maximum of 5% on their own direct costs, and the PR may charge a maximum of 2% on the SR direct costs (the calculation should exclude the SR ICR).** |
| Where an eligible NGO is an SR of a UN agency, they may charge up to 5% on their own direct costs. |
| If a fiscal agent is contracted, no ICR should be paid to the PR. |

**CALCULATION NOTE:**
- The PR charge on funds managed by SRs should be exclusive of the percentage based charges applied by the SR.
- These rates may only be charged to the grant based on actual cash expenditure and disbursement to SRs. Therefore they may not be charged based on accrued expenses.
ANNEX 3: Sample Calculation

GRANT X – an INGO PR with 2 SRs (1 INGO and 1 NGO). The PR and SRs require ICR.

**Budget Breakdown**

PR – 10,000,000 (8,000,000 Health Products, 2,000,000 Other Direct Costs)
SR 1 (INGO) – 5,000,000 (Other Direct Costs)
SR 2 (NGO) – 3,000,000 (Total Budget including common costs which are detailed)

Total Budget before Support/ICR – 18,000,000

**Headquarters Support/ICR Calculation**

PR – Health Products – 8,000,000 X 3% = 240,000
PR – Direct Costs – 2,000,000 x 7% = 140,000
PR – Disbursements to SR 1 (INGO) – 5,000,000 X 2% = 100,000
PR – Disbursements to SR 2 (NGO) – 3,000,000 X 2% = 60,000

Total Percentage Charge by PR – 540,000

SR 1 (INGO) – 5,000,000 X 5% = 250,000
SR 2 (NGO) – 3,000,000 X 5% = 150,000

TOTAL GRANT VALUE – 18,940,000

Total Headquarters Support Costs/ICR levied on the grant at both PR/SR combined = 5.2% or 940,000

OVERALL OBJECTIVES

1. The Additional Safeguard Policy (the “ASP”) is one of an array of Global Fund risk management tools. It was instituted by the Board at its Seventh Meeting.

2. ASP can be invoked in full or in part whenever “existing systems to ensure accountable use of Global Fund financing suggest that Global Fund monies could be placed in jeopardy without the use of additional measures” (see ASP Policy). The ASP is primarily focused on addressing material issues that arise when program implementers (e.g., Principal Recipients and Sub-Recipients) have demonstrated a lack of capacity or failure to effectively deploy, implement and/or safeguard Global Fund grant funding and assets as a result of factors within and beyond the control of existing implementers in a particular country (e.g., civil unrest, an influx of displaced persons, governmental instability, and inadequate national program capacity).

3. This OPN situates the ASP within the overall portfolio risk management framework of the Global Fund and provides the parameters for the application of the ASP within that risk framework. This OPN complements the existing policies on Challenging Operating Environments (COE) and Risk Management across the grant life cycle.

OPERATIONAL POLICY

Scope of ASP

4. The ASP may be invoked for an entire portfolio of Global Fund grants in a particular country or for a specific disease component.

5. The ASP may be invoked when there are significant portfolio or disease-specific risks that compel the Global Fund to take the primary role in prescribing and deciding the implementation arrangements for a particular portfolio or disease component.

6. Triggers. Applying the ASP may be prompted by the following:
   - Global Fund Secretariat assessments;
   - Findings of the Office of the Inspector General;
   - Reports from Local Fund Agents (“LFAs”);
   - External auditor reports; and
   - Assessments from partners or other sources assessing risk factors in a particular portfolio.

---

221 Report of the Governance and Partnership Committee GF/B7/7 - https://www.theglobalfund.org/board-decisions/b07-dp14/
7. Examples of these triggers include (but are not limited to):
   - Political instability or lack of a functioning government;
   - Poorly developed or lack of civil society participation;
   - Lack of a transparent process for identifying appropriate implementing partners;
   - Identified fraud or misuse of Global Fund financing and/or any other funds; and
   - Recent or ongoing conflict limiting capacity for the Country Coordinating Mechanism ("CCM") to conduct a transparent selection process for implementers.

8. **ASP safeguards.** In determining specific implementation arrangements under the ASP, the Global Fund may select the Principal Recipient(s) ("PR(s)"), and/or Sub-recipient(s) ("SR(s)") and other implementing entities.

   - **Selection of PRs.** The Global Fund may elect to lead the selection of implementers for the program. The nomination of the PR(s) may be made directly by the Global Fund, in consultation with the CCM and other development partners. Such PR(s) may include multilateral or bilateral organizations, NGOs or other suitable entities as determined by the Global Fund.\(^\text{222}\)

     When selecting a PR, the applicable Global Fund Country Team is expected to conduct a capacity assessment of potential organizations to transparently select the most suitable entity for the implementation of the grant(s). The capacity assessment will be tailored to identified risks specific to the portfolio or disease component and consider existing assessments.

   - **Selection of SRs and Other Implementing Partners.** The Global Fund may also select or make final decisions on the nominated SR(s) and implementing entities. The selection will be based on assessment of risks which may include review of existing financial management systems, institutional and programmatic structures, procurement systems, and where applicable, monitoring and evaluation structures.

9. **Additional Risk Mitigation Measures.** The ASP safeguards, whereby Global Fund selects the implementer(s), can complement or be complemented by risk mitigation measures such as the installation of fiscal/fiduciary agents, restricted cash policy, use of GF Pooled Procurement Mechanism and other measures as specified in the Risk Management OPN and the Global Fund Guidelines on Financial Risk Management. The proposed additional risk mitigation measures and the ASP safeguards form part of the overall risk management approach for a particular portfolio and/or disease component.

**Invoking the ASP**

10. The decision to invoke and subsequently revoke the ASP for a particular portfolio is taken by the Global Fund Executive Director based on recommendation from the Head, Grant Management Division in consultation with the Portfolio Performance Committee (PPC). In emergency and crisis situations, the Head, Grant Management Division can recommend invoking the ASP to the Executive Director in consultation with the Chief Risk Officer as PPC Co-Chairs. The decision to invoke the ASP by the Executive Director will be succeeded by a PPC Executive Session to further discuss the situation and review the overall risk mitigation measures applied to the country.

11. A decision to invoke the ASP can be taken prior to or during the submission of a funding request for a particular funding cycle, so that the decision to invoke ASP can inform the design of funding requests and resulting grants. However, in some cases, significant risks

\(^{222}\) In the event that UNDP is selected as Principal Recipient, the special ASP standards terms and conditions of the grant agreement for UNDP should be used.
may arise during the implementation stage which would justify the subsequent invocation of ASP for a particular portfolio.

12. A Country Team proposal to apply ASP for a portfolio should be supported by a comprehensive risk assessment. In proposing to invoke the ASP, the Country Team should clearly state:
   a. the rationale for proposed invocation of the ASP and clear identification of applicable risk factors;
   b. the proposed implementation arrangements that will be determined by the Global Fund
   c. any additional risk mitigation measures that are or will be applied to the portfolio proposed for ASP; and
   d. specific conditions to be met to revoke the ASP status.

13. Proposed conditions to revoke ASP status include clear, time-bound, strategic actions to be implemented by the CCM and/or the PR(s), for factors that are within their control, as a precondition to the revocation of ASP status.

14. Risk factors and Country Team recommendations to invoke the ASP should be discussed with the CCM including the implications of invoking ASP for the applicable country portfolio. The CCM should be notified about the final decision to invoke the ASP status.

15. ASP status is valid until the Global Fund has made a decision to revoke the ASP for a particular portfolio or disease component based on an analysis of risks, the effectiveness of implementation arrangements, the status of the additional risk mitigation measures and the extent to which the conditions to revoke ASP status have been met.

**Monitoring and Revoking the ASP**

16. As part of the routine operational risk management functions, the Country Team monitors risk factors, the implementation arrangements, the additional risk mitigation measures and the conditions related to ASP.

17. For High Impact and Core portfolios, the review of ASP-related risks will be conducted as part of the annual review of portfolio risks by Country Team and Risk Department as captured in the Key Risk Matrix (see OPN on Risk Management). For Focused portfolios, such review will be conducted annually as part of the Annual Funding Decision-making process. The review will focus on the current status of relevant risks and the effectiveness of the implementation arrangements, the existing risk mitigation measures and conditions previously identified to revoke the ASP status. When assessing the mitigation measures in place, such as a requirement to use an international organization as PR, the value for money of management costs are a factor to be considered but should not be the sole basis for a transition to a national PR and must always be part of a risk-based discussion with approvals at the appropriate level.

18. As part of the regular ASP monitoring process, the Country Team may propose the revocation of ASP status for a particular portfolio. The proposal to revoke ASP status will be presented to the PPC. This review may occur through scheduled country portfolio reviews as applicable or through a PPC Executive Session (as defined by the PPC TORs). In proposing to revoke ASP status, the Country Team should clearly indicate to the PPC:
   a. the rationale for the proposed revocation, providing an update on the status of risk mitigation measures and fulfilment of conditions to revoke the ASP for the applicable portfolio; and
   b. the continuing relevance of the implementation arrangements that were originally imposed on the portfolio.

19. The PPC will review the proposal and analysis conducted by the Country Team. The ASP may be revoked if:
a. circumstances that gave rise to the original decision to invoke the ASP for the specific country portfolio have materially changed and/or the country or grant implementers have put in place systems and safeguards to ensure accountable use of Global Fund financing; or

b. further grant implementation experience has demonstrated that the risks identified at the time the ASP was invoked have not materialized, such that the applicable ASP measures are no longer necessary.

20. In circumstances where the annual risk review reveals a negative upward risk trend and worsening situation of a specific country portfolio, the PPC will review the full scope of risk mitigation measures and flexibilities in place including the ASP.

Secretariat Tracking and Reporting of ASP

21. The Secretariat will report cases in which the ASP has been invoked or revoked to the Strategy Committee on a regular basis.

22. The Operational Efficiency Team, GPS Department will track the status of ASP countries and the Head, Grant Management Division will report newly added and removed ASP countries to the Strategy Committee.

Amendments to this Policy

23. The ASP, as set forth in this Operational Policy Note, will be reviewed and updated as necessary based on specific cases and experiences.

RESPONSIBILITIES AND PROCEDURES

Responsibilities

24. The Country Team is responsible for the monitoring of the ASP within the risk management of country portfolios and in proposing to the Portfolio Performance Committee whether:

- Any country portfolio should be managed under the ASP;
- The imposed implementation arrangements and additional risk mitigation measures imposed on the country portfolio managed under the ASP are effective or require revision; and
- The ASP should be revoked for any country portfolio currently being managed under the ASP, based on the fulfilment of the special conditions to revoke the ASP status.

25. The Risk Specialist is responsible for reviewing the risk analysis undertaken by the CT, ahead of the PPC review for invoking, revoking or monitoring the progress of the ASP. The Risk Specialist conducts annual review with the Country Team of the portfolio risks as a part of the annual update of the Key Risk Matrix.

26. The Operational Efficiency Team, GPS Department is responsible for managing the list of ASP countries and updating the ASP portfolio categorization in the Global Fund Operating System (GOS).

27. The Portfolio Performance Committee (PPC) reviews the proposals to invoke or revoke the ASP for a particular portfolio. The PPC also reviews the progress on the additional risk mitigation measures and ASP conditions.

28. The Head, Grant Management Division is responsible for reporting to the Strategy Committee on country portfolios where ASP is invoked or revoked. The Head, Grant Management Division will recommend invoking or revoking the ASP status to the Executive Director for final decision.

29. The Executive Director considers the recommendation from the Head, Grant Management Division and makes final decision to invoke or revoke ASP in a particular portfolio.
30. The **Country Coordinating Mechanism** is informed of the Secretariat risk assessment and decision to invoke or revoke ASP. The CCM oversees the implementation of ASP conditions as part of its in-country oversight and holds the relevant stakeholders accountable.

31. The **Principal Recipient** is responsible for safeguarding the Global Fund investments and implementing the grant as agreed with the Global Fund. They are responsible for ensuring the implementation of the specific risk mitigation measures and reports to the CCM on the status of mitigation measures.

32. The **LFA** assists the Country Team, by assessing the risks of a particular country portfolio and recommending appropriate risk mitigation measures and/or conditions and, as requested, oversee ASP mitigation measures such as in-depth assessments of the PR and SRs and review progress on conditions to revoke the ASP status.

**Procedures**

*Annex 1* provides detailed procedures and RACI on invoking, revoking and monitoring of ASP.

OPERATIONAL POLICY NOTE

Country Coordinating Mechanism Funding

Approved on: 25 September 2019
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions & Support – CCM Hub
Sub-process Owner: Program Finance and Controlling Department

OVERALL OBJECTIVES

1. The Global Fund provides Country Coordinating Mechanism funding (CCM Funding) through performance-based agreements tied to achievement of performance objectives. CCM Funding aims to support:
   a. CCM core functions as set forth in the CCM Policy Including Principles and Requirements;
   b. CCM performance and maturity in oversight, key populations engagement, linkages, and CCM functioning, as set forth in the CCM Policy Including Principles and Requirements.

2. The framework below provides an overview of the CCM Funding process:

   ![CCM Funding Process Diagram]

   - **Assess CCM Funding Eligibility**
   - **Negotiate and Sign CCM Funding Agreement**
   - **Disburse & Report on CCM Funding**
   - **Close CCM Funding Agreement**

   **AGREEMENT PROCESS:** 1-2 MONTHS
   **FUNDING PERIOD:** UP TO 3 YEARS

OPERATIONAL POLICY

3. This Operational Policy Note (OPN) describes the rules and requirements that Country Coordinating Mechanisms (CCMs) must follow to receive CCM Funding.

4. Unless otherwise stated in this OPN or agreed in writing with the Global Fund, CCMs must comply with the Global Fund Guidelines for Grant Budgeting when using CCM Funding.

5. The CCM Hub, within the Grant Management Division, centrally manages CCM Funding, including the CCM Funding Agreement negotiation and execution, disbursement, monitoring & reporting, and closure processes. This is done in close consultation with Country Teams.

---

123 As set forth in the CCM Policy Including Principles and Requirements.
124 This document replaces previous CCM Funding OPN and CCM Funding Guidelines.
125 For purposes of this document, the term “Country Coordinating Mechanism” or “CCM” includes all coordinating mechanisms fulfilling CCM functions as they are set forth in the CCM Policy Including Principles and Requirements.
Assess CCM Funding Eligibility

6. Eligibility for CCM Funding is determined by compliance with the six CCM Eligibility Requirements, as set forth in the CCM Policy Including Principles and Requirements, until the last Global Fund grant is closed. Eligibility for CCM Funding does not guarantee an allocation of funding for CCMs.

7. Compliance with CCM Eligibility Requirements 1 and 2 is assessed by the Global Fund’s Access to Funding Department, at the time of submission of the national request for funding through the country’s allocation, as set forth in the CCM Policy Including Principles and Requirements, and in the OPN on Design and Review of Funding Request.

8. Compliance with CCM Eligibility Requirements 3 to 6 is assessed at the time request for funding stage and on a yearly basis, as set forth in the CCM Policy Including Principles and Requirements. An Eligibility and Performance Assessment must be carried out as an evaluation tool to assess compliance with CCM Eligibility Requirements 3 to 6.

Negotiate and Sign CCM Funding Agreement

CCM Funding Period and Amount

9. CCM Funding is approved for a three-year funding period, and no overlap between funding periods is allowed: the earlier CCM Funding Agreement is automatically terminated when the new CCM Funding Agreement is signed.

10. A CCM Funding Performance Framework is determined at the beginning of each funding period. The Performance Framework must be consistent with the country-context and composed of a set of indicators targeting the performance objectives each CCM is required to report on annually. Failure to meet the agreed objectives affects the disbursement decisions in subsequent years, in line with the principle of performance-based CCM Funding.

11. The Global Fund determines at the beginning of each funding period an annual funding envelope amount for each CCM (“Funding Envelope”), which is based on the achievements of the performance objectives set in the preceding funding period. The total CCM Funding Agreement amount corresponds to three Funding Envelopes, that are distributed and spent over the three-year funding period. This amount cannot be increased during the funding period.

12. For CCM Funding Agreement amounts higher than US$ 300,000, the CCMs must demonstrate mobilization of additional external funding, which must be at least 20 percent of the amount exceeding US$ 300,000. The CCMs must report annually on the use of such external funds.

---

126 The three-year funding period is not necessarily aligned with the national grant allocation cycle.

127 Indicators may be defined by CCM Hub in cooperation with CCMs, Global Fund Country Teams and other relevant teams within the Global Fund Secretariat.
Eligible Items for CCM Funding

13. The CCM Secretariat operational costs and CCM activities must be agreed and endorsed by all CCM members. They must be included in a Costed Work Plan by cost grouping, performance area, and respective budget cost. Costed Work Plans must be submitted to and approved by the Global Fund annually.

14. The following categories of operational costs and activities are eligible for CCM Funding:
   a. Human Resources (CCM Secretariat staff)
   b. Travel Related Costs (includes meeting expenses)
   c. External Professional Services
   d. Non-health Equipment (office furniture and equipment)
   e. Communication Materials and Publications
   f. Indirect and Overhead Costs

15. The Human Resources budget is validated as a fixed cost and cannot increase during the three-year funding period. Any annual salary increases aligned with national or organizational policy of the hiring entity must be budgeted for within the agreement. The budget shall not exceed 2 full-time equivalent headcounts.

16. CCM Secretariat staff must (i) be accountable to the CCM as a whole, and not to any single constituency or member, (ii) have clear terms of reference, (iii) be recruited through a transparent and documented process based on capacity for the role and global good practices, and (iv) be rigorously evaluated on a regular basis, with participation of all CCM constituencies. Global Fund support to HR costs is dependent on the performance of the CCM Secretariat.

17. Activities linked to the CCM’s role in strengthening sustainability and/or preparing for transition from Global Fund financing can be financed via the CCM Funding Agreements. CCMs whose country is notified by the Global Fund that they have disease components that are a “transition preparedness” priority or that they are receiving transition funding must use a portion of CCM Funding to implement activities that support the sustainability of the national responses to the three diseases. Other activities included in this category are those related to the continuation of the role of the CCM or activities to ensure the continuation of the principles of Global Fund CCMs in other national governance mechanisms after full transition from Global Fund financing.

---

128 Please refer to Instructions included in the Costed Work Plan template for more details on each category.
129 Employees supporting CCM Secretariat’s cleaning and other services not related to the CCMs’ core functions must be included in the category Indirect Overhead Costs.
130 This principle applies the approach set forth in the Sustainability, Transition and Co-financing Policy (GF/B35/04 – Revision 1 Board Decision).
131 Under the Sustainability, Transition and Co-financing (STC) Policy, all Upper Middle Income (UMI) countries (regardless of disease burden) and Low Middle Income (LMI) countries with disease components that have a low burden are considered transition preparedness priorities. While this does not mean that all the disease components in this category are transitioning from Global Fund financing immediately, it does mean that these components should proactively prepare for transition from Global Fund financing and that transition considerations should be included in Funding Requests, grant design, program design, and co-financing commitments. For more information, please consult the STC Guidance Note.
132 While these activities will depend heavily on country context, they may include activities such as strengthening oversight of sustainability or transition work-plans, oversight of compliance with co-financing commitments, support for implementation of recommendations from Transition Readiness assessments or other comparable analyses, etc. More information on the Global Fund’s overall approach to sustainability and transition can be found in the Global Fund’s STC Guidance Note.
18. CCMs must allocate at least 15% of the CCM Funding Agreement amount to support constituency engagement for non-governmental sector activities, in order to facilitate non-governmental constituency consultations, including civil society and key population groups, and to promote and improve the quality of stakeholder participation. Failure to comply with this requirement may affect disbursement decisions in subsequent years and calculation of the Funding Envelope.

19. The use of CCM Funding has the following limitations:
   a. cannot be used to remunerate CCM members;
   b. cannot be used to finance Principal Recipient’s activities;
   c. cannot be used for consultancy costs associated with writing national funding requests for Global Fund financing133;
   d. cannot be used to finance international travels;
   e. cannot be used to purchase a vehicle, nor for long-term lease of a vehicle;
   f. cannot be used for CCM member per diems, except for CCM members representing Civil Society; and
   g. cannot be used to cover travel costs for CCM members, with the exception of Civil Society representatives.

20. The costs included in the Costed Work Plan are reviewed and validated by the Global Fund to determine their eligibility, reasonableness, and consistency with local prices, salaries, operating costs, and historical reports. The CCM Hub Manager approves the Costed Work Plan.

CCM Funding Agreement

21. CCM Funding Agreements are signed by the Global Fund, the CCM and, when applicable, a third entity acting as CCM Funding Recipient.

22. The CCM must nominate two signatory authorities for the signature of a CCM Funding Agreement: CCM Chair or CCM Vice-chair134 and a Civil Society representative.

23. In cases where the CCM is not a legally incorporated body, a CCM Funding Recipient is designated by the CCM to be responsible for receiving and managing CCM Funding on behalf of the CCM. The Global Fund verifies the legal capacity of this entity to receive and manage funds with the support of the Local Fund Agent (LFA).

24. All CCM and CCM Funding Recipient signatory authorities are subject to the Global Fund’s anti-terrorism screening.

25. The CCM Hub Manager is the Global Fund’s signatory authority for CCM Funding Agreements, as well as related amendments and disbursement decisions135.

133 Country Dialogue consultations can however be supported through CCM Funding.
134 A different CCM member, duly appointed and acting on behalf of the CCM Chair or CCM Vice Chair, could sign the agreement.
135 The signature of CCM Funding Agreements, related disbursements and amendments is regulated by the Global Fund Signature Authority Procedure.
26. A CCM Funding Agreement must incorporate:
   a. Agreement Face Sheet
   b. Costed Work Plan for Year 136
   c. CCM Funding Performance Framework for Year 137
   d. Standard Terms and Conditions.

27. A CCM Funding Agreement enters into force once it has been signed by all the necessary signatory authorities, as detailed in the CCM Funding Agreement Face Sheet.

28. For transparency purposes, the Global Fund reserves the right to publish the CCM Funding Agreements, including the CCM Funding Performance Frameworks and the Costed Work Plans, on its website.

29. Amendments to CCM Funding Agreements must be done through Implementation Letters or Notifications Letters. They become effective after the signature and written acknowledgment of the modification by the signatory authorities, as detailed in the CCM Funding Agreement Face Sheet.

Disburse & Report on CCM Funding

Disbursement Decision

30. CCM Funding disbursement decisions are taken annually and approved by the CCM Hub Manager. The first disbursement is processed after the CCM Funding Agreement is signed. The subsequent disbursements are conditioned upon reporting on expenditure and achievement of the performance objectives set forth in the Performance Framework. Late reporting may result in a reduction in the subsequent disbursement decision, which the Global Fund reserves the right to apply.

31. The Global Fund deducts from the disbursement decisions the in-country cash balance, as determined by the Global Fund in its sole discretion, from the preceding CCM Funding Agreement.

32. Failure to meet the performance objectives reduces the subsequent disbursement decisions, with performance-based reductions up to 10% per indicator targeting CCM’s performance, and up to 5% per indicator targeting CCM Secretariat’s performance138. The Global Fund determines the rate to be applied based on the CCM’s historic and overall performance, absorption rate and Funding Envelope.

---

136 Costed Work Plans for the succeeding funding years are approved annually. No Implementation Letters are required.
137 CCM Funding Performance Frameworks for the succeeding funding years are approved annually. No Implementation Letters are required.
138 The base used to apply the performance-based reductions is the Funding Envelope.
**Reporting Requirements**

33. Notwithstanding the involvement of the CCM Secretariat, and the CCM Funding Recipient when applicable, CCMs are solely responsible and accountable for the implementation of their Costed Work Plans, and reporting obligations set forth in this OPN.

34. CCMs must document all activities and operational costs incurred during a funding period, in accordance with the [Standard Terms and Conditions](#) of the CCM Funding Agreements.

35. No later than one month after the completion of each funding year, CCMs must report to the Global Fund their expenditure and achievement of the performance objectives set forth in their Performance Framework, using [Global Fund’s templates](#).

36. The unspent funds at the end of a funding year may be reprogrammed and included in the Costed Work Plan for the succeeding funding year within the same funding period and for the implementation of CCM activities without seeking Global Fund’s written approval. The in-country cash balance at the end of a three-year funding period is deducted from disbursements for the next CCM Funding Agreement, or, in the absence of a new CCM Funding Agreement, returned to the Global Fund.

37. The Global Fund reserves the right to request at the end of each funding year, based on in-country risk level, financial review, audit, or any other action that it deems necessary to ensure CCM’s accountability, as set forth in the [Standard Terms and Conditions of the CCM Funding Agreement](#), through an external agent or LFA.

38. Expenses incurred must be verified at the end of each 3-year funding period by an external audit. The Global Fund reserves the right to request at any time a financial review, audit, or any other action that it deems necessary to ensure CCMs’ accountability, as set forth in the Standard Terms and Conditions of the CCM Funding Agreement, through an external agent or LFA.

39. A recovery process (as defined in the Global Fund Budgeting Guidelines) is triggered when the Global Fund determines that expenditures incurred by the CCM, or when applicable by the CCM Funding Recipient, were not compliant with the relevant CCM Funding Agreement, this OPN or the Global Fund Budgeting Guidelines.

40. Cash refund of the full recoverable amount in the currency in which the funds were disbursed is the default mode of resolution for all recovery cases. Where the recovery and other possible leverages have failed to resolve a recovery matter, the Global Fund’s Recoveries Committee may approve, without limitation, a reduction to a CCM’s annual Funding Envelope by an amount equal to double the outstanding recoverable amount\(^{139}\).

---

\(^{139}\) Refer to the Recovery Process set forth in the [Global Fund Guidelines for Grant Budgeting](#).
Close CCM Funding Agreement

Types of closure

41. There are three types of closure of CCM Funding Agreement with differentiated requirements.

42. *Closure due to end of CCM Funding:* CCM Funding stops being allocated to the CCM.

43. *Closure due to a change of the CCM Funding Recipient:* the CCM decides to transfer the CCM Funding Recipient role from one entity to another. CCM Funding is continued through a new CCM Funding Agreement signed with the newly appointed CCM Funding Recipient.

44. For the two above-mentioned cases, the CCM must complete the following requirements to close the CCM Funding Agreement:
   a. Report on the last year of expenditure and achievement of performance targets;
   b. Transfer the in-country cash balance to the new Funding Recipient, or returning to the Global Fund;
   c. Clear outstanding commitments and refund to the Global Fund non-eligible expenses;
   d. Account for and transfer or dispose non-cash assets: the outgoing entity (CCM or CCM Funding Recipient) must complete an inventory of non-cash assets procured with CCM Funding. In accordance with the *Standard Terms and Conditions* of the CCM Funding Agreements, these assets must be transferred to the new CCM Funding Recipient or, in case of termination of CCM Funding, to national entities. The transfer must follow the necessary legal processes of the country, be endorsed by CCM members and approved in writing by the Global Fund.

45. *Closure due to end of a three-year funding period:* CCM Funding is continued through a new CCM Funding Agreement signed by the same parties. CCMs must in this case:
   a. Report on last year expenditure and achievement of performance targets; and
   b. Clear outstanding commitments and refund of non-eligible expenses.

---

140 The report must be audited and, if applicable, subject to LFA verification, as described in Paragraph 38.
141 The choice between the two options depends on CCM Funding Recipient’s regulations, and timeline for the verification of closing cash balance.
142 The report must be audited and, if applicable, subject to LFA verification, as described in Paragraph 38.
Annex 1. Definition of Terms

1. **Country Coordinating Mechanisms (CCM):** mechanisms for public-private partnership in the coordination with disease programs at country and/or regional level, as set forth in Paragraphs 7 to 12 of the CCM Policy including Principles and Requirements.

2. **CCM Secretariat.** The CCM Secretariat performs day-to-day operations on behalf of the CCM, supports the implementation of the CCM’s decisions, facilitates the participation of all CCM members in CCM meetings and decision-making processes and helps the CCM achieve its strategic mandate. The CCM Secretariat’s duties include extensive coordination, meeting logistics and oversight visits, and communication between the Global Fund and in-country (or regional, as the case may be) stakeholders. To limit actual and potential conflicts of interest, the CCM Secretariat shall be independent from Principal Recipients (PRs), Sub-Recipient (SRs), and other implementing entities.

3. **CCM Funding Recipient:** The CCM Funding Recipient is a legally incorporated body with the authority to enter into legally binding agreements with third parties. When a CCM does not comply with these requirements, it designates a third entity responsible for receiving and managing funds on its behalf. As set forth in the Standard Terms and Conditions of CCM Funding Agreements, the CCM Funding Recipient shall ensure that all funds are prudently managed and shall ensure all the necessary actions to ensure that the funds are used solely to pay for activities in accordance with the agreed Costed Work Plan.
**OPERATIONAL POLICY NOTE**

*Private Sector Co-Payment Mechanism for ACTs*

**Issued on:** 16 December 2013  
**Purpose:** To provide guidance on operationalizing the establishment of a Private Sector Co-payment Mechanism for ACTs in Global Fund Grants

### OVERALL OBJECTIVES

1. The Private Sector Co-payment Mechanism (“Co-payment Mechanism”) is a financing model to expand access to artemisinin-based combination therapies (ACTs) in the private sector, particularly in countries where the private retail sector is a major provider of malaria case management. It is based on the results of the Affordable Medicines Facility-malaria (AMFm) Phase 1 Independent Evaluation, which showed that the combination of price negotiations, a subsidy provided directly to manufacturers, and large-scale mass communications led to rapid and large changes in price, availability, and market share of quality-assured ACTs.

2. This OPN provides guidance to relevant parties (including CCMs, PRs, and the Global Fund Secretariat) on how to establish such a mechanism for those countries that choose to allocate Global Fund funding to the Co-payment Mechanism in new malaria grants or to integrate the Co-payment Mechanism into existing malaria grants supported by the Global Fund. Annexes 1 and 2 describe the process for integrating the Co-payment Mechanism into existing and new malaria grants, respectively.

### POLICY AND PRINCIPLES

**Co-payment Mechanism Components**

3. The Co-payment Mechanism can be used for quality-assured ACTs only (as described in the first footnote of this OPN) and is limited to private for-profit and private not-for-profit first-line buyers. Public sector entities will continue accessing ACTs through traditional grant procurement channels.

4. The Co-payment Mechanism model is comprised of three elements:

   a. **Price negotiations:** Regular negotiations by the Global Fund Sourcing Department at the global-level with manufacturers to establish maximum allowable ex-factory prices of quality-assured ACTs procured using Global Fund grant resources;

   b. **Subsidy provided directly to manufacturers:** Further reductions of the price paid by first-line buyers through a partial payment made directly to manufacturers using grant funds for the procurement of ACTs (a “co-payment”); and

   c. **Supporting interventions:** Country-level activities funded by Global Fund grants or

---

143 An assessment by the World Health Organization of the feasibility to include diagnostic testing in the Co-payment Mechanism has been submitted to the Global Fund, and some countries have requested funding for scaling up diagnostic testing in the private sector. The results of this study will help shape operationalization of the co-payment mechanism for diagnostic testing, in addition to any early experience of these countries. Based on this work, this OPN may be amended for the inclusion of co-payments for malaria diagnostic tests or a separate OPN will be developed subsequently.

144 First-line buyers for the Co-payment Mechanism include international, regional and national buyers/importers from the private not-for-profit and for-profit sectors who purchase ACTs directly from the manufacturer.

145 A partial payment is made by the Global Fund directly to manufacturers on behalf of eligible first-line buyers to cover a proportion of the ex-factory price of quality-assured ACTs plus freight and insurance. The first-line buyer is responsible for any remaining costs of the ACTs not covered by the co-payment plus all direct in-country supply-chain costs, including distribution and storage.
the national government to facilitate the safe and effective scale-up of access to ACTs in the private sector. The following activities represent the minimum bundle of activities identified by the AMFm Phase 1 Independent Evaluation as essential to achieve the greatest impact.

- Mass communication campaigns to increase public awareness about the co-payment and important attributes of co-paid products. These messages may complement existing campaigns to improve malaria case management and the use of ACTs in the public and private sectors.
- Private sector provider training.
- Periodic (e.g. quarterly) monitoring of retail price and availability implemented by an independent entity in order to guide management decisions on implementation of the Co-payment Mechanism by the PR and Co-payment Task Force.146
- Policy and/or regulatory changes at the country level (e.g. banning sales and importation of artemisinin monotherapies, granting waivers for import duties and taxes).

**Accessing Funding for the Co-payment Mechanism**

5. The decision by the CCM to include the Co-payment Mechanism in a funding request to the Global Fund or to allocate funding to the Co-payment Mechanism in their existing Global Fund-supported malaria programs147 should be informed by the country's relevant national malaria control strategy, which defines the role of the private sector in achieving a country's malaria case management targets.148

6. The review and approval of a request for funding the Co-payment Mechanism will be in accordance with the access to funding process. Discussions about funding for the Co-payment Mechanism should be done through the country dialogue process. Once a decision is made, the Concept Note should indicate relevant parameters and design factors to implement the Co-payment Mechanism in a given context,149 including but not limited to, key supporting interventions (described above, to ensure maximum impact of the subsidy), the role of diagnostic testing based on national guidelines and regulatory policies.

---

146 Standard, validated methodologies exist that permit a systematic approach to data collection and analysis without a hefty price tag for monitoring availability and price at the retail level; examples of the tracking survey approach used across AMFm Phase 1 pilots are available.

147 Countries which participated in AMFm Phase 1 will be able to allocate funding to the Co-payment Mechanism through existing Global Fund grants through reprogramming of existing malaria grants, including at the time of Grant renewal.

148 The Co-payment Mechanism should be implemented in the context of a country's long-term strategy to increase access to basic primary health services, given that all patients, whether presenting with fever in the public, private and/or community sectors, should be able to receive a diagnostic test and appropriate treatment, and be captured by national reporting systems. While the availability of diagnostic testing in the private sector remains low and there are limited mechanisms for private retailers to report cases through national malaria control systems, the Co-payment Mechanism provides a proven mechanism to expand access to quality-assured malaria treatment through the private sector in the immediate/short-term.

149 Please see the [Technical Brief on Malaria Case Management in the Private Sector](#).
7. **Co-payment Task Force**: The PR will be required to establish an operational Co-payment Task Force responsible for providing guidance (i.e., including minimizing conflicts of interest and monitoring contracting), supporting the PR on the implementation of the Co-payment Mechanism (e.g., first-line buyer conditions of participation, reviewing and approving proposed co-payment approvals and taking action on the results of the retail price and availability surveys and first-line buyer spot checks), and linking with the country PSM coordination mechanism. The Task Force should be comprised of relevant stakeholders, including but not limited to: government, private sector first-line buyers, professional societies, regulatory bodies, civil society organizations/non-governmental organizations and academia. The CCM (through its Oversight committee) will provide oversight of the implementation of the Co-Payment Mechanism, as per its mandate.

8. **Principal Recipient**: The CCM may consider appointing a separate, public or private sector PR to be responsible for the Co-payment Mechanism. The PR must have the capacity to implement the activities described in Table 1 as well as meet the relevant minimum standards, in close collaboration with the CCM and private sector.

9. **First-line Buyer Agreements**: With the support of the Co-payment Task Force, the PR will maintain First-Line Buyer Agreements with all eligible first-line buyers. These non-negotiable agreements, pursuant to a standard form provided by the Global Fund, are signed by the PR and first-line buyer and establish the terms and conditions with which first-line buyers must comply in order to participate in the Co-payment Mechanism. The PR, in consultation with the Co-payment Task Force, sets the conditions of participation, in line with standards utilized during AMFm Phase 1. At a minimum, first-line buyers should be from the private for-profit or private not-for-profit sector, with all regulatory licenses, waivers, or other governmental approvals, if required and as relevant, to import, sell, market, store and distribute ACTs in the host country; however the PR and Co-payment Task Force may opt to prioritize first-line buyers based on, for example, distribution networks, supply capacities, or other characteristics.

10. **First-line buyers will not be treated as sub-recipients under the Grant Agreement. However, the First Line Buyer Agreement will contain legal obligations under which first line buyers will be required to, among other things, appropriately purchase and re-sell/distribute products procured under the Co-payment Mechanism and document such activities, and the first line buyer will be responsible to the PR should they fail to do so.

11. **The PR will be responsible, under the Grant Agreement between the PR and the Global Fund, for compliance by the first line buyer with its obligations under the First Line Buyer Agreement, as if they were its obligations. The PR shall also be required to conduct periodic**
spot checks of first-line buyers for compliance with their obligations. Special Terms and Conditions will be added to the PR’s Grant Agreement to reflect this arrangement. On behalf of the Secretariat, the LFA will verify compliance of a smaller sample of first-line buyers on an annual basis.

**FINANCING ARRANGEMENTS**

Figure 2. Co-payment Mechanism Funding and Commodity Flow

12. **Disbursement.** Approved funding for the Co-payment Mechanism will not be released to the PR but will be managed by the Global Fund Secretariat through a pooled procurement sub-account and based on the Co-payment Mechanism Implementation Arrangements. The Co-payment Mechanism budget will be disbursed to the pooled procurement account in line with the grant disbursement schedule, and no co-payment commitment for any ACT order can be made until sufficient funding has been transferred. The full budget for co-payments (e.g., for 12 months if on an annual disbursement schedule) will be disbursed (i.e., no partial cash transfer).

13. **Co-payment Approval and Invoicing System.** The Global Fund Sourcing Department will manage the co-payment approval and invoicing system.

   a. **Approvals:** Using an automated and transparent process, the Global Fund Sourcing Department will prepare a periodic (e.g., quarterly) proposal for co-payment allocation against requests for co-payment submitted by manufacturers on behalf of eligible first-line buyers (according to the conditions of participation set by the PR and described in the Implementation Arrangements plan) for all grants which have allocated resources to the Co-payment Mechanism. The “demand-shaping levers” set by Co-payment Task Force and first-line buyer capacity assessments described in the Co-payment Mechanism Implementation Arrangements will be built into the allocation system and can be updated over the life of the grant, as needed. PR approval of the quarterly allocation will be built into workflow management before the co-payment commitment is processed through the GFS-based Co-payment Approval and Invoicing System.

   b. **Invoices:** Manufacturers will submit invoices to the Global Fund, along with acceptable proof of delivery. These will be reviewed and approved by the Co-payment Mechanism focal point at the Global Fund Secretariat.

   c. **Public Reporting/Tracking of Co-payment:** Each round of co-payment allocation will be automatically posted on a public Web Report. This Web Report will include all relevant information (e.g., prices, co-payment, products and quantities procured and delivered, manufacturers, first-line buyers) needed for monitoring co-payment approval. All co-payment approvals and invoices will be tagged with the relevant grant number and will directly interface with the Global Fund’s Price and Quality Reporting mechanism (PQR) and the relevant finance and grant management information systems.

---

151 Demand shaping levers are order prioritization criteria used to determine which requests for co-payment are to be approved in the event that demand for co-payment exceeds available financing. Some examples of demand shaping levers applied during AMFm Phase 1 can be found in Annex 3 of this OPN.
14. **Reprogramming.** The PR (with CCM endorsement) may reprogram funding to and from the ring-fenced Co-payment Mechanism funding for a particular grant, once approved, in line with grant management processes and policies. Reprogramming from the ring-fenced Co-payment Mechanism funding is limited to funds which have not already been committed to ACT co-payments.

**PROCUREMENT AND SUPPLY MANAGEMENT ARRANGEMENTS**

15. Through the Co-payment Mechanism, grant funds will be used to make a co-payment towards procurement which is carried out by private sector first-line buyers; all direct in-country supply-chain costs, including distribution and storage, will be borne by the private sector, not by the Global Fund grant.

16. The PR will complete components of the Implementation Assessment Tool describing the following elements: list of ACTs eligible for co-payment, conditions of participation for first-line buyers, first-line buyer assessment, list of first line buyers if available, subsidy level and demand levers (described below). The PR will complete the Modular tool detailing the quantification for ACTs eligible for copayment, the co-payment subsidies budget per year (i.e. copayments as well as freight and insurance) and all costs related to product management that will be funded by the grant.

   a. **First-line Buyer Assessment:** The PR will describe a maximum annual allocation of co-paid ACTs for each first-line buyer, based on an assessment of distribution network and capacity by the PR, with guidance by the Co-payment Task Force. The proposed allocation across first-line buyers will be approved by the Country Team (LFA review, as needed), and revisited every 6 months in light of requests for co-payment received, new first-line buyers registered, or the findings from first-line buyer spot checks and retail price tracking surveys.

   b. **ACT Quantification:** Estimating the total market for antimalarials in the private sector can be a challenge, due to the lack of available data and the fact that the private sector market is based on demand. The PR should estimate the ACT needs based on the country’s overall case management strategy or link to any national gap analysis.

   c. **Demand Levers:** The Co-payment Task Force will establish the parameters for the automated system to allocate co-payment managed by the Global Fund Secretariat, particularly in the event that demand for co-payment is greater than the available funding.\(^\text{152}\)

17. **Procurement:** Each first-line buyer will procure ACTs from eligible manufacturers with signed agreements with the Global Fund at or below the maximum prices negotiated by the Global Fund Sourcing Department. The first-line buyer is responsible for clearance/import duties and all storage and in-country distribution costs. Through the Co-payment Mechanism, grant funds for co-payment and transport to the first port of entry are paid directly to the manufacturer after confirmation of delivery.

18. **Quality Assurance:** The Global Fund’s Quality Assurance Policy will apply to procurement, pre-shipment inspection and quality control testing of ACTs purchases through the Co-payment Mechanism. PRs will be responsible for allocating resources for post-shipment inspection and quality monitoring for products co-paid on behalf of private sector first-line buyers.

**REPORTING ARRANGEMENTS**

*Figure 3. Co-payment Mechanism Data and Reporting Arrangements*

---

\(^{152}\) Please see Annex 3 for examples of possible demand levers.
19. In addition to monitoring progress against the National Malaria Strategy in the modular tool, which may include tracking the capacity of the health system to report out on malaria testing and treatment, private sector grants with allocations to the Co-payment Mechanism will be required to report out on the following:

   a. **Co-payment commitments and deliveries**: The Secretariat will make all relevant information (e.g., prices, co-payment, products and quantities procured and delivered, manufacturers, first-line buyers) available via a publicly available Web Report.

   b. **Implementation of key supporting interventions**: The price and availability surveys will provide visibility regarding the retail level, and findings from these reports will be submitted by the PR to the CCM, Co-payment Task Force and Secretariat. If the implementation of key supporting interventions (namely, mass communication campaign) is not well synchronized with the arrival in country of co-paid ACTs, a decision by the Co-payment Task Force will need to be taken regarding whether to continue co-payment approvals in the absence of critical supporting interventions.

   c. **Programmatic Reviews and Thematic Evaluations**: As the Co-payment Mechanism will be part of the National Strategy, this will be assessed during periodic Malaria Program Reviews. In addition, a country may decide to implement a special “thematic evaluation” of the Co-payment Mechanism after two years to inform decisions regarding continuation of the investment. Findings from national-level household surveys (DHS, MIS, MICS, ACTwatch) can be considered.

---

**Table 1:** Summary of Co-payment Mechanism Roles and Responsibilities

**Annex 1:** Process for integrating the Private Sector Co-payment Mechanism into existing malaria grants

**Annex 2:** Process for integrating and implementation of the Private Sector Co-payment Mechanism in new grants

**Annex 3:** Description of examples of “demand levers” applied by the Secretariat at the end of AMFm Phase 1
## RESPONSIBILITIES AND PROCESSES

Table 1: Summary of Co-payment Mechanism Roles and Responsibilities

<table>
<thead>
<tr>
<th>Actor</th>
<th>Responsibility</th>
</tr>
</thead>
<tbody>
<tr>
<td>National Government</td>
<td>• Develop National Malaria Control Strategy, defining role of the private sector in malaria case management</td>
</tr>
<tr>
<td></td>
<td>• Provide supportive policy environment for the Co-payment Mechanism (e.g., waivers on import duties/taxes)</td>
</tr>
<tr>
<td>Country Coordinating Mechanism</td>
<td>• Include the Co-payment Mechanism in Concept Note (or allocate funding to the Co-payment Mechanism in the existing malaria grants) and select implementing PR</td>
</tr>
<tr>
<td></td>
<td>• Ensures that the CCM Oversight Committee has included ‘Co-payment’ related activities in its scope of oversight</td>
</tr>
<tr>
<td>Co-payment Task Force</td>
<td>• Advise and provide guidance to PR on the implementation of the Co-Payment Mechanism (including PR’s review and approval of results of each round of co-payment allocation) and minimize potential conflicts of interest</td>
</tr>
<tr>
<td></td>
<td>• With PR, establish and periodically review first-line buyer conditions of participation, proposed allocation across first-line buyers and demand shaping levers</td>
</tr>
<tr>
<td></td>
<td>• Monitor co-payment mechanism contracting arrangements</td>
</tr>
<tr>
<td></td>
<td>• Take action on the results of retail price and availability surveys and first-line buyer spot checks as necessary</td>
</tr>
<tr>
<td></td>
<td>• Link with the country PSM coordination mechanism</td>
</tr>
<tr>
<td>Principal Recipient</td>
<td>• Assess first-line buyer capacity (storage, distribution network/coverage) to inform proposed allocation across first-line buyers with guidance from the Co-payment Task Force</td>
</tr>
<tr>
<td></td>
<td>• Maintain and oversee First-line Buyer Agreements</td>
</tr>
<tr>
<td></td>
<td>• Conduct periodic spot checks of first-line buyers for compliance with terms and conditions of the First-line Buyer Agreement</td>
</tr>
<tr>
<td></td>
<td>• Manage implementation of the grant that includes the Co-payment Mechanism, including execution of the approved Implementation Arrangements plan and supporting interventions</td>
</tr>
<tr>
<td></td>
<td>• Ensure that grant funds are used solely for program purposes and properly managed in implementing the Co-payment Mechanism</td>
</tr>
<tr>
<td></td>
<td>• With guidance from Co-payment Task Force, review, validate and approve results of each round of co-payment allocations proposed by the Secretariat in accordance with demand levers and first-line buyer assessments</td>
</tr>
<tr>
<td>First-line Buyer</td>
<td>• Procure and distribute co-paid ACTs in accordance with terms and conditions of First-line Buyer Agreement</td>
</tr>
<tr>
<td>LFA</td>
<td>• As requested by the Secretariat, verify compliance of a sample of first line buyers with terms and conditions of the First-line Buyer Agreement on an annual basis</td>
</tr>
</tbody>
</table>

[153] The PR will describe the list of ACTs eligible for co-payment, conditions of participation for first-line buyers, first-line buyer assessment, list of first line buyers if available, subsidy level and demand levers in the Co-payment Implementation Arrangements Plan.
20. The integration of funding for the Co-payment Mechanism into Global Fund grants requires the CCM and PR to take on more responsibility for the management of co-payment funding (relative to AMFm Phase 1). The CCM and PR are responsible for allocating resources (quantification, budgeting, rationing), exercising oversight of first-line buyers (including management of conflicts of interest), and commissioning quarterly price and availability surveys. These modifications imply some changes in the level of risks associated with the Co-payment Mechanism.

<td>Complete assessment of eligible first-line buyers.</td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>Co-payment Task Force and PR</td>
<td>Upon completion of first-line buyer assessment and based on the findings, communicate to the Secretariat the proposed annual co-payment allocation split across first-line buyers. (This may be periodically updated and resubmitted for consideration in light of requests for co-payment received, new first-line buyers registered, or the findings from first-line buyer spot checks and retail price tracking surveys.)</td>
<td></td>
</tr>
</tbody>
</table>

For the three grant agreements incorporating the Private Sector Co-payment Mechanism signed prior to the issuance of this OPN, “Identify Co-Payment Task Force” and “Initiate assessment of first-line buyers” (per Step 3) are expected to be the only pre-grant implementation steps that will still need to be undertaken upon issuance of this OPN. For these grants, to avoid a potential interruption in supplies of co-paid ACTs, PRs may request the Secretariat to continue to manage the co-payment allocations on their behalf for a three month grace period while steps 7 to 11 are completed; in this instance, the PR will agree that one quarter of the annual allocation be transferred to the pooled procurement account for co-payments.

Co-Financing

Issued on: 31 March 2017
Issued by: Strategic Information Department
Approved by: Executive Grant Management Committee
Purpose: To describe the operational policies and processes in the grant management lifecycle necessary to fulfill the Board’s requirements for ‘co-financing’.

BACKGROUND AND OBJECTIVES

3. The Global Fund’s co-financing policy is set forth in the Global Fund’s Sustainability, Transition and Co-financing (STC) Policy; which is aimed at:
   1. Enabling long term sustainability of Global Fund supported programs and successful transitions from Global Fund financing; and

4. This Operational Policy Note (OPN) describes the key grant management processes through which to implement the co-financing policy for grants arising from the 2017-2019 allocation period onwards. The OPN also describes implications to grants in countries due to non-compliance with willingness to pay requirements under the 2014-2016 allocation period.

KEY PRINCIPLES

1. The STC policy aims to strengthen the sustainability and impact of Global Fund supported programs through measures that include stimulating increased co-financing for the health sector, health systems, and for the three disease programs.

2. Co-financing, in the context of the Global Fund, pertains to domestic public resources and domestic private contributions that finance the health sector and the national response against HIV, tuberculosis and malaria. Domestic public resources include: government revenues, government borrowings, social health insurance, and debt relief proceeds (including Debt2Health arrangements with the Global Fund). With the exception of loans and debt relief, all other forms of international assistance, even when channelled through government budgets, are not considered as co-financing.

3. The operationalization of the co-financing policy and requirements is guided by the following principles:
   a. **Maximizing leveraging of domestic financing.** The overarching goal of country engagement on co-financing is to leverage additional domestic financing in line with overall health need, National Strategy Plan targets, and fiscal capacity of the country.

---

155 The Global Fund Sustainability, Transition and Co-financing Policy, as set forth in Annex 1 to GF/B35/04 – Revision 1, and approved by the Board in April 2016 under decision point GF/B35/DP08: https://www.theglobalfund.org/media/3221/bm35_04-sustainabilitytransitionandcofinancing_policy_en.pdf
158 Co-financing requirements (previously called counterpart financing and willingness-to-pay requirements) for grants arising from the 2014-2016 allocation period is as set forth in the OPN on Counterpart Financing.
159 Restricted to verifiable contributions from domestic corporations and philanthropies that finance National Strategic Plans (excludes direct out of pocket expenditures borne by households).
160 This pertains to expenditure from loan proceeds in a grant implementation period and excludes repayment and interest.
161 Debt2Health contributions to the Global Fund are considered towards co-financing of disease programs subsequent to Board decision GF/BM32/DP13.
While this OPN specifies minimum additional co-financing investments required to access the full Global Fund allocation across country income groups, the overall focus is to use provisions of the co-financing policy to maximize leveraging of domestic financing;

b. **Systematic assessment of co-financing, and implementation of the policy.** It is important to more systematically enforce implications of non-compliance with co-financing requirements, while at the same time providing maximum flexibility for Country Teams and the Secretariat to enforce such implications in a manner that minimizes negative consequences on grant performance and overall impact. This includes flexibility to enforce implications either via current grants or future allocations, taking into account relevant contextual factors;

c. **Tailoring requirements and differentiation.** Co-financing requirements are tailored along the development continuum according to income level, disease burden and other contextual factors to enable long-term sustainability and successful transitions of disease programs from Global Fund support. The Secretariat’s approach to engaging with countries and monitoring co-financing commitments is also differentiated to focus efforts on mitigating sustainability and transition risks;

d. **Alignment with existing in-country and Global Fund systems and processes.** Rather than establishing parallel processes, co-financing considerations should be aligned to country systems and processes, to the extent possible. For the Global Fund, the implementation of the co-financing policy is integrated with existing operational policies and processes throughout the grant lifecycle. Unless otherwise specified, the processes for implementing the co-financing policy shall follow the existing decision-making processes for access to funding and grant management;\(^{662}\)

e. **Clear communication of co-financing requirements and implications of non-compliance to key country stakeholders.** All communication on co-financing requirements and implications of non-realization of commitments should be addressed to key stakeholders beyond the Principal Recipient and Country Coordination Mechanism, including Ministry of Finance, the Ministry of Planning and other authorities, as relevant. In general, Country Teams should seek to communicate the implications of non-realization of commitments to the highest authorities to which the Global Fund Secretariat has access and with whom the Global Fund has an established relationship.

### POLICY

**Scope and Applicability:**

6. All countries receiving an allocation from the Global Fund for a particular disease component must comply with the co-financing requirements to access the allocation, irrespective of whether the Principal Recipient is a governmental or non-governmental (including the private sector) entity.

7. Multi-country priorities (comprised solely of catalytic funding), non-CCM applicants and countries included in multi-country grants that are no longer eligible for a standalone Global Fund grant for the same disease component are exempt from co-financing requirements. However, countries included in multi-country grants composed of individual allocations must show that they comply with co-financing requirements, on a country by country basis. Applicability of co-financing requirements for such countries is communicated through the Allocation Letter.

8. Co-financing requirements for accessing funds beyond country allocations\(^{663}\), will be subject to the rules governing the use of such funding, if applicable.

---

\(^{662}\) OPNs on Access to Funding, Grant-making and Approval, Grant Revisions, Annual Funding Decisions and Disbursements and Signature Authority Procedure as of date

\(^{663}\) E.g. catalytic funds or additional funding through portfolio optimization as per terms of GAC approval
Core Co-financing Requirements

9. The STC Policy outlines two core Co-Financing Requirements that are prerequisites for countries to access the full allocation. These requirements serve to strengthen the overall financing for the health sector and the sustainability of HIV/AIDS, TB and/or malaria programs. Countries must demonstrate during the implementation period of grants arising from the allocation, the following:

a. Requirement-1: Progressive government expenditure on health to meet national universal health coverage (UHC) goals; and

b. Requirement-2: Increasing co-financing of Global Fund supported programs, focused on progressively taking up key costs of national disease plans.

Requirement 1: Progressive government expenditure on health

10. Governments should increase their health expenditure in accordance with recognized international declarations\textsuperscript{164} and national strategies. Specifically, applicants should demonstrate:

a. For countries where government spending on health is less than 8%: this share will increase over the implementation period of grants arising from the allocation;

b. For countries where government spending on health is equal to or greater than 8%: health expenditure will increase in line with government expenditure such that the current share is at least maintained, if not increased during the implementation period of grants arising from the allocation.

c. For countries with high’, ‘severe’ or ‘extreme’ disease burden\textsuperscript{165} for two or more disease components who have a low prioritization of government spending on health and/or low capacity for domestic revenue capture\textsuperscript{166}: development a robust health financing strategy and incorporation of its provisions in national development frameworks (such as medium term expenditure frameworks) before the end of 2020.

Requirement 2: Increasing co-financing of Global Fund supported programs

11. During the implementation period of grants arising from the allocation, applicants should demonstrate increasing co-financing to progressively absorb costs of key program components such as human resources, procurement of essential drugs and commodities, programs that address human rights and gender related barriers and programs for key and vulnerable populations\textsuperscript{167}.

12. In line with fiscal capacity and health system capabilities, countries should ensure co-financing for priority interventions of the National Strategic Plan to reduce over-dependence on external resources and pave the way for longer term sustainability of Global Fund supported programs.

Co-Financing Incentive

13. In order to encourage additional domestic investments, a co-financing incentive is included as part of the allocation for each country component. The ‘co-financing incentive’ is at least 15 percent of the Global Fund allocation (as specified in the Allocation Letter). In order to access the co-financing incentive, countries must: (1) provide commitments of additional domestic investments to the relevant disease programs and/or related Resilient and Sustainable Systems for Health (RSSH) over the implementation period of the grant arising from the allocation, as per the requirements in the STC policy; and (2) demonstrate realization of such commitments (See Annex-3).

14. To access the co-financing incentive for each relevant disease component, the additional domestic investments must be:

\textsuperscript{164} Such as the Abuja Declaration of 2001
\textsuperscript{165} As defined in Annex 1 of the Eligibility Policy
\textsuperscript{166} Less than 8% of government expenditure on health and/or tax revenues are lower than 15% of the GDP.
\textsuperscript{167} Indicative list of requirements for assessment and will be assessed on a case by case basis.
a. More than the domestic investments made in the corresponding implementation period of the grants arising from the prior allocation period, by at least:
   i. 50 percent of the co-financing incentive for low income countries
   ii. 100 percent of the co-financing incentive for middle income countries;

b. Invested in priority areas of national strategic plans, in line with the investment guidance developed with partners (including region specific guidance, as applicable); and

c. Evidenced through allocations to specific budget lines, or other agreed assurance mechanisms.

15. The focus of additional domestic investments required to access the co-financing incentive must be agreed upon during country dialogue or grant making. As per the STC policy, the following requirements will apply for additional co-financing contributions to access the co-financing incentive:

<table>
<thead>
<tr>
<th>Country Income Classification</th>
<th>Disease Burden</th>
<th>Additional Co-Financing Investments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Income</td>

<td>UMI</td>
<td>Any</td>
<td>Focused on disease components and RSSH activities to address roadblocks to transition, with a minimum of 50% invested in specific disease components targeting key and vulnerable populations</td>
</tr>
</tbody>
</table>

16. By default, the co-financing incentive available for each component is the same percentage across the allocations for each component following the final program split. However, on an exceptional basis, based on country context and priorities, Country Teams may negotiate with country stakeholders and agree to a different distribution of the additional domestic investments to access the co-financing incentive among eligible components, provided that:

a. The revised distribution that is agreed upon will determine (1) the co-financing incentive for each component and (2) the additional investments per component to access the co-financing incentive and (see annex-5 for illustration);

b. The aggregate amount of the co-financing incentive across all disease components remains unchanged;

---

168 In assessing additional domestic investments to a disease program, one-off loan contributions or capital investments for infrastructure development in the prior period can be discounted. Where major efficiencies are targeted in disease program spending in line with technical partner guidance (example: shift from hospitalized TB care to ambulatory DOTS), re-investment of savings to priority areas can be considered as additional domestic investments.

169 According to the Global Fund Eligibility List, based on World Bank’s income classification.

170 Identified by the country either through a transition readiness assessment or transition work plan or through national strategic plans or other relevant assessments.

171 Ibid

172 As defined in the Global Fund Key Populations Action Plan 2014 – 2017 [link to document]

173 Among others, such priorities could include substantive scale up of domestic funding required for a component due to reductions in Global Fund allocation or other donor funding for such component; or where the focus is not to just increase domestic contribution to a disease component but rather to channel efficiencies to a component with already high levels of domestic funding to priority interventions by changing delivery models or provider payment systems (example: shift from hospitalized TB care to ambulatory DOTS)
c. Co-financing commitments for all components are available prior to the final Grant Approvals Committee (GAC) review of the first component;

d. The deviation from the default level of additional co-financing for a component is approved by the GMD Department Head/Regional Manager and communicated to the GAC through the Grant-making Final Review and Sign-off Form.

e. The additional investments per component to access the co-financing incentive and the co-financing incentive for each component will be communicated by the Country Team to the CCM and country stakeholders through a ‘management letter’

17. Extenuating Circumstances: In exceptional circumstances, where the country is not in a position to meet the co-financing requirements, the Country Team may recommend a full or partial \(^{174}\) exemption from the requirements. Any waiver of co-financing requirements will require strong justification, as well as a plan for addressing funding shortfalls, where applicable. Exemptions from co-financing requirements may be considered in limited cases of strongly justified and/or exceptional circumstances, such as:

a. The country is a Challenging Operating Environment (COE), where in-country engagement on domestic financing is not feasible; \(^{175}\)

b. Severe economic/fiscal crisis impacting government revenues/expenditure, which results in lower health and disease spending;

c. *Force majeure* events such as natural disasters, sudden outbreaks of disease, sudden or unforeseen outbreaks of war, civil or political unrest that result in severe disruption of program implementation or in the reallocation of government resources to address emergencies.

18. Partial or full exemptions must be approved by the Head, Grant Management Division through a memo (standardized memo template [link forthcoming]) and may be granted prior to communication of the allocation, during country dialogue, at the time of review of the funding request, at grant making and/or during grant implementation. The Head, Grant Management Division, may seek guidance from the GAC on the request for exemption. Once approved, the exemption applies for the duration of the implementation period. If a full exemption is granted, the applicant has access to the total allocation, including the funding that would be provided as co-financing incentive. If a partial exemption is sought and granted, the country will be reviewed and monitored for the approved lower level of requirements, as outlined in the memo seeking the partial exemption. Exemptions will be communicated by the Country Team to the CCM and country stakeholders through a ‘management letter’. All exemptions will be reported to the Board and captured in the relevant GAC Report to the Board (See Annex-2).

**DETERMINING AND COMMUNICATING THE CO-FINANCING INCENTIVE**

19. By default, 15% of a country component’s allocation will be available as a co-financing incentive if the country makes additional domestic commitments to three diseases as well as RSSH, as per policy requirements.

20. The co-financing incentive may be set at greater than 15% based on the following factors: evidence of less than 8% of government spending on health; the need to proactively strengthen transition preparedness and plan for transition if the country is a UMI (regardless of disease burden) or LMI with low/moderate disease burden; and/or other country specific contextual factors. Such other country specific contextual factors include but are not limited to: how the country compares with peers of the same income classification and region, macro-economic and fiscal trends, programmatic performance and impact against the three diseases, the overall funding landscape for the three diseases, and previous co-financing commitments.

---

\(^{174}\) In instances, where country is in a position to make additional investments in the next phase but not sufficient to access the full co-financing incentive

\(^{175}\) The classification of a country as a COE does not automatically guarantee the application of flexibilities.
21. The key parameters, guidance, and background data to determine the share of co-financing incentive is developed by the Health Financing Team of the Strategic Information Department as part of the Access to Funding processes for finalizing the Allocation Letter.

22. The share of the co-financing incentive of each country component is determined by the Country Team taking into account contextual priorities and considerations, with support from the Health Financing team, where appropriate. Country Team’s recommendations are endorsed by the Department Head/Regional Manager. The proposed co-financing incentive share of the allocations are then reviewed and validated by the Grant Approvals Committee (GAC).

23. Countries are informed of their total allocation across eligible disease components and the share of the allocation for each eligible component that is available as a co-financing incentive, through the Allocation Letter. The required level and focus of domestic investments to access the co-financing incentive is also communicated through the Allocation Letter.

24. The requirements that apply to access the co-financing incentive component of the allocation are based on ‘country income classification’ as per the latest Eligibility List published prior to communication of the allocation. If there is a change to the income classification during an allocation period, requirements associated with the new income level will apply only to the subsequent allocation.

COUNTRY DIALOGUE AND DEVELOPMENT OF FUNDING REQUEST

25. Co-financing of Global Fund supported disease programs and RSSH, as applicable, will be agreed upon during the country dialogue and/or grant making. In addition to the minimum additional investments to access the co-financing incentive, overall co-financing commitments should take into account funding need, existing commitments, fiscal space, sustainability and transition considerations; as applicable.

26. Country dialogue should include engagement on:
   a. The realization of co-financing commitments for the implementation period of the grants arising from the previous allocation period, as applicable;
   b. Co-financing investments in the health sector and disease programs over the implementation period of the grant arising from the next allocation;
   c. Leveraging the co-financing incentive to increase strategic domestic investments for health, in line with country priorities and STC policy requirements;
   d. Ensuring that the funding request for UMICs irrespective of disease burden and LMICs with low and disease burden describes the major bottlenecks to financial sustainability and how these bottlenecks will be strategically addressed with additional domestic investments that comply with the co-financing requirements.

27. Realization of co-financing commitments for the implementation period of the grants arising from the previous allocation period: Evidence of realization of previous co-financing commitments is required to assess implications to grant funds tied to co-financing commitments and/or the subsequent allocation, as well as establish the baseline to determine additional investments for the next implementation period.

28. Evidence of realization of co-financing commitments (see Annex-3) and any justification for not meeting commitments (if applicable) must be formally submitted to the Global Fund prior or along with the submission of first funding request. Evidence of realization of co-financing commitments may be requested earlier, if the Country Team perceives a risk in materialization of commitments. If not at risk of realizing commitments, a country whose first funding request is through the ‘program continuation’ application modality can submit evidence on realization of co-financing commitments during grant making, as per the schedule agreed with the Country Team.

176 Country income classification used for the 2014-16 allocation period applies to previous ‘Willingness to Pay’ requirements.

177 Was referred to as ‘willingness to pay’ in the 2014-16 allocation period.
29. **Co-financing investments in the health sector and disease programs in the next implementation period:** Domestic financing of the broader health sector and of disease programs should be a focus of country dialogue, engaging key stakeholders including the Ministries of Finance and Health.

30. In high burden countries with low government spending on health and/or low revenue capture and countries where there is a declining trend in government health expenditure, country dialogue should explore government plans to develop and/or implement health financing strategies to increase domestic financing of health. With partners and through global platforms, Country Teams and CCMs are encouraged to discuss needs of additional support through grants to accelerate the implementation of health financing strategies, if relevant. Where there are no specific initiatives in place to develop or implement a health financing strategy, the Secretariat and CCMs may explore, in consultation with partners, support for developing health financing strategies through grants.

31. The development of the funding request should include a review of available resources and funding gaps for Global Fund supported programs, preferably based on costed National Strategic Plans. Through the CCM and key stakeholder engagement, country dialogue should discuss co-financing contributions over the next implementation period as well as longer-term strategies for sustaining programs with increased domestic investments.

32. **Leveraging the co-financing incentive for strategic domestic investments for health, in line with country priorities:** Country dialogue should aim to establish strategic actions and co-financing commitments to meet the co-financing requirements and access the total co-financing incentive. See Annex-3 for examples of the types of commitments and elements of a commitment plan.

33. The ongoing country dialogue process must ensure a clear understanding of:
   a. Mechanisms through which government will finance the disease program or RSSH (central/regional/local government revenues, loans, debt relief and/or social health insurance);
   b. Current and planned additional domestic financing of disease programs and RSSH in terms of the extent of funding and the interventions supported;
   c. Timing or annual cycle of co-financing investments; and
   d. The mechanism by which co-financing will be tracked and reported (see Annex-3 for indicative examples), including assurance provided by the country’s public finance management systems and ‘supreme audit institutions’ for reliable monitoring of realization of co-financing commitments.

**FUNDING REQUEST REVIEW AND ASSESSING COMPLIANCE WITH CO-FINANCING REQUIREMENTS**

34. The Country Team (supported by inputs from the Strategic Information Department) will review and assess (a) compliance with core co-financing requirements (see paragraphs 9-12) based on qualitative assessment of co-financing trends, taking into account relevant contextual factors; (b) realization of co-financing commitments for the implementation period of the grant arising from the previous allocation period; and (c) co-financing commitments to access the co-financing incentive for the grant arising from the subsequent allocation period. The Country Team’s assessment is captured in the Secretariat Briefing Note submitted to the TRP. The Country Team’s assessment of compliance will also be captured in the Grant-making Final Review and Sign-off Form, and reviewed by the GAC (see paragraph 50)

**ASSESSING REALIZATION OF CO-FINANCING COMMITMENTS FOR THE**

---

178 Countries with high, ‘severe’ or ‘extreme’ disease burden for two or more disease components, as defined by Eligibility Policy
179 Defined as less than 8% of government expenditure on health and tax revenues are lower than 15% of the GDP
180 Such as the Global Financing Facility.
181 For program continuation, the Country Team will present the assessment of compliance to the GAC
PREVIOUS ALLOCATION PERIOD\textsuperscript{182}:

35. Realization of a co-financing commitment is defined as reasonable assurance of either execution of funds for agreed upon activities or implementation of agreed upon activities (See Annex-3 for illustrative examples of evidence that supports realization of co-financing commitments).

36. In assessing co-financing in the implementation period of grant(s) arising from the previous allocation, it is expected that information on budget execution for completed fiscal years and the budget of the final implementation year will be reviewed. With respect to the execution/or budgeting of funds, countries will be considered as compliant with requirements to access the co-financing incentive of the previous allocation\textsuperscript{183}, if:
   a. Realization of co-financing commitment in completed fiscal years plus budget allocated for the final year in USD/EURO\textsuperscript{184} is equal to or higher than the requirements to access the co-financing incentive (willingness to pay of the 2014-16 allocation), as per policy existing at time of the previous allocation;\textsuperscript{185} OR
   b. Realization of co-financing commitment in completed fiscal years plus budget allocated for the final year in local currency, adjusted for inflation is equal to or higher than the requirements to access the co-financing incentive (willingness to pay of the 2014-16 allocation) as per policy existing at the time of the previous allocation

37. In High Impact and Core countries, the Finance Specialist, with support of Health Financing Team (if applicable) will be responsible for assessing evidence on execution of funds and allocation of budget funds committed towards meeting co-financing requirements and the extent to which the required co-financing commitments were realized. The Fund Portfolio Manager, taking into consideration the assessment of the Finance Officer and supplementary evidence on implementation of agreed upon activities, determines compliance with co-financing requirements in consultation with the Legal Officer and other Country Team members (as applicable). In Focused countries, the Fund Portfolio Manager will determine compliance with support from the Health Financing Team and/or STC Specialists (as applicable) and in consultation with the Legal Officer\textsuperscript{186}

38. The possible outcomes of the compliance determination and their implications are summarized below:
   a. Requirements Met: Requirements are considered met if execution of funds or implementation of agreed activities in completed fiscal years (a) is greater than requirements to access the co-financing incentive OR (b) meets the requirements together with budget/approved implementation plan for the final year and there are no identified risks for execution of the allocated budget/implementation plan
      Implications: There are no implications to existing grant(s) or the new allocation, if requirements are met
   b. Requirements Conditionally Met: Requirements are considered conditionally met, if execution of funds or implementation of agreed activities has been inconsistent with actual commitments, but allocated budget/approved implementation plan for the final year implies that the country will meet the requirements to access the co-financing incentive. Implications: If requirements are deemed conditionally met, the implications are the following:
      i. Country teams, with the support of the Health Financing Team, should monitor realization of commitments during the remainder of the implementation period;
      ii. Where feasible and appropriate\textsuperscript{187}, Country Teams should consider tying subsequent disbursements to realization of commitments;

---

\textsuperscript{182} Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\textsuperscript{183} Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\textsuperscript{184} Depending on which currency the country had used to provide commitments
\textsuperscript{185} For the 2014-16 allocation; the minimum requirements of additional investments was 25% of the co-financing incentive (referred to earlier as ‘willingness to pay’) for low income countries, 50% for lower LMI, 100% of upper LMI, and 200% for UMI. For subsequent allocations, as per the STC Policy, outlined in paragraphs 14-15
\textsuperscript{186} The same process will be applicable for assessment of compliance during grant implementation
\textsuperscript{187} Disbursement can be linked to specific co-financing milestones based on an assessment of potential impact of its withholding, should co-financing not materialize
iii. Subsequent actions based on whether requirements were ultimately met or not met

c. **Requirements Not Met with Justifiable Circumstances:** If country does not meet requirements to access the co-financing incentive, but has justifiable reasons for non-compliance (see paragraph 17). **Implications:** Exemption of requirements, approved by the Head, Grant Management Division through a memo based on a standardized memo template (see paragraph 18 and Annex 2).

d. **Requirements Not Met:** If country does not meet requirements to access the co-financing incentive, and has no justifiable reasons (see paragraph 17) for non-compliance. **Implications:** The implications of not meeting requirements include the following:

i. Withholding of disbursements or reduction of grant funds during the current grant implementation period, where feasible and appropriate; or

ii. Downward adjustment of subsequent allocation, proportionate to the level of non-realization of commitments, where feasible and appropriate.

### 39. Applying consequences of non-realization of co-financing on existing grants:

Disbursements may be withheld or the grant funds amount may be reduced, for the grant (s) arising from the prior allocation period, in the event of non-realization of commitments to access the co-financing incentive.\(^{188}\) The proportion of realized co-financing commitments will be applied to the amount provided as co-financing incentive,\(^{189}\) and the residual amount either withheld as disbursement or reduced from the grant funds amount (See Annex-4 for illustration).\(^{90}\)

Disbursements may be withheld for non-realization of co-financing commitments at any point of time during the implementation period. The Principal Recipient will receive notification of the reduced disbursement through a Management Letter accompanying Disbursement Notification Letter (see Annex-2).

The grant funds amount may be reduced for non-realization of co-financing commitments, in the final year of implementation. Reduction of grant funds and the related program revisions (if applicable) should be processed following the OPN on Grant Revisions. After approval, reductions in grant funds amount due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

### 42. Applying consequences of non-realization of co-financing on subsequent allocation:

Non-compliance with co-financing requirements will result in reduction of subsequent allocation, if the country is not exempted from requirements and did not have consequences of not meeting co-financing requirements\(^{91}\) applied to existing grants. The amount to be deducted from the subsequent allocation will be calculated in the same manner as outlined in paragraph 39. However, given potential for significant reductions in subsequent allocations, any adjustments to future allocations because of non-realization of co-financing commitments will be proportional to any reductions in allocations\(^{192}\) (See Annex-4 for illustration). The reduction will be prorated across the eligible components of the subsequent allocation. Any reductions to the allocation will have to be approved by the GAC. A GAC review can be requested by Country Teams, in consultation with A2F, for downward adjustments to the allocation due to non-realization of co-financing commitments (See OPN on Access to Funding, Grant-making and Approval). GAC review for downward adjustment of allocation should be scheduled sufficiently in advance of the final GAC review of the disbursement-ready grants to provide the necessary time to negotiate budgets for the revised upper-ceiling amount. After approval, reductions in allocation due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

\(^{188}\) Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\(^{189}\) Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\(^{190}\) The reductions will be applied to individual grant components, proportionate to share of co-financing incentive applicable to each component. However, for grants under the 2014-16 allocation, reductions can apply to any grant component in any proportion as per strategic requirements of the portfolio since willingness to pay commitments were not tied to a specific component.
\(^{192}\) Withholding of disbursements or reduction of grant funds

Proportion will be capped at 100%, for countries receiving a higher level of funding in the current allocation
ASSESSING CO-FINANCING COMMITMENTS TO ACCESS THE CO-FINANCING INCENTIVE FOR THE NEXT ALLOCATION:

43. The amount of the ‘co-financing incentive’ available to each component will be proportional to the level of additional co-financing commitments provided by the country, unless justified by extenuating circumstances (see paragraph 17).

44. For countries applying via program continuation’ application modality, co-financing commitments should be provided during grant-making, prior to the final GAC approval of the grant. For full and tailored funding requests, it is expected that co-financing commitments to access the full co-financing incentive for a component is submitted along with the funding request. If additional time is required for country processes, the commitments can be formalized at grant-making or during grant implementation, provided indicative commitments are available prior to final GAC. If the time required for formal commitments extends into grant implementation period, grant agreements must have ‘grant requirements’ specifying the time-frame when the co-financing commitments will be provided and the expectations of realization of these commitments.

45. If during grant making sufficient commitments (either indicative or formal) to access the full co-financing incentive are not forthcoming, the allocation will be proportionally reduced based on available co-financing commitments, unless exempted. Any reductions to the allocation will have to be approved by the GAC. A GAC review can be requested by Country Teams, in consultation with A2F, for downward adjustments to the allocation (See OPN on Access to Funding, Grant-making and Approval).

46. After approval, reductions in allocation due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

GRANT APPROVAL

47. Co-financing considerations at grant approval as well as subsequent monitoring during grant implementation will be differentiated based on whether there is a material risk for realization of commitments. Figure-1 provides an illustrative list of key risks that should be considered by the Country Team.

Figure-1 Risk based approach for Approval and Monitoring of Co-Financing Commitments

<table>
<thead>
<tr>
<th>Illustrative Risks</th>
<th>Material Risk</th>
<th>Low Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor track record of meeting previous commitments (less than 75% unless justified)</td>
<td>Sign off on commitments from MOF or other relevant bodies/processes</td>
<td>MOF Sign-off encouraged</td>
</tr>

48. If the Country Team determines that there is a material risk of non-realization of co-financing commitments, appropriate mitigation measures such as endorsement of co-financing

---

193 Ongoing processes for budget formulation, parliamentary approval, development of medium term expenditure frameworks, approval of national strategy plans, development of sustainability plans, resource tracking etc.

194 As part of the ORR, a framework is currently being defined to measure and monitor key risks levels across the organization, including co-financing risks.
commitments by the Ministry of Finance/other relevant bodies specific to the country and/or specific grant requirements should be presented to the GAC for approval.

49. Country Teams should consult their Legal Officer to capture co-financing requirements in the grant agreement, which will depend on the Country Team’s assessment of risk and endorsement by the GAC. Accordingly, two options are available:

- No Material Risk: If it is determined that there is a low risk of non-realization of domestic commitments, a generic grant requirement must be included in the grant agreement that reserves the right of the Global Fund to withhold funding during the implementation period of the grant (through withholding of disbursements or reduction of the grant funds amount), or from the subsequent allocation proportionate to non-compliance with the additional domestic commitments.

- Material Risk: If it is determined that there is a material risk of non-realization of domestic commitments, country-specific grant requirement(s) that will formalize the co-financing commitments for the implementation period must be included in the grant agreement. The grant requirement will specify annual co-financing investments or specific outputs related to co-financing commitments (as applicable), and the mechanisms and time-frame for reporting realization of co-financing commitments. If appropriate, the grant requirement should specify the disbursement amount per year that is tied to realization of co-financing commitments. The amount tied per year will generally be proportional to the amount of co-financing commitment per year as confirmed to the Global Fund. If appropriate, the Country Team may at its discretion tie specific components of the grant budget to realization of co-financing commitments.

50. The Country Team captures its assessment of risk of non-compliance with co-financing requirements and the outcome of the grant-making considerations on co-financing in the Grant-making Final Review and Sign-off Form. By recommending the proposed grant for Board approval, the GAC will also be endorsing the assessment of risk of non-compliance with co-financing requirements and the option recommended by the Country Team for the monitoring of realization of additional domestic commitments during the implementation period.

MONITORING CO-FINANCING COMMITMENTS DURING GRANT IMPLEMENTATION

51. The monitoring of co-financing commitments and implications of non-compliance will be differentiated as presented in the table below:

<table>
<thead>
<tr>
<th>Option</th>
<th>Grant Agreement</th>
<th>Approval of Approach</th>
<th>Monitoring</th>
<th>Implications for Non-Compliance</th>
<th>Approval of Implications</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Generic grant requirement in grant agreement for countries with low risk of non-realization of co-financing commitments, that reserves the right of Global Fund to withhold funding proportionate to non-compliance</td>
<td>GAC</td>
<td>Periodically followed up through country engagement, budget execution reports, NHA, NASA, and partner data</td>
<td>If evidence of non-compliance, based on country context, strategic requirements and impact on the program; one or more of the following actions: (a) withholding of disbursement</td>
<td>Withholding of disbursement as per OPN on Annual Funding Decisions and Disbursements</td>

<td>Monitoring of specific commitments as per the terms of the grant requirement in the grant agreement (i.e. at the time of an Annual Funding Decision or other specified date).</td>
<td>(b) reduction in grant funds amount (c) reduction of subsequent allocation</td>
<td>Revisions Reduction of Allocation – GAC Approval</td>
</tr>
</tbody>
</table>

52. In exceptional cases, depending on the context, risk profile and country specific requirements, verification of realization of co-financing commitments may be included within the terms of reference of the external audit or LFA services.

53. If a country does not meet its additional co-financing commitments, it is mandatory to have a country-specific requirement in all subsequent grant agreements until a track record of compliance can be (re-) established.

## PROCESS AND RESPONSIBILITIES

### RESPONSIBILITIES

54. **Country Team**: Strategic engagement and negotiation of co-financing to enhance sustainability of Global Fund supported programs, appropriate to the country context. Provide necessary guidance to country stakeholders on co-financing requirements and articulation of its compliance through relevant documentation and mechanisms at the time of accessing funding and grant implementation. With support from the health financing team, assess compliance, with co-financing requirements at the time of accessing funding and reflect the assessment in ‘Secretariat Briefing Notes’ and GAC documentation. Incorporate ‘requirements’ related to co-financing commitments in Grant Agreements based on country context and requirements, and accordingly track their materialization during grant implementation. Take appropriate actions for non-compliance in line with guidance provided in the OPN based on country context, strategic requirements and impact on the supported program(s).

**High Impact and Core Countries**

a. **Fund Portfolio Manager (FPM) supported by Program Officer(s)**: Lead Global Fund negotiations and decision making related to co-financing requirements in the grant lifecycle. Ensure timely communication of co-financing requirements and decisions related to co-financing to country stakeholders. Leverage Secretariat resources’ and strategically engage with country stakeholders to advocate and support actions for improving co-financing and sustainability of Global Fund supported programs.

b. **Finance Specialists**: Finance Specialists advise and strengthen Country Team understanding of public financing mechanisms in the country; monitor grant conditions related to co-financing; responsible for assessing evidence on execution of funds committed towards meeting co-financing requirements, with support of the Health Financing Team, where applicable; incorporate verification of co-financing
within the terms of reference of the external audit or LFA services, where appropriate; and provide internal clearance prior to approval of withholding of disbursements, reduction in grant funds and/or reduction of future allocation for non-realization of co-financing commitments, as per normal processes for disbursements, modifications in grant agreements, and GAC approvals.

**Focused Countries**

c. **Fund Portfolio Manager (FPM):** Lead Global Fund negotiations and decision making related to co-financing requirements in the grant lifecycle. Leverage Secretariat resources’ and strategically engage with country stakeholders to advocate and support actions for improving co-financing and sustainability of Global Fund supported programs. Responsible for assessing evidence on execution of funds committed towards meeting co-financing requirements, with support of the Health Financing Team and/or STC Specialists, where applicable.

d. **Portfolio Support Team:** With support of the Health Financing Team and/or Sustainability and Transition Specialists, if applicable, the PST provides internal clearance prior to approval of withholding of disbursements, reduction in grant funds and/or reduction of future allocation for non-realization of co-financing commitments, as per normal processes for disbursements, modifications in grant agreements, and GAC approvals. Incorporates verification of co-financing within the terms of reference of the external audit or LFA services, where applicable.

**All Countries**

e. **Legal Officer:** Incorporates co-financing requirements in grant agreements in a manner that is enforceable and consistent with Board and Secretariat policies; advises on determination and legal implications of non-compliance with co-financing requirements; and provides the internal clearance prior to approval of actions to enforce consequences of non-compliance.

f. **Public Health and Monitoring & Evaluation Officer** Where appropriate, support negotiations by identifying key programmatic gaps that could be potentially supported by the government; assess commitments to absorb existing support and/or scale up program provided through previous requests to the Global Fund; support assessment of evidence with regard to implementation of agreed upon activities.

  g. **Health Product Management Specialist:** Where appropriate, assess implications of commitments for absorbing and/or scaling up procurement of drugs and commodities. Support as required tracking of realization of specific co-financing commitments related to procurement.

55. **Health Financing Team:** Based on requests from Country Teams, provides technical support and advice for co-financing negotiations, assessment of public financing mechanisms, macroeconomic and fiscal outlook, updated data and other information inputs on program and health sector financing; capacity building of Secretariat staff and sharing of best practice; supports assessment of compliance with requirements at the time of accessing funding and tracking materialization of co-financing commitments during grant implementation. Responsible for tracking and reporting of progress on co-financing at the portfolio level including KPI on domestic financing and actions taken for non-realization of commitments; and facilitating support of technical partners in expenditure tracking and development of sustainability plans.

56. **Sustainability and Transition Specialists:** Supports negotiation of increased domestic financing to enable the gradual absorption of Global Fund financed interventions into government-supported programs and to comply with the requirements of the co-financing policy; supports country engagement on transition plans and related co-financing; supports strategic initiatives to strengthen co-financing, sustainability, and transition preparedness, including (as appropriate and relevant) enhanced access of transition countries to favorable
prices for health products, innovative financing schemes, etc.; supports monitoring and assessing compliance with co-financing requirements in applicable focused countries, within the context of ongoing country work on sustainability and transition.

57. **Sustainability, Transition and Co-Financing Coordination Mechanism (including STC Working Group and Steering Committee, as applicable):** Support integration and mainstreaming of co-financing considerations within grant management processes; identify needs and facilitate development of guidance, tools, training and skill-sets required to effectively operationalize co-financing policy requirements; coordinate internal and external communication on co-financing issues.

58. **External Relations Department:** Implement multi-sector advocacy strategy to promote increased domestic financing for health by reaching key decision-makers through country engagement, global and regional platforms; facilitate targeted country support for domestic resource mobilization for health; private sector engagement on domestic financing; support the development and implementation of innovative financing mechanisms such as Debt2Health, Social Impact Bonds, and Blended Finance, based on direction provided by the Audit and Finance Committee.

59. **Policy Hub:** Coordinate development of Global Fund strategies and Board policies on sustainability, transition and co-financing; incorporation of co-financing considerations in Strategy Implementation Plan and its monitoring.

60. **Access to Funding Department:** Facilitate and support TRP/GAC review process and GAC reports to the Board; provide applicant support for submission of funding requests; and facilitate GAC reviews for compliance with co-financing requirements, where applicable. In addition, take an active role in advising country teams on the requirements of Global Fund co-financing policies, and develop best practices examples of how co-financing has strengthened sustainability and transition preparedness.

61. **Risk Department:** As part of the Risk Specialist’s oversight role in the grant cycle, the co-financing risks will be analyzed in selected High Impact and Core portfolios, especially during grant-making and disbursements. As necessary, the Risk Specialist will also input in identifying options for applying consequences of non-compliance with co-financing requirements.

62. **Technical Review Panel:** Reviews Secretariat Briefing Notes and Funding Requests to assess implications of co-financing on program targets and sustainability of programs; and assess material program impact of reduction of grant funds amount due to non-compliance with co-financing requirements, as per OPN on Grant Revisions.

63. **Grant Approvals Committee:** Validates share of co-financing incentive for each disease allocation and exceptional revision in distribution of co-financing incentive among components; through normal GAC review process prior to making funding recommendation to the Global Fund Board, approves assessment of compliance with co-financing requirements, assessment of co-financing risks, grant requirements for co-financing, approach for monitoring co-financing; approves reduction of allocation due to non-compliance with co-financing requirements.

64. **External Auditor/Local Fund Agent:** Where relevant, external audit or LFA services to be used as a source of assurance for appropriate monitoring and verification of compliance with co-financing requirement.

65. **National Government:** (as represented by the ministries of health, finance and/or other relevant authorities) is expected to engage in negotiations to augment sustainability of Global Fund supported programs, commit additional government investments to Global Fund supported programs according to specific timelines that can be tracked and reported, and

---

195 Refer to OPN on Risk Management Across the Grant Lifecycle
provide official documentation as evidence of government commitments and spending during grant implementation.

66. **CCM:** Responsible for facilitating engagement with country stakeholders and advocates for additional domestic investments in Global Fund supported programs with key country stakeholders, including appropriate government authorities as required. Ensures submission of co-financing commitments with the funding requests, and facilitates monitoring and reporting of materialized commitments during grant implementation.

### MONITORING AND REPORTING

67. Progress on co-financing will be monitored and reported to the Board and within the Secretariat by the Strategy, Investment and Impact Division, as part of the oversight of the overall Global Fund portfolio:

   e. **Corporate KPI on Domestic financing (KPI 11).** Annual reporting on progress with realization of co-financing commitments. Reporting to provide supplementary information on co-financing commitments to Global Fund supported programs and RSSH

   f. **GAC Report to the Board.** GAC recommendations to the Board for grant approval to include the amount of additional domestic commitments made by countries reviewed in each wave.

   g. **Strategy Implementation Plan:** Implementation KPIs and milestones under Strategic Objectives 1 and 4

### ANNEXES

68. The following Annexes provide guidance on the relevant processes:

   - Annex 1: Snapshot of Co-financing considerations in Grant cycle
   - Annex 2: Decision Making Process for Co-financing
   - Annex 3: Negotiation and Tracking Additional Domestic Investments
   - Annex-4: Illustration for reduction of grant funds and subsequent allocation for noncompliance with co-financing requirements
   - Annex-5: Illustration for revision of default co-financing incentive among eligible components
   - Annex-6: Data Sources for Co-Financing
   - Annex-7: Assessment and Reporting of Compliance with Co-Financing Requirements
# Annex-1: Snapshot of Co-financing considerations in funding cycle

Annex 3: Negotiation and Tracking Additional Co-Financing Investments

1. Illustrative areas for additional domestic investments include:
   i. Strategic benchmarks set internally by Global Fund regional management, if applicable;
   ii. Direct investments to scale coverage of key intervention in accordance with national targets (example: targeted interventions such as harm reduction, drugs, commodities, equipment);
   iii. Absorption of existing Global Fund support (example: recurrent costs such as human resources\textsuperscript{106}, targeted interventions, drugs, commodities); allowing the release of Global Fund resources to other priority areas;
   iv. Co-financing of specific Global Fund support. Examples include:
      a. In-country storage and distribution costs of drugs and commodities procured with Global Fund support;
      b. Mass campaign distribution costs of LLINs procured with Global Fund support;
   v. Investments to address health systems bottlenecks to sustainability and transition
   vi. Reinvestment of savings from reform of service delivery (example: shift from hospitalized TB care to ambulatory care) in priority interventions
   vii. Progressive increases in the total health budget, particularly in low income settings, where the Global Fund is a major source of health funding;
   viii. Innovative financing mechanisms developed by the country such as health funds or approved Global Fund mechanisms for innovative financing (example: Debt2Health)

2. Types of commitments acceptable to the Global Fund will depend on the country context, official nature of commitments, trends in government spending and past history of meeting commitments.
   i. Commitments that are based on approved national strategic plans, medium-term expenditure frameworks, budget program, budgeted transition plans or other official documents are acceptable, provided the government has a reasonable track record of meeting its commitments.
   ii. In case of countries where government spending show strong increasing trends but official medium-term commitments is not available, commitments negotiated during country dialogue and confirmed by the CCM as part of the concept note submission, should be sufficient.
   iii. In case of other countries which have a poor track record of government spending or require significant increases in government spending to avail the co-financing incentive, commitments negotiated as part of the country dialogue need to be formalized by the Ministry of Finance or other relevant authorities, as appropriate. A formal commitment should specify:
      a. Annual cycle of investments
      b. Specific activities financed
      c. When information of budget allocation and execution will be available
      d. How realization of commitment will be verified and reported (budget line, implementer accounts etc.)

3. Illustrative examples of mechanisms for tracking realization of co-financing commitments during grant implementation include:
   i. Disbursement/expenditure against earmarked budget allocations;
   ii. Funds release for procurement orders;
   iii. Funds release to implementing agencies;

\textsuperscript{106} Global Fund investments in recurrent costs, such as that for human resources in the public sector, should be considered only if it is strategic to the objectives of grant support. To ensure sustainability, the country needs to develop a medium-term plan for transitioning such support to the government budget.
iv. Estimates of expenditure approved by appropriate authorities Ministry of Finance/ Finance Department of Ministry of Health along with supporting evidence;

v. Outputs of routine expenditure tracking exercises such as National Health Accounts, National AIDS Spending Assessment, Public Expenditure Review, etc.

vi. Evidence of absorption of specified human resources on government payroll;

vii. Evidence of implementation of provisions of an agreed sustainability plan

viii. Evidence of implementation of other agreed upon activity such as distribution of drugs, harm reduction interventions, scale up of services, conduct of special surveys or training
Annex-4: Illustration for reduction of grant funds and 2017-19 allocation for noncompliance with co-financing requirements under 2014-2016 allocation period

Annex-5: Illustration of exceptional revision of default level of additional co-financing among eligible components- Reference paragraph 16
(Example of a Country with a US$120 M Allocation with a 20% Co-Financing Incentive)
Annex 6: Data Sources for Co-Financing

Global Fund Resources
- Historical data reported to Global Fund in previous proposals and requests for continued funding
- Data and background information elicited in funding request
- LFA assessment report
- Program financing database maintained by the health financing team

Partner Resources
- Health: [http://apps.who.int/nha/database/ChoiceDataExplorerRegime.aspx](http://apps.who.int/nha/database/ChoiceDataExplorerRegime.aspx)
- Health: [http://www.who.int/nha/country/en/](http://www.who.int/nha/country/en/)
- Disease and Health: [http://www.healthsystems2020.org/section/resources/](http://www.healthsystems2020.org/section/resources/)

Country Resources
- Health and disease strategy documents
- Medium Term Expenditure Framework (MTEF)
- Government Budgets and Supporting Documents
- Budget Outturns/Obligations
- Government Accounts
- Accounts of Autonomous entities such as NACs/Disease Funds
- Beneficiary Payment Statement of Social Security Spending
- National Health Accounts (NHA) with disease sub-accounts
- National AIDS Spending Assessment (NASA)
• Public Expenditure Reviews (PER)
• Public Expenditure Tracking Surveys (PETS)
• Program Evaluation/Review Reports
Annex 7: Considerations for Assessing and Reporting of Compliance with Co-Financing Requirements

A. Non-exhaustive list of issues for consideration in assessment of co-financing requirements

1. Understanding of public financing mechanisms
   a. How is government contribution to the disease program is financed—through revenue resources, loans, social health insurance, and/or debt relief?
   b. Which levels of government incur disease spending—central, regional and local?
   c. Through which ministries, departments or agencies at each level of government does government spending occur?
   d. Is all lower-level government spending from its own resources or do they include transfers from a higher level of government?
   e. What interventions or actions do government contributions fund?
   f. Do government budgets have earmarked budget heads or line items to capture government disease spending?
   g. Is all government disease spending captured by earmarked budget heads or line items?
   h. When earmarked budget heads or line items are not available or if they do not capture all government disease spending, how is government spending reported?
   i. Are loans availed from international sources reported under government spending or under external funding?
   j. When funding from external sources is routed through government budgets, how are they accounted for?
   k. What are the data sources for the reported spending, which can be verified?
   l. Are there bottlenecks in budgeting, financial management, audit, or reporting systems that make it difficult for the country to report actual expenditure on disease programs?
   m. If there are bottlenecks hindering routine reporting of expenditure data, can they be addressed through support provided through grants?

2. Data availability
   a. Is data on government spending on disease program reported to Global Fund through proposals and requests for continued funding and/or technical partners available?
   b. What does the reported government-spending figure represent?
      i. All or part of government spending
      ii. Earmarked disease spending only or do they include apportioned health system costs or estimates based on assumptions regarding proportion of human resources deployed, general health services utilized etc.
      iii. Recurrent programmatic spending or do they include capital investments also
      iv. Budget allocation, budget outturns, actual expenditure or estimates of spending based on historical trends
   c. Is data reported to Global Fund consistent across different periods of time and with that reported to partners? If not, are reasons for inconsistencies known?

3. Analysis of past spending:
   a. Based on historical data what has been actual spending compared to budget allocations and previous commitments
   b. Based on trends available from data on past spending, what is the likelihood of the country meeting the co-financing requirements in the next implementation period
   c. What activities/interventions did the government invest its resources in
d. Do trends of past government spending show a stable or increasing trend?
e. Is there a likelihood of skewing of government spending trends due to severe exchange rate fluctuations, intermittent capital investments etc.

5. Assessment of existing commitments:
   a. Nature of commitments- Are projections for future government spending realistic based on past spending trends? If not, are they based on official commitments either publically available or communicated to Global Fund
   b. Implications of country systems, macroeconomic, policy and financing context, in allocation of resources for health/disease programs; and,
   c. Likelihood of accessing allocation that is available as co-financing incentive.

5. Identifying priority areas for strategic country engagement for co-financing:
   a. Potential areas of additional domestic investments based on country context and requirements;
   b. Potential areas of take-over of existing Global Fund support which will free Global Fund resources to be reinvested in strategic areas;
   c. Assessment of where the country stands, vis-a-vis, regional strategy targets, if applicable.

B: Examples of actions to improve compliance with co-financing requirements
   i. Incorporating requirements for additional domestic investments within national planning processes such for national development plans, medium term budgeting and expenditure frameworks, national disease/health strategies, health sector development plans, budget cycle etc.;
   ii. Plans for utilizing debt relief proceeds or availing loans from agencies, such as the World Bank for the disease program and/or health sector;
   iii. Additional allocation to support specific high impact interventions from discretionary funds available to the government;
   iv. Actions to improve absorption and execution rates of allocated budget;
   v. Incorporating specific budget heads for earmarked allocation to disease program;
   vi. Strengthening systems for expenditure tracking;
   vii. Actions to improve routine reporting of government disease spending in official country documents and/or to technical partners.
Operational Policy Note

Grant Entity Data

Approved on: 11 November 2020, last updated 17 August 2022
Approved by: Executive Grant Management Committee
Process Owner: Finance

Overall Objective

1. The grant entity data (GED) process\textsuperscript{197} enables the efficient and effective delivery of all grant life cycle processes through use of accurate and updated information on Coordinating Mechanisms (CM)\textsuperscript{198}, Principal Recipients (PR)\textsuperscript{199}, Local Fund Agents (LFA) and third-party organizations\textsuperscript{200} (Third Party). These are Global Fund partners that are actively engaged in the grant life cycle and collectively referred to as “Grant Entities” in this OPN.

2. GED refers to the 14 data sets presented in the diagram below. These data sets are critical to the execution of grant life cycle processes and may have legal and/or grant funding implications (i.e., used in the preparation of legal documents and/or release of Grant Funds)

\textsuperscript{197} Formerly known as Master Data process.
\textsuperscript{198} Throughout this OPN, references to CM include any Country Coordinating Mechanism (with or without CCM funding recipient), Regional Coordinating Mechanism (RCM), Regional Organization (RO) or other applicants, as applicable. In addition, unless defined in this OPN or the context otherwise requires, all capitalized terms used in this OPN shall have the same meaning set out in the Global Fund Grant Regulations (2014). For terms not defined in the Global Fund Grant Regulations, please refer to Annex 1.
\textsuperscript{199} And Lead Implementer (LI), if applicable. LI arrangements are only applicable where a government implementer (such as the Ministry of Health) is not mandated to sign Grant Agreements per national laws or other reasons. In such cases, the mandated Government entity (such as the Ministry of Finance or Ministry of Foreign Affairs) signs the Grant Agreement as PR with the Government implementer (such as the Ministry of Health) acting as LI to lead grant implementation. This assignment does not change or waive the accountability and responsibilities of the PR for implementation of the grant under the terms of the relevant Grant Agreement. LI role must be clarified when referred to in the Grant Agreement such as in the grant budgets Summary Budget if an LI has been selected for expenditure tracking purposes. Please consult with the Country Team Legal Counsel for appropriate wording to be included as an attachment to the Summary Budget.
\textsuperscript{200}
3. The key steps for managing GED are presented in the following diagram:

![Diagram showing Grant Entity Data processes: Submit, Review, Validate, Integrity Due Diligence, Data Quality Review]

* And Lead Implementer if applicable (see footnote 3). The relevant GED for Lead Implementers are: Organization Information, Contacts with Notice Rights and Contacts with Access Rights. Lead Implementer GED are all non-Core GED.

---

**Operational Policy**

4. This Operational Policy Note (OPN) defines the principles, rules and requirements for the submission, review and validation, and data quality review of GED. It applies to country and multi-country portfolios and grants.

5. **Guiding Principles**

   i. **GED Responsibility and Accountability.** Grant Entities are the source of their respective GED\(^\text{201}\). They are responsible and accountable for the integrity and quality of the data that they provide to the Global Fund, which includes ensuring its accuracy, completeness and overall compliance with the requirements of this operational policy. Grant Entities are responsible for defining and creating\(^\text{202}\), updating and managing their own information. Global PRs\(^\text{203}\) are also accountable for both their headquarters and country-level GED.

---

\(^{201}\) Under the [Global Fund Data Governance and Design Framework](https://www.globalfund.org), these entities are the data producers.

\(^{202}\) Except in cases defined in Submit GED section of this OPN.

\(^{203}\) As defined in Annex 1.
ii. **GED Protection and Privacy.** GED containing personal data\(^{204}\) which is submitted to the Global Fund is processed and stored in accordance with the [Global Fund Privacy Statement](#) and the [Global Fund Personal Data Protection Regulations](#). These policies ensure the Global Fund abides by internationally recognized standards for protecting personal data. In turn, Grant Entities are responsible for processing personal data in compliance with the requirements on privacy and data protection contained in their contracts with the Global Fund.

iii. **GED Use.** Grant Entity Data is used, among other things, for the execution, monitoring and reporting of grant life cycle processes. The [Global Fund Privacy Statement for Global Fund Grant Funding and Management Activities](#) provides details on the various purposes for which GED may be used.

### A. SUBMIT GED

6. The timely creation and updating of GED is crucial to support end-to-end grant life cycle processes, from funding request development to grant closure. This avoids unnecessary delays in preparing and signing grants, processing annual funding decisions and disbursements, among others. Annex 2 illustrates the use of GED across the whole grant life cycle. Grant Entities must take note of these milestones, and others listed in the respective grant life cycle Operational Policy Notes and Procedures and plan their GED creation or updates accordingly.

7. **Applicable Rules and Requirements.** All Grant Entities must ensure the quality of their GED (i.e. that all required information is complete and accurate with accompanying supporting documents) and that they comply with the applicable rules and requirements for creating and updating GED defined in Annex 3.

8. **Creation and Update.** Each Grant Entity owns and is responsible for creating or updating their GED. However, the Global Fund Secretariat undertakes the creation of new organization information in all cases as new organizations do not yet have access to the Global Fund Partner Portal.

9. Depending on the type, GED is created and updated through the Grant Operating System (GOS) GED Module, the Global Fund Partner Portal (GED Module) and/or the Global Fund System (GFS). Grant Entity Contacts with Access Rights to the Global Fund Partner Portal are required to enter a verification code when logging into the Global Fund Partner Portal (Multi-Factor Authentication) and must agree to the Partner Portal Terms of Use.

### B. REVIEW AND VALIDATED GED

10. **Review.** All GED submitted by Grant Entities undergoes a review process by the Global Fund Secretariat to ensure appropriate checks have been performed on information to be used in grant life cycle processes. The Country Team may also ask the LFA to perform in-country verification of GED of PRs and CCM.

11. The review process focuses on ensuring data quality, specifically:

    i. completeness of GED and supporting documents;
    ii. accuracy of information against submitted supporting documents;
    iii. and compliance with the GED requirements defined in this OPN.

---

\(^{204}\) As defined in Annex 1.
Validation. Based on the review, GED will be validated by the following before being reflected in Global Fund systems:

<table>

</tbody>
</table>

---

205 LI GED (Organization Information, Contacts with Notice Rights and Contacts with Access Rights) follows the validation process for Regular PRs.

206 First Name, Last Name, Role, Recipient Status
C. INTEGRITY DUE DILIGENCE
12. In parallel with the review and validation process described above, the Global Fund Secretariat screens all Grant Entities against (a) international terrorism and (b) sanctions lists. The due diligence review is focused on screening of organization, banking information and contacts data against these lists. The Essential Due Diligence Procedure provides an overview of the process.

D. DATA QUALITY REVIEW
13. Data Quality. To ensure data quality, Grant Entities must undertake a regular (at least annual) comprehensive review and clean-up of their GED focusing on ensuring completeness, accuracy and compliance with GED requirements as well as removing duplicate records or outdated GED. In addition, the Global Fund will carry out a regular data check and cleansing exercise.

14. Deactivate GED. Where a GED record has expired or is no longer valid, it will be deactivated and archived by the Global Fund in accordance with Global Fund regulations on record retention. Depending on the type of GED, the deactivation process can be initiated by Grant Entities. Annex 5 defines the scenarios and approaches for deactivation of GED records.

Specific Multi-Country Considerations

15. The standard approach defined above also applies to multi-country portfolios and grants. The Global Fund’s Portfolio Services Team (PST) is responsible for the internal review of GED relating to Global PRs.
Annex 1. Definition of Terms

1. **Third Party Organization (Third Party):** A Supplier of services or goods who may receive direct disbursements of Grant Funds from the Global Fund. The Direct disbursements may either be requested by the PR or mandated by the Global Fund Secretariat in accordance with the OPN on Annual Funding Decisions and Disbursements.

2. **Global PRs:** refer to (i) all “United Nations” organizations, and (ii) “other Multilateral Organizations”, “International Non-Government Organizations” and “International Faith-based Organizations” implementing in more than one country or multi-country. See Annex 4 of this OPN for the Global Fund categorization of implementers.

3. **Organization information:** refers to information about the organization to be captured in the legally-binding documents for the successful execution of grant lifecycle processes (such as official name, address and legal / disbursement signatories).

4. **Banking Information:** provides details of the bank account that will be used to receive disbursements from the Global Fund (such as Bank Account Number, Account Holder Name, Legal Owner of the Bank account, SWIFT/ABA (where applicable) and IBAN (where applicable).

5. **Contacts with Signatory Rights:** refer to persons that are duly authorized by the organization to sign or acknowledge legally-binding documents and/or to sign disbursement requests.

6. **Contacts with Notice Rights:** refer to the persons that will serve as the contact point for Global Fund notices regarding contractual matters (as per the terms of the relevant Grant Agreement) and/or grant or portfolio-specific correspondences.

7. **Contact with Access Rights:** refers to the person that will have access to the Global Fund Partner Portal to manage GED.

8. **Personal Data:** means any information relating to a natural person who can be identified by such data, from such data and other information, or by means reasonably likely to be used related to such data. This can include biographical data, such as name, sex, marital status, date and place of birth, country of origin, country of asylum, individual registration number, identification number, occupation, religion, ethnicity, sexual orientation, biometric data such as a photograph, fingerprint, facial or iris image, location data, an online identifier, or information that is linked specifically to the physical, physiological, genetic, mental, economic, cultural or social identity of the person.
Annex 2. Illustrative graph visual indicating the importance of GED across the Grant Life Cycle

Grant Entity Data (GED) is foundational to the Grant Life Cycle (GLC)

<table>
<thead>

* HPMT is not yet generated from GOS
** GCT: Grant Cessation Table. It is generated from GOS and attached to the IL, where amendments to the GCT are required.

- For existing PRs, grants can be created after the FR is submitted for TRP Review.
- CCM and LFA Membership lists are used throughout the Grant Life Cycle.
## Annex 3. Rules and Requirements on creating or updating GED

### 1. Organization Information

<table>
<thead>
<tr>
<th>Required Information</th>
<th>Applicable To</th>
<th>Applicable Rules</th>
<th>Supporting Documents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Official and/or Legal name of the organization</td>
<td>PR, CM, LFA, Third Party</td>
<td>Must be the organization name that appears in official or legal documents. PR (and LI if applicable), LFA and Third-Party official name must be in English. For CM, the official name can be in one of the Global Fund official languages, however the CM organization short name must be in English.</td>
<td>All entities (except Third Party): Completed Organization Information Form[^209] EN</td>
</tr>
<tr>
<td>Official Address of the Organization</td>
<td>PR, CM, LFA, Third Party</td>
<td></td>
<td>- Documentary evidence such as certificate of incorporation, Articles of Association, registration certificate or trust deed.</td>
</tr>
<tr>
<td>Type and sub-type of Organization</td>
<td>PR, LI</td>
<td>Implementers (PR and LI if applicable) type and sub-type must be aligned with the Global Fund classification as defined in Annex 4. CM types can be: Country Coordinating Mechanism (CCM), Regional Coordinating Mechanism (RCM), Regional Organization (RO) or Non-CCM.</td>
<td>Third Party - Supplier Information (To be continued on next page)</td>
</tr>
</tbody>
</table>

[^207]: And LI, if applicable (see 3rd footnote of this OPN).
[^208]: See 3rd footnote of this OPN.
[^209]: The official name of an organization is the name that appears on all official or legal documents, such as registrations, constitutional documents and contracts. The organization should provide the document(s) which evidences its official name as part of submission of the signatory authority letter (e.g., Certificate of Incorporation, Articles of Association, registration certificate or trust deed) or a letter signed by an authorized person of the organization confirming the official name. The official name should be specified in English. If the Principal Recipient is proposing to use a non-English official name for Global Fund GED purposes (e.g., French or Spanish), the Country Team should consult with Legal Counsel.
[^210]: Spanish and French versions are courtesy translations only. External stakeholders should complete and submit the English version of this template.
[^211]: This is only applicable if the CM is a legal entity. If the CM is not a legal entity, then these documents are provided by the Funding Recipient; and please consult with Legal Counsel in case of further queries.
### 1. Organization Information

### Annex 4. Global Fund Categorization of Implementers

This annex presents the approach used by the Global Fund in categorizing implementers according to organizational types and sub-types (this approach may be amended or adapted depending on the circumstances, from time-to-time). Please refer to this document for the categorization of organizations that are currently implementing Global Fund grants.

<table>
<thead>
<tr>
<th>Organization Type</th>
<th>Organization Sub-type</th>
<th>International / Local Sub-type Distinction (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Civil Society Organization (CSO)</td>
<td>Community Based Organization (CBO):</td>
<td>N/A</td>
</tr>
<tr>
<td>Organizations/groups that undertake collective action around shared interests, purposes and</td>
<td>CBOs are those organizations that have arisen within a community in response to particular needs or challenges and are locally organized by community members (CSS Technical Brief, 2019).</td>
<td></td>
</tr>
</tbody>
</table>

221 As a specific organization may fall within one or more categories, at any point in time and be categorized for various reporting and other purposes, please consult with the Operational Efficiency Team for any changes or proposed changes to the categorization for any specific organization under this Annex.
<table>
<thead>
<tr>
<th>Organization Type</th>
<th>Organization Sub-type</th>
<th>International / Local Sub-type Distinction (if applicable)</th>
</tr>
</thead>
</table>
| values, generally distinct from government and commercial for-profit actors. Civil society includes charities, development NGOs, community groups, women’s organizations, faith-based organizations, professional associations, trade unions, social movements, coalitions and advocacy groups. | Community-led organizations (CLO)
Groups, and networks, irrespective of their legal status (whether formally or informally organized), are entities for which the majority of governance, leadership, staff, spokespeople, membership and volunteers, reflect and represent the experiences, perspectives, and voices of their constituencies and who have transparent mechanisms of accountability to their constituencies. Community-led organizations, groups, and networks are self-determining and autonomous, and not influenced by government, commercial, or donor agendas. Not all community-based organizations are community led (UNAIDS PCB, 2021). | N/A |
| | Non-Governmental Organization (NGO): An Organization which is independent of government involvement is known as a non-governmental organization or NGOs or non-government organizations. NGOs are a subgroup of organizations founded by citizens, which include clubs and associations providing services to its members and others. They are usually non-profit organizations. Many NGOs are active in humanitarianism or the social sciences, at local and international level. | International Non-Governmental Organizations (INTNGO): NGOs with global presence spanning across countries. |
| | Faith-Based Organization (FBO): An Organization that has values based on faith and/or beliefs. It has a mission based on social values of the particular faith; and most often draws its activists (leaders, staff, volunteers) from a particular faith group. The faith relating to the FBO does not have to be academically classified as religion. Faith-based organizations are grassroots organizations active locally but also on an international scale. | Local Non-Governmental Organizations (LOCNGO): NGOs with mostly domestic presence (in-country). |
| | Multilateral Organization (MO): Organizations formed by three or more nations to work on relevant cross-cutting issues. An MO can fund its projects by receiving funding from multiple governments. | International Faith-Based Organization (INTFBO): FBOs with global presence spanning across countries. |
| | United Nations (UN): All UN organizations / agencies, such as UNDP, UNICEF, UNOPS, and IOM. | Local Faith-Based Organization (LOCFBO): FBOs with mostly domestic presence (in-country). |
| | Others (OTH): MOs that are non-UN, such as International Bank for Reconstruction and Development (IBRD), Inter-American Development Bank (IDB), Caribbean Community Secretariat (CARICOM) | N/A |
| | Ministry of Health (MOH) (including other governmental organizations which report to the Minister of Health) | N/A |

---

222 Forthcoming organization sub-type – will be available after further system enhancement.
<table>
<thead>
<tr>
<th>Organization Type</th>

Operational Procedures

Grant Entity Data

Approved on: 11 November 2020, last updated 17 August 2022
Approved by: Executive Grant Management Committee
Process Owner: Finance
Associated OPN: OPN on Grant Entity Data

Key Operational Policies:

- OPN on Grant Entity Data
- GED Process Maps and High-level RACI
A. Purpose

1. This document provides procedural guidance on Grant Entity Data (GED) submission, review, validation, and data quality review.

2. The key steps in managing the GED process are captured in the following diagram.

![Grant Entity Data processes diagram]

**Legend**

* Review and/or validation might not be required depending on the type of change request. Refer to the GED Operational Procedures for further details.

** And Lead Implementers, if applicable.

- PST: Portfolio Services Team
- Country Team: FPA or PO
- LFA Team: LFA Coordination Team
3. Depending on the applicable GED type, Country Teams and other relevant stakeholders can refer to the relevant section of this Operational Procedures below:
   - Section A: Principal Recipient (PR) Information
   - Section B: Coordinating Mechanism (CM) Information
   - Section C: Local Fund Agent (LFA) Information
   - Section D: Third Party Information
   - Section E: Management of Exceptions
   - Section F: Monitoring and Reporting

4. Sections A-D describes the data quality review and validation that are undertaken by the Secretariat on GED. The review process focuses on ensuring data quality, specifically:
   i. completeness of GED and supporting documents;
   ii. accuracy of information against submitted supporting documents; and
   iii. compliance with the GED requirements defined in the GED OPN.

5. **Integrity Due Diligence.** In parallel with the review and validation, the Global Fund Ethics Office screens all Grant Entities against relevant (a) international terrorism and (b) sanctions lists. The due diligence review is focused on screening of organization, banking information and contacts data against these lists. The Essential Due Diligence Procedure provides an overview of the process. Essential Due Diligence screening will be undertaken daily. If a change request is required to be completed with urgency (i.e., end-to-end completion within 24 hours), the Global Fund Ethics Office must be informed by the Country Team as early as possible to conduct a manual screening, before the change request process is completed.

---

225 And Lead Implementer (LI), if applicable. LI arrangements are only applicable where a Government implementer (such as the Ministry of Health) is not mandated to sign Grant Agreements per national laws or other reasons. In such cases, the mandated Government entity (such as the Ministry of Finance or Ministry of Foreign Affairs) signs the Grant Agreement as PR with the Government implementer (such as the Ministry of Health) acting as LI to lead grant implementation. This assignment does not change or waive the accountability and responsibilities of the PR for implementation of the grant under the terms of the relevant Grant Agreement. LI role must be clarified when referred to in the Grant Agreement such as in the grant budgets Summary Budget if an LI has been selected for expenditure tracking purposes. Please consult with the Country Team Legal Counsel for appropriate wording to be included as an attachment to the Summary Budget.

\(^{230}\) If LFA verification is requested following Legal Counsel review, the Legal Counsel notifies the FPM or PO (as applicable) to arrange for the LFA verification. Once received, the Legal Counsel attaches evidence of the LFA verification in GOS.

\(^{231}\) Where a Global PR is a PR for a multi-country grant not under PST oversight, the PST review will be based on the relevant FPA/PO or FPM recommendation. PST will coordinate with relevant FPMs or FPAs/POs accordingly. This applies to all cases where PST review and/or validation is required.

5) Monitoring and Reporting

1. The operational monitoring and reporting of specific GED processes data points aims at:
   • Ensuring that data about the Global Fund’s Grant Entities’ organizations, banking and contact details are complete and relevant for delivery of key grant life cycle documents, as well as for communication purposes;
   • Addressing the results of data quality reviews;
   • Anticipating the business needs and avoid delays in the execution of core grant life cycle processes; and
   • Monitoring exceptions for senior management follow up and decision making.

2. The operational monitoring and reporting activities is led by Finance, in coordination with sub-process owners (CCM Hub, LFA Coordination Team, and Operational Efficiency Team)

3. The following data points will be monitored:
• Process completion status and timing for each review step in the different GED processes
• Exception reporting (for example, number and details of change requests raised internally, outside of the allowed cases set out in the OPN)
• Number and details of signatory and/or notice contacts, by organization type
• Number and details of contacts, by organization type
• Completion of GED for critical grant life cycle milestones (e.g., grant-making)

C. Acronyms

- **FPM**: Fund Portfolio Manager (including Senior FPM, Disease and State Fund Managers\(^{248}\))
- **PO**: Program Officer for High Impact & Core Portfolios (including Senior PO)
- **FPA**: Fund Portfolio Assistant for High Impact & Core portfolios (including Senior FPA) or Fund Portfolio Analyst for Focused portfolios
- **FS**: Finance Specialist
- **FST**: Financial Services Team
- **PHME Specialist**: Public Health and Monitoring & Evaluation Specialist
- **HPM Specialist**: Health Product Management Specialist
- **PST Specialist**: Specialist in the Portfolio Services Team of Program Finance for Focused portfolios
- **LFA**: Local Fund Agent
- **TRP**: Technical Review Panel
- **GAC**: Grant Approval Committee
- **RM**: Regional Manager
- **DH**: Department Head for relevant High Impact Department
- **CT**: Country Team (comprises: FPM, PO, FPA, Finance/PST Specialist, PHME Specialist, HPM Specialists, Legal Counsel)
- **PR**: Principal Recipient
- **CCM**: Country Coordinating Mechanism
- **TAP**: Technical Advice and Partnerships Department
- **GFM**: Grant Finance Manager
- **MECA**: Monitoring Evaluation & Country Analysis Team
- **AFD**: Annual Funding Decision
- **ADMF**: Annual Decision-Making Form
- **IRM**: Integrated Risk Management (module in GOS)
- **IP**: Implementation Period
- **SR**: Sub-recipient

\(^{248}\) Disease Fund Manager and State Fund Manager review as the FPM, but they do not have approval authorities. The overall accountability for a portfolio remains with the FPM.
Once a grant is signed, work begins to implement the grant. Funds for the first year are committed based on the first annual funding decision and the first disbursement is released to the account of the Principal Recipient. Subsequent disbursements are released based on defined schedules, and the funds for the remainder of the implementation period are committed on an annual basis.

Implementation is monitored by the Secretariat on an ongoing basis. Country Teams, in coordination with LFAs and in-country partners, monitor programmatic activities through regular progress updates, country visits, and programmatic assurance activities. In addition, financial activities are monitored and verified through financial reports and annual external audits.

The ongoing monitoring and reporting feed into regular decision-making on determining grant performance ratings, making annual funding decisions, setting operational risk levels and putting in place management actions and other requirements. It may also lead to adjustments to the grant (programmatic and/or financial) to respond to the implementation environment as well as to maximize the impact of programs.

The approaches and requirements during grant implementation are differentiated depending on the portfolio category.
Operational Policy Note

Operate Implementation and Monitor Performance

Approved on: 28 April 2022
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions and Support Department
Sub-process Owners: See Annex 1
Associated Procedures: Operational Procedures on Oversee Implementation and Monitor Performance

Metrics for Oversee Implementation and Monitor Performance

Principal Recipients (PRs)\(^{249}\), Local Fund Agents (LFAs) and Country Teams (CTs) are expected to meet the following deadlines:

- PR submits Progress Update (PU) within 45 days\(^{250}\) and PU/Disbursement Request (DR) within 60 days from last reporting period end-date.
- LFA submits findings and recommendation(s) 20 days from the receipt of the PU and PU/DR.
- CT issues the Performance Letter and Performance Rating within 95 days (PU) and 110 days (PUDR) from last reporting period end-date.

Overall Objective

1. Implementation of a Global Fund grant is led and owned by the recipient country. The Global Fund oversees implementation and monitors grant and PR performance to drive maximum impact against the three diseases.

2. At the country level, the PR is responsible and accountable to the CCM\(^{251}\) and the Global Fund for quality and timely grant delivery, and efficient and effective PR operations in line with its obligations under the Grant Agreement. While the PR may contract Sub-recipients (SRs) and other service providers to undertake defined services, the PR remains accountable for the performance of SRs and its contractors\(^{252}\).

   i. Grant delivery refers to the quality and timely execution of grant activities so agreed results are achieved;

   ii. PR operations refers to the PR's effective planning of implementation and the execution of management functions to enable grant delivery. Management functions include monitoring & evaluation, finance, procurement and supply chain and risk management.

\(^{249}\) Unless defined in this Operational Policy Note or the context otherwise requires, all capitalized terms used in this Operational Policy Note shall have the same meaning set out in the Global Fund Grant Regulations (2014).

\(^{250}\) In this OPN, ‘days’ refers to calendar days, unless otherwise stated.

\(^{251}\) Reference to CCMs includes Regional Coordinating Mechanisms (RCMs) unless otherwise stated.

\(^{252}\) Contracting an SR or a service provider does not release the PR from its obligations under the Grant Agreement.
3. The **CCM** facilitates an enabling environment for the PR to implement grant activities and oversees implementation focusing on key programmatic, financial and management aspects of grants and their contribution to the national health response. The CCM implementation oversight function corresponds to *CCM Eligibility Requirement 3: Oversee program implementation and implement an oversight plan*. Regular engagement between the CCM and the CT enhances oversight through sharing of existing and potential challenges and solutions. The [CCM Oversight Guidance Note and its annexes](#) provide detailed guidance on CCM oversight functions.

4. From the **Global Fund**, implementation is overseen by:

   i. The CT, with support from the LFA, is primarily responsible for day-to-day implementation oversight;

   ii. The Risk Department and other oversight functions (Business Risk Owners253) together with Global Fund Senior Management define the risk management framework and provide oversight, guidance and support to CTs; and

   iii. The Office of the Inspector General (OIG) and external auditors, provide independent assurance regarding the management of risks and controls by the CT and Business Risk Owners and efficient use of Global Fund resources.

**Operational Policy**

5. This Operational Policy Note (OPN) defines the guiding principles and requirements on how the Global Fund Secretariat (in particular, the CT, Business Risk Owners and Senior Management) oversees implementation and monitors performance. Specific best practice guidance is also captured in the document.

6. The OPN applies to country and multicountry portfolios and grants unless otherwise specified in the dedicated multicountry section. While the principles and general requirements defined in this OPN apply across all portfolios, the specific grant deliverables do not apply to Focused portfolios, unless explicitly stated. Annex 1 provides a summary of the requirements and best practices and how they apply to each portfolio category.

**D. Guiding Principles on Implementation Oversight by the Global Fund**

7. The Global Fund oversees implementation focusing on grant delivery and PR operations. This requires regular engagement with the PR, CCM and in-country stakeholders to maintain an overview of implementation progress and to jointly define solutions to address implementation bottlenecks. In overseeing implementation, the Global Fund also identifies common issues, lessons and best practices across all portfolios to facilitate organizational solutions and learning. The Global Fund oversees implementation using most appropriate formal and informal sources254.

8. The Global Fund supports national disease and health system strengthening programs and COVID-19 responses. Grant Funds are additional resources to domestic and other donors’ resources to achieve national disease priorities and targets and to strengthen health systems. Implementation oversight covers both implementation of grants as well as the overall implementation of the national disease programs where relevant. This requires engagement beyond the PR, implementers and

---

253 Refer to section D below.
254 Refer to Annex 2.
CCM but also with national disease coordination bodies, donors and technical partners supporting the programs.

9. Oversight activities must be planned in advance and adjusted throughout the process to ensure continued alignment with changes in grant and portfolio priorities and contexts.

10. A critical part of overseeing implementation is identifying and prioritizing grant and portfolio-level risks, defining together with the PR and CCM actions to mitigate these risks, and planning and monitoring assurance activities to ensure defined mitigating actions are implemented.

11. The approach for overseeing implementation must be tailored considering the portfolio category, grant and portfolio risk profile and defined priorities, among others. The areas of focus are communicated to the PR with the understanding that these may change to adapt to evolving risks and contexts.

E. Implementation Oversight by the Country Team

E.1. PLAN

E.1.1. Define Implementation Oversight Priorities

12. CTs prioritize implementation oversight and assurance activities on an ongoing basis. As a best practice, these activities are captured into existing CT workplans. The strategic deliverables from these workplans flow into CT performance objectives.

13. **Implementation Oversight Priorities.** The CT prioritizes the portfolio and grant-level activities that the CT will focus on based on organizational and national priorities, key grant and portfolio risks, changes in country context, among others.

14. **Assurance Activities.** The CT leverages LFA services, external auditors, other assurance providers and fiscal/fiduciary agents, as needed, to gain continued insights and provide the necessary assurance on whether controls are in place to mitigate identified risks. The OPN on Risk Management provides guidance on assurance planning. Assurance plans inform the annual LFA workplan and budgeting exercise. The CT ensures that the scope, timing of assurance activities and associated resources are agreed upon, and the required LFA services are implemented.

15. **Engagement with Countries.** As a best practice, CTs regularly engage, through virtual and in-person communication platforms, with PR, CCM, LFA, partners and other key stakeholders to gain

---

255 see OPN on Risk Management.
insights, discuss progress and address implementation issues. CTs plan these regular engagements with country stakeholders.

**E.2. TAKE ACTION**

**E.2.1. Oversee Grant Delivery**

16. The CT undertakes planned oversight and assurance activities through formal or informal channels. This allows the CT to have an overview of implementation progress and existing and potential bottlenecks to proactively discuss with the PR and CCM on solutions.

17. Examples of CT actions include but are not limited to:

   i. **Make disbursements.** Process disbursements in line with the disbursement schedule established as part of the Annual Funding Decision and the terms of the Grant Agreement to ensure funds are disbursed to the PR and/or third parties in a timely manner for the continuation of grant activities.

   ii. **Create Synergies and Avoid Duplication.** Engage with partners supporting national disease programs to ensure synergies and collaboration and avoid duplication of support.

   iii. **Facilitate Technical and Implementation Support.** Facilitate technical assistance and capacity building support to ensure effective delivery of the grant and overall national strategies and programs.

   iv. **Revise Grants.** Discuss and work with the PR to drive implementation and adapt to changes in context, including through timely programmatic and/or budget revisions.

   v. **Request Additional Funds through Portfolio Optimization.** If the grant is positioned to accelerate implementation, request additional funding through the portfolio optimization process to maximize impact by financing items on the register of unfunded quality demand.

18. As part of implementation oversight, the CT also tracks the status of grant requirements and actions. When these have not been fulfilled within the agreed timelines, the CT determines required follow-up. To mitigate risks, the CT can also introduce new grant requirements or actions for the PR to undertake.

**E.2.2. Oversee PR Operations**

19. PR Operations refers to the PR’s execution of key management functions to enable grant delivery and is linked to the four elements that underpin implementation readiness as part of grant-making as shown in the figure below.
20. The CT, with LFA support as necessary, monitors the efficiency and effectiveness of PRs in executing these management functions. As a best practice, prior to the start of an execution period, the PR develops the annual Implementation Workplan and discusses this with the CCM and CT. For Focused portfolios, the PR prepares the Implementation Workplan independently. The Implementation Workplan is updated as needed to reflect implementation realities.

21. The CT ensures planned assurance activities (e.g., spot checks, assessments) are undertaken to confirm adequacy of PR capacities and systems and the implementation arrangements. Based on the outcomes of these assessments, capacity strengthening measures or changes to implementation arrangements can be discussed and agreed with the PR and/or CCM.

22. Measures are differentiated depending on the type of PR (i.e., local or international organizations) with examples described below. In exceptional cases, international organizations can be approved as PRs when local organizations do not have the required capacities. International organizations are expected to have the capacities and systems to manage the grant and deliver results.

23. **Strengthen PR and implementers capacities.** The CT engages internally and externally to facilitate technical and implementation support to strengthen national PR, SR and implementer capacities and systems. For international organization PRs, the CT, in collaboration with teams across the Secretariat, notifies the PR headquarters of the PR’s performance issues and any capacity gaps, and agree on expected performance improvements with clear milestones and outcomes, as well as a follow-up plan to assess improvements in PR performance.

24. **Adjust Implementation Arrangements.** The CT discusses with the PR and/or CCM to introduce required changes to implementation arrangements. Examples include:
   - **Outsourcing part of the PR’s responsibilities**\(^{261}\). When critical management weaknesses are identified related to local PRs and/or SRs, an assurance service provider (e.g., fiduciary agent, fiscal agent, procurement agent) can be contracted as a temporary measure. The assurance service provider is financed from Grant Funds. For health products for which the Global Fund determines that the PR’s procurement and supply management capacity is insufficient, the Global Fund can require a PR to use the Pooled Procurement Mechanism\(^{262}\) or other established procurement and supply management agents or services acceptable to the Global Fund.\(^{263}\).

---

\(^{262}\) Refer to the OPN and Operational Procedures on the Pooled Procurement Mechanism.

\(^{263}\) Refer to the Guide to Global Fund Policies on Procurement and Supply Management of Health Products.
• **Change PR/SR.** As a last resort, a PR and/or one or more SRs may be replaced or added during implementation when the PR or SR is not able to perform its role and carry out its responsibilities under the grant, in accordance with the terms of the Grant Agreement. The process to replace or add a PR is planned well in advance, when possible, to facilitate the transfer of responsibilities and avoid interruption of service delivery. A change in PR requires a grant closure for the outgoing PR, and negotiation and signature of a new grant for the incoming PR. Changes to the implementation arrangements are captured in the Implementation Arrangement Map.

• **Additional Safeguard Policy.** When implementers consistently demonstrate a lack of capacity or failure to effectively safeguard Global Fund investments, the CT may recommend invoking the Additional Safeguard Policy (ASP). The ASP allows the Global Fund to lead the selection of implementers for the program and/or replace an existing PR when significant risks arise during implementation. The details of the responsibilities and procedures for invoking/revoking the ASP are defined in the OPN on ASP.

25. **Manage Recoveries.** In overseeing implementation, the CT also follow-up with the PR on potential or confirmed recoverable amounts following guidance defined in the Guidelines for Grant Budgeting and the OPN on Recovery of Grant Funds.

**E.3. MONITOR**

**E.3.1. Collect Information and Review Progress**

26. The CT uses informal and formal sources to gain insights on progress of grant delivery and PR operations. The LFA provides critical support to the CT in gathering country-level information and providing analysis and recommendations.

27. **PR Reporting Requirements.** The PR reports information collected on grant delivery and PR operations to the Global Fund Secretariat and CCM to enable assessment of progress and drive decision-making. The quality and timeliness of PR reporting is a critical part of evaluating PR performance.

28. Table 1 presents the standard reporting requirements. Portfolios categorized as Challenging Operating Environments can request for flexibilities in PU/DR submission timelines. Grants applying Payment for Results arrangements, particularly those with Results-Based Financing, use a fit-for-purpose reporting approach.

---

264 When there is a decision to replace a PR, the Grant Agreement with the outgoing PR must be closed out following the OPN on Implementation Period Reconciliation and Grant Closure and a new agreement is signed with the new PR.

265 Per guidance defined in the OPN and Operational Procedures on IP Reconciliation and Grant Closure.

266 The ASP Policy (GF/B07/DP14), instituted by the Board at its Seventh Meeting (Report of the Governance and Partnership Committee GF/B7/7).

267 See Annex 2 for a non-exhaustive list of sources and examples of information that can be used for oversight.

268 For more information, please refer to the OPN on Challenging Operating Environments and the Global Fund Guidelines on Financial Risk Management.

269 Please refer to the Global Fund Guidelines for Grant Budgeting. RBF is a form of financing in which the full grant payment is contingent on the verification of predetermined results.
Table 1. Reporting frequency and deadlines for submission.

<table>
<thead>
<tr>

<td>35 days from the end of the last reporting period</td>
<td>✔️  ✔️</td>
</tr>
<tr>
<td>Audit Report</td>
<td>Annual</td>
<td>Within 6 months after the end of the audit period</td>
<td>✔️  ✔️  ✔️</td>
</tr>
</tbody>
</table>

i. **Progress Update/Disbursement Request (PU/DR)\(^{271}\):** The PU/DR is a comprehensive report on programmatic and financial progress as well as management issues\(^{272}\).

ii. **Pulse Check:** The Pulse Check collects more frequent and timely insights, which enables swift and fact-based decision-making and action as needed, increasing the agility of implementation. The PR provides rapid updates on a select number of coverage indicators and financial metrics and a self-evaluation on grant performance\(^{273}\).

iii. **Audit Report:** Audits provide the Global Fund with assurance that (i) disbursed funds were used for the intended purposes in accordance with the relevant Grant Agreement, including the approved budget and the Performance Framework, and (ii) the financial statements fairly represent the financial transactions and balances of the grant\(^{274}\).

29. There may be cases where the Global Fund Secretariat gains insights into concerns or allegations of actual or attempted misconduct. In such cases, the CT members are guided by the Code of Conduct for Global Fund Employees and must proactively report these issues to the OIG or to the Ethics Office to ensure they are appropriately addressed early on.

**E.4. ASSESS**

**E.4.1. Performance Rating: Assess Grant and PR Performance**

30. Information formally reported through the PU/DR allows the Global Fund Secretariat to undertake a comprehensive assessment of performance resulting in a Performance Rating\(^{275}\), which comprises Grant Performance and an assessment of PR Performance.

i. **Grant Performance** measures progress against the expected results (programmatic rating) and budget utilization and in-country absorption (financial rating), as shown in the figure below.

---

\(^{270}\) Unless otherwise communicated by the Global Fund.

\(^{271}\) All references to PU/DR refer to the PU and the PUDR, unless otherwise stated.

\(^{272}\) Refer to **PU/DR Form Instructions**.

\(^{273}\) Refer to the Guide for PRs on Completing and Submitting Pulse Checks for more information.

\(^{274}\) Refer to the Guidelines for Annual Audit of Global Fund Grants for more information.

\(^{275}\) Refer to Annex 2 of the Operational Procedures for the Performance Rating Methodology.
ii. **PR Performance** reviews how well the PR has managed the grant over the course of the previous reporting period. The Global Fund looks specifically at: (i) implementer capacity, in areas such as monitoring and evaluation, financial management, procurement and supply chain management and governance and implementation management; and (ii) the quality, timeliness and compliance with Global Fund requirements as they pertain to PR operations.

E.4.2. **Communicate Assessment and Required Actions**

31. Based on its analysis of results and performance, the CT defines specific and actionable recommendations to improve the programmatic and financial results and PR operations. A Performance Letter is issued to the PR within defined timelines\(^{276}\) to communicate CT findings, Performance Rating (which includes both the grant and PR performance), and required actions to address identified implementation challenges and additional risks. A Performance Letter is required for all portfolio categories.

E.4.3. **Support In-Country Program Review and Evaluation**

32. In-country program reviews and evaluations constitute periodic reviews of program design, implementation and achievements against national strategic objectives and targets. They play an important role in learning from past implementation, facilitating timely course correction and ensuring investments are based on evidence-informed program design to maximize impact, efficiency and equity\(^ {277}\).

33. These in-country program review and evaluations cover the national disease programs including the Global Fund contribution through its grants. Where relevant, the CT is expected to engage in these in-country reviews and engage with the PRs and CCM so that results of such reviews are used to ensure that the Global Fund continues to fund the most important interventions to achieve national strategic objectives and targets and introduce improvements to the way the grant is implemented. As applicable, required actions from the PR resulting from these in-country program review and evaluations are communicated to the PR through the Performance Letter.

34. These in-country program review and evaluations are tracked through the country M&E Profile updated by the CT for High Impact and Core portfolios. Annex 3 provides further details.

---

\(^{276}\) Within 95 days (PU) and 110 days (PU/DR) from last reporting period end-date.

\(^{277}\) Within the Secretariat, the process of In-Country Program Reviews & Evaluations is coordinated by MECA under the strategic guidance of the Secretariat M&E Working Group.
Table 2. In-country Program Reviews and Evaluations

<td>National or sub-national review of program implementation and results.</td>
</tr>
<tr>
<td></td>
<td>Mandatory for High Impact and Core portfolios, conducted at regular intervals between program reviews, at a minimum: (\text{-}^{279}) annually at national level; (\text{-}^{280}) semi-annually at sub-national level.</td>
</tr>
<tr>
<td></td>
<td>Led by respective disease programs at national and intermediate sub-national levels.</td>
</tr>
<tr>
<td></td>
<td>Budgeted and supported through Grant Funds.</td>
</tr>
<tr>
<td></td>
<td>The CT engages with national stakeholders to strengthen the approach, especially in cases where no plans and/or guidance exist for such reviews; technical support may be facilitated through the MECA M&amp;E TA Pool.</td>
</tr>
<tr>
<td>Enhanced Portfolio Review</td>
<td>In-depth assessment of the entire grant portfolio or specific areas of a national disease program, against a predefined program design and defined, verifiable results.</td>
</tr>
<tr>
<td></td>
<td>Recommended for Focused portfolios, once per 3-year grant cycle, particularly when a program review has occurred and the quality is deemed inadequate(^{281}) or when no program review has occurred. It can also be triggered by a specific programmatic need.</td>
</tr>
<tr>
<td></td>
<td>Budgeted and supported through Grant Funds.</td>
</tr>
<tr>
<td></td>
<td>Commissioned by the Global Fund Secretariat.</td>
</tr>
<tr>
<td>Program Evaluation</td>
<td>Rigorous assessment of the entire program or specific areas of a national disease program, against a predefined program design (or theory of change) and defined, verifiable results.</td>
</tr>
<tr>
<td></td>
<td>Strongly recommended for High Impact and Core portfolios when the quality of a program review is deemed inadequate(^{282}) or when no review has occurred. It can also be triggered by a specific programmatic need.</td>
</tr>
<tr>
<td></td>
<td>Usually commissioned by Ministry of Health and/or other in-country partners, and may be supported or independently commissioned by the Global Fund Secretariat.</td>
</tr>
</tbody>
</table>

\(^{278}\) Not required when a program evaluation was conducted within the last three years and can serve the purpose of assessing the design and implementation of the NSP.

\(^{279}\) Not required when a program review was conducted in the same fiscal year.

\(^{280}\) Sub-national reviews occur at the provincial/regional and district levels. The frequency of periodic reviews at sub-national levels are planned and budgeted for during grant-making and set as targets in the Performance Framework.

\(^{281}\) Refer to the high-level criteria on program review quality.

\(^{282}\) Refer to the high-level criteria on program review quality.
F. Global Portfolio\textsuperscript{283} Oversight by Business Risk Owners and Senior Management

35. The Global Fund Secretariat has dedicated mechanisms to provide strategic guidance and support to CTs in overseeing implementation and monitoring grant and PR performance. Through these mechanisms the Global Fund Secretariat maintains a global view on performance and risks for all portfolios and can identify common issues and challenges which require organizational-level solutions and facilitate organizational learning.

F.1. Business Risk Owners

36. Global Business Owners are responsible for providing policy and technical guidance to CTs in their functional areas regarding risk identification and prioritization, and best practices for mitigating actions and assurance activities based on country context.

37. **Business** Risk Owners. There are Business Risk Owners for each of the risk categories, assigned as follows:
   - Programmatic and Monitoring and Evaluation Risks: Head, Technical Advice and Partnerships
   - Human Rights and Gender Equality Risk: Head, Community Rights and Gender
   - Health Product and Supply Chain Risks: Head, Sourcing and Supply Chain Department
   - Finance and Fiduciary Risks: Chief Financial Officer/ Head, Grant Financial Management
   - Governance, Oversight and Management Risks: Head, Grant Portfolio Support and Solutions Department
   - Health Finance: Head, Health Finance Department

38. The Legal and Governance Department also advises CTs and Business Risk Owners on Governance, Oversight and Management Risks. Business Risk Owners are members of the Portfolio Performance Committee and are also responsible for the content of risk management systems and tools (i.e. capacity assessment questions, pre-defined root causes, standardized assurance activities, and overall design and functionality of the risk management systems and tools).

39. The details of the oversight responsibilities of Business Risk Owners are defined in the OPN on Risk Management.

F.2. Global Fund Senior Management

40. **Grant Management Division (GMD) Management** includes the Regional Managers, Regional Department Heads and the Division Head, who supervise CTs on the management of country/multicountry portfolios. They are the first point of escalation for CTs on grant and portfolio implementation issues requiring management guidance and decision. GMD Management also oversees portfolio performance through regular monitoring and assessment of regional and global portfolio performance against key organizational metrics and providing strategic guidance to CTs on required actions. GMD Management also participate in the Portfolio Performance Committee (PPC).

41. The **Portfolio Performance Committee (PPC)**, a Global Fund Senior Management body oversees implementation of the global portfolio and hosts the Country Portfolio Review, PPC Executive Session, PPC Thematic Executive Session, and Enterprise Performance Review. The PPC provide

\textsuperscript{283}Global portfolio refers to all country and multicountry portfolios supported by the Global Fund.
strategic steer and identify areas where additional support, flexibilities and adaptations may be needed to maximise impact.

i. **Country Portfolio Review (CPR):** to validate country portfolio risks and identify issues where additional support, flexibilities and/or innovation are needed, and provide the Country Team and Business Risk Owners the opportunity to seek strategic steer. Through CPRs, common issues, lessons learned and good practices across countries and regions are also identified. The outcome of a CPR guides the CT in defining priorities for overseeing the portfolio. The selection criteria to determine which countries are brought to CPR is revised annually, based on risk factors and priorities, and approved by the PPC Co-chairs. The CPR format is adapted accordingly to reflect the strategic focus of the CPR for each given year.

ii. **PPC Executive Session:** to provide a platform for focused discussions and decision-making on critical country issues. Held on an as needed basis, to respond to issues as they arise.

iii. **PPC Thematic Executive Session:** to review the progress towards impact with regards to overall disease performance at the aggregate level and/or specific portfolio wide issues or challenges. It provides the opportunity to receive PPC strategic steer which is then used to develop tailored response plans to meet specific country needs. Thematic Executive Sessions occur on an as needed basis.

iv. **Enterprise Performance Review (EPR):** to review progress towards impact for all portfolios. EPRs occur on an as needed basis in agreement with the Head of Strategy and Policy Hub.

42. Further information on the PPC can be found in the PPC ToR. The purpose of the PPC will continue to adapt to complement the evolving approach to oversee implementation across the Global Fund Secretariat.

G. **Specific Multicountry Considerations**

43. Multicountry grants generally follow the same requirements set out in this OPN, with the following specific considerations:

i. For multicountry grants, reference to CCM includes engagement of the Regional Organization (as applicable), Regional Coordinating Mechanism (RCM) and CCM representatives of all countries included within the grant (as applicable).

ii. The legal and political considerations and logistics of cross-border implementation are considered when tailoring LFA-services.
## Annex 1. Overview of Requirements and Best Practices

### Approach

<table>
<thead>
<tr>
<th>Implementation Oversight by the Country Team</th>
<th>Requirement / Best Practice</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Approach &amp; Grant Deliverables</strong></td>
<td>High Impact &amp; Core</td>
</tr>
</tbody>
</table>

#### PLAN

**Define Implementation Oversight Priorities**
- Oversight and assurance activities identified
- Regular engagements with country planned
- Oversight, assurance activities and country engagements captured in existing CT workplans

#### TAKE ACTION

**Oversee Grant Delivery**
- Oversight and assurance activities implemented and adjusted (as applicable)
- Required CT actions to address implementation challenges identified and delivered (as applicable)
- Status of Grant Requirements and required actions tracked

**Oversee PR Operations**
- Inputs to PR implementation workplan
- Oversight and assurance activities implemented and adjusted (as applicable)
- Required capacity strengthening measures identified and agreed with PR and/or CCM (as applicable)
- Recoveries managed (as applicable)

#### MONITOR

**Collect Information and Review Progress**
- PU submitted and reviewed
- PU/DR submitted and reviewed
- Pulse Check submitted and reviewed
- Audit Report submitted and reviewed

#### ASSESS

**Performance Rating: Assess Grant and PR Performance**
- Grant Performance (programmatic and financial ratings)
- PR Performance qualitative assessment
- Assessment and required actions communicated through Performance Letter

**Support In-country Program Review and Evaluation (as applicable)**
- Support in-country program review
- Support periodic performance reviews
- Commission enhanced portfolio review (as applicable)
- Support program evaluation

---

284 LFA work planning and budgeting only

[^285]: Information will vary by grant and country.
[^286]: As the principal sources of information, the PU/DR and Pulse Checks are always shared with the CCM.
[^287]: Refer to the Guidelines for Annual Audit of Global Fund Grants for more information.
[^288]: An open source, web-based platform most commonly used as a health management information system (HMIS).
Annex 3. In-Country Program Reviews and Evaluations

1. In-country program reviews and evaluations are part of the Global Fund Monitoring and Evaluation Framework and are made up of program reviews, periodic performance/routine data reviews, enhanced portfolio reviews and country-led program evaluations.

2. In the current global context where resources are very limited as compared with the overall need, well-designed in-country program reviews and evaluations guide programs to the most optimal path to achieve sustainable impact, system resilience, equity and efficiency.

3. This annex provides guidance to CTs and other supporting structures within the Secretariat for planning, coordination, implementation and quality assurance of in-country program reviews and evaluations, as well as the use of their findings. It also ensures the consistency and quality of the process and products of in-country program reviews and evaluations. The planning and implementation status of the reviews and evaluations is tracked through country M&E Profiles for High Impact and Core portfolios and using workplan tracking measures in the performance frameworks.

Principles

4. The Secretariat takes the following principles into account in all stages of in-country program reviews and evaluations process:

- **Alignment**: In-country program reviews are aligned with country systems, processes and program cycle.

- **Ownership and Inclusiveness**: In-country program reviews are owned and managed by the country, usually by the Ministry of Health and/or its national disease programs, technically supported by WHO, with participation of relevant global and national stakeholders.

- **Quality**: In-country program reviews and evaluations are of quality necessary to inform program design and implementation.

- **Tailored**: The design and implementation of program reviews are tailored to the epidemiological contexts, portfolio category and level of investment in country. Generic Terms of References (ToRs) can be adapted to each country.

- **Learning**: The use of the findings is the primary purpose of in-country program reviews and evaluations. Final reports are made available within three months after completion of program review field work to ensure findings can be used in a timely manner. Findings are used for learning and to inform program design implementation and revisions, and not to penalize grants or programs.

- **Accountability**: All national disease programs are subject to demonstrating their results against the targets defined in NSPs or in grant agreements with donors. In-country program reviews and evaluations are among the primary means to ensure the national disease programs’ accountability to the governments, donors, civil societies and program beneficiaries.

---

289 Refer to the Global Fund Strategic Framework for Data Use for Action and Improvement at Country Level.

290 Within the Secretariat, the process of In-Country Program Reviews & Evaluations is coordinated by MECA under the strategic guidance of the Secretariat M&E Working Group.

291 For example, reviews in COE and Focused portfolios may have a more targeted scope than reviews in High Impact and Core portfolios.

292 Generic terms of references for reviews and evaluations

293 Learning refers to a process of translating findings and recommendations from a program review or evaluation into programmatic actions as well as informing program design and implementation.
• **Transparency**: All final reports from in-country program reviews and evaluations are accessible to all stakeholders. This permits the tracking of progress over time and ensures mutual accountability.

**Objectives**

5. This Annex provides guidance to help CTs, PRs and lead implementers to:

- **Institutionalize** in-country program reviews, evaluations and enhanced portfolio reviews including the frequency and timing of program reviews and criteria for program evaluations/enhanced portfolio reviews by: a) ensuring that program reviews are planned, budgeted and conducted at least once in a 3-year grant implementation cycle, which are mandatory in High Impact and Core countries, as well as countries submitting Tailored for NSP funding applications; b) ensuring program reviews are supported in Focused countries as deemed appropriate through a prioritization process against a set of defined criteria; c) defining criteria for when evaluations or enhanced portfolio reviews shall be conducted in addition to and/or in lieu of program reviews.

- **Operationalize** in-country program reviews, evaluations, and enhanced portfolio reviews through, a) defining the roles and responsibilities of different teams at the Global Fund Secretariat, as well as in-country and global partners in the planning, design, and implementation of in-country program reviews, evaluations, and enhanced portfolio reviews, and in subsequent use of the results; b) outlining processes to ensure program reviews are planned well in advance, including scope, timeline, budget and technical assistance (TA) needed—ideally considering the timelines for funding request and grant-making.

- **Ensure the quality** of in-country program reviews, evaluations, and enhanced portfolio reviews, by institutionalizing quality assurance at planning, implementation and report preparation stages, as well as a quality assessment of the process and reports. This also includes provision of updated guidance, tools, and generic ToRs jointly developed with WHO and partners, as well as facilitation of technical support tailored to country-specific needs.

- **Ensure the dissemination and learning** of findings from in-country program reviews, evaluations, and enhanced portfolio reviews - that the findings and recommendations are appropriately referred to and used at various stages of program management cycle, i.e., during NSP revision, while preparing funding requests, during the grant making or reprogramming processes, and when deciding on the annual disbursements. This also includes biannual synthesis reports of key findings, recurring themes and recommendations, to be shared with the Senior management and various teams within the Secretariat, relevant board committees and partners.

**Program Reviews**

6. A program review is a systematic review of program design, inputs, implementation and results against national strategic objectives and targets as well as regional and global benchmarks. National program review is conducted every two to three years following the national strategic planning cycle. It is owned and managed by the Ministry of Health or its national disease programs and usually carried out by a joint national and international team of experts. Program reviews are mandatory in High Impact and Core portfolios, and strongly recommended for Focused portfolios with Tailored for NSP funding applications. CTs negotiate a budget and an appropriate timeline for program reviews with national programs that serve both the national need and grant-specific aspects. The main objectives of program reviews are to:

i. examine progress and impact of national disease programs, including all contributions (government, civil society, private sector) towards the objectives and targets of the National Strategic Plan (NSP) and regional/global coverage, outcomes and impact targets;
ii. examine progress in strengthening key programmatic/thematic health system areas, including cross-cutting aspects such as human rights, equity, human resources, laboratory, supply chain management, information systems, domestic resource mobilization, etc.;

iii. review the structure, organization, financing, and management of the program, partnerships and funding landscape, including engagement of civil society and private sector, where relevant; and

iv. inform a revision of NSP, the Global Fund Funding Request and/or grant implementation.

7. During funding applications, CTs/PHME Specialists must ensure that program reviews are planned and budgeted for in the respective disease program funding request, specifying all funding sources that may contribute to the review. During implementation, PHME Specialists engage with national disease programs to ensure that: a) the planned timelines are respected and TORs are shared for secretariat review and input; b) funding and technical support for the review has been fully mobilized; c) the program reviews are accompanied by an appropriate epidemiological and impact analysis; d) additional technical support is accessed through the MECA M&E TA pool (if required); e) draft program views reports are reviewed by the CTs/PHME Specialists and relevant technical teams, as appropriate, before final versions are validated by the countries; and f) final reports are shared with MECA for synthesis, quality review and feedback. MECA tracks mandatory program review planning and supports CTs through facilitation of technical support and access to generic TORs, which countries can adapt to their respective local contexts.

**Periodic Performance Reviews**

8. Periodic performance reviews, also called “routine data reviews” in some settings, refer to national or sub-national review of program implementation and results, conducted at regular intervals (quarterly, semi-annually, annually). They are informed by the analysis of routine programmatic data and serve as a platform for programmatic and operational discussions and decisions, based on progress against annual and semi-annual targets. Such platforms are led by respective disease programs and used to assess achievements in program implementation, gaps, challenges and opportunities for course correction, as needed. Sub-national health authorities (provincial/regional and district levels) usually organize monthly, quarterly or semi-annual performance reviews, whereas those at national level typically hold semi-annual or annual reviews.

9. Periodic performance reviews are mandatory in High Impact and Core countries. During funding applications and grant-making, the PHME Specialist ensures that CCMs have included plans and budget for periodic performance reviews. The PHME Specialist explores with the MOH and disease programs if sound guidance and tools for such reviews exist. Standard WHO health facility data analysis packages for national and subnational levels are available. When no quality guidance exists or it has been applied insufficiently, the PHME Specialist engages with national stakeholders to strengthen the approach using grant funds, as required. Technical support to strengthen this component can be accessed through the MECA M&E TA pool. MECA will track routine review planning where mandatory and discuss M&E investments to ensure data analysis and use are integrated in routine review methodology at all levels.

**Enhanced Portfolio Reviews**

10. An enhanced portfolio review refers to an in-depth assessment of the entire grant portfolio or specific program areas of a national disease program, against a predefined program design and defined, verifiable results, commissioned by the Global Fund Secretariat and implemented by an external provider or jointly with partners. Enhanced portfolio reviews are particularly suited for

---

294 Emergency program review maybe triggered by country crises or emergency, to inform grant revision to this effect.

Focused portfolios, and are planned, budgeted for and implemented once per 3-year grant cycle. The results can serve as an important assurance mechanism regarding whether Global Fund investments in the portfolio represented a good value for money. The evidence generated through enhanced portfolio reviews guide decisions on what should continue and what should change.

11. The need for an enhanced portfolio review is determined by the CT, in consultation with MECA and other technical teams. If the need is jointly determined, the cost of the review including TA costs, is budgeted using grant funds. Depending on the scope of the review, technical support could be accessed through the MECA M&E TA Pool. MECA is consulted during the development of TORs and review of reports before they are validated by countries. Please refer to para. 14 below which outlines other scenarios when the Secretariat may consider commissioning such a review.

Program Evaluations

12. A program evaluation is a rigorous assessment of the entire program or specific areas of a national disease control program against a predefined program design (or theory of change) and defined, verifiable results, implemented by an expert service provider or jointly with partners. Country-led evaluations are commissioned by the Ministry of Health and/or other in-country partners and may be supported by the Secretariat. The need for a program evaluation is determined based on the assessment of the quality of the program review process and resulting reports, with considerations to the recommendations from previous evaluations, specific program needs, and/or donor requirements.

13. If a country intends to undertake a program evaluation with Global Fund resources, the scope is discussed and agreed with the CT during grant-making. The CT, in consultation with MECA and other relevant technical teams, will support the country in the planning and execution of the evaluation.

14. In addition, the Secretariat may consider commissioning an evaluation or enhanced portfolio review when:
   
i. there have been no program reviews or any other forms of program evaluations conducted in the last three years and there are no plans nor secured funding for program reviews or evaluations in the current grant cycle;
   
ii. the process and/or product of most recent program review is deemed to be inadequate;
   
iii. a program review or previous evaluation recommends the entire or part of the national program be independently evaluated;
   
iv. The CT, Technical Advice and Partnership (TAP) Department, Community Rights and Gender (CRG) Department, Health Financing Department or other department recommends an evaluation of specific programmatic or cross-cutting needs; or
   
vi. an agreement is reached for a joint evaluation based on recommendations from partners or donors.

15. The Secretariat participates in the planning and implementation of program reviews, support program evaluations, and actively engages in periodic performance reviews. When such reviews are not available, the Secretariat actively coordinates with the CCM and relevant health authorities to help institutionalize the platforms. The Secretariat avails the grant and other resources to build up the in-country capacity for program reviews, evaluations and periodic performance reviews.

---

296 Refer to the high-level criteria on program review quality.
Quality assurance of in-country program reviews and evaluations

16. MECA, in coordination with TAP teams and technical partners, facilitates the provision of latest guidelines and generic ToRs for program reviews and evaluations (including key aspects of RSSH, CRG, private sector engagement, etc.) for countries to adapt to local contexts.

17. The CT and/or focal points from other technical teams (e.g., Disease teams, MECA, RSSH and CRG) may participate in the program review and evaluation process, based on their availability and identified need by the country or CT.

18. MECA conducts a six-monthly synthesis of program review and evaluation reports to provide ongoing feedback on key recurring recommendations, as well as on the quality of the conduct and content of the reviews.

Dissemination and use of evidence from in-country program reviews and evaluations

19. Dissemination and the use of findings are critical steps to ensuring in-country reviews and evaluations provide learnings for program improvement.

20. At country level, the national program disseminates program review and evaluation reports, together with in-country stakeholders, to relevant audiences in different forms including, sharing the report, organizing in-country dissemination sessions, and making the report available through official websites. With support from in-country stakeholders, the national program creates aide mémoires for the official adoption of findings and recommendations by the Ministry of Health.

21. At the Secretariat level, MECA coordinates bi-annual synthesis of the main findings and recommendations of program reviews and evaluations conducted each year. The synthesis report is shared with CTs, senior management, technical teams, relevant partners, and Board Committees. The CTs may use the synthesis of findings and recommendations to inform discussions during country dialogue, grant-making and implementation. The information can also guide discussions with global level technical partners if guidelines or tools need to be updated/developed or if existing ones need wider dissemination at country level, as well as to identify technical areas where countries may need further support.

22. MECA tracks the use of program review and evaluations in funding request, NSP revisions and other critical programmatic decisions. All program reviews or evaluations, as part of their scope, must revisit the status of implementation of recommendations from the previous program reviews or evaluations.

Oversee Implementation and Monitor Performance

Approved on: 28 April 2022
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions and Support Department
Associated OPN: OPN on Oversee Implementation and Monitor Performance

Metrics for Oversee Implementation and Monitor Performance

Principal Recipients (PRs), Local Fund Agents (LFAs) and Country Teams (CTs) are expected to meet the following deadlines:

- PR submits Progress Update (PU) within 45 days and PU/Disbursement Request (DR) within 60 days from last reporting period end-date.
- LFA submits findings and recommendation(s) 20 days from the receipt of the PU and PU/DR.
- CT issues the Performance Letter and Performance Rating within 95 days (PU) and 110 days (PU/DR) from last reporting period end-date.

Purpose

1. This document provides procedural guidance on how the Global Fund Secretariat oversees implementation and monitors performance. The specific grant deliverables set out in these procedures do not apply to Focused portfolios, unless explicitly stated (see also Annex 1 of the OPN on Oversee Implementation and Monitor Performance).

---

297 Unless defined in this Operational Policy Note or the context otherwise requires, all capitalized terms used in this Operational Policy Note shall have the same meaning set out in the Global Fund Grant Regulations (2014).

298 In this OPN, ‘days’ refers to calendar days, unless otherwise stated.
A. Implementation Oversight by the Country Team

1. Define Implementation Oversight Priorities

<table>
<thead>
<tr>

Operational Procedures

Annex 1. Recommended Elements for a PR Annual Implementation Workplan

What is the difference between a workplan and a detailed budget?

A workplan breaks down agreed activities, with clear timelines, milestones, when cash is required and the planned completion/delivery. A workplan clearly articulates who is responsible for undertaking each activity by when, the sequence and relationships between activities (interdependencies) and considers the availability of human resources and ongoing projects.

A detailed budget estimates the costs of these activities with a breakdown by module, intervention, activity, cost input and unit cost, with the funding amounts required for each period, and serves as the baseline for the annual funding and disbursement process. The budget is broken down into quarters, which is the estimated period of delivery of good and services, rather than actual timing for the payment of grant activities, and shows when expenditures are expected to be recognized.

1. The implementation workplan is based on the objectives defined in the Grant Agreement and final grant documents (including but not limited to the Performance Framework, Summary Budget and Health Product Management Template (as applicable)) and covers grant delivery, as well as PR operations. As best practice, the following are recommended elements of an annual implementation workplan:

   i. All activities\textsuperscript{323} that will enable meeting the grant objectives, including how they will be delivered, resources required, and how results will be monitored and evaluated.
   
   ii. PR, SR and other roles, responsibilities and accountabilities assigned for each individual activity.
   
   iii. The chronological flow of individual activities, including interdependencies and critical path activities, with built-in buffers to mitigate unforeseen delays.
   
   iv. The timeframe for activities, with clear milestones and deadlines (including grant Requirements and critical management actions).
   
   v. Implementation risks or bottlenecks with appropriate mitigating actions

\textsuperscript{322} As per the OPN.

\textsuperscript{323} Including, but not limited to, supervision and training plans, the procurement plan for health and non-health products, deployment plan (as applicable).

</table>
Annex 2. Performance Rating Methodology

1. The Global Fund Performance Rating applies to all grants. It is determined twice per year for High Impact and Core Portfolios, and annually for Focused portfolios based on progress reported and validated through PU/DRs. It captures grant and PR performance by assigning a:
   i. **Programmatic Rating**: to measure to what extent the program is delivering the expected results;
   ii. **Financial Rating**: to measure to what extent is the budget utilized as agreed; and
   iii. **Principal Recipient Rating** (for High Impact and Core portfolios only): to demonstrate how well the PR is implementing the grant (*currently in development*).

2. The Performance Rating is one of the parameters taken into consideration when defining the amount for the Annual Funding Decision.

3. The Performance Rating which is composed of the following:

<table>
<thead>
<tr>
<th>Grant Performance</th>
<th>PR Performance</th>
</tr>
</thead>
<tbody>
<tr>
<td>Programmatic Rating</td>
<td>Financial Rating</td>
</tr>
<tr>
<td>To what extent is the Program delivering the expected results?</td>
<td>To what extent is the budget utilized as agreed?</td>
</tr>
<tr>
<td>A B C D E</td>
<td>1 2 3 4 5</td>
</tr>
</tbody>
</table>

4. **Management Adjustment.** A management adjustment can be applied to the Performance Rating on an exceptional basis to account for force majeure (e.g., war, pandemic, natural hazards, etc.). The PR rating may be adjusted upwards or downwards; however, the programmatic and/or financial ratings may only be adjusted to “no rating”.

**Programmatic Rating**

5. A quantitative indicator rating is calculated using the data from the indicators reported in the PU/DR. Depending on the type of indicator and target setting in the Performance Framework, the results are aggregated over the reporting periods. The quantitative indicator rating is calculated as follows:
   - “Non-cumulative” targets: These reflect period specific targets/results, irrespective of the targets/results in the previous periods. In such cases, the relevant periodic targets/results will be added up to calculate the quantitative indicator rating.
   - “Non-cumulative (other) targets: This is applied to indicators that refer to people currently receiving services irrespective of the targets/results in previous periods. Therefore, the targets/results in the last reporting period will be used to calculate the quantitative indicator rating.

---

324 Refer to the OPN and Procedures on Annual Funding Decisions and Disbursements for more information.
325 The Quantitative Indicator Rating calculation has been maintained from the previous Grant Rating Methodology to ensure comparability over time.
326 If the grant’s quantitative indicator rating will be based on Work-Plan Tracking Measures, please refer to the section below on how to convert the Country Team’s evaluation of progress against the workplan into a quantitative indicator rating.
• “Cumulative annually” targets: These targets are already cumulated over the year or the reporting period. In such cases, the targets in the last reporting period will be used to calculate the quantitative indicator rating.

6. **Programmatic Rating Ranges.** The grant is assigned a value from A to E for programmatic performance.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Rating</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>≥ 100%</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>90% - 99%</td>
</tr>
<tr>
<td>C</td>
<td>Moderate</td>
<td>60% - 89%</td>
</tr>
<tr>
<td>D</td>
<td>Poor</td>
<td>30% - 59%</td>
</tr>
<tr>
<td>E</td>
<td>Very Poor</td>
<td>&lt; 30%</td>
</tr>
</tbody>
</table>

7. **Automatic Downgrading.** If an indicator is rated less than 60%, the Quantitative Indicator Rating is downgraded by one rating level, unless the Quantitative Indicator Rating is C, D or E, in which case no further downgrading is applied.

8. **Indicator Performance Cap Rule.** If an indicator’s performance is above 120%, the indicator’s performance used in the calculation of the “Average Performance All Indicators” is capped at 120%.

9. **Programmatic Technical Adjustment.** In some specific scenarios, the quantitative indicator rating may not reflect the actual grant/program performance due to the linkages and correlation across indicators. In such cases, the CT can adjust the quantitative rating to reach the final indicator rating. Appropriate and documented justification must be included for any changes to the quantitative indicator rating.

10. Cases in which a CT may consider a technical adjustment include, but are not limited to:
    - The achievement or overachievement of one indicator, when correlated with another indicator, indicates a gap in reaching people in need of services i.e., below 60%.
    - When there are multiple PRs and the underperformance of one indicator for one PR is resulting in the over-performance of another related indicator for another PR, when the actual performance of the latter is below 60% of the expected target.
    - When disease grants with substantial investments in resilient and sustainable systems for health (RSSH) and/or community, rights and gender (CRG)-related modules that include both coverage indicators and Work Plan Tracking Measures (WPTMs): if the overall WPTM rating is below 60%, the quantitative indicator rating can be downgraded by one rating point.

11. The programmatic technical adjustment must not be used in cases due to:
    - Delays in implementation of activities including M&E activities: In cases of extreme/unforeseen environmental or political crisis, the “management adjustment” (see below) may be possible.
    - Delays in meeting grant requirements or required actions (which most likely will be covered under other ratings and/or adjustments).
    - Underperformance due to activities or contexts beyond the control of the PR (which most likely will be covered under other ratings and/or adjustments).
• Insufficient level of funding to meet the targets.  
• Targets achieved before time.  
• Targets have overachieved.  
• COVID-related adaptations to the program/mitigation actions.  
• COVID-related delays/disruptions: these are to be reflected by maintaining the programmatic rating.  
• Issues with financial performance, e.g., under-absorption against agreed budget: these are to be reflected in the financial rating.  
• Weak PSM systems and/or persistent gaps in supply chain management, stock-outs, etc.: these are to be reflected in PR rating (currently under development).  
• Data quality issues:  
  - PR-reported results cannot be verified by the LFA (e.g., no supporting documents provided): the programmatic rating must be maintained. In such cases the result for the respective indicator will be considered zero.  
  - Documented programmatic data quality issues: to be reflected in PR rating (currently under development).  
• If programmatic rating is D, or E: do not downgrade.  
• Poor or good performance of indicators not in the Performance Framework.  
• Achieving global targets but not the grant targets.  
• Improvement from past reporting periods, but still showing underperformance.

**Financial Rating**

12. The financial rating uses two quantitative metrics and does not require any technical adjustment. These are:

13. **Budget utilization (BU)** demonstrates the Global Fund’s efficiency in making funds available to the grant. It is calculated by dividing the sum of in-country cash balance and cumulative disbursement by the cumulative disbursement:

\[
BU = \frac{\text{In-country Cash Balance} + \text{Cumulative Disbursement}}{\text{Cumulative Budget}}
\]

14. **In-country absorption (ICA)** maintains the link between programmatic and financial performance at grant level, while reflecting PR influence and/or control over its achievement of grant objectives. It is calculated by dividing the cumulative expenditure by the cumulative budget:

\[
ICA = \frac{\text{Cumulative Expenditure}}{\text{Cumulative Budget}}
\]

---

327 This is addressed during grant making or if the situation has changed during implementation, through a grant revision to change the targets and/or budget.  
328 Addressed through a grant revision if targets have been achieved early on in grant implementation or reported as planned for the respective reporting period.  
329 Addressed through the performance cap of 120%.
15. It can be calculated as soon as the Finance/PST Specialist has validated the expenditures.

16. **Financial Rating Ranges.** The grant is assigned a value from 1 to 5 for financial performance.

<table>
<thead>
<tr>
<th></th>
<th>Excellent</th>
<th>≥ 95%</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>Good</td>
<td>85% - 94%</td>
</tr>
<tr>
<td>3</td>
<td>Moderate</td>
<td>75% - 84%</td>
</tr>
<tr>
<td>4</td>
<td>Poor</td>
<td>65% - 74%</td>
</tr>
<tr>
<td>5</td>
<td>Very Poor</td>
<td>&lt; 65%</td>
</tr>
</tbody>
</table>

17. In some cases, BU is above 100% which can result into Financial Ratings above 100%. There is no cap for the financial rating.

18. **Weighting of Financial Rating (BU/ICA).** The weighting in the composition of the financial rating is 20% of the BU metric and 80% of the ICA metric.

**PR Rating**

19. The PR rating will provide insight in the PR performance that can trigger in-depth capacity assessment, technical support and improvement plans, among others. The metrics for the PR rating are currently being developed. During its development, a qualitative assessment of PR Performance will be made by the CT and communicated to the PR in the Performance Letter.

**Scoring Methodology for Work-Plan Tracking Measures**

20. There are some program areas (modules) and interventions that constitute essential investments in Global Fund grants but cannot be measured using available coverage indicators during the execution period being assessed and will therefore not result in a standard indicator rating. Moreover, these areas require additional qualitative measures to assess their effectiveness.

21. To address this, the Global Fund has developed a specific M&E framework for modules that do not have a service delivery component and will request the PR to report on progress through the PU/DR on the agreed upon work-plan tracking measures (WPTM).

22. A differentiated approach will be applied in using these measures for determining an indicator rating:

i. When grants do not include any coverage indicators, a scoring methodology will be applied to measure progress against WPTMs to arrive at an indicator rating.

---

330 Under development.
331 Examples of such modules/interventions include removing legal barriers to access or changes in policy and governance under RSSH.
ii. When grants include both coverage indicators as well as the WPTMs, only the coverage indicators will be used to calculate the indicator rating. In these instances, the overall WPTM rating can be additionally used to make programmatic technical adjustment to quantitative indicator rating.\footnote{Refer to the section on the Programmatic Technical Adjustment in Annex 3.}

23. The following scoring methodology will be applied to derive scores and equivalent quantitative indicator rating.

1. The progress on work-plan tracking measures (i.e., milestones and targets for input and process indicators) will be categorized and their achievement scored as follows:

<table>
<thead>
<tr>
<th>Implementation progress during the reporting period</th>
<th>Category</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>No progress against planned milestone or target</td>
<td>Not started</td>
<td>0</td>
</tr>
<tr>
<td>Less than 50% completion of the milestone or target</td>
<td>Started</td>
<td>1</td>
</tr>
<tr>
<td>50% or more completion of planned milestone or target</td>
<td>Advancing</td>
<td>2</td>
</tr>
<tr>
<td>100% achievement of planned milestone or target</td>
<td>Completed</td>
<td>3</td>
</tr>
</tbody>
</table>

2. At each reporting period, depending on the progress in implementation of various activities, the respective score will be allotted to each measure.

3. Based on reported progress, the sum of all scores during the reporting period will be compared against the maximum score for that period to obtain the default WPTM rating.

<table>
<thead>
<tr>
<th>% achievement during the reporting period (total score/maximum score)</th>
<th>Default WPTM rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>A: Excellent</td>
<td>( \geq 100% )</td>
</tr>
<tr>
<td>B: Good</td>
<td>90% - 99%</td>
</tr>
<tr>
<td>C: Moderate</td>
<td>60% - 89%</td>
</tr>
<tr>
<td>D: Poor</td>
<td>30% - 59%</td>
</tr>
<tr>
<td>E: Very Poor</td>
<td>&lt; 30 %</td>
</tr>
</tbody>
</table>
ANNUAL FUNDING DECISIONS AND DISBURSEMENTS

Approved on: 11 August 2022
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions and Support Department

Process Metrics for Annual Funding Decisions and Disbursements

PRs and Country Teams are expected to meet the following key performance indicators:

- 85% budget utilization of the first year of implementation, reported at end-June/end-December\(^{333}\);
- 94% budget utilization, reported in end-June/end-December\(^{334}\); and
- 90% disbursement utilization, reported in end-March/end-September;
- AFD Notification Letter sent by CT within 15 days\(^{334}\) of AFD approval; and
- Disbursement Notification Letter sent by CT within 15 days of release of the disbursement.

OVERALL OBJECTIVE

1. The annual funding decision (AFD) and disbursement processes are critical grant management functions. These processes allow the Global Fund to commit and disburse approved Grant Funds\(^{335}\) appropriately and take action to ensure grants continue to achieve maximum impact\(^{336}\). There are two main objectives:

   A. **Decide on Annual Funding:** Determine and commit the amount of funding that will be disbursed to the grant over the next 12 months of implementation\(^{337}\) (plus a buffer period), considering implementation performance and issues and risks; and

   B. **Disburse Funds:** Disburse funds committed through the AFD to the Principal Recipient (PR), or third party on behalf of the PR, for the payment of goods and/or services.

2. The AFD and disbursement processes ensure:

   i. Grant Funds are used for agreed objectives and outputs in an accountable manner whereby known or new risks are minimized and mitigated;

   ii. AFDs consider grant and PR performance to ensure PRs focus on results and timely grant implementation;

   iii. AFDs are well documented and justified; and

   iv. Disbursements are released on time to implementers and third parties to ensure the continuation of grant activities.

---

\(^{333}\) Budget utilization is reported annually for Focused portfolios.

\(^{334}\) All references to “days” in the document shall mean calendar days, unless otherwise stated.

\(^{335}\) Unless defined in this Operational Policy Note or the context otherwise requires, all capitalized terms used in this Operational Policy Note shall have the same meaning set out in the Global Fund Grant Regulations (2014).

\(^{336}\) The review of the grant service delivery and PR operational management and assigning a performance rating is part of Oversee Implementation and Monitor Performance. Refer to the **OPN on Oversee Implementation and Monitor Performance for more information**.

\(^{337}\) The amount committed under the AFD does not include centralized commitments and disbursements.
OPERATIONAL POLICY

A. DECIDE ON ANNUAL FUNDING

3. The AFD is the process of determining and setting aside (i.e. committing) Grant Funds to finance a specified 12-month period (execution period)\(^\text{338}\) plus a period of up to 6 months (buffer period)\(^\text{339}\). This maximum 18-month execution and buffer period are referred to in this document as the AFD Period. The AFD amounts are disbursed to the PR and third parties as relevant, in a staggered manner during up to a maximum 18-month period\(^\text{340}\) in accordance with the relevant Grant Agreement (see fig. 1).

![Figure 1. AFD Period.](image)

4. **Align AFDs.** The AFD and disbursement schedule aligns with the progress reporting period\(^\text{341}\) which, in turn, is ideally fully aligned with the national reporting cycle. If the grant start date is not aligned with the national reporting cycle, the 1st AFD is lengthened or shortened to ensure such alignment\(^\text{342}\).

\(^{338}\) In some cases, an execution period may be six months in high-risk environments. The same policies and processes apply except where indicated otherwise.

\(^{339}\) The Country Team determines whether the buffer period is 3 months or 6 months, as required.

\(^{340}\) Or up to 21 months when an AFD period is exceptionally lengthened for purposes of national reporting cycle alignment or to process a disbursement under a Supplementary Decision.

\(^{341}\) The progress reporting period is ideally aligned with the national reporting cycle and is not necessarily linked to calendar year or implementation years from the grant start date. Alignment to this period is necessary to ensure availability of programmatic results required to inform AFDs.

\(^{342}\) This is exceptionally permitted for the 1st or last AFD, since the execution period can only be up to 12 months.
5. Figure 2 shows the example of a grant with an implementation start date of 1 October. The national reporting cycle for the grant is from January to December. In order to align the AFD with the national reporting cycle, the execution period of the 1st AFD covers 15 months (plus a buffer). The 3rd AFD will cover a period of 9 months up to 30 September, since the Implementation Period is typically 3 years.

*Figure 2. Aligning the AFD and the disbursement schedule with the national reporting cycle.*

6. All commitments to the grant are processed through the AFD except commitments for centralized payments to third parties for: (i) the procurement of health products through the Pooled Procurement Mechanism (PPM), (ii) Wambo-related transactions, (iii) the private sector co-payment mechanism for ACTs (CPM) and (iv) Green Light Committee (GLC) payments (please also refer to the Direct Disbursements to Third Parties section below).

7. Each AFD is processed through an annual decision-making form (ADMF). The sum of all funds committed through AFDs and centralized payments for the full Implementation Period and closure period of a grant cannot exceed the grant signed amount stipulated in the relevant Grant Agreement.

8. The Approve AFD section below provides the delegated authority on annual and supplementary funding decisions.

9. **Types of Funding Decisions.** There are three types of funding decisions:

   - **1st AFD:** For a new grant or Implementation Period, this decision is taken immediately after grant signing and purchase order (PO) approval, based on the grant cash requirements in line with the approved budget. If the 1st AFD is completed within 30 days of the PO approval, and there are no exceptions selected, no signatures are required to process this decision. If there is a delay of more than 30 days in processing the 1st AFD, the relevant signatory authority stipulated in the “Approve AFD section” will be invoked.

     The 1st AFD does not consider grant or PR performance; however, it does consider any issues or actions identified during grant-making and/or approval.
• **2nd and 3rd AFD:** The subsequent funding decisions for years 2 and 3 of the grant Implementation Period take into consideration grant and PR performance and financial needs as reported through the Progress Update and Disbursement Request (PU/DR)\textsuperscript{343} or the Local Fund Agent, as relevant.

• **Supplementary Funding Decision:** Decisions that may be processed up to 18 months from the start date of the AFD Period, in the following cases:
  - When there is insufficient commitment under the active AFD to support grant activities for the PR or third parties;
  - To commit and disburse additional funds from mechanisms, such as portfolio optimization or the COVID-19 Response Mechanism (C19RM);
  - To reduce funds from the current AFD; or
  - To disburse funds for closure activities, after the Implementation Period end date, as long as the Implementation Letter approving the grant closure plan and budget has been signed by the PR (only applicable where there is insufficient commitment or the disbursement period of the previous AFD has expired)\textsuperscript{344}.

A Final Payment Letter\textsuperscript{345} is signed with the PR in order to process a supplementary funding decision or disburse funds more than 6 months after the Implementation Period end date to liquidate financial liabilities (Exception Level 1).

It is possible to process more than one supplementary funding decision in an AFD Period. This can be done through completing an additional supplementary ADMF that is generated to supplement the existing decision\textsuperscript{346}.

**A1. Determine AFD Amount and Disbursement Schedule**

10. **Determine AFD Amount.** The 1\textsuperscript{st} AFD amount is based on the approved grant budget. For the 2\textsuperscript{nd} and 3\textsuperscript{rd} AFD, the Country Team determines the AFD amount based on the following parameters:

• **Annual Performance.** The PU/DR and other relevant reports provide the Country Team with the programmatic performance (i.e. achievement of agreed targets, and which activities were completed, delayed and/or need to be continued in the next execution period) and the financial performance (i.e. in-country absorption and budget utilization against the agreed budget) of the grant, as well as any issues or challenges in implementation that require action. Annual performance translates into an annual rating.

The Global Fund uses an annual *Performance Rating Methodology* to determine the grant performance (resulting from the programmatic and financial performance of the grant), and a PR performance (resulting from an analysis of the PR’s implementation, financial, procurement and supply chain, and grant and risk management). Please refer to the *OPN and Operational Procedures on Oversee Implementation and Monitor Performance* for a full description of the Performance Rating Methodology.

---

\textsuperscript{343} See *Guidelines on Progress Update and Disbursement Request*.
\textsuperscript{344} Supplementary funding decisions related to grant closures can be processed until six months after grant end date (see *OPN on Implementation Period and Reconciliation and Grant Closure*).
\textsuperscript{345} The Final Payment Letter can also be applied to non-closure related activities with rationale provided for the AFD (if there is sufficient commitment balance) or supplementary funding decision.
\textsuperscript{346} Strong justification is required for any supplementary funding decisions submitted within 6 months from the initial AFD and more than 75% of the AFD amount.
• **PR Cash Expenditure Forecast**\(^{347}\). The projected amount of Grant Funds required for the payment of goods and/or services in accordance with the approved budget for the next execution and buffer periods\(^{348}\). This forecast calculation is based on:

  i. **In-country cash balance and advances.** Any available\(^{349}\), unspent cash balances held in-country (e.g., held by PR, Sub-recipient (SR), or suppliers) from the previous AFD.

  ii. **Changes to the work plan.** Changes to the work plan for the next execution period (e.g., postponement or acceleration of activities, changes to implementation arrangements, or delays or advances in major procurements) which have an impact on the cash needed for the period.

  iii. **Unit price changes.** The current or expected unit prices compared to those in the agreed budget.

  iv. **Financial commitments and financial obligations.** Current confirmed commitments and obligations to be paid during the disbursement request period.

  v. **Macroeconomic factors.** Any major changes in inflation or exchange rates that have affected the cash needs for the next execution period.

• **Reduction of funds.** Any reduction of funds that will affect the funds available for the next execution period\(^{350}\), e.g., non-compliance with co-financing commitments and documented decision to reduce funds (see *OPN on Co-financing*).

11. **Create a disbursement schedule.** The disbursement schedule is established by the Country Team as an integral part of the AFD process, based on the forecasted cash requirements for the execution and buffer periods covered by the AFD and the grant risk profile.

**High Impact and Core portfolios.** For High Impact and Core portfolios, disbursements are made on a quarterly basis or when the PR requires cash during the execution and buffer period covered by the funding decision. The first disbursement of the AFD is released with the approval of the AFD. Subsequent disbursements must be reviewed prior to the release of funds.

For grants with good programmatic and financial performance, as demonstrated by the criteria below, the Country Team can schedule and release bi-annual disbursements for grants with the total budget of US$100M or less, or full annual disbursements for grants with the total budget of US$30M or less, if the PR meets the following conditions:

  i. There is a cumulative grant in-country absorption of 85% ;
  ii. There is a timely submission of an unqualified\(^{351}\) audit report for the past year;
  iii. The latest PR reporting\(^{352}\) is submitted with no more than 30 days delay; and
  iv. The IRM rating is low and has not deteriorated in the last reporting period.

If one or more of the above conditions is not met, or financial performance and risk

---

\(^{347}\) In the PU/DR.

\(^{348}\) The calculation of the AFD amount does not include PPM/Wambo.

\(^{349}\) ‘Available funds’ is the cash balance minus any financial commitments and/or financial obligations.

\(^{350}\) Financial Services reduces the grant’s Purchase Order amount in the Global Fund Financial System (GFS) prior to initiating the AFD.

\(^{351}\) The report is accurate and complete.

\(^{352}\) When referencing multiple reports, the Finance Specialist assesses the condition of each.
deteriorates during the AFD period, the Country Team will revert to releasing quarterly disbursements.

**Focused portfolios.** For Focused portfolios, the first disbursement of the AFD is released with the approval of the AFD. Subsequent disbursements are released on a “no objection” basis, unless the disbursement is modified, postponed or canceled or is exceptional (see Management of Exceptions section).

The Global Fund disburses funds twice to the Principal Recipient as part of the 1st AFD: once during the year 1 and once during quarter one of year 2.

For the second and third year of implementation, for PRs with good programmatic and financial performance, the Country Team can disburse the annual budget amount based on the annual approved budget or the PR forecast\(^353\) (if lower than the annual budget), if the PR meets the following four conditions:

i. There is a cumulative grant in-country absorption of 85% ;
ii. There is a timely submission of an unqualified\(^354\) audit report for the past year;
iii. The latest PR reporting\(^355\) is submitted with no more than 30 days delay; and
iv. The IRM rating is low, and has not deteriorated in the last reporting period

If one or more of the above conditions is not met, the Country Team will prepare the AFD based on an agreed forecast and disburse on a semi-annual basis, which requires a review by the PST Specialist.

12. Undisbursed Funds\(^356\) remaining from the previous AFD are made available for the next AFD. The disbursement schedule for the (current) AFD must be equal to the total AFD disbursement amount to the PR and third parties.

13. **Disbursement currency.** Disbursements are generally made in the currency(ies) of the signed Grant Agreement unless there is a specific framework agreement between the Global Fund Secretariat under a corporate initiative with third parties requiring the disbursement in other currency(ies). Disbursements can also be processed in multiple currencies\(^357\). Where it is possible to manage and neutralize the foreign exchange impact on funds received for budgeted implementation activities, the Global Fund, in consultation with the PR, may deem\(^358\) multiple currencies more advantageous.

14. **Direct disbursement to third parties.** A direct disbursement to a third party can be requested by the PR or required by the Global Fund. Third parties that can receive direct disbursements from the Global Fund include:

---

\(^353\) Forecasts for Focused portfolios are based on the approved budget and the AFDs and updated as and when the PST receive information on absorption through the PU/DR.

\(^354\) The report is accurate and complete.

\(^355\) When referencing multiple reports, the Finance Specialist assesses the condition of each.

\(^356\) Grant Funds that have been committed to an AFD but not yet disbursed to the designated bank account of the PR or third party.

\(^357\) When preparing an AFD in a local currency, the amount is sourced from the signed budget prepared in the local currency. In cases when the foreign exchange is prepared from the budgets developed in the grant currency, the GOS/GFS exchange rate which is updated on a daily basis is used, which requires the Country Team to recalculate the disbursement amount(s) prior to AFD approval.

\(^358\) Agreed between the Country Team, Grant Financial Management and Treasury.
i. procurement service agents;
ii. agents that are directly contracted by the Global Fund Secretariat (e.g., fiduciary agents, fiscal agents);
iii. other service providers providing independent assurance to the Global Fund on grant implementation (external audit, diagnostics and other independent reviews);
iv. third parties which trigger a mandatory direct disbursement by the Global Fund under Section 3.7 (Mandatory Direct Payments) of the Global Fund Guidelines for Grant Budgeting;
v. private entities and internationally recognized technical assistance agencies and service providers with which the Global Fund has signed partnership agreements (including the official travel agent of the Global Fund when it is deemed more optimal and efficient for the Secretariat to arrange implementers’ travel on grant-related missions to Geneva);
vi. centralized payments, such as for the Green Light Committee (for the payment of the cost-sharing element pursuant to the MoU with the Green Light Committee); and
vii. SRs, in cases where SRs are acting as procurement agents, SRs in Additional Safeguard Policy countries or in countries where the political and/or the financial context does not enable the PR to disburse to the SR, and SRs that are in different geographical locations from the PR and where risks relating to potential foreign exchange exposure and/or inefficient banking regulations exist.

15. Third party payments outside of the above cases must be strongly justified and signed off on an exceptional basis.

16. All the required documentation for third party payments is set out in the Operational Procedures.

17. All third parties receiving direct disbursements from the Global Fund must be registered through the Grant Entity Data (GED) process by raising a ServiceNow ticket. Please refer to Annex 3 of the OPN on GED and its Operational Procedures for more detailed information.

18. Issues regarding the AFD amount or disbursement schedule that cannot be resolved at the Country Team level are escalated in accordance with the process outlined in the Guidance on Country Team Approach.

A2. Review Risks and Associated Mitigating Actions

19. As part of the AFD process, the Country Team undertakes a review of management issues and risks. It represents a critical point in time to (i) consider newly identified risks and/or (ii) adapt existing mitigating actions or controls based on the outcomes of assurance activities to ensure risks are being managed to an acceptable level. The Country Team ensures that new or amended mitigating actions are appropriate to safeguard funds being disbursed, and are appropriately funded.

20. While Country Teams remain the overall risk owner and responsible for all grant risks, the Risk Management Department provides independent and objective oversight for grants. This oversight ensures that key risks are adequately identified, prioritized and mitigated with appropriate assurance mechanisms in place. Country Teams engage with the Risk Management Department throughout the grant cycle so that issues or differences of opinion are identified early in the processes and resolved. During the preparation of the AFD, the

359 For example, for multi-country grants where the PR and SRs are located in different countries.
360 This includes the review of management issues to assess whether any need to be changed to a (Key) Mitigating Action.
Country Team selects relevant grant risks and Key Mitigating Actions (KMAs) relevant to the AFD Period.

**High Impact and Core portfolios.** Country Teams for High Impact and Core portfolios engage with the Risk Management Department in the review of management issues and key risks. Prior to submitting the AFD for approval, the ADMF is shared with the Risk Management Department seeking a “no objection” on the risk section within 48 hours. If no objection is raised within that period, their agreement with the risk analysis is confirmed. If an objection is raised, the AFD is sent back to the FPM for revision based on Risk’s feedback. If the issue cannot be resolved, it is escalated to the next management level in accordance with the process outlined in the Guidance on Country Team Approach.

**Focused portfolios.** Fund Portfolio Managers (FPMs) managing Focused portfolios are required to include any agreed issues identified during the PU/DR review into the annual funding decision-making process. The Portfolio Services Team (PST), supporting financial analysis for Focused portfolios, follows a standardized methodology to determine a grant’s financial risk ratings for the six risks within the Finance and Fiduciary Risk Category and any mitigating actions from the review of the external audit report and/or PUDR.

**A3. Approve AFD**

21. The approval authority depends on the recommended AFD amount and whether the AFD involves exceptions to the standard process.

**AFD Approval Limits**

---

361 Grant risks and Key Mitigating Actions are updated in the Integrated Risk Management (IRM) module prior to the AFD process in GOS. Focused portfolios are not required to select KMAs.
362 Given the ongoing engagement, it is expected that the 48 hours-period for raising an objection will be used rarely. In case of frequent use, it would reflect poorly on the engagement between the Country Team and Risk Management Department and is escalated to Grant Management Department Head and the Chief Risk Officer.
363 At the end of the review of the grant and PR Performance, the Country Team agreed upon issues to take forward. This is done by adding the issues that have been flagged by the LFA in the Findings and Recommendations section of the PU/DR, to the IRM Module in GOS. For more information, please refer to the OPN Oversee Implementation and Monitor Performance.
364 When processing a supplementary funding decision, the amount to determine the approval threshold is based on the undisbursed amount + the supplementary amount (and not the incremental amount of the AFD + supplementary amount).
22. The Financial Services Team perform a final compliance and due-diligence review to ensure compliance with established procedures as outlined in the OPN and accurate matching of payee details (name and associated bank account). There is a 2-step verification within Financial Services as follows:

<table>
<thead>
<tr>
<th>Approval Level</th>
<th>Approver Role</th>
<th>Decommitment†</th>
<th>AFD/Disbursement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Treasury &amp; Financial Transactions Department</td>
<td>Analyst, Financial Services</td>
<td>Compliance verification</td>
<td>Compliance verification</td>
</tr>
<tr>
<td></td>
<td>Manager, Financial Services</td>
<td>Compliance review &amp; approval</td>
<td>Compliance review &amp; approval&lt;sup&gt;365&lt;/sup&gt;</td>
</tr>
</tbody>
</table>

† Decommitments and transfers between periods and grants. This is not related to funding decision transactions.

23. The AFD is approved through an approval workflow<sup>366</sup>, whereby the approver reviews, recommends, validates and/or approves the AFD. The first disbursement is automatically approved with the approval of the AFD.

A4. Communicate AFD

24. An Annual/Supplementary Funding Decision Notification Letter is sent to the PR following the relevant funding decision, communicating the amount and the planned disbursement(s).

25. Following an AFD approval, the Country Team, in addition to the Annual Funding Decision Notification Letter, also sends a Performance Letter to the PR (as part of the PR reporting process), which may include the AFD amount and disbursement schedule. For more information, please refer to the OPN and Procedures on Oversee Implementation and Monitor Performance.

B. DISBURSE FUNDS

B1. Review Disbursement Schedule

26. A disbursement is the transfer of cash from the Global Fund to the PR or to third parties on behalf of the PR for the payment of goods and services based on the disbursement schedule defined in the AFD.

27. **Modify, postpone or cancel a scheduled disbursement (if applicable).** Country Teams are responsible for ongoing grant monitoring and determining if circumstances have changed between the time of the AFD and the scheduled disbursements. Any changes to the originally approved dates and/or amounts for payees are completed through an approval workflow. Any such changes must be within the overall AFD.

28. Country Teams can follow the below indicative guidance when determining whether a scheduled disbursement (including the buffer) needs to be modified downward or upward, postponed or canceled:
   i. progress on requirements related to the scheduled disbursement as well as compliance with requirements due during the AFD Period;
   ii. Low absorption<sup>367</sup>;

---

<sup>365</sup> This includes the Batch Release Approval for execution of the transaction by the Treasury and banking institution.
<sup>366</sup> Physical signature permitted when electronic approval not possible.
<sup>367</sup> Significant unspent cash balances which are not required before the next disbursement – more than 25-50% not spent of the previous cash disbursed under the current AFD as evidenced by the latest progress update in cash balances.
iii. Increased cash needs due to accelerated implementation; or
iv. Non-compliance of previous co-financing commitments

29. Where the Country Team modifies, postpones or cancels the scheduled disbursement, a rationale needs to be provided to justify such action.

B2. Approve Disbursement

30. The FPM and Finance Specialist have the approval authority to release disbursements for the grant (excluding Wambo, GLC and PPM) with escalated approval required if the disbursement involves exceptions (see Management of Exceptions section). Disbursements are approved through an approval workflow.

| High Impact and Core portfolios. | FPMs have the option to approve, modify, postpone or cancel the scheduled disbursement. Finance Specialists have the option to approve or reject. In order to release the scheduled disbursement, its status must be changed to ‘ready for release’.

| Focused portfolios. | Scheduled disbursements approved in the AFD are authorized by the FPM and PST Specialist through a no-objection basis, except when the disbursement is modified, postponed or cancelled, or requires additional sign-off due to an exceptional case (see Defined Exceptions section of this OPN). |

31. For Disbursements, the Financial Services Team perform a final compliance and due-diligence review for all portfolios, prior to the release of the disbursement, in the same way they do for the approval of an AFD (please refer to the Financial Services review in the AFD Approval section).

B3. Communicate Disbursement

32. A Disbursement Notification Letter is sent to the PR and/or third party to inform them of a disbursement made.

33. The Country Team provides additional contextual information to the PR if the relevant disbursement amount differs from what was originally approved in the AFD.

SPECIFIC MULTI-COUNTRY CONSIDERATIONS

34. The standard approach defined above also applies to multi-country portfolios and grants.

---

368 A proportionate withholding of disbursements may occur as a consequence of non-compliance of previous co-financing commitments. Please refer to the OPN on Co-financing for more information.

369 Physical signature permitted when electronic approval not possible.

370 The CT can only provide additional text to the system-proposed text.

| 1.  | EGMC        | • Clarified rules that buffer cannot be release before 12 months of the execution period, but if required, the disbursement must be approved by Treasury.  
• Clarified definition of AFD (not incremental commitment but total disbursement over the execution and buffer period) and included rules on disbursing beyond the buffer period (up to 6 months after the buffer).  
• A differentiated approach for rolling out the new requirement for PRs to submit quarterly financial reporting on cash balances and (ii) clarification that the EFR remains applicable for old grants, while the new Annual Financial Report (AFR) is applicable for grants signed under the new funding model.  
• Introduces workplan tracking measures for use in grants without service delivery components as well as the rating methodology for grants converting the milestone tracking into a standard indicator rating.  
• Clarifies the simplified process for making a first AFD based on the recently signed budget in the grant agreement. | 18 September 2014 | 2.2         |
| 2.  | EGMC        | • Standard 6 months buffer for AFDs for focused countries. 6 months buffer is also allowed for core and high impact countries.  
• For Focused Countries, disbursements approved either through a no-objection basis except when the disbursement is modified, cancelled or requires additional sign-off.  
• PPM, AMFm and Wambo-related commitments will not be processed through the ADMF but through the IOCF process.  
• Provision for multi-currency disbursements if deemed more advantageous in terms of managing foreign exchange fluctuations.  
• Revised delegated authority for annual funding decisions and disbursements.  
• Additional flexibilities on disbursements to third parties.  
• Revised grant rating methodology. | 22 July 2016       | 2.3         |
<p>| 3.  | EGMC        | Complete revision of the OPN to align with the Operational Policy Framework and relevant policy/system updates.                                                                                                                                                                                                                                   | 11 August 2021     | 3          |</p>

ANNUAL FUNDING DECISIONS AND DISBURSEMENTS

Approved on: 11 August 2021
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions and Support Department
Associated OPN: OPN on Annual Funding Decisions and Disbursements

Process Metrics for Annual Funding Decisions and Disbursements

PRs and Country Teams are expected to meet the following key performance indicators:

- 85% budget utilization of the first year of implementation, reported at end-June/end-December;
- 94% budget utilization, reported in end-June/end-December;
- 90% disbursement utilization, reported in end-March/end-September;
- AFD Notification Letter sent by CT within 15 days of AFD approval; and
- Disbursement Notification Letter sent by CT within 15 days of release of the disbursement.

Key Operational Policies:

- OPN on Annual Funding Decisions and Disbursements
- OPN on Oversee Implementation and Monitor Performance
- Operational Procedures on Oversee Implementation and Monitor Performance
- Guidelines on Implementers of Global Fund Grants
- Guidelines on Progress Update and Disbursement Request

PURPOSE

2. This document provides procedural guidance on the annual funding decision (AFD) and disbursement process and applies to grants financed during the 2020-2022 funding cycle and onwards.

---

371 Budget utilization is reported annually for Focused portfolios.
372 All references to “days” in this document shall mean calendar days, unless otherwise stated.
3. The key steps in the AFD and disbursement processes are outlined in the following diagram:

<table>
<thead>
<tr>
<th>Decide on Annual Funding</th>
<th>Disburse Funds</th>

### A. DECIDE ON ANNUAL FUNDING

#### 1. Determine Funding Amount and Disbursement Schedule

<table>
<thead>
<tr>
<th>Outputs</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st Annual Funding Decision</td>
<td>After grant signature</td>
<td>Prepared by: PO or FPM/FPA (Focused)</td>
</tr>
</tbody>
</table>

1st ADMF capturing:
- recommended AFD amount;\(^{373}\)
- disbursement schedule including payees\(^{374}\) and transaction currency;\(^{375}\)
- rationale and summary of the intended use of the recommended AFD amount.

The 1st AFD amount is based on the approved grant budget.

---

\(^{373}\) Amounts can be withheld from the AFD, either for co-financing, portfolio optimization or other purposes. Please refer to the *GOS Manual for AFD and Disbursements* for technical guidance, and to the *OPN on co-financing* and Portfolio Optimization documentation for related information.

\(^{374}\) Central payments are handled directly through an integrated interface between the Grant Financial System with Wambo. For Wambo and/or PPM, refer to the *OPN on Pooled Procurement Mechanism (PPM)*; for the private sector co-payment mechanism for ACTs (CPM), through the Internal Order Confirmation Form (IOCF); for Green Light Committee (GLC), through Financial Services.

\(^{375}\) When a currency is selected that is different from the grant currency, the local currency forecast amount is sourced from the signed budget prepared in the local currency. In cases when the disbursement currency is prepared from the budgets developed in the grant currency, the GOS/GFS exchange rate is used (which is updated on a daily basis).
### 1. Determine Funding Amount and Disbursement Schedule

<table>

Grant Revisions

Issued on: 22 February 2018
Issued by: Grant Portfolio Solutions
Approved by: Executive Grant Management Committee
Purpose: To provide guidance to Country Teams on the policy and process for revising an existing grant.

INTRODUCTION

1. The goal of a grant revision is to allow Global Fund investments to adjust to programmatic requirements during grant implementation, in order to ensure the continued effective and efficient use of Global Fund resources invested to achieve maximum impact in line with the Global Fund’s 2017-2022 Strategy. A grant revision may also occur due to other changed circumstances and arrangements.

HOW TO READ THIS DOCUMENT

2. As this OPN covers all types of revisions, only parts of this document will be relevant to Country Teams at any given time, depending on the type of revision planned.

3. First, it is recommended that Country Teams determine the type of revision required, based on the decision tree on page 2, and then proceed directly to the appropriate section. The types of revisions and relevant sections of this OPN are:

   Extensions (End-Date Revisions) if extending the grant’s implementation period (IP)  
   Section A

   Additional Funding Revisions if increasing total funds, but not extending IP  
   Section B

   Program Revisions if revising programmatic scope/scale, but not extending IP or adjusting total funds  
   Section C

   Budget Revisions if changes are solely budgetary and do not impact Performance Framework  
   Section D

   Administrative Revisions if changes are only being made to master data contained in Grant Agreement (e.g., PR/LFA contact details)  
   Section E

4. For each type of revision, the comprehensive process and requirements are defined in the specified section in the OPN. For example, extensions which involve changes to both budget and performance framework would follow only the extensions process defined in Section A and do not need to go through the program revisions and budget revisions processes.

---

388 This Operational Policy Note (OPN) supersedes former OPN on Signing and Amending Grant Agreements (sections pertaining to amending grant agreements), OPN on Extending Grant Implementation Periods, and OPN on Reprogramming During Grant Implementation.

389 This Operational Policy Note is designed as an interim document, to provide guidance to Country Teams, until potential revisions to the Board-approved extension policy (GF/B31/DP12) are approved.

390 If a Country Team is unclear as to which type of revision is most relevant given the context, please consult with the Operational Policy Hub or Legal Officer for guidance.
5. It is critical that grant revisions should be processed prior to effectivity date of the grant revisions. Retroactive grant revisions (such as processing of an extension request past the grant end-date) are not allowed.

6. Second, for more detailed guidance on the specific steps required by each stakeholder, please refer to *Grant Revision Process Flow*.

7. Third, there are frequently asked questions related to Grant Revisions on Service Now.

8. Finally, a list of key concepts related to Grant Revisions, as well as an overview of stakeholder roles and responsibilities can be found on pages 2-4.

*Figure 1: Decision tree to determine the type of grant revision to pursue*

**KEY CONCEPTS**

9. **Allocation period.** The allocation period is the three-year period, aligned to each replenishment period, during which eligible applicants may apply for, and the Board may approve, such funding for grant programs. For the 2017-2019 allocation period, this period starts on 1 January 2017 and ends on 31 December 2019. For key concepts related to grant making, refer to the *OPN on Access to Funding, Grant-making, and Approval*. 
10. **Allocation Utilization Period (AUP).** The Allocation Utilization Period is the 3-year period\(^{391}\) during which the country allocation per disease component can be utilized to implement programs. It starts the day after the original end-date of existing grant(s). The start date of the Allocation Utilization Period per disease component is documented in the Allocation Letter\(^{392}\).

<table>

<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Implementation Period.** An implementation period is the period during which a Principal Recipient implements programmatic activities, as reflected in the grant agreement\(^{393}\). An Extension of an existing grant will extend the end-date of the implementation period of the existing grant, however the end-date of the current Allocation Utilization Period will not be extended. This means that all Extensions will use time from the subsequent Allocation Utilization Period, with funding used during the Extension period to be deducted from the subsequent allocation amount; the remaining balance will then become the maximum amount of funds available for the remainder of the subsequent Allocation Utilization Period (figures 2 and 3).

**Figure 2. The Allocation, Allocation Utilization and Implementation Periods.**

**Figure 3. Example of an Extension of an existing implementation period.**

12. **Unutilized Funds (undisbursed funds + uncommitted in-country cash balance).** Funds from a previous allocation period that remain unutilized at the end of the relevant implementation period cannot be carried over to increase the designated country allocation for the new Allocation Utilization Period. Instead, unutilized funds will be returned to the general

---

\(^{391}\) Justifications for variations from the three-year standard will be provided to the Board as part of the Secretariat’s grant approval requests - Annex 1, **GF/B35/05 Allocation Methodology 2017-2019**. Should the allocation utilization period be more than three years, the maximum funding available remains the same.

\(^{392}\) In order to incentivize joint programming and enable effective and efficient management of such grants in exceptional cases, flexibilities to the grant implementation periods may be applied.

\(^{393}\) An implementation period is not necessarily the same as a grant; a single grant can span multiple implementation periods. For example, a grant implemented by the same PR for the same disease component and with the same grant name in the subsequent implementation period will continue as the same grant, but in a new implementation period.
funding pool and become available for portfolio optimization investment. For further guidance, please refer to the *OPN on Grant Closures*.

### HIGH-LEVEL ROLES & RESPONSIBILITIES

13. At a high-level, the roles and responsibilities associated with pursuing a grant revision are roughly similar, regardless of which type of revision is being pursued. For further information on the detailed process steps, see Annex I.

14. **Principal Recipient (PR)** initiates a revision (in coordination with the Country Team and Country Coordinating Mechanism); accesses the relevant revision documents in the Partner Portal; completes relevant sections of the *Grant Revision Request Form* and the amended grant documents (including Performance Framework, Detailed Budget, and List of Health Products, if applicable) and submits to the Country Team through the Grant Operating System (GOS); and countersigns the Implementation Letter required to amend the Grant Agreement (if applicable).

15. **Lead Implementer (LI)** is the entity (organization or office) that is operationally responsible for the implementation of the grant’s activities. In terms of grant revisions, the LI supports the PR in preparing the relevant revision documents and is notified of key steps and deliverables in the process (e.g., approvals). Note that the Lead Implementer is not reflected in the Grant Agreement, and for many grants, the Principal Recipient and Lead Implementer are the same entity.

16. **Country Coordinating Mechanism (CCM)** endorses the revision request (for Extensions, Additional Funding, and Program Revisions) or is notified about the request (for Budget and Administrative Revisions).

17. **Local Fund Agent (LFA)**, if requested by the Country Team, reviews the Performance Framework and Budget documents (and others, if applicable) and makes recommendations to the Country Team.

18. **Country Team** initiates revisions (in coordination with the PR and CCM); provides grant revision templates for PR/LI to complete; reviews PR/LI-submitted documents (including the *Grant Revision Request Form*, Budget, Performance Framework, List of Health Products, etc.); determines the type of revision required; finalizes the *Grant Revision Request Form* for review by the relevant approval authority, if applicable; facilitates and executes the review and approval process of the revision request; coordinates with other teams within the Secretariat to notify the Board and Grant Approvals Committee, as applicable; approves revision requests in line with delegated approval authority; and prepares and signs the relevant amendments to the grant agreements (e.g., through an Implementation Letter), if applicable.

### SECTION A: EXTENSIONS (END-DATE REVISIONS)

19. **Definition:** An Extension (End-date Revision) amends and extends the end-date of the relevant implementation period to allow for continued grant implementation and to avoid program disruptions while operational challenges are addressed or a new allocation is being accessed.

20. **Triggers:** Extensions should be sought on the grounds of strongly justified circumstances, such as:

---

394 This section operationalizes the policy related to extending grant implementation periods as approved by the Global Fund Board (GF/31/DP12 – Extension Policy under the New Funding Model).

395 Operational policy on the possible use of extensions will be updated should there be amendments to the Board-approved extension policy (GF/B31/DP12).
ii. To facilitate the submission of single funding requests for multiple disease components (e.g., joint HIV and TB concept notes for high co-infection countries);

iii. To address challenges in timely submission of funding requests due to circumstances that are beyond the control of the applicants;

iv. To compensate for delays in the review and processing of relevant funding requests by the Global Fund, such as unexpected delays caused by the Grant Approvals Committee (GAC) or Technical Review Panel (TRP) review processes, or when the Global Fund Board objects to relevant funding recommendations from the Secretariat;

v. To compensate for delays in grant making and signing due to circumstances that are beyond the control of the applicants (e.g., matters related to the work of the Office of the Inspector General, changes to nominated Principal Recipients); and/or

vi. To compensate for delays in implementation due to circumstances that are beyond the control of the implementers.

21. **Initiators:** An Extension may be initiated by the Principal Recipient, the CCM, or the Country Team. The CCM must be informed of all Extensions, and shall endorse all requests for Extensions as these will be financed from the country’s subsequent allocation.

22. **Timing:** An Extension should ideally be approved at least three months prior to the current implementation period end-date, to avoid any gaps between current implementation period end-date and Extension period start-date. To meet this deadline, it is recommended that countries begin the process at least 6 months prior to the current implementation period end-date.

23. **Key Design Considerations:** When designing an Extension, Principal Recipients and Country Teams should adhere to the following guidelines:

   a. **Source of Funding:** Although Extensions amend the Implementation Period, they do not amend the Allocation Utilization Period. Therefore, all Extensions will use time from the subsequent Allocation Utilization Period and will be funded from the subsequent allocation, reducing the amount of time and funds available for the next Implementation Period. In addition, the Allocation Utilization Period in which goods and services are delivered determines the allocation from which it will be funded; therefore, if goods and services are delivered during an Extension period, they will be funded from the subsequent allocation.

   b. **Sustainability:** As all Extensions will be financed by the subsequent allocation, Country Teams and PRs must ensure that programmatic and cost implications beyond the Extension period have been fully considered. The activities and budget for the Extension period should enable a proper transition to the next Implementation Period and consider the expected trajectory of future funding. This is to ensure that a disproportionate amount of the subsequent allocation is not consumed during the Extension period (e.g., to ensure that 50% of the subsequent allocation for a component is not consumed during a 6 month Extension) and that sufficient funds exist to cover the entire 3-year Allocation Utilization Period. Such disproportionate spending could set the program on an unsustainable spending trajectory or one not reflective of the epidemiological context.

   c. **Maximizing Impact:** Country Teams should ensure that all programmatic activities during the Extension period maximize impact given the available resources, align with the core objectives of the Global Fund’s 2017-2022 Strategy, and allow for a seamless transition to the new implementation period.

   d. **Targets and Activities:** The Country Team and PR shall work to determine key programmatic activities and targets during the Extension period. The targets for the period

---

396 The composition of the Country Team varies depending on the portfolio category. For Focused Countries, the Country Team is comprised of the Fund Portfolio Manager, Senior Fund Portfolio Assistant, the Public Health and M&E Specialist, and the Legal Officer. For Core and High Impact Countries, the Country Team includes the Fund Portfolio Manager, Program Officer, Public Health and M&E Specialist, Health Products Management Specialist, Finance Specialist and Legal Officer.
of the Extension should be the same as those specified in the last reporting period, or if an adjustment is required, should be in line with the trajectory of the allocation for that country component going forward. If such programmatic adjustments are deemed to be “Material Program Revisions”, then the process for reviewing Material Program Revisions should be followed in addition to the process for reviewing Extensions (see Section C, paragraph 43).

e. **Length:** Other than with Global Fund Board approval, an Extension cannot extend the current implementation period of the grant for more than 12 months. This maximum length of 12 months is cumulative for all Extensions approved for the current implementation period.

f. **Procurement:** Procurement orders can be placed during the Extension period, but only in instances where 1) procurement is required to avoid stock outs and interruption of program implementation and service delivery during the new implementation period; and 2) where the subsequent grant is in advance stages of the grant making process (must have completed TRP review). For further information, please refer to the *OPN on Advanced Payment Mechanism (forthcoming)* and the *OPN on Pre-Financing*.

**Approval Authority**

24. A number of criteria are used to determine the appropriate approval authorities required for Extensions (see table on following page). These criteria include:

   a. **The unutilized funds from the current implementation period are sufficient to fully cover the budget for the extension period.** While this criteria will be used to determine the level of approval required for an Extension, it is important to note that all funds used during the Extension period will be deducted from the subsequent allocation. See Figure 4 for an illustration of the two scenarios.

   b. **The length of the Extension period** (e.g., how much the current implementation period’s end-date will be extended, on a cumulative basis – and therefore, how much time from the Allocation Utilization Period will be left available for the subsequent implementation period);

   c. **The percentage of the subsequent country allocation for the relevant disease component to be used during the Extension period** (e.g., what the Extension period budget will be – and therefore, how much funding for the disease component will be available for the remainder of the Allocation Utilization Period).

25. When assessing the criteria above, the following should be taken into consideration:

   a. When determining the percentage of the subsequent allocation amount designated for the relevant disease component to be used during the Extension period, the Country Team should use the most recent program split, as defined through country dialogue during the access to funding and grant-making process (for further details please refer to the *Guidance Note on Program Split*). If such country dialogue has not yet taken place, the Country Team should use the indicative program split, as communicated in the allocation letter for the new allocation period. For multi-component grants, the Country Team should use the sum of the allocation of the relevant components.

---

397 For example, if the country component is facing a subsequent allocation that is significantly smaller than the current one, targets for certain interventions could be adjusted downward in order to reflect the new funding reality. Such decisions should involve consultation with the Country Team and relevant disease advisor.

398 This is particularly important when it is known that specific activities are unlikely to continue in the new implementation period due to the amount of the new allocation (e.g., if the amount is reduced).

399 Commodities required must be clearly identified and agreed in the List of Health Products in the detailed budget. See OPN on the Pooled Procurement Mechanism for further detail on the mitigating measures required in this situation or the OPN on Advanced Payment Mechanism (forthcoming).

400 This criteria will apply until potential revisions to the Board-approved extension policy (GF/B31/DP12) are approved.
b. When determining the length and the percentage of allocation amount for the relevant disease component to be utilized during the Extension period, both time and funds should be cumulative for all Extensions requested for that implementation period (e.g., those already signed, if applicable, and the Extension requested).  

Scenario 1: Unutilized approved funds greater than or equal to Extension period budget

Scenario 2: Unutilized approved funds less than Extension period budget

Figure 4. Illustration of examples where sufficient unutilized funds do or do not exist in current implementation period to cover the budget for the Extension period.

Scenario 1: Unutilized funds from the current implementation period are sufficient to fully cover the extension budget

<table>
<thead>
<tr>
<th>Cumulative Extension Period</th>
<th>% of the next allocation for relevant disease component to be used during Extension period</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to 3 months</td>
<td>Up to 10%</td>
<td>Country Team (and PST for Focused)</td>
</tr>
</tbody>
</table>

For example, if a grant is approved by a Department Head for a six month Extension (assuming sufficient unutilized funds from current implementation period available to finance the Extension budget) accounting for 10% of the new allocation amount for the relevant disease component, and then the country requests an additional two month Extension (assuming sufficient unutilized funds, as well) accounting for 7% of the new allocation amount for the relevant disease component, the second Extension is subject to an elevated approval authority and must be approved by the GAC as it will cumulatively be a nine month Extension accounting for 17% of the new allocation for the relevant disease component.

Formerly “non-costed extension”

In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the Country Team Approach.
<table>
<thead>
<tr>
<th>Duration</th>
<th>Percentage</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>More than 10%</td>
<td>Regional Manager or Department Head (for High Impact)</td>
<td></td>
</tr>
<tr>
<td>Up to 15%</td>
<td>Grant Approvals Committee (GAC)</td>

</tbody>
</table>

Reporting and Impact on Legal Documents

26. Reporting: The Grant Revision Request Form should be used to submit all Extension requests. The Country Team provides to the PR the Grant Revision Request Form together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest List of Health Products (LOHP) (as applicable) to complete/update. Using the information compiled by the PR in the Request Form and the updated grant documents, the Country Team will finalize the Request Form for securing Global Fund approval, with the following documents accompanying the form:

a. An amended Performance Framework for the full implementation period (including Extension period);

b. An updated Summary Budget for the full implementation period (including Extension period) and Financial Calculator approved by FO/PST and RFM;

c. The CCM Chair and Vice Chair endorsement of the Extension request and the use of allocation for the revision. This endorsement will be captured in the Grant Revision Request Form.

---

405 Formerly “costed extension”

406 According to Board-approved extension policy (GF/31/DP12), the GAC is authorized to approve Scenario 2 Extensions as long as the amount of additional funding required (the funding required for the Extension period minus the unutilized funds approved by the Board for the current IP) does not exceed USD 10 million and is not equivalent to more than 6 months of additional funding. To calculate the equivalent months of additional funding, first, determine the additional funding requested, as a percentage of the total Extension period budget. Then, multiply this percentage by the number of months of the Extension request; if more than 6, Board approval is required. For example, if there is an Extension request of 8 months, with a total revision budget of USD 8 million and additional funds requested of USD 4 million, the percentage of additional funds requested over total revision budget is 50%, and the months of funding required is 50% multiplied by 8 months, or 4 months. Therefore, this revision request requires GAC approval. However, if instead, the Extension request is for 8 months, with a total revision budget of USD 8 million and additional funds requested of USD 7 million, the percentage of additional funds requested over total revision budget is 87.5%. Therefore the months of funding required is 87.5% multiplied by 8 months, or 7 months; this revision request requires Board approval.

407 The Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.

408 If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.

409 Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).

410 In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice &
27. For all extensions request, Country Team should consult and inform Access to Funding Department for tracking and reporting of extensions to the Board. For extension requests in High Impact or Core countries requiring GAC and Board approval, Country Teams should consult with the Risk Department on the grant’s key risk and mitigating actions.

28. **Implementation Letter:** Once approval of the Extension has been secured, an amendment to the Grant Agreement is required, which takes the form of an Implementation Letter.
   a. **Documents to be included:** This should include an updated Summary Budget and Performance Framework, as applicable.
   b. **Signatories:** The Implementation Letter must be signed by the authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

29. **Notification to Board and GAC:** All Extensions approved by the Secretariat must be notified to the Board and GAC through Grant Approvals Committee Reports.

30. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION B: ADDITIONAL FUNDING REVISIONS**

31. **Definition:** An Additional Funding Revision increases the total approved funding for the relevant implementation period during grant implementation, with no amendment to the length of the implementation period.

32. Reductions to the total approved funding for a relevant implementation period should be managed through regular grant management processes. Depending on the trigger of such reductions, further guidance could be sought in the *OPN on Co-Financing* or the *OPN on Recovery of Grant Funds*. Where such an approach is not possible, the Country Team may escalate the request to the GAC for review.

33. **Triggers:** Additional funds may be made available at the aggregate portfolio level as a result of, among other factors:
   a. Additional pledges and contributions by donors, including permitted restricted financial contributions by private donors;
   b. The portfolio optimization process, upon the review and endorsement of the Audit and Finance Committee.

34. **Initiators:** An Additional Funding Revision may be initiated by the Country Team and managed in consultation with CCM, PR(s), LI(s) and technical partners.

35. **Timing:** An Additional Funding Revision may be proposed at any time during grant-making or during grant implementation. For revisions during grant-making, please refer to the *OPN on Access to Funding, Grant-making, and Approval*.

36. **Key Design Considerations:** When designing an Additional Funding Revision, Principal Recipients and Country Teams should adhere to the following guideline:
   a. **Targets and Activities:** The Country Team and PR shall work to determine how to adjust the key programmatic activities and targets for the implementation period. Typically, targets should be adjusted upwards as a result of an Additional Funding Revision, considering the additional resources provided. If, however, the Country Team and PR

---

411 Additional funding from the Emergency Fund follows the Emergency Fund review and approval process as captured in the *Guidelines on Emergency Fund.*

Partnerships Team within the Strategy, Investment and Impact Division (SIID) and to the extent possible, in-country partners.
determine that increasing the targets is not possible, justification in the *Grant Revision Request Form* is required.

**Approval Authority**

37. The approval process for Additional Funding Revisions is differentiated based on the percentage increase compared to the original grant funds.

38. The thresholds for percentage increase are cumulative for the entire implementation period and are always compared to the original approved budget at the time of grant signing.

39. It should be noted that if funding becomes available during grant implementation through channels with clearly defined and distinct approval processes and requirements (e.g., special initiatives), or through channels where funding has already been approved for specific country components, the approval authorities and requirements as defined below do not need to be pursued, in addition.

<table>
<thead>
<tr>
<th>Threshold</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Additional Funding Revision of up to 30% of approved fund for the implementation period</td>
<td>Board (with GAC recommendation)</td>
</tr>
<tr>
<td>- Additional Funding Revision of more than 30% (if additional funds will finance TRP-reviewed Unfunded Quality Demand)</td>
<td>Board (with GAC and TRP recommendation)</td>
</tr>
</tbody>
</table>

**Reporting and Impact on Legal Documents**

40. Reporting: The *Grant Revision Request Form* should be used to submit Additional Funding Revision requests. The Country Team provides to the PR the *Grant Revision Request Form* template, together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest LOHP (as applicable), to complete/update. Using the information compiled by the PR in the *Request Form* and the updated grant documents, the Country Team can then finalize the *Request Form* for securing Global Fund approval, with the following documents accompanying the form:

   a. An amended Performance Framework for the full implementation period;
   b. An amended Summary Budget and Financial Calculator approved by FO/PST and RFM;
   c. The CCM Chair and Vice Chair endorsement of the revision request. This endorsement will be captured in the *Grant Revision Request Form*.

---

412 If the additional funding is used to finance TRP-recommended unfunded quality demand (UQD), the PR section of the Grant Revision Form is not required. Agreed elements of the UQD to be funded by additional funding will be captured in the Country Team Section of the Grant Revision Form. In reviewing additional funding revisions, the Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.

413 If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.

414 Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).

415 CCM input will be with respect to programmatic implications of additional funding. In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice & Partnerships Team within the Strategy, Investment and Impact Division (SIID) and to the extent possible in-country partners.
41. **Implementation Letter:** Once finalized and approved by the Global Fund, an Additional Funding Revision must be reflected in the grant agreement, by issuing an Implementation Letter to amend the Performance Framework and Budget.

   a. **Documents to be included:** This should include an updated Summary Budget and Performance Framework.

   b. **Signatories:** The Implementation Letter must be signed by the authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the **Signatory Authority Procedures**).

42. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION C: PROGRAM REVISIONS**

43. **Definition:** A Program Revision (formerly referred to as a “reprogramming”) is the process of changing the scope and/or scale of a Global Fund-supported program within already approved funding ceiling and current implementation period. The goal of a Program Revision is to promote and enable the adjustments of programs to ensure the continued effective and efficient use of Global Fund resources invested to achieve maximum impact in line with the Global Fund’s 2017-2022 Strategy.

   a. Changing the **scope** is the process of (i) adding or deleting goals and/or objectives, or (ii) changing key interventions\(^\text{416}\), (including those related to RSSH, Human Rights, and Gender Equality) either at the level of a grant, or at the level of the Global Fund supported disease or HSS program.

   b. Changing the **scale** is the process of increasing or decreasing targets for goals and objectives for key interventions.

44. **Triggers:** There are a number of potential scenarios which might trigger a Program Revision. These include, but are not limited to:

   a. The need to invest more strategically, e.g., in case of changes in NSP, epidemiological trends, new data from national surveys, or program evaluations, etc.

   b. Emerging scientific evidence or normative guidance

   c. Changes in the national context

   d. Changes in unit costs and budgetary changes

   e. Changes in implementation arrangements

   f. Scale up effective interventions

   g. Risk mitigation purposes

   h. Shifting activities and budget from one grant / PR to another grant / PR emanating from one funding request

   i. The need to advance transition planning, particularly in the event that a country is nearing the end of its funding relationship with the Global Fund.

45. **Initiators:** A Program Revision may be initiated by the Country Coordinating Mechanism (CCM), Principal Recipient (PR), or the Global Fund Country Team and managed in consultation with CCM, PR/LI(s), and technical partners.

46. **Timing:** A Program Revision may be proposed during grant implementation. The timing of submission of a Program Revision request during grant implementation depends on the defined portfolio category of the country component:

\(^{416}\) For example, key interventions within a defined epidemiological context, as confirmed by the relevant disease advisor: interventions that are not adequately funded at present and/or interventions that meet one or more of the following criteria: i) address emerging threats to disease control, ii) lift barriers to the broader disease response and/or create conditions for improved service delivery; AND/OR iii) enable the roll-out of new technologies that represent best practice.
<table>
<thead>

</thead>
<tbody>
<tr>
<td>Focused</td>
<td>Once a year, if warranted by the program context.</td>
</tr>
<tr>
<td>Core</td>
<td>Any time during grant implementation, if warranted by the program context.</td>
</tr>
<tr>
<td>High Impact</td>
<td>Any time during grant implementation, if warranted by the program context.</td>
</tr>
</tbody>
</table>

**Types of Program Revisions**

47. A Program Revision request is classified as either “**material**” or “**non-material**”. The materiality of a Program Revision request is assessed at the disease or HSS program level (supported by the Global Fund) and not at the individual grant level.

48. **Material Program Revision.** A Program Revision is considered material when:
   a. It contradicts the TRP’s original or modified review and recommendation on the funding request (e.g. intervention originally removed by TRP is being re-introduced to the program; there is a significant redesign or shift of balance of original approved funding request/grant, i.e. a prevention program is shifting to treatment; a key intervention is removed from the grant without evidence of alternative funding in the country); OR
   b. There is a lack of agreement in the normative guidance, significant gaps in evidence to support a Program Revision, unexplained lack of impact, or difficult trade-offs in decision making (e.g. the grant is operating in a context where there is no national strategy or there is a lack of strategic focus of additional investments or interventions), which therefore requires an independent technical review of the Program Revision request.

49. **Non-Material Program Revision.** A Program Revision request is considered non-material if it falls outside the definition of materiality described in paragraph 44 above.
   a. In addition, funding activities that are included and prioritized in the UQD register generally will be considered non-material and therefore will not require a TRP review. (For further information, please refer to the *OPN on Access to Funding, Grant-making, and Approval*).
   b. A request involving a shift of activities and respective budget from one PR to another PR from the same approved funding request will not be considered material.

**Determining Materiality**

50. The Country Team, in consultation with relevant Disease Advisors and Regional Managers/Department Heads, reviews the Program Revision request and makes a preliminary determination of whether the revision is material or non-material, as defined above. If no agreement is reached among parties involved in the consultations in determining the materiality of the request, the decision-making will be escalated as per the standard escalation procedure, as determined in the *Country Team Approach*.

51. All cases identified as Material Program Revisions by the Country Team must be reviewed by the GAC. The GAC confirms whether a Program Revision identified by the Country Team as material is *indeed* material. If the GAC determines the request to be non-material, the GAC approves the request.

---

417 During a reallocation of activities and accompanying budget between PRs in the same program, Country Team must ensure that (i) PR(s) to whom the activities will be reallocated has achieved satisfactory past performance and has relevant capacity to perform the activities; (ii) the proposed reallocation is aligned with the program goals and objectives; and (iii) the proposed reallocation is consistent with the TRP recommendations for the program.
52. If the GAC determines the request to be material, the request is referred to the TRP for review. The TRP makes a recommendation to the GAC on the strategic focus, technical soundness, and potential for impact of a Program Revision request. Following the TRP review and recommendation, the GAC then makes the decision on the Program Revision request.

### Approval Authority

53. The approval process for Program Revisions is differentiated based whether the revision is deemed material or non-material:

<table>
<thead>
<tr>

### Reporting and Impact on Legal Documents

55. **Reporting:** The *Grant Revision Request Form* should be used to submit Program Revision requests.<sup>420</sup> The Country Team provides to the PR the *Grant Revision Request Form* together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest LOHP<sup>32</sup> (as applicable) to complete/update. Using the information compiled by the PR in the

---

<sup>418</sup> See Annex III for the TRP review process of revision requests.

<sup>419</sup> In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the *Country Team Approach*.

<sup>420</sup> Program Revisions that do not increase or decrease targets in the Performance Framework (e.g., changes to reporting schedules, aligning terminologies of indicators) do not require the Grant Revision Form. In reviewing program revision requests, the Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.
Request Form and the updated grant documents, the Country Team can then finalize the Request Form for securing Global Fund approval, with the following documents accompanying the form:

- An amended Performance Framework\footnote{If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.} for the full implementation period;
- An amended Summary Budget (if revision impacts budget)\footnote{Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).} and Financial Calculator approved by FO/PST and RFM;
- The CCM Chair and Vice Chair endorsement of the revision request\footnote{In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice & Partnerships Team within the Strategy, Investment and Impact Division (SIID) and to the extent possible in-country partners.}.

This endorsement will be captured in the Grant Revision Request Form.

56. For Material Program Revision requests in High Impact or Core countries, Country Teams should consult with the Risk Department on the grant’s key risk and mitigating actions.

57. **Implementation Letter**: Once finalized and approved by the Global Fund, a Program Revision must be reflected in the grant agreement, by issuing an Implementation Letter. This should be done for both Material and Non-material Program Revisions.

   a. **Documents to be included**: An updated Summary Budget and a Performance Framework, regardless of the scale or materiality of the change.
   b. **Signatories**: The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

58. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION D: BUDGET REVISIONS\footnote{The operational policy on Budget Revisions is intended to be aligned with the Global Fund Guidelines for Grant Budgeting. In the event of any conflict or inconsistency between the OPN and the Budgeting Guidelines, the terms of the Budgeting Guidelines will control.}**

| This section is currently being updated. For the latest guidance on budget revision, please refer to the Guidelines on Budgeting for Global Fund Grants |

59. **Definition**: Adjustments that are purely budgetary in nature, do not represent a change in the total approved funding for the relevant implementation period, and do not affect the Performance Framework.

60. **Triggers**: A Budget Revision can take place periodically in the normal course of grant implementation in order to respond to program realities (e.g., to reflect changes in administrative or operational costs, changes in unit costs of items being purchased or to allow for programmatic assurance activities like Health Facility Assessments or Data Quality Reviews).

61. **Initiators**: A Budget Revision may be initiated by the Principal Recipient (PR) or the Country Team and is managed in consultation with CCM, Secretariat (if applicable), PR, Lead Implementer(s), and technical partners.

**Types of Budget Revisions**
62. Budget revisions can take two forms (Material and Non-material), depending on the percentage increase or decrease of the detailed budget (on an intervention or cost grouping basis, as applicable).

<table>
<thead>
<tr>
<th>Budget revision for any standard intervention</th>
<th>Budget revision for any discretionary cost category</th>
<th>Is Global Fund prior written approval required?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Non-material budget revision</td>
<td>Less than 15% change to the total budget for any intervention (either an increase or decrease)</td>
<td>No</td>
</tr>
<tr>
<td>Material budget revision</td>
<td>Less than 5% increase to the total budget of any discretionary cost category</td>
<td>Yes</td>
</tr>
</tbody>
</table>

63. In specific cases, based on program and grant context (including but not limited to heightened risk ratings), the Country Team could specifically define principles for determining materiality of budget changes, which might partially or entirely differ from the above-mentioned thresholds for determining materiality. For further guidance, please refer to *The Global Fund Guidelines for Grant Budgeting*.

64. **Timing:** A Budget Revision may be proposed during grant implementation. The timing of submission of a revision request during grant implementation depends on a) the defined portfolio category of the country component and b) type of Budget Revision:

<table>
<thead>
<tr>
<th>Portfolio Category</th>
<th>When a Budget Revision request may be submitted</th>
</tr>
</thead>
<tbody>
<tr>
<td>Focused</td>
<td><strong>Material Budget Revision:</strong> Once a year, if warranted by the program context. <strong>Non-material Budget Revision:</strong> Any time during grant implementation, if warranted by the program context.</td>
</tr>
<tr>
<td>Core</td>
<td><strong>All Budget Revisions:</strong> Any time during grant implementation, if warranted by the program context.</td>
</tr>
<tr>
<td>High Impact</td>
<td><strong>All Budget Revisions:</strong> Any time during grant implementation, if warranted by the program context.</td>
</tr>
</tbody>
</table>

**Approval Authority**

65. The approval process for Budget Revisions is differentiated based on the percentage increase or decrease of the budget (on an intervention or cost grouping basis, as applicable). It should be noted that the thresholds for percentage increase or decrease are cumulative for the entire implementation period and are always compared to the latest approved summary budget (the “baseline budget”) to establish the materiality level.

---

425 The discretionary categories may be pre-defined taking into account country context and grant-associated risks. The general definition of discretionary categories for Global Fund grants includes: human resources, vehicles, travel-related costs (per diems, etc.), indirect costs/overheads, and any other pre-defined activities, at the discretion of the Global Fund.

426 The inclusion of new modules and interventions on the official approved budget would also involve a corresponding change to the Performance Framework. In such cases, the Program Revision (Section C) process should be followed.

427 As attached to the grant agreement or an implementation letter.
66. In addition to the above thresholds, there are some circumstances where Country Team approval may be required even if the revision is deemed “Non-material” (e.g., any increase in salary or incentive or top-ups above those already planned in the budget to staff / agents working for the Global Fund). For further information, please refer to The Global Fund Guidelines for Grant Budgeting.

67. For Non-material Budget Revisions, PRs have the flexibility to make adjustments and incur expenditures relating to such non-material budgetary adjustment. Implementers have to follow their own procedures of budget modification with an explanatory note and the formal approval of the relevant authority at the implementer level. PR should track non-material budget revisions over the entire implementation period and compare to the original budget (approved during grant signing). If the cumulative non-material budget revisions reach the materiality thresholds, subsequent budget revisions should be processed as material budget revisions and will require Global Fund pre-approval.

68. For Material Budget Revisions, the revision request must be submitted to the Country Team for pre-approval prior to the initiation of the activity and the related payment.

Reporting and Impact on Legal Documents

69. Material Budget Revisions: If a Budget Revision is deemed material, the submission should be in the form of a revised detailed budget incorporating the proposed adjustments for the future periods (and actuals for the prior quarters) within the overall ceiling of the initial approved budget and a rationale for the proposed adjustments. When reviewing and approving the material budget revision, the Country Team will decide whether the revised budget should be reflected in the grant agreement through an Implementation Letter and captured in GOS (e.g., if the revised detailed budget needs to be reflected in the PR reporting template and used for subsequent PR reporting).

70. Once finalized and approved by the Global Fund and there is a decision to capture in GOS and issue an Implementation Letter:
   a. Documents to be included: An updated Summary Budget.
   b. Signatories: The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

71. Non-material Budget Revisions: The PR tracks non-material budget revisions. The PR, as part of the expenditure reporting in the Progress Update/Disbursement Request, will report non-material budget revisions to Global Fund as regular expenditures and provide comments in the budget variance analysis. (see Global Fund Guidelines on Progress Update and Disbursement Request).

---

428 The inclusion of new modules and interventions on the official approved budget would also involve a corresponding change to the Performance Framework. In such cases, the Program Revision (Section C) process should be followed.
429 In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the Country Team Approach.
430 Only legally agreed information captured through an implementation letter will be imported into GOS.
See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION E: ADMINISTRATIVE REVISIONS**

73. **Definition:** Adjustments that have no impact on the Budget or the Performance Framework and are purely of an administrative nature (e.g., changes to Master Data reflected in a grant agreement), which require modifications to grant agreements.

74. **Triggers:** An administrative revision can take place periodically in the normal course of grant making and grant implementation and could be triggered by (among other reasons):

   a. A change in the organizational representative for legal notices (for PR) and notices (for LFA)
   b. A change in PR / LFA contact details (e.g., address, name)

75. Changes to other types of Master Data that are not reflected in the Grant Agreement, therefore do not require an Administrative Revision under this OPN. In such circumstances, Country Teams should refer to the Guidance on Updating Master Data, to ensure the changes to data are appropriately reflected in GOS.

76. **Initiators:** An administrative revision may be initiated by the Principal Recipient (PR), LFA, or the Country Team, and is managed in consultation with CCM, PR/LI(s).

77. **Approval Authority:** For an Administrative Revision, the final approval authority is the Fund Portfolio Manager.

<table>
<thead>
<tr>
<th>Threshold</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Administrative Revisions</td>
<td>Fund Portfolio Manager</td>
</tr>
</tbody>
</table>

**Reporting and Impact on Legal Documents**

78. The categories of Master Data highlighted in paragraphs 72a and 72b are included as part of the Grant Agreement. Therefore any changes to this Master Data should be reflected in GOS (see Guidance on Updating Master Data for further details), and subsequently, need to be reflected in the Grant Agreement through an Implementation Letter.

79. **Implementation Letter:** Once finalized and approved by the Global Fund, an Administrative Revision must be reflected in the grant agreement, by issuing an Implementation Letter.

   a. **Signatories:** The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).
   b. **Timing:** For the majority of Administrative Revisions, the changes to Master Data do not need to be reflected immediately in the Grant Agreement, and therefore do not require the immediate issuing of an Implementation Letter. Instead, it is recommended that the County Team wait until an Implementation Letter is required for another type of grant revision (e.g., a Program Revision or Extension) and then any changes to Master Data can be included in that Implementation Letter. This approach is suggested to reduce the need for Country Teams to issue multiple Implementation Letters. However, in cases where the LFA changes or PR/LFA name changes, an Implementation Letter is required to be issued immediately, to reflect the change promptly in the Grant Agreement.
   c. **Consultation:** The Country Team should consult with their Legal Officer on whether and when to issue an Implementation Letter for an Administrative Revision.

---

431 For revisions during grant-making, please refer to the OPN on Access to Funding, Grant-making, and Approval.
80. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

Pooled Procurement Mechanism

Approved on: 25 March 2019
Approved by: Executive Grant Management Committee
Process Owner: Sourcing and Supply Chain
Sub-Owners: Program Finance and Controlling

OVERALL OBJECTIVES

1. The Pooled Procurement Mechanism (PPM) is a key tool used to implement the Global Fund’s Market Shaping Strategy.\(^{432}\) PPM enables the Global Fund Secretariat to aggregate order volumes from participating Principal Recipients\(^{433}\) to leverage the Global Fund’s market spend aiming to:
   a. secure quality-assured products;
   b. obtain better Value for Money\(^{434}\) through best pricing and delivery conditions;
   c. reduce lead times for critical health products by engaging with manufacturers using framework contracts; and
   d. contribute to sustainable markets for core life-saving health products as defined in paragraph 4 (i) below.

2. The framework below provides a summary overview of the PPM process:

---

\(^{433}\) Unless otherwise defined, all capitalized terms used in this Operational Policy Note shall have the same meaning as set forth in the Global Fund Grant Regulations (2014) available at: [https://www.theglobalfund.org/grantregulations](https://www.theglobalfund.org/grantregulations).

\(^{434}\) Value for Money as defined under the Global Fund Procurement Policy (2008) as amended from time to time.
3. This operational policy describes critical rules and requirements for implementation of the Pooled Procurement Mechanism. Detailed procedural guidance to implement these rules are provided in the Operational Procedures. It applies to grants financed under the 2017-2019 allocation period and thereafter.

Eligible Health Products

4. Health products that may be procured by Principal Recipients through the PPM are categorized as PPM core or non-core products. The list, which may be updated from time to time, is as follows:

(i) **Core products**: anti-retrovirals (ARVs); rapid diagnostic tests for HIV (HIV RDTs); CD4 and viral load tests; Artemisinin-based combination therapy (ACTs); long-lasting insecticide treated nets (LLINs); anti-malarial pharmaceutical products (other than ACTs); and rapid diagnostic tests for malaria (malaria RDTs).

(ii) **Non-core products**: drugs for opportunistic infections and sexually transmitted infections; other diagnostic products and laboratory supplies; post-exposure prophylaxis kits; condoms; re-treatment tablets for bednets; insecticides for indoor residual spraying (IRS) and related equipment/consumables; and other products agreed with the Sourcing Team.

Procurement Service Agents and Suppliers

5. Through the PPM, the Global Fund facilitates the procurement of eligible health products identified at paragraph 4 above for Principal Recipients using the services of Procurement Services Agents (PSAs). PSAs are external service providers contracted by the Global Fund to perform procurement and delivery services on behalf of PPM-participating Principal Recipients, including order and logistics management, while ensuring quality assurance and timely deliveries. The selection of PSAs is done by the Global Fund through a competitive process, and their performance is managed through long-term performance-based agreements.

6. As part of the PPM, the Global Fund also manages the selection of suppliers for certain core health products. Supplier performance is managed by the Global Fund through long-term performance-based agreements which are signed according to the Global Fund Delegations of Signature Authority (which may be amended from time to time). Supplier-specific prices negotiated by the Sourcing Team for health products are uploaded onto the wambo.org platform and are updated from time to time.

7. In order to efficiently manage the overall PPM mechanism, the Global Fund may issue an annual Payment Limit Letter to each PSA as a guarantee up to a defined ceiling amount for grant-funded PPM procurement. The Payment Limit Letter is based on the estimated consolidated forecast of grant-funded health products compiled by the Sourcing Team to be procured by Principal Recipients through PPM.

8. The Payment Limit Letter will take the form of an annual Purchase Order as created in the Global Fund Financial System (GFS) by the Sourcing Team, and approved and signed in accordance with the Global Fund Delegations of Signature Authority (which may be amended from time to time).

---

435 For certain categories of health products, the Global Fund may use partner organizations, acting as agents of the Principal Recipients.

436 Previously referred to as a Letter of Commitment.
A. Principal Recipient Registration

9. Principal Recipients may wish, on a voluntary basis, to take advantage of the benefits (e.g., reliable delivery) and negotiated PPM prices which may provide better Value for Money. In the event that a Principal Recipient does not volunteer, the Country Team may require a Principal Recipient to use this mechanism for some or all Global Fund-financed health products as a risk-mitigating measure where the Principal Recipient or the designated procurement entity has demonstrated inadequate capacity to procure health products effectively and efficiently. At its own discretion, the Global Fund may for any Principal Recipient, regardless of their participation in PPM, limit health product budgets to the negotiated PPM unit prices to ensure that the Global Fund will not pay for health products purchased by non-PPM participating Principal Recipients more than the PPM negotiated prices for similar commodities.\(^{437}\)

10. To participate in PPM, Principal Recipients must comply with defined PPM registration requirements. A registration application may be submitted and processed at any time during grant making or implementation.

11. Participation in PPM is, in principle, for the duration of the grant managed by the same Principal Recipient. Registration remains effective until they cease to be Principal Recipient or the Principal Recipient’s participation in PPM ends. The Principal Recipient’s participation in PPM may be ended through written notice only, at least ninety (90) calendar days prior to the desired end date.\(^{438}\)

12. Only PPM-registered Principal Recipients are allowed to use PPM, including the Rapid Supply Mechanism (RSM).

B. Earmarking Funding for PPM

13. PPM-related funding is committed outside of the grant-based annual funding decision process. From the grant signed amount, Grant Funds are earmarked for PPM orders directly in GFS by setting the PPM ceiling amount, which, for orders processed through wambo.org, is automatically interfaced with wambo.org.

14. The PPM ceiling amount can be based either on the approved PPM-related procurement budget for the implementation period of the grant as per the approved List of Health Products, as applicable, or adjusted over time as each PPM order request is received from the Principal Recipient.

15. The sum of all Grant Funds committed through annual funding decisions, wambo.org orders, and the PPM Internal Order Confirmation Form for the full implementation period and closure period of a grant must not exceed the grant signed amount of the relevant Grant Agreement as approved by the Global Fund Board.

C. PPM Order Request, Approval and Delivery

16. PPM Purchase Requisitions are raised electronically through the wambo.org platform.\(^{439}\)

---

\(^{437}\) Reference prices per product category are updated from time to time and are available at: https://www.theglobalfund.org/en/sourcing-management/health-products/

\(^{438}\) The end of participation in PPM would apply to new Price Quotations not yet approved; any Price Quotations approved by the Principal Recipient prior to the desired end date would be fulfilled as per contractual agreements triggered by Principal Recipient approval of the Price Quotation.

\(^{439}\) Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be raised “manually.”
17. A request for procurement should only be initiated by the Principal Recipient and will only be validated by the Country Team and the Sourcing Team after grant signing if:

a. Principal Recipient registration to participate in PPM has been completed;
b. The quantification and estimation of the initial order value has been approved by the Global Fund (e.g., as per the List of Health Products, where applicable);
c. Grant Funds are available in accordance with the signed Grant Agreement and the associated approved budget; and
d. All relevant grant requirements for the procurement have been fulfilled, or otherwise waived or postponed.440

18. PPM Purchase Requisitions should include a requested delivery date. To achieve better Value for Money and timely delivery of products under PPM, Principal Recipients must place orders taking into account a minimum procurement lead time as defined in the Category and Product-level Procurement and Delivery Planning Guide (as amended from time to time).441 If the requested lead-time is below the defined minimum lead time, additional costs may be incurred by using air freight instead of the standard sea freight.

19. When the order request is submitted less than three months from the expected delivery date, the Sourcing Team may recommend the use of the RSM. The RSM is an approach that has been agreed with selected suppliers to help mitigate against the risk of stock-outs of certain health products. Through agreements with selected suppliers, suppliers implement Vendor Managed Inventory (VMI) of certain health products to permit increased responsiveness and reduced delivery times compared to the standard order process. Through the RSM, certain health products can be delivered to the port of entry within four to six weeks from order approval. Products available through the RSM include select anti-retroviral medicines and antimalarial medicines through VMI. This product selection may be reviewed from time to time and amended as deemed necessary by the Sourcing Team. The RSM includes a premium fee of the total commodity cost.

20. All order requests should be submitted and planned as per standard lead times to ensure that final deliveries take place no later than the implementation period end-date stipulated in the Grant Agreement. In certain instances, deliveries may span between two implementation periods, in which case relevant guidance should be consulted.442

21. Following review and approval of the Purchase Requisition by the Sourcing Team and Country Team per agreed procedures, a Price Quotation is submitted to the Principal Recipient for approval and, if required under the Principal Recipient’s national laws, signature. The Price Quotation may include a buffer amount, which can be used for potential increases in cost; the buffer, if any, is set as described in the PSA’s standard Terms and Conditions. Following approval and, if applicable, signature by the Principal Recipient of the Price Quotation and the Global Fund’s review and clearance process, a Purchase Order is issued on wambo.org, which becomes the legally binding agreement between the PSA and the Principal Recipient.443

---

440 In accordance with the OPN on Conditions and Management Actions or future OPN providing guidance on management of requirements.
441 See https://www.theglobalfund.org/media/4754/psm_categoryproductlevelprocurementdeliveryplanning_guide_en.pdf
442 Guidelines for Grant Budgeting.
443 Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be raised "manually."
Approval limits for purposes of PPM Purchase Orders, including RSM orders, issued to PSAs are broken down into two categories (as outlined in the table below):

<table>
<thead>
<tr>
<th>APPROVAL AUTHORITY</th>
<th>Up to (and including) US$ 10 million</th>
<th>Above US$ 10 million</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPM Purchase Orders, including Rapid Supply Mechanism orders</td>
<td>• Manager, Global Sourcing, Sourcing &amp; Supply Chain Department</td>
<td>• Senior Manager, Sourcing &amp; Supply Chain Department</td>
</tr>
</tbody>
</table>

22. The issuance of a PPM Purchase Order on wambo.org triggers grant liability recognition in the accounts of the Global Fund. Once committed, PPM funds will no longer be available for other purposes (e.g., disbursement to the Principal Recipient or third parties) until the order is finalized and all payments for the relevant PPM Purchase Order are made to the PSA. The Principal Recipient will be notified of every PPM-related commitment made.

23. Under certain circumstances, a Price Quotation for a previously approved order may need to be updated. For material changes (as defined in the PPM Operational Procedures), an updated Price Quotation will be issued to the Principal Recipient for approval and, if applicable, signature, following the initial process followed. For non-material changes, the Principal Recipient will be notified of the changes.

24. PSAs are responsible for issuing Purchase Orders (or their equivalent) and other requested information to suppliers and logistics providers for the fulfilment of PPM Purchase Orders and delivery of the health products to the Principal Recipient. PSAs are also responsible for ensuring that health products meet the quality standards of the Global Fund.

25. Principal Recipients are responsible for ensuring appropriate waivers (e.g., registration and import duty, etc.) are obtained when required and facilitating the import process locally. Principal Recipients must confirm receipt of each order to the corresponding PSA, indicating the goods received and any discrepancies.

D. PPM Payments and Reporting

26. Payments to PSAs for the procurement and delivery of health products and their services under the PPM shall be made from available Grant Funds of PPM-participating Principal Recipients. Payments are made to PSAs by the Global Fund on behalf of Principal Recipients upon approval of invoices in accordance with the payment terms stipulated in their respective agreements. All payments made will be charged as disbursements under the respective grants, and the Principal Recipient will be informed of every PPM-related disbursement made. The approved PPM Purchase Orders and related payments will reduce the open value of the Payment Limit Letter for the relevant PSA.

27. For the purposes of procurement management, planning and performance, the PSAs will send to the Global Fund a comprehensive report capturing required financial and operational details for each grant on a regular basis as agreed with the Global Fund. Reports received from PSAs feed into Global Fund organizational reporting.

---

444 In the case of RSM orders processed outside of wambo.org, the approval of the Internal Order Confirmation Form and related confirmation of funding for the RSM quotation or its equivalent to the PSA triggers grant liability recognition in the accounts of the Global Fund.

445 If a grant is suspended or terminated, no disbursements shall be made without due consideration and relevant authorization in accordance with Global Fund policies and procedures relating to the suspension and termination of grants.
28. PPM Purchase Orders are closed after products have been received by the Principal Recipient and all PSA payments have been made. As described in the PPM Operational Procedures, confirmation of the receipt of goods is made by the Principal Recipient to the PSA within the timeline specified in the Terms and Conditions for the order, after which time the goods are considered received. Once all payments have been made to the PSA, an Invoice Summary Statement is issued to the Principal Recipient, who is granted fifteen days within which to review and to object, or approve the statement; in case of no response within fifteen days, the Invoice Summary Statement is approved in wambo.org on the Principal Recipient’s behalf, and the Purchase Order is closed. The Principal Recipients will be notified of any decommitment.

446 Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be closed “manually.”
Annex 1. Definition of Terms

1. **List of Health Products**: An outline of the health products and associated costs that will be financed through the funding request. The list contributes to the detailed grant budget and includes for each product, the estimated quantities to be procured for each year of the implementation period, their estimated unit costs and costs related to their management. This is required of ‘High Impact’ countries at the funding request stage and is optional for ‘Core’ countries, depending on the proportion of the funding request allocated to health products.\(^{447}\)

2. **Purchase Requisition**: A procurement request submitted by the Principal Recipient to the Procurement Services Agent containing product information, quantities, requested delivery date, ship-to address, consignee, Incoterm and special requests, if any.

3. **Price Quotation**: A legally binding offer by the Procurement Service Agent to the Principal Recipient to supply and deliver products in accordance with the terms set out therein, specifying the Incoterm applicable to the order, which is either signed manually or approved through wambo.org by the Principal Recipient.

4. **Purchase Order**: The legally binding agreement between the PSA and the Principal Recipient, issued by wambo.org resulting from the Price Quotation approved, and, if required by the Principal Recipient’s national laws, signed by the Principal Recipient and the completion of the Global Fund’s review and clearance process.

5. **Wambo.org**: The electronic purchasing platform through which PPM transactions are processed. More information is available at [https://www.theglobalfund.org/en/wambo/](https://www.theglobalfund.org/en/wambo/).

6. **Invoice Summary Statement**: A final statement summarizing all invoices issued through wambo.org after all payments to the PSA have been processed for a Purchase Order.

Pooled Procurement Mechanism

Approved on: 8 November 2018
Approved by: Executive Grant Management Committee
Process Owner: Sourcing and Supply Chain
Sub-Process Owner: Program Finance and Controlling

Relevant Operational Policies and Guidance:
- OPN on Pooled Procurement Mechanism
- Guidance on Category and Product-level Procurement and Delivery Planning
- Guidance on Transition between Allocation Utilization Periods (Section 2 of the Guidelines for Grant Budgeting)

1. This document provides procedural guidance on the Pooled Procurement Mechanism (PPM). It applies to grants financed under the 2017-2019 allocation period and thereafter. The diagram below provides an overview of the key steps in the PPM process:

2. Detailed procedural guidance is provided below on each of the key steps outlined above for the standard PPM process through the wambo.org platform. An additional section on the full procedures for the Rapid Supply Mechanism, which also essentially progresses from key step A to D, is provided as well.
   - Section A: PPM Registration
   - Section B: Earmarking Funds for PPM
   - Section C: PPM Order Request, Approval and Delivery
   - Section D: PPM Payments and Reporting
   - Section E: Rapid Supply Mechanism

SECTION A: PPM REGISTRATION

3. PPM participation may be initiated by the Principal Recipient or required by the Global Fund.
<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principal Recipient completes registration</td>
<td>During Grant Making or Implementation</td>
<td>Review by:</td>
</tr>
<tr>
<td>requirements</td>
<td></td>
<td>• PPM Focal Point, who validates registration information (e.g., grant details, delivery details, etc.)</td>
</tr>
<tr>
<td>• Signed Registration Letter with the PPM Schedule on Operational Matters;</td>
<td></td>
<td>• Wambo Team for system configuration (e.g., authorized users, acceptance of electronic approvals, approval hierarchy, delivery addresses and consignees, and required shipping documents)</td>
</tr>
<tr>
<td>• Wambo.org on-boarding form and the wambo.org Terms of Use</td>
<td></td>
<td>Approval by:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Senior Manager, Sourcing Team</td>
</tr>
</tbody>
</table>
4. Grant funds are earmarked for PPM procurement in the Global Fund Financial System. The initial PPM ceiling and increases to it can be based either on the approved PPM-related procurement budget for the implementation period of the grant or adjusted over time as each PPM order request is received from the Principal Recipient. Only the unutilized PPM ceiling can be reduced (i.e., the amount that has not been committed for specific orders). Such reduction should be processed only if the unutilized PPM ceiling will no longer be required for existing or future PPM orders.

<table>

<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td>Establishment of and increases in PPM ceiling</td>
<td>After Grant Signature, either up front or over time as each PPM purchase requisition is raised</td>
<td>- Finance Specialist/Portfolio Services Team (PST) Specialist, in consultation with the FPM, after validating the PPM ceiling establishment or increase against the quantification and estimation of the order value approved by the HPM Specialist (e.g., as per the List of Health Products, where applicable)</td>
</tr>
<tr>
<td>Decreases in PPM ceiling</td>
<td>Anytime, provided the unutilized PPM ceiling is not required for existing or future PPM orders</td>
<td>Review by:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- PPM Financial Controlling, who validates that the unutilized PPM ceiling is not required for existing PPM orders</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- PPM Focal Point, who validates that no PPM orders are in the pipeline or no incremental commitments on current PPM orders are required</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- HPM Specialist, who validates that no additional PPM orders are planned to be placed under the current Implementation Period</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Approval by:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Finance Specialist/PST Specialist</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Fund Portfolio Manager, based on the above</td>
</tr>
</tbody>
</table>

Please note that forFocused Countries for which no HPM Specialist is assigned, during the onboarding process, the Country Team will determine who will perform this step. In some instances, this may be the Fund Portfolio Manager.
SECTION C: PPM ORDER REQUEST, APPROVAL AND DELIVERY

5. **PPM Order Request and Approval.** The Principal Recipient submits a Purchase Requisition taking into account the minimum procurement lead time as defined in the Category and Product-level Procurement and Delivery Planning Guide (as amended from time to time). For products not listed in the Guide, prior to submission of the Purchase Requisition, consultation with the PPM Focal Point for anticipated lead times is recommended. For emergency orders, the Global Fund has established the Rapid Supply Mechanism, which is detailed in Section E.

<table>

</tr>
</tbody>
</table>
6. **Order changes.** In some instances, changes may need to be made to an electronic Price Quotation after it has been approved by the Principal Recipient. For material changes, following a review/approval process similar to that for the issuance of the original electronic Price Quotation, the Principal Recipient will receive an updated electronic Price Quotation for review/approval. For non-material changes, the Principal Recipient will be notified of the changes.

Each of the following shall constitute a non-material change:

(a) Increases in the price originally authorized by the Principal Recipient in an electronic Price Quotation as evidenced by the affirmative consent or signature of its duly authorized representative, where such increases amount to no more than Ten Thousand United States Dollars (USD 10,000) or five percent (5%) of the total value of the electronic Price Quotation, whichever is less. Increases pursuant to the foregoing sentence will be calculated against the price originally authorized by the Principal Recipient and shall not apply with respect to amended prices where the Global Fund has processed increases incrementally or cumulatively.

(b) Unplanned costs related to importation (e.g., demurrage, container detention, warehousing, etc.) for which there are accruing costs and for which further delays to address the import issue may result in additional costs.

A material change is a change where the cost increase is USD 10,000 and above or represents 5% or more of the total value of the electronic Price Quotation (whichever is less). Increases pursuant to the foregoing sentence will be calculated against the price originally authorized by the Principal Recipient and shall not apply with respect to amended prices where the Global Fund has processed increases incrementally or cumulatively.

7. **Order Fulfilment and Delivery.** The PSA is responsible for ensuring that orders are fulfilled and delivered to the Principal Recipient in accordance with the approved order. PSA performance is monitored by the Sourcing Team. When the Global Fund has executed agreements with manufacturers, the performance of such manufacturers is also monitored by the Sourcing Team, in accordance with those agreements, including their ability to meet promised goods-ready-pick-up dates.

### SECTION D: PPM PAYMENTS AND REPORTING

8. Payments are made to PSAs per payment terms stipulated in their respective Agreements.

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
</table>
| **Payments to PSAs** based on invoices received, which triggers disbursements under the respective grants | Based on PSA Agreements | Review by:  
• PPM Financial Controlling, who verifies invoices not automatically matched in wambo.org  
Approval by:  
• Financial Services, who approves based on final compliance and due diligence review (including Batch Release Approval for execution of the transaction by the Treasury and banking institution)  
The Country Team is informed and sends the Principal Recipient a Disbursement Notification Letter. |
| **Periodic performance and financial reports** submitted by the PSA to the Global Fund on their procurement activities | Per agreed periodicity | • PPM Category Manager and PPM Manager, Sourcing Team, who validate and approve performance information  
• PPM Financial Controlling, who validates and approves financial information |
| **Electronic Purchase Order** is closed | Following submission of Invoice Statement by PSA | Review by:  
• Wambo Team, who uploads Global Fund Invoice Statement to wambo.org (until full automation is possible)  
• PPM Focal Point, who flags known anomalies, if any  
• PR, who flags known anomalies, if any  
Approved by:  
• PPM Financial Controlling, who approves after confirming financial information in the PSA and Global Fund statements are consistent, complete and accurate  
In case of any de-commitment, the Country Team is informed and sends the Principal Recipient a Commitment Notification Letter. |

---

452 A non-response by the Principal Recipient after 15 days will be considered concurrence with the Invoice Statement, in which case the PPM Focal Point will approve the Invoice Statement on behalf of the Principal Recipient.
SECTION E: RAPID SUPPLY MECHANISM ORDERS

10. When the order is placed less than three months from the expected delivery date, the Sourcing Team may recommend the Rapid Supply Mechanism (RSM). RSM orders may be raised “manually” until system improvements permit the raising of these orders through the wambo.org platform. If RSM is requested for a non-PPM-registered Principal Recipient, a pre-approval following the exceptions process, as defined in Annex 6 (Managing Exceptions) is required, before the RSM order process is initiated.

**Acronyms:**

**FPM:** Fund Portfolio Manager (including Senior FPM and Disease Fund Manager for Nigeria and DRC)

**HPM:** Health Product Management Specialist
Implementing the Quality Assurance Policies for Pharmaceutical, Diagnostics and Other Health Products

Issued on: 10 November 2014
Purpose: To define the monitoring process for compliance with requirements of the Quality Assurance Policies for Pharmaceutical, Diagnostics and other health products, including corrective measures to address non-compliance.

OVERALL OBJECTIVES

1. The Global Fund’s Quality Assurance (QA) Policy for Pharmaceutical Products and Quality Assurance Policy for Diagnostics Products defines the requirements which must be met for finished pharmaceutical products (FPP) and diagnostic products purchased with Global Fund resources. For other health products, the Global Fund has specified requirements for selection and procurement, as listed in the Guide to Global Fund Policies on Procurement and Supply Management of Health Products. The objectives of the QA policies and requirements are to ensure that grant recipients procure quality-assured health products and that value for money is achieved. The QA policies play a critical role in ensuring that risks related to poor quality, substandard products are mitigated for the benefit of those who need them. Ensuring compliance with the policies and requirements is an essential function of the Secretariat.

POLICY AND PRINCIPLES

2. Global Fund quality assurance refers to the management activities required to ensure that the medicines and other health products are of the quality required for their intended use. There are four categories of products:
   A. Pharmaceutical Products
   B. Diagnostic Products
   C. Pesticides
   D. Condoms

3. The quality requirements for each of these categories is summarizes below, with reference to the relevant Quality Assurance Policy when relevant and other important documents. For more information, please refer to the Quality Assurance Information section of the Global Fund website.

A. Quality Assurance Policy for Pharmaceutical Products

4. The Quality Assurance Policy for Pharmaceutical Products (“QA Pharmaceutical Policy”)\(^ {454}\) aims to ensure the safety of pharmaceutical products procured with Global Fund resources.

5. The policy defines quality requirements for Finished Pharmaceutical Products (FPPs) that are antiretrovirals (ARVs), anti-malarial and anti-tuberculosis, and for all other FPPs. Currently, all other FPPs only need to comply with the relevant quality standards that are established by the National Drug Regulatory Authority (NDRA) in the country of use. The quality requirements and corrective measures in case of non-compliance described in this OPN apply to all ARVs, antimalarial and anti-TB FPPs.

\(^ {454}\) GF/B22/11 Revision 1, Annex 1, amendments approved by the Board in December 2010 under GF/B22/DP9: Global Fund Quality Assurance Policy for Pharmaceutical Products.
a) **Quality Requirements for ARVs, Antimalarial and Anti-TB FPPs**
   
   (1) Marketing authorization in country of use

6. All finished pharmaceutical products (FPPs), must comply with the relevant quality standards established by the National Drug Regulatory Authority (NDRA) in the country of use.

   - For more detailed information, please refer to the [QA Pharmaceutical Policy](#), para. 19-21.

   (3) Criteria for the procurement of ARVs, anti-TB products and antimalarials

7. In addition to approval by the NDRA in the country of use, all ARV, anti-TB and anti-malaria pharmaceutical products should meet the following standards:

   i. Prequalified by the WHO Prequalification Programme (“A products”) or authorized for use by a Stringent Drug Regulatory Authority (SRA) (“B products”); or

   ii. Recommended for use by an Expert Review Panel (ERP).

   - For more detailed information, including the processes, please refer to the [QA Pharmaceutical Policy](#), para. 7-16.

(5) Before procuring ERP-reviewed products

8. Before procuring ERP-reviewed products, Principal Recipients (PRs) must inform their Fund Portfolio Manager (FPM) in writing by filling in the “Notification Form”. Procurement can only proceed once the PR receives a “no objection” letter from the Global Fund Secretariat for the requested selection.

   - Notification Form
   - Notification of Additional Order Form

(6) Pre-shipment Quality Control (QC) testing and results

9. The Global Fund is responsible for QC of ERP-reviewed products for which a notification has been received (see above). Testing is performed on random samples by an independent laboratory contracted by the Global Fund. Upon successful QC results, the Secretariat will approve product shipment by issuing a final letter, including the test report, to the PR and concerned manufacturer.

   - For more detailed information, please refer to the [QA Pharmaceutical Policy](#), para. 31.

**B. Quality Assurance Policy for Diagnostic Products**

10. The Quality Assurance Policy for Diagnostic Products[^455] (“QA Diagnostics Policy”) applies to all durable and non-durable in vitro diagnostics (IVDs), and imaging equipment and microscopes, used in Global Fund-financed programs for diagnosis, screening, surveillance or monitoring purposes. The PR must ensure that the procurement of Diagnostic Products with Grant Funds is undertaken in compliance with all applicable laws and regulations, as outlined in the QA Diagnostics Policy.

---

[^455]: GF/SIIC10/6 Revision 1, Annex 1, amendments approved by the SIIC in February 2014 under GF/SIIC10/DP2: Global Fund Quality Assurance Policy for Diagnostic Products.
Quality standards of manufacturing site

11. The PR must ensure that that the manufacturing site is compliant with the requirements of ISO 13485:2003; or ISO 9000 series as applicable; or an equivalent Quality Management System recognized by one of the Regulatory Authorities of the Founding Members of the Global Harmonization Task Force (GHTF), i.e. USA, Japan, EU, Canada, Australia.

   • For more detailed information, please refer to the QA Diagnostics Policy, para. 7.

Quality standards of products

12. The PR must ensure that HIV Immunoassays, HIV Virological and CD4 technologies, tuberculosis Diagnostic Products and Malaria Rapid Diagnostic Tests comply with the following requirements:

   i. recommended by WHO for use in HIV, tuberculosis and malaria programs, as applicable, based on a technical review of quality and performance indicators; or

   ii. authorized for use by one of the Regulatory Authorities of the Founding Members of GHTF when stringently assessed (high risk classification). This option is only applicable to HIV Immunoassays Products and HIV Virological Technologies; or

   iii. shall be acceptable for procurement using Grant Funds, as determined by the Global Fund, based on the advice of an Expert Review Panel for Diagnostics (ERPD).

   • For more detailed information, please refer to the QA Diagnostics Policy, paras. 8-9 and 17.

C. Quality Assurance requirements for public health pesticides

13. Recipients are only authorized to procure long-lasting insecticidal mosquito nets with grant funds when the products are recommended for use by the WHO Pesticide Evaluation Scheme (WHOPES) and other pesticides are compliant with specifications indicated by WHOPES. Below is a summary of the process to ensure that products comply with the quality assurance requirements:

   i. Products to be procured are approved by WHOPES (formulations/manufacturers)

   ii. Random pre-shipment testing by an independent QC lab

   iii. Sampling to be done by an independent sampling agent

   iv. Testing by a QC testing by ISO 17025 certified laboratory, WHO Collaborating Centre for QC of Pesticides and according to WHO Methods and Specifications,

   • For more information, please refer to the WHO Guidelines for Procuring Public Health Pesticides.

D. Quality assurance requirements for condoms

   It is highly recommended to all PRs to select condoms from the list of prequalified condoms

---

456 The list of pesticide products recommended by WHOPES, including insecticides for indoor residual spraying, insecticides for treatment of nets, LNs and mosquito larvicides is available on the WHO site at https://www.who.int/whopes/resources/en/.
published by United Nations Population Fund (UNFPA). If condoms selected are not on the UNFPA list, the PR must ensure that the following specifications are met:

a. The condoms complied with national regulatory policies of the country of use before being imported into a country;
b. The manufacturing facility conforms to ISO 13485 latest specifications;
c. The condoms meet Directive 93/42/CEE or other requirements from a Stringent Regulatory Authority;
d. The pre-shipment QC testing was performed in ISO17025 accredited laboratory that has been accredited for testing condoms; and
e. The testing was done as per ISO4074 (latest edition) as recommended by WHO, and the test report reviewed by the PR for compliance with the above specification.

- For more information, please refer to the [Prequalification Section](#) of the Reproductive Health Essential Medicines (RHEM) resource portal.

### E. Quality assurance requirements for other health products

16. Health products, other than pharmaceutical products, diagnostic products, long-lasting insecticidal mosquito nets, other pesticides, and condoms, are selected from the applicable list of prequalified products, if any, and comply with the quality standards applicable in the country where such products will be used. This refers to health products for which the Global Fund has not developed a specific quality assurance policy, such as general laboratory items, syringes and therapeutic nutritional support.

b) **Types of non-compliance with quality requirements**

17. There are two possible ways in which a PR can breach the grant agreement by not complying with one of the QA Policies:

- **Level 1 “No-notification”:** Product(s) comply with the relevant quality requirement, however:
  i. the ERP(D)-recommended products have been procured without notification; or
  ii. for pesticides, the WHOPES products have been procured without pre-shipment testing.

- **Level 2 “Non-compliant procurement”:** the product(s) procured do not comply with the relevant QA Policy, and the PR fails to send notification(s) required for the procurement of ERP(D)-recommended product(s).
c) Identifying non-compliance

18. Non-compliance is identified through either: (i) the review of data reported through the Price & Quality Reporting (PQR) tool on a quarterly basis; or (ii) reports from in-country sources, LFA, partners, etc.

19. When a case is reported, the Country Team evaluates the reasons for non-compliance and potential impact.

d) Deciding on and monitoring of corrective measures for non-compliance

20. Based on this analysis, the country team selects the most appropriate course or action. The decision is made at the discretion of the country team, with guidance from the HPM Hub.

Options of course of action:

i. Issue a warning letter (first time cases/and non-compliance level 1)

ii. Request for reimbursement for the products procured (non-compliance level 2/or new case of non-compliance after having received a warning letter)

iii. Use a procurement agent for those products

iv. Use a procurement agent for all products procured with grant funds

e) 21. With regards to any corrective measures taken, the Global Fund will make every effort to avoid the interruption of life-saving treatment.

22. Corrective measures are communicated to the PR.\textsuperscript{457}

\textsuperscript{457} All communications with PRs are routed through the country team with copy to the CCM, LFA and the HPM Hub. The HPM specialist and FPM will keep the HPM Hub informed on any decision made by the country team and any corrective
23. The implementation of corrective measures will be monitored by the Country Teams in collaboration with the HPM Hub.

**Communication to PRs**

24. All PRs must be informed of the quality requirements of the QA Policies and corrective measures described in this OPN.
Supplier Misconduct

**Issued on:** 11 June 2014

**Purpose:** Guidance to the Secretariat in Responding to Supplier Misconduct

**OVERALL OBJECTIVES**

1. The major area in which Global Fund grant resources are expended is procurement. Consequently, it is essential for the Global Fund to enforce the accountability of suppliers and grant recipients in maintaining the integrity of Global Fund-supported grant operations.

2. The Global Fund’s Code of Conduct for Suppliers (the “Supplier Code of Conduct”) describes supplier obligations in this regard and requires Suppliers to inform the Global Fund of any integrity concerns involving or affecting Global Fund resources of which they have knowledge. It also emphasizes the critical role of grant recipients in communicating and ensuring that all suppliers of goods and services to the Global Fund or to the activities it finances, including bidders, suppliers, agents, intermediaries, consultants and contractors and representatives of each of the above (each referred to herein as a “Supplier” and collectively as the “Suppliers”) 

3. This Operational Policy Note guides the Secretariat in responding, in connection with grant implementation, to instances of non-compliance with the Supplier Code of Conduct and other events concerning suppliers that may place the resources and reputation of the Global Fund at risk. Through the application of a consistent set of procedures, the Global Fund can fairly, consistently and appropriately address any corrupt, fraudulent, collusive, anti-competitive or coercive practices involving Suppliers under Global Fund programs.

**POLICY AND PRINCIPLES**

**Sanctionable Activities**

4. The Global Fund may sanction a Supplier or its successor in order to protect the interests, resources and reputation of the Global Fund, including in situations where the Global Fund determines that the Supplier has breached the Supplier Code of Conduct.

5. Activities which constitute supplier misconduct can take many different forms. Potential circumstances that may lead to the Global Fund initiating its sanctions process, which may then result in the imposition of sanctions upon a Supplier or its successor (each a “Sanctionable Activity” or “Sanctionable Event” and collectively referred to herein as “Sanctionable Activities”), include:

   i. **Procurement Irregularities:** When the Inspector General has determined that there is credible and substantive evidence that a Supplier may have directly or indirectly breached the Global Fund Supplier Code of Conduct, including by engaging in corrupt,

---

458 Suppliers include suppliers of goods and services to Principal Recipients, Sub recipients, other recipients, Country Coordinating Mechanisms, procurement agents and first-line buyers. Supplier representatives include affiliates, employees, subcontractors, agents and intermediaries of Suppliers.

459 This includes early notification of red flags although such evidence would only be expected to result in the imposition of operational remedial measures pending the finalization of the OIG’s finding through a published report.
fraudulent, collusive, anti-competitive or coercive practices in competing for, or performing under, a Global Fund-financed contract (“Procurement Irregularities”);

ii. **Sanctions by a Partner or Grant Recipient:** When a Supplier has engaged in misconduct which results in a sanction being imposed on a Supplier (and/or its successors) by any Global Fund partner organization, any comparable institution or by a Global Fund grant recipient for conduct which would constitute a breach of the Global Fund Supplier Code of Conduct or any other unethical or unlawful behavior;

iii. **Sanctions by a National or an International Authority:** When a Supplier has engaged in misconduct which results in an investigation, proceeding or finding, either civil, criminal or administrative, or the imposition of sanctions, by another national or international authority for conduct which would constitute a breach of the Global Fund Supplier Code of Conduct;

iv. **Breach of Contract:** When there is a significant and material breach by a Supplier of a contract between the Global Fund and a Supplier or between a grant recipient and a Supplier that in the opinion of the Global Fund places Global Fund resources at risk; and

v. **Assets at Risk:** When credible and substantive information has been received by the Global Fund from any source, including local fund agents, partner organizations and comparable institutions, which indicates that Global Fund resources have been placed at risk by a Supplier’s conduct.

**Reporting and Responding to Sanctionable Activities**

6. The Executive Director decides on the Global Fund’s response to a Sanctionable Activity based on the recommendations of the Executive Grant Management Committee (EGMC) and/or the Sanctions Panel.

7. Upon becoming aware of potential supplier misconduct in connection with Global Fund financed activities, the Country Team shall notify the Office of the Inspector General (OIG) through the relevant Grant Management Department Head.

8. If the OIG notifies the Secretariat of substantive and credible findings of supplier misconduct or in the event that another Sanctionable Activity (such as a supplier engaging in misconduct which results in a sanction being imposed on such Supplier by a partner organization or a comparable institution) has occurred, the EGMC shall be notified, through the appropriate Country Team. As part of the notification to the EGMC, the Legal and Compliance Department will confirm whether the relevant Supplier has breached the Supplier Code of Conduct or any other provision of a contract with the Global Fund or a Principal Recipient. The Country Team will also develop operational remedial measures to propose to the EGMC for approval to safeguard Global Fund resources.

9. In cases where there is an ongoing OIG investigation, operational remedial measures may be submitted to the relevant Grant Management Department Head for interim approval, as needed, or to the EGMC for approval prior to the issuance of a final OIG report.

Potential operational remedial measures will vary based on the nature of the irregularities and other contextual factors, but could include procurement through the Pooled Procurement Mechanism or the institution of a Procurement and/or Fiduciary Agent.

---

In cases where the OIG has informed the Secretariat that it has identified credible and substantive evidence of fraud, abuse, misappropriation or corruption by a Principle Recipient or a Sub-Recipient, the Country Team shall also comply with the requirements contained in GF/B18/DP23 (Nov 2008) and GF/B19/DP25 (May 2009) regarding the restrictions to be promptly implemented to address the applicable risks to the Global Fund and its resources.
10. The EGMC will consider the OIG’s conclusions and/or the nature of the Sanctionable Activity and, taking into account the criteria listed in paragraph 12 below for when the involvement of the Sanctions Panel is expected, determine whether to recommend to the Executive Director that the case be referred to the Sanctions Panel. The Executive Director will then decide whether to refer the matter to the Sanctions Panel.

Sanctions Panel

11. The Sanctions Panel advises the Executive Director on remedies for Sanctionable Activities with respect to specific cases referred by the Executive Director to the Panel. The operation of the Sanctions Panel is described in the Sanctions Panel Procedures Relating to the Code of Conduct for Suppliers (the “Sanctions Panel Procedures”), as may be amended by Global Fund executive management from time to time.

12. Based upon a recommendation of the EGMC, the Executive Director may decide to refer a case to the Sanctions Panel in any circumstance where a Supplier has, directly or indirectly, engaged in Sanctionable Activities. In particular, involvement of the Sanctions Panel is expected in the following cases:
   i. the egregious nature of the Sanctionable Activities placed a material amount of Global Fund resources at risk and/or created a significant reputational risk for the Global Fund;
   ii. the concerned entity has engaged in Sanctionable Activities and is a Supplier to Global Fund grant programs in several countries;
   iii. the Sanctionable Activities involve an entity which has previously been reviewed by the Sanctions Panel or which has previously been the subject of OIG findings of credible and substantive evidence of fraud or misconduct; and/or
   iv. the concerned entity has violated a Global Fund-led or endorsed/supported integrity pact, such as the integrity pact for long-lasting insecticide treated net suppliers.

Types of Sanctions

13. Sanctions are used for ensuring the accountability of Suppliers. Sanctions protect the integrity of the procurement process through (i) exclusion of specific actors from access to Global Fund financing (i.e., permanent or temporary/conditional debarment), and (ii) deterrence.

14. There are four principal types of sanctions available: (i) Reprimand, (ii) Conditional Continued Engagement, (iii) Debarment with Conditional Release, and (iv) Indefinite Debarment. The Executive Director will decide whether to impose a sanction on a Supplier after receiving a recommendation from the Sanctions Panel.

15. When considering the appropriate sanction to be applied, relevant considerations include: (i) the severity of the misconduct; (ii) harm caused by the misconduct; (iii) the Supplier’s level of cooperation with the investigation and sanctions process; (iv) the Supplier’s past history of misconduct; and (v) the risk of continued engagement with the Supplier. Annex 1 provides a list of factors for assessing these considerations.

Reprimand

16. A reprimand, in general, shall be used to sanction a Supplier guilty only of a relatively minor or isolated incident of insufficient oversight.
**Conditional Continued Engagement**

17. This sanction is generally appropriate for:
   
i. Individuals/entities that were not directly involved in the misconduct, but which bear some responsibility through, for example, a systemic lack of oversight; or
   
ii. Individuals/entities that have demonstrated that they have taken comprehensive corrective measures and/or that there are other mitigating factors, as outlined below, so as to justify not debarring such individuals/entities.

18. The conditions imposed may be similar to those imposed under debarment with conditional release. The Executive Director may decide that if the Supplier fails to demonstrate compliance with the conditions within an established time period, an indefinite debarment or a debarment with conditional release would automatically become effective. The EGMC will verify whether the conditions to continued engagement have been met or if circumstances suggest that a revision to the original decision regarding the sanction may be warranted.

**Debarment with Conditional Release**

19. Debarment with conditional release is targeted towards Suppliers, rather than individuals. The purpose of the conditional release is to mitigate further risk to Global Fund resources and eventually allow the Supplier to again have an opportunity to act as a Global Fund Supplier once appropriate remedial measures have been implemented. Accordingly, the Supplier will only be released from debarment after the Supplier has demonstrated that it has met the conditions set by the Executive Director.

20. Conditions for lifting the debarment may include, but are not limited to:
   
i. implementation or improvement of a compliance and ethics program, anti-corruption training, and/or the engagement of an independent monitor;
   
ii. remedial measures to address the misconduct for which the Supplier was sanctioned, including disciplinary action or termination of employee(s)/officer(s) responsible for the misconduct; and
   
iii. payment of a monetary sanction commensurate with any financial harm caused by the misconduct.

21. The Executive Director decides on the conditions for release based on the recommendations from the Sanctions Panel. The EGMC will verify whether the conditions for lifting debarment have been met or if circumstances suggest that a revision to the original decision regarding the sanction may be warranted.

**Indefinite Debarment**

22. Indefinite debarment is generally appropriate in cases of severe misconduct where it is believed that it is unreasonable to expect that the Supplier can use remedial measures to address the cause of the misconduct and to protect against future misconduct, or when the supplier has not meaningfully cooperated with the investigation or sanctioning process.

**Communicating Sanctions**

23. If the Executive Director decides to impose sanctions, the decision will be communicated, with appropriate confidentiality measures, to the concerned Supplier and, if the sanctionable conduct
affects a Global Fund grant program(s), to the Principal Recipient(s) of the concerned grant(s) and, where needed to give effect to the decision, to the Country Coordinating Mechanism and other Principal Recipients in the relevant market. If the decision is connected to an on-going investigation or audit by the OIG or public disclosure of the final OIG report is restricted in accordance with the Policy for the Disclosure of Reports Issued by the Office of the Inspector General, the Inspector General shall be consulted on the decision being communicated and will retain sole discretion over any factual details which will be included in the communication with the Supplier.

24. For cases referred to the Sanctions Panel by the Executive Director, the Sanctions Panel may, in accordance with the Sanctions Panel Procedures, notify the concerned Supplier of the sanctions under considerations prior to making a recommendation to the Executive Director. Whether or not the Sanctions Panel has sent a previous communication to the concerned Supplier, the Supplier shall be notified of any decision to sanction such Supplier prior to the decision being communicated publicly by the Global Fund.

25. The confidentiality of sanctions decisions is important owing to the legal risks to the Global Fund associated with public disclosure of these decisions. Consequently, all communications on sanctions shall be undertaken in collaboration with the Legal and Compliance Department and, where relevant, the Inspector General.

26. The Global Fund may share the decision on sanctions imposed, as well as information and evidence underlying the decision, with national authorities, partners and other comparable institutions. In order to protect the confidentiality of sanctions decisions, these shall only be communicated to a third party after execution of a confidentiality agreement as required by the Inspector General or the Legal and Compliance Department.

**Monitoring Sanctions**

27. Within the Secretariat, the Grant Management Division and the Legal and Compliance Department will monitor a Supplier's compliance with conditions related to sanctions imposed by the Global Fund.

28. The Executive Director, with guidance from the EGMC, will decide whether the applicable conditions have been met and whether the sanctioned Supplier can be reinstated. In some cases, the Executive Director may also determine that additional sanctions may be necessary.

29. Reinstatement of a sanctioned Supplier or the imposition of an additional sanction period, may be considered for the following reasons:

   i. Payment of restitution in a manner determined by the Global Fund;
   ii. Changes in management or ownership, including permanent severance of officers and employees responsible for the sanctionable misconduct;
   iii. Installation, by the Supplier concerned, of effective, verifiable mechanisms to improve their business governance, ethics and oversight systems;
   iv. Adoption of ethics and anti-corruption compliance and training programs, including installing an independent monitor;
   v. Further cooperation with the OIG satisfactory to the OIG;
   vi. Initiation of administrative, civil or criminal action by the sanctioned party against the individuals responsible for the sanctionable misconduct, which is commensurate with the severity of the sanctions imposed by the Global Fund; or
   vii. Receipt by the Global Fund of any credible information that the sanctioned party engaged in further sanctionable misconduct after the imposition of sanctions by the Global Fund.
PROCESS, RESPONSIBILITIES

Process
30. Annex 2 defines the general process for identifying, reporting and reviewing supplier misconduct.

Responsibilities
31. **Country Team** notifies the OIG and Senior Management of supplier misconduct in connection with Global Fund financed activities and other types of Sanctionable Activities and recommends remedial measures.

32. **Executive Grant Management Committee** determines, based on the OIG findings and/or the Sanctionable Activities, whether to recommend to the Executive Director that he/she refer the case to the Sanctions Panel and whether any operational remedial measure is advisable.

33. **Sanctions Panel** advises the Executive Director on referred sanctions cases concerning supplier misconduct pursuant to the Sanction Panel Procedures.

34. **Executive Director** refers cases to the Sanctions Panel and makes a final determination as to whether to impose a sanction on a Supplier. These decisions are informed by the recommendations of the EGMC and the Sanctions Panel.
Annex 1. List of Considerations for Determining Sanctions

Severity of Misconduct

35. Severity may be measured through considerations including the following:
   i. Did the misconduct place a material amount of Global Fund resources at risk?
   ii. Is it a repeated pattern of conduct?
   iii. How sophisticated was the scheme? This includes the complexity of the misconduct (e.g., degree of planning, diversity of techniques applied, level of concealment); whether the scheme was developed or lasted over a long period of time; and if the misconduct spanned grant programs in more than one country.
   iv. Did management have a role in the misconduct? Have individuals within high-level personnel of the organization participated in, condoned, or willfully ignored the misconduct?
   v. Did the misconduct involve a Global Fund or government official?

Harm Caused by the Misconduct

36. Harm may be measured through considerations including the following:
   i. Did the misconduct create a danger to public health/welfare?
   ii. Did the misconduct result in the waste/inefficient use of grant funds?
   iii. Did the misconduct involve corruption?
   iv. Did the misconduct cause harm to any third parties?
   v. Did the misconduct create a significant reputational risk for the Global Fund?

Voluntary Corrective Actions

37. In evaluating corrective actions, the timing of the action may indicate the degree to which it reflects genuine intention to reform, or a calculated step to reduce the severity of the sentence. Considerations may include:
   i. Did the Supplier voluntarily disclose the misconduct to the Global Fund?
   ii. Did the Supplier initiate any reforms voluntarily upon becoming aware of the misconduct?
   iii. Did the Supplier initiate an internal action against responsible individual(s)?
   iv. Did the Supplier voluntarily establish or improve a corporate compliance program?

Cooperation with the Investigation

38. Cooperation may be measured through considerations including the following:
   i. Has the OIG concluded that the Supplier provided substantial assistance in the investigation, including voluntary disclosure, truthfulness, completeness, reliability of any information or testimony, the nature and extent of the assistance, and the timeliness of assistance?
   ii. Did the Supplier’s actions indicate intent to interfere with the investigation, including through destroying or concealing evidence; making false statements to investigators or reviewers; threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation; or attempting to corrupt individuals in exchange for non-cooperation with the investigation?
Prior History of Misconduct

39. Prior history can include debarments or other sanctions applied by the Global Fund and/or other development partners.

Risk Management across the Grant Lifecycle

Issued on: June 2018
Issued by: Risk Department
Approved by: Executive Grant Management Committee

OVERALL OBJECTIVES

1. The Global Fund recognizes that a preventive, focused risk management approach is critical for optimal achievement of the Global Fund’s mission of saving lives. Robust risk management occurs where risks are explicitly considered and decisions are taken consistently per agreed-upon principles. At the same time, it is incumbent on the Global Fund to ensure that the risks encountered in pursuing the Global Fund’s mission to maximize impact and end the three diseases is balanced with the mitigating actions taken and controls put in place to protect grant program resources.

2. Risk management is an integral part of grant management, both at country and Secretariat levels. While risk management initiatives by in-country stakeholders and implementers have significant impact on grant outcomes, the OPN focuses on the risk management framework internal to the Global Fund Secretariat. Country Teams engage implementers on an ongoing basis to facilitate that the outcomes from risk management activities by different stakeholders are aligned, prioritized and translated into mutually complementary actions.

3. Seamlessly embedding risk management into Global Fund culture, strategic planning, decision-making and resource allocation is critical for effective and efficient grant management and to the organization’s achievement of operational and strategic objectives. Effectively embedded risk management throughout the full grant lifecycle will:
   a. promote an environment in which Country Teams are responsible and empowered to manage risk and have a consistent understanding of the principles by which the Global Fund differentiates its approach to risk management;
   b. enable Country Teams to identify and prioritize risks;
   c. empower and encourage Country Teams to escalate identified risks when necessary; and
   d. foster management support to debate and make critical risk-based decisions.

4. The purpose of this OPN is to:
   • define the risk management framework;
   • provide guidance to Country Teams on how to operationalize risk management across the grant lifecycle; and,
   • articulate how the Risk Department and Global Risk Owners provide risk oversight to help achieve optimal outcomes at the grant and portfolio level.
POLICY AND PRINCIPLES

Principles

5. The following principles underpin the embedding of risk management throughout the grant lifecycle. Country Teams must take into account these principles when managing grants and making decisions:

**Principle 1 – Updating and maintaining grant specific risks:** Country Teams managing High Impact and Core portfolios are responsible for updating risk assessments for their portfolios on an ongoing basis as information becomes available. Teams managing Focused portfolios will review and update risks on an annual basis as part of the Annual Funding Decision process and document financial risks on an ongoing basis in the Financial Risk and Assurance Matrix.

**Principle 2 – Prioritizing portfolio-level risks:** Risk prioritization is based on country context and grant objectives, taking into account trade-offs between achieving grant objectives and accepting risk in the four main risk categories, i.e. Programmatic and M&E, Financial & Fiduciary, Health Product Management & Supply Chain, and Governance, Oversight & Management. This ensures that both the Country Team and implementers are focused on mission critical risks with appropriate and effective mitigating actions. Key grant risks which will be prioritized will cascade upwards to form prioritized portfolio-level risks.

**Principle 3 – Mitigating risk and planning comprehensive assurance:** All prioritized root causes must have mitigating actions aimed at managing the associated risk with the view of reaching a target risk level. The types of mitigating actions, and the degree to which risks are mitigated, should be driven by the target risk level and a defined period of time required to reach the target level. Assurance activities will verify whether controls and mitigating actions for key portfolio risks are executed as planned and whether they are effective in reducing risks to the target level. Proper assurance will facilitate the identification of gaps in implementer controls and weaknesses in the design and implementation of mitigating activities.

**Principle 4 - Accepting risk when necessary:** Defining the amount and type of risk the Global Fund is willing to accept in pursuit of its strategic objectives namely to achieve health outcomes and impact is critical for effective risk management, in particular to drive trade-off decisions and enable resource allocation. The degree to which residual risk is deemed acceptable by the Portfolio Performance Committee for High Impact and Core countries will guide Country Teams in determining the extent of mitigating actions and assurance activities to put in place against prioritized risks.

**Principle 5 – Alignment of portfolio and strategic risks:** Key thematic organizational risks that can have significant influence on the achievement of grant objectives are captured in the Organizational Risk Register. Country Teams, supported by other departments (particularly the Risk Department

---

464 Controls are generally designed into grant programs (e.g., segregation of duties intended to prevent fraud and error), where mitigation actions reduce the level of identified risk (e.g., strengthening logistic management information systems).
and Global Risk Owners\textsuperscript{462}, should align their approach to mitigating and assuring risks in their portfolios with the organization’s Risk Management Framework described in the section below, to ensure grant implementation supports the Global Fund’s strategic objectives.

**The Risk Management Framework**

6. Risk management is an ongoing process with built-in feedback loops to allow for timely adjustments to the level of risk and the corresponding mitigating actions. The framework below governs this process:

*Figure 1. Risk and assurance planning process.*

\textsuperscript{462} See section on the “Role of Risk Department and Global Risk Owners” for details on the Global Risk Owners.
Risk Identification and Prioritization

7. **Risk Identification.** Grant-specific risks, as well as corresponding controls and mitigating actions, are identified, prioritized, and monitored by Country Teams in High Impact and Core portfolios throughout the grant lifecycle (from country dialogue to closure), using the Integrated Risk Management (IRM) Module in the Grant Operating System (GOS).

8. Identified risks are categorized in four areas:

   (1) Programmatic and M&E Risks;
   (2) Financial & Fiduciary Risks;
   (3) Health Product Management & Supply Chain Risks; and
   (4) Governance, Oversight & Management Risks.

   These four Risk Categories are broken down into eight grant-specific Organisational Risks, reflected in the Organizational Risk Register, and then to the 21 individual risks included in the IRM.

9. **Capacity Assessment.** A capacity assessment is required for:

   (1) all new Principal Recipients (PR) who have not previously implemented the disease component, and
   (2) existing PRs who will be implementing new activities for which their capacity has not been previously assessed (e.g. a PR previously implemented LLIN campaigns and will now also implement case management activities).

   Examples of the second scenario include:

   - Changes in program scope, including for activities the PR has not previously been assessed for (i.e. community outreach, BCC activities, etc.).
   - PRs with specific experience in one disease being selected to manage a disease component where they have not yet evidenced expertise.

---

463 As from May 2018, the IRM has replaced the QUART and CAT tools.
• PRs with no or limited past experience in specific activities (i.e. procurement of non-health products) being tasked to take over such tasks.

10. Outside of the two mandatory situations described above, a Country Team may also conduct a capacity assessment for an existing PR if necessary to manage risks. The following are examples of potential triggers for conducting a capacity assessment of an existing PR:
   • Material changes in scale of the program (e.g., expanding from 2 states to 10 states)
   • PRs with grants that have been consistently performing at B2 or C level.
   • Evidence that the PR’s capacity has significantly changed since the last capacity assessment.

11. In situations where the above potential triggers are present (or other relevant triggers), Country Teams, in consultation with their Risk Specialist, determine if a capacity assessment will be conducted and document the outcome of the decision.

12. If a Capacity Assessment is completed in the context of a process requiring GAC approval (e.g. new grant approval or material reprogramming requiring GAC approval), the outcome of the assessment is submitted to GAC as part of the GAC approval process. If Country Teams, in consultation with their RM/DH/RPM and Risk Specialist, determine a capacity assessment will not be undertaken, the rationale for this decision is submitted to GAC for information as part of its review of standard grant documentation.

13. **On-going Risk Assessment for High Impact and Core Portfolios.** Country Teams follow a standardized methodology to determine a grant’s overall risk rating within a structured risk assessment process using likelihood and severity of 21 pre-defined risks within the four risk categories described above. Risk Assessments are completed at the grant level and maintained up to date as information becomes available to Country Teams in High Impact and Core portfolios throughout the grant lifecycle, from Funding Request to Grant Closure (e.g., as progress reports, audit reports, Health Facility Assessments, mission reports, etc., become available to Country Teams, they will update their Risk Assessment as required to reflect an up-to-date risk profile). Each grant’s risk assessment in High Impact and Core portfolios should be updated as mitigating actions or assurance activities are completed or revised; when a new risk or root cause is identified; when risk levels or implementation arrangements shift; or whenever the Country Teams recognize an important change in the grant risk profile.

14. **Risk Assessments for Focused Portfolios.** FPMs managing Focused portfolios complete Risk Assessments at the grant level as part of the annual funding decision-making process. The Portfolio Services Team (PST) supporting financial analysis within Focused portfolios follow a standardized methodology to determine a grant’s financial risk ratings for the six risks within the Finance and Fiduciary Risk Category.

15. **Risk Prioritization.** Prioritization ensures that both the Country Teams and implementers are focused on mission critical risks. From the grant specific risks captured in their risk assessment, Country Teams further flag risks at the grant level that represent a key risk at the portfolio level. Key Portfolio Risks are those that cut across multiple grants or may be a critical, grant-specific risk that has the potential to prevent the program from achieving key objectives. Risks identified as Key Portfolio Risks in High Impact and Core portfolios are documented in a Key Risk and Assurance Matrix (KRM).

---

464 Risk Specialist only consulted for High Impact and Core portfolios. In case of disagreement, the issue is escalated to the next management level in accordance with the process outlined in the Guidance on Country Team Approach.

465 When a Capacity Assessment is submitted, the Country Team must state whether the PR has the capacity to implement the program or not and document the rationale for their decision. This is recorded as a PDF and automatically saved in the Document Management tab within the IRM module. The Country Team can upload this PDF.

466 The Country Team must record whether a Capacity Assessment will be completed for the PR that will implement the program for each new Implementation Period in the Capacity Assessment section of the IRM. This is recorded as a PDF and automatically saved in the Document Management tab within the IRM module. The Country Team can upload this PDF with their other GAC required documents.

467 Focus countries are not required to develop a KRM.
**Risk Mitigation**

16. All root causes identified for risks must have mitigating actions (or “mitigants”) to manage the risks to an acceptable level. A mitigating action must meet the five S.M.A.R.T. criteria; i) Specific, so what must be implemented is clearly understood, ii) Measurable, so its status can be tracked, iii) Attainable, within the span of control of the actor to which it is assigned to, iv) Relevant to the identified risk, and v) Time-bound to ensure exposure to the risk is within agreed limits.

17. In cases where mitigating actions have due dates of more than six months, sub-milestones are recommended to be included as part of the mitigating actions to ensure the mitigant is on track to being completed on time and to an acceptable level.

18. The degree to which risks are mitigated should be driven by the trade-off decisions made at the Portfolio Performance Committee in the context of a portfolio/grant, considering the entire set of risks that can prevent achievement of grant and portfolio objectives. The types of mitigating actions and the degree to which risks are mitigated should be driven by the existing and target risk levels and defined periods of time which are given to reach these target levels.

**Assurance and Monitoring**

19. Assurance planning is at the heart of robust risk management, providing confidence to the Global Fund, donors, technical partners, and beneficiaries that investments are made strategically, efficiently and effectively. In the Global Fund risk management context, assurance is defined as a holistic framework that gauges whether adequate controls and mitigating actions are in place to manage key portfolio risks, with the ultimate goal of achieving grant objectives. Assurance activities help identify gaps in controls and mitigating actions in a timely manner to ensure corrective action can be taken.

20. **Comprehensive Assurance Planning for High Impact and Core Portfolios.** The assurance planning process starts with the Key Portfolio Risks identified by the Country Team. Assurance activities and providers are added for the mitigants linked to those Key Portfolio Risks in a grant’s risk assessment and are documented in the Key Risk and Assurance Matrix. Comprehensive portfolio-level assurance planning is required for High Impact and Core countries on an annual basis and is documented in the KRM. For comprehensive guidance on assurance planning, please refer to the Risk and Assurance Handbook.

21. The annual updates of KRM for High Impact and Core portfolios should be completed prior to the annual LFA budgeting exercise, in as much as an LFA’s scope of work will be directly informed by activities assigned to it within the assurance plan. Costed activities by other assurance providers will also be approved as part of the grant budgeting process during grant making.

22. The annual update is reviewed and approved by the Regional Manager (for Core portfolios) or Department Head (for High Impact portfolios), Regional Finance Manager, and relevant Risk Specialist. When a portfolio has been selected for review by the Portfolio Performance Committee (“PPC”), the review is required after the KRM has been validated by the Global Risk Owners,
Disease Advisors and CRG as part of Key Issues meeting of the PPC process.\textsuperscript{468} Once signed-off, the KRM is submitted for review to the PPC as described in the PPC ToRs.\textsuperscript{469}

23. **In-Country Consultation.** An in-country consultation on the resulting assurance plan captured in the KRM for High Impact and Core portfolio shall be undertaken jointly by the Country Team and Risk Specialist with country-based implementers, partners, beneficiaries and other stakeholders once per Implementation period. This exercise is designed to (1) ensure country context is accounted for, and (2) align partners and implementers around an agreed set of prioritized risks, mitigating actions and assurance activities. This consultation when undertaken shall be done before the approval of the KRM.

24. **Financial Risk and Assurance Plans.** Financial assurance planning is performed for individual grants in all portfolios\textsuperscript{470}, unless subject to exemptions as defined in Annex 2 of the *Guidelines for Financial Assurance Planning on Global Fund Grants*. Based on the information in the IRM, grant-specific financial assurance plans can be extracted from the standard grant risk assessment and are approved in accordance with the *Guidelines for Financial Assurance Planning on Global Fund Grants*.

25. **Monitoring.** Given the importance of assurance activities in determining the effectiveness of mitigation actions, there are a number of ways in which effective monitoring of progress made on implementing mitigating actions and assurance activities will be carried out throughout the grant lifecycle, including but not limited to:
   a. LFA and Country Team review through the Progress Update report
   b. Annual review, update and approval of the KRM
   c. Risk Specialist review of the Annual Funding Decision
   d. Ongoing Risk Specialist review of grant specific risk management plan
   e. Periodic in-country review, update and validation of the KRM

### Reporting

26. Risk data at the grant level will be available through GOS to aggregate and report at the grant, disease, country, regional and global levels. Such analyses are also incorporated in the Organizational Risk Register and escalated to the Enterprise Risk Committee (ERC), as needed. The Risk Department’s independent analyses are derived from its risk oversight function and contribute to the Chief Risk Officer’s (CRO’s) Annual Assurance Opinion to the Board and Committees.

### Differentiated Requirements

27. The approach and requirements for risk management are determined according to the differentiation framework (see the Overview of Grant Implementation for details on how risks are considered in portfolio categorization). A general framework has been developed (Table 1) to guide the risk management actions that Country Teams are required to undertake in each category.

---

\textsuperscript{468} The Key Issues Meeting is a preparation meeting before the PPC and is co-chaired by the Head of Country Risk Management and the GMD Department Head/Regional Manager of the portfolio being reviewed. It is an opportunity to have an open and in-depth conversation to refine articulation of the issues, risks and potential ‘asks’ to the PPC, as well as identify any changes required to supporting data & analyses based on the feedback of various experts, including the Global Risk Owners.

\textsuperscript{469} An approval process for the Key Risk and Assurance Matrix will be implemented in IRM as part of AIM Phase 2. Until such time as this is deployed, the approval process will be documented via email. The email approvals will be uploaded in the Document Management tab of IRM.

\textsuperscript{470} Financial Risk and Assurance Plan are generated from the Integrated Risk Management (IRM) module on GOS. There is no duplication of effort in documenting or tracking financial risks.

**Governance over Risk Management**

28. **Enterprise Risk Committee.** The Risk Department leads enterprise level risk management and carries out the governance and reporting functions over risk management. The Enterprise Risk Committee (ERC) is a forum for senior management to proactively identify and prioritize key organizational risks, assure the quality, strength and feasibility of associated mitigation actions, and to ensure that appropriate assurances are applied (see ERC ToRs for additional information).

29. **Portfolio Performance Committee.** Considering program performance, progress towards impact and contextual factors, the Portfolio Performance Committee (PPC) reviews country portfolios to ensure that risks have been prioritized correctly, that mitigating actions for key portfolio risks are appropriate, that short-term mitigations have been considered where needed, all with explicit attention to risk acceptance when necessary.

30. High Impact and Core portfolios will in principle be reviewed at least once during a funding cycle, unless otherwise determined by the PPC. Focused portfolios will be reviewed as determined by the PPC. The selection of portfolios to be reviewed by the PPC each year will be informed by semi-annual enterprise reviews to be conducted by the PPC, which will evaluate performance across all portfolios and identify key gaps and opportunities for maximizing impact. PPC also will review relevant CoE (Challenging Operating Environments) exceptions, the related risk exposures and the mitigation measures, as needed.

31. The PPC reports grant related risk management trends to the ERC, as needed (see PPC ToRs for additional information). The PPC will escalate to the ERC risks identified across multiple country

\(^{471}\) As part of AIM Phase 2, the Risk Tracker will be simplified for use by Focus countries. Until such time as this is deployed, Focus countries are recommended to use the Risk Tracker in its current form, but it is not required.

\(^{472}\) See the Guidelines for Financial Assurance Planning on Global Fund Grants for additional information and possible exemptions.
portfolios that should inform enterprise-wide risk discussions and resulting policy and enterprise mitigation actions.

32. **Risk Acceptance.** Management’s acceptance of selected risks in portfolios is one of the key outcomes of a PPC review. There are three scenarios where risk can be accepted by management:
   a. Situations where it is difficult for the Global Fund to influence identified risks through effective short or long-term mitigating actions. Management accepts the risks, giving due consideration to the organization’s mission in these contexts (e.g., risk mitigations in countries with long-term conflicts);
   b. While ideal mitigations are long-term, there are temporary short-term mitigations that can be instituted that reduce the near term risk to an acceptable level (e.g., use of fiscal agents when internal controls are weak while capacity building happens over the long-term);
   c. Effective long-term mitigations exist; however, no suitable short-term mitigations are available. Therefore, management accepts the risks for the time being while the long-term mitigations are being implemented (e.g., data quality risks arising from inadequate general health systems capacity).

Overall, the acceptance of a risk is contingent upon the trade-offs involved and the implementation and success of agreed upon mitigation actions and/or controls.

33. Management’s decision to classify certain portfolios as Focused constitutes their acceptance of the residual risks in those portfolios, and associated trade-offs on internal processes and resourcing; including for exemption from some requirements as provided for in this OPN.

**OPERATIONAL GUIDANCE ON RISK MANAGEMENT ACROSS THE GRANT LIFECYCLE**

34. This section outlines the critical milestones across the grant lifecycle where risk analysis feeds directly into grant decision-making processes. While these are standard milestones, there will also be specific issues that arise in the course of the grant lifecycle that will require the use of risk analysis, thus underscoring the principle of updating the Risk Tracker and ensuring appropriate actions are taken in a timely manner on an ongoing basis.

35. Table 2 below summarizes what is required at each stage of the grant lifecycle. Following the table are the details for each of these milestones.
### Table 2: Grant lifecycle milestones and use of risk analysis

473 The access to funding application package may be further differentiated based on various review categories and these requirements may be changed accordingly.
474 The Risk Department does not review or provide input for Focused countries.
demonstrates how residual risks are adequately mitigated for the grant revision (program revision and extension) activities.

| Closure | Carry forward residual risks from the closing grant into the new grant arrangements for continuing PRs as relevant. | Reviews and contributes to risk analysis included | Guides the Country Team as needed |

Access to Funding (A2F) and Grant Making

36. Funding request: Country Teams for all portfolios are required to provide applicants with the Secretariat’s view of key component-relevant risks to facilitate the development of the Funding Request. For High Impact and Core countries, this summary can be generated as an extract from the IRM and should be shared with applicants at the beginning of the country dialogue process. The applicant will then be required to describe how it will directly address these risks when submitting its Funding Request.

37. Secretariat Briefing Note (SBN). In line with Access to Funding principles of differentiation, for a country undergoing a full or tailored review, once a funding request is received by the Secretariat, the Country Team provides its analysis to the TRP and, when applicable, the GAC in the SBN. An essential component of the SBN is the Country Team’s analysis of the applicant’s proposed actions to address key component-relevant risks identified during Country Dialogue. The Country Team’s analysis in High Impact and Core portfolio shall also include an extract from the Risk Tracker of any residual risks that remain unmitigated and their proposed actions for grant making.

38. As part of finalizing the SBN review for TRP submission for High Impact and Core portfolios, the relevant Risk Specialist and Country Team will agree on a Grant Making Risk Assessment that summarizes risk management actions that should be completed during grant making; progress against actions in the Grant Making Risk Assessment is the basis upon which the Risk Specialist assesses the status of residual risks and provides non-objection to the Grant Making Final Review and Sign-off Form (see section on “After grant making” for additional details).

39. Grant making. In line with the GAC Terms of Reference, as needed, the GAC Review will provide guidance on the risks or control issues that must be addressed during grant making, particularly those that may have budgetary implications. During grant making, Country Teams shall work with implementers to ensure that critical risks to the achievement of grant objectives are addressed to the extent possible, and that appropriate controls and mitigating actions are put in place for residual risks that cannot be addressed within the grant making period. Country Teams for High Impact and Core portfolios will update their risk assessment as risks are either identified or addressed throughout the grant making process.

---

475 Fiduciary and programmatic risk is a consideration for application and review modalities of funding requests in line with Access to Funding Core Guiding Principles for Differentiation (GF/SC01/DP03). For more detailed guidance and context, please refer to the OPN on Access to Funding and Grant Making. Fiduciary and programmatic risk is a consideration for application and review of funding requests.

476 Focused portfolios are not required to share the key component-relevant risks with the applicant as part of country dialogue.
40. **After grant making**: At the end of grant making, the residual risks and their mitigating actions (including associated assurance activities where known) shall be documented in the grant making Final Review and Sign-off Form and presented to GAC. In line with the GAC Terms of Reference, (see the GAC ToRs) an element of the GAC review and approval of the grant is the acceptance of the residual risks and the mitigation strategy to be actioned during grant implementation.

41. For High Impact and Core countries, the Risk Specialist will continue to engage with the Country Teams on an ongoing basis and will review the risk section of the grant making Final Review and Sign-off Form and associated grant documentation on a “no objection” basis within 48 hours of receipt of form to ensure that:

a. all key risks related to grant objectives have been identified and appropriately prioritized;

b. mitigation measures are adequate to manage the risks at an acceptable level; and

c. appropriate assurance mechanisms are identified (to the extent possible based on known implementation arrangements at the time of GAC review).

If the Risk Department does not raise an objection within 48 hours, their agreement with the risk analysis is assumed. If an objection is raised, the issue is escalated to the next management level in accordance with the process outlined in the *Guidance on Country Team Approach*.

**Grant Implementation**

42. **Annual Funding Decisions (AFD)**. Following GAC and Board approval of a grant, the critical grant decisions are made when determining the annual funding amounts and disbursement schedule. This is an opportunity to take stock of the status of prioritized risks and the effectiveness of mitigants put in place to address them based on the outcomes of assurance activities. Annual Funding Decisions represent critical points to ensure that any new or amended mitigating actions, as a result of changes to the risk management plan, are fully funded and that appropriate mitigants and controls are in place to safeguard funds being disbursed.

43. Country Teams shall select which risks and mitigating actions from their grant’s risk assessment to include in the Annual Funding Decision-Making Form (ADMF) based on the risks’ relevance to the activities being funded. This information shall form a critical part of the final decision on the funding amount approved, and if any additional actions/safeguards need to be put in place to safeguard the funding.

Country Teams and Risk Specialists are expected to collaborate on an ongoing basis throughout the grant lifecycle so that issues or differences of opinion are identified early in the process and resolved. In preparing the annual funding decision, Country Teams for High Impact and Core portfolios should engage Risk Specialists in the review of management issues and risks. Before the ADMF is submitted for the formal approval process, the Risk Department Focal Point will review the risk analysis to ensure that:

a. all risks related to key grant objectives relevant to the activities being funded have been identified and appropriately prioritized;

b. mitigation measures are adequate to manage the risks at an acceptable level; and

c. appropriate assurance mechanisms are identified.

If the Risk Specialist does not raise an objection within 48 hours of receipt of the ADMF, their agreement with the risk analysis is assumed. If an objection is raised and not resolved in a timely manner, the issue is escalated to the next management level in accordance with the process outlined in the *Guidance on Country Team Approach*.

---

477 To the extent possible in 2016-17, depending on whether countries have completed assurance planning by the time of the annual funding decision is processed.
44. In addition, the Performance Letter sent to the implementer shall include (at a minimum) the list of prioritized risks, mitigating actions and assurance activities relevant to the implementer.\textsuperscript{478}

45. **Grant Revisions.** Grant Revision requests are opportunities to assess progress to manage key component-relevant risks during grant implementation and determine if programmatic and budgetary adjustments are needed to support new or amended mitigating actions.

46. For Material Program Revisions Requests in High Impact and Core countries, the Risk Specialist will provide input on the grant’s risks and mitigating actions to the Country Team. In some cases, issues will be escalated to GAC for further guidance (see OPN on Grant Revisions and GAC Terms of Reference for additional information).

47. For grant extension requests in High Impact and Core countries requiring GAC and Board approval, the Risk Specialist will provide input on the grant’s risks and mitigating actions to the Country Team (See OPN on Grant Revisions for additional information).

48. **Grant Closure.** In the majority of cases where a grant continues with the same PR, it is critical that the residual risks not mitigated during the previous implementation period are documented by Country Teams and carried forward into the new grant implementation period.\textsuperscript{479} In cases where the PR is being replaced, risks that remain relevant to the new grant and PR (i.e. supply chain, data quality, or accessibility issues, etc.) shall be transferred from the previous PR to the new PR for the next implementation period. In all cases, mitigating actions and assurance activities included in the grant’s risk assessment need to be either closed, waived or transferred for the grant to be closed. Any mitigating actions or assurance activities that remain relevant to address risks in the program should be transferred to the grant or grants that will continue implementing the program.

### Role of Risk Department and Global Risk Owners

49. In addition to providing advice and oversight on the Country Team’s execution of risk management at the grant level, the Risk Department leads enterprise level risk management through the ERC and PPC as described above, and provides governance and reporting functions over risk management:

   a. **Risk Management Group:** The Risk Department will coordinate with Global Risk Owners to identify points of collaboration and actions for strengthening success and efficiencies across Programmatic, Financial, PSM and Governance related risk and assurance activities. This will promote collective learning on risk management across the broader “second line of defence” functions.

   b. **Reporting.** The Risk Department’s independent analysis, based on various risk oversight functions, will contribute to the Chief Risk Officer’s Annual Assurance Opinion to the Board and Committees.

   c. **In-Country Risk Reviews.** An in-country risk review by the Risk Department provides the Secretariat with additional information to draw independent conclusions with respect to a portfolio, based on interactions with key stakeholders and beneficiaries. The in-country risk review also develops the Risk Department’s understanding of the risks and root causes facing portfolios, and facilitates evaluation of existing mitigating actions, including their adequacy, feasibility and likelihood of adequately mitigating specific risks.

   d. **Transfer of best practices across the portfolio.** Given its view of risk mitigation practices throughout the Global Fund’s entire portfolio, the Risk Department takes stock

---

\textsuperscript{478} As described earlier in the section on Mitigating Actions, prioritized risks and mitigating actions should be discussed with implementers on an ongoing basis. The Performance Letter is a means of formally communicating the mitigating actions that particular PR is responsible and accountable for implementing, but can be formally communicated outside of a Performance Letter as necessary.

\textsuperscript{479} In situations where the same PR continues to implement the disease component in the next implementation period, the Risk Tracker for the new implementation will be automatically cloned from the previous implementation period to ensure that all risk related data is transferred to the next period.
of mitigants that have proven effective in specific contexts and assists in transferring such best practices across Country Teams.

50. **Global Risk Owners.** There are Global Risk Owners for each of the four risk categories, assigned as follows:

- Finance and Fiduciary Risks: Head, Program Finance & Controlling Department
- Programmatic and Monitoring and Evaluation Risks: Head, Technical Advice and Partnerships
- Health Product and Supply Chain Risks: Head, Supply Chain Department
- Governance, Oversight and Management Risks: Head, Grant Portfolio Support and Solutions Department

51. Global Risk Owners are responsible for providing policy and technical guidance in their functional area regarding risk identification and prioritization, and best practices for mitigating actions and assurance activities based on country context. Further, as applicable, Program Finance has an additional management control function. The Legal and Compliance Department also advises Country Teams and Global Risk Owners on Governance, Oversight and Management Risks. Global Risk Owners are members of the PPC and are also responsible for the content of risk management systems and tools (i.e. capacity questions, pre-defined root causes and overall design and functionality of the systems and tools).

</tr>
</tbody>
</table>
SECTION 3: IMPLEMENTATION PERIOD RECONCILIATION AND GRANT CLOSURE
Implementation Period Reconciliation and Grant Closure

**OVERALL OBJECTIVES**

1. When the Global Fund’s support for a particular disease/HSS program continues from one implementation period (“IP”) to the next or a grant ends, the Grantee or Principal Recipient, acting on behalf of the Grantee\(^{480}\), must ensure that:
   a. agreed closure activities are planned, implemented and paid for;
   b. remaining financial commitments and financial obligations are addressed;
   c. remaining grant funds or recoveries are returned\(^{481}\) to the Global Fund;
   d. program assets are accounted for, transferred or disposed of; and
   e. programmatic and financial reports are submitted to the Global Fund.

2. The implementation and finalization of the IP Reconciliation or Grant Closure process must be completed within a maximum of 12 months from the IP end date.

**OPERATIONAL POLICY**

3. This Operational Policy Note (“OPN”) applies to grants financed under the 2014-2016 allocation period and thereafter. The OPN on Grant Closures issued on 18 December 2014 applies to grants financed prior to the 2014-2016 allocation period.

4. This OPN covers the following types of closure:

   a. **IP Reconciliation** when the Global Fund’s support for a particular disease/HSS program continues from one IP to the next, with the same Principal Recipient.

   b. **Grant Closure** means the grant ends due to one of the following reasons:
      i. **Change of the Principal Recipient**: a decision is taken by the Country Coordinating Mechanism (“CCM”) and/or the Global Fund to change the Principal Recipient;
      ii. **Transition from Global Fund Financing**: a decision is taken by the Global Fund or the country to end Global Fund financing for a disease component or country; or
      iii. **Grant Consolidation**: a decision is taken by the CCM and/or the Global Fund to consolidate several grants with the same Principal Recipient into one grant managed by that Principal Recipient.

5. The closure stages and a summary of the closure steps for each stage is set out in the framework below. The steps will vary depending on the type of closure. A separate step-by-step operational

\(^{480}\) As such terms are defined in the Global Fund Grant Regulations (2014) available at: https://www.theglobalfund.org/grantregulations. For the purposes of this Operational Policy Note, all references to Principal Recipient includes the Grantee, where the Principal Recipient acts on behalf of such Grantee.

\(^{481}\) In the case of IP Reconciliation, the remaining grant funds may be deducted from the approved grant amount for the next IP.
guidance is detailed in the Operational Procedures on IP Reconciliation and Grant Closure. Annex 1 provides the definition of key terms used in this OPN.

6. The implementation of the IP Reconciliation or Grant Closure process is undertaken following the IP end date. However, the Global Fund may also suspend or terminate a Grant Agreement early in accordance with its terms, in order for example, to change the Principal Recipient or cease Global Fund financing for a disease component or portfolio. In such instances, the Grant Closure process must be initiated immediately after such decision is communicated in writing to the Principal Recipient (as required under Section 10.2 of the Global Fund Grant Regulations (2014)).

7. At the Global Fund Secretariat, the Country Team is responsible for overseeing the completion of the IP Reconciliation or Grant Closure process, as applicable. At country level, under the oversight of the CCM, the Principal Recipient is responsible for undertaking and completing the IP Reconciliation or Grant Closure process, as applicable. It is the Principal Recipient’s sole responsibility to ensure that all Sub-recipient(s) and any other implementing partner(s) complete(s) activities and submit(s) required information in a timely manner so that the Principal Recipient is able to comply with the Grant Agreement and this OPN.
8. Set out below are the stages for IP Reconciliation and Grant Closure:

**A. Plan Closure**

9. As part of rigorous grant management, closure steps must be planned at least six months in advance of the IP end date to ensure the closure process is finalized in a timely and orderly manner. In the event of an early suspension or termination of the Grant Agreement, planning must begin as soon as the Principal Recipient is informed in writing.

**Agree on Closure Approach (including Grant Closure Plan and Grant Closure Budget)**

10. During the pre-closure period, the Country Team and the Principal Recipient must agree on the closure steps and timelines specified under the ‘Implement Closure’ stage that apply in the context of the grant. Depending on the closure type, the requirements to finalize the closure process will vary.

11. Under IP Reconciliation, the steps must be planned as part of the grant making process for the new IP. No separate Grant Closure Plan and Grant Closure Budget are required. For Grant Closure cases (with the exception of Grant Consolidations), all closure activities including the timeline for completing and paying those activities within the Closure Period must be clearly documented in the Grant Closure Plan and Grant Closure Budget which must be endorsed by the CCM. The Grant Closure Plan and Budget are approved by the Regional Manager or Department Head, and the Regional Finance Manager, through the Implementation Letter, in accordance with the Global Fund Signature Authority Procedure ("SAP") (which may be amended from time to time).

12. Subject to the Global Fund’s approval of the Grant Closure Plan and Grant Closure Budget, grant funds may be used to finance closure activities approved in the Grant Closure Plan and Budget to ensure the orderly closure of the grant. The Principal Recipient is responsible for minimizing the costs of closure. Any payment for activities not set forth and approved in the Grant Closure Plan and Grant Closure Budget is non-compliant and the Principal Recipient must reimburse such amount to the Global Fund.

**B. Implement Closure**

**Complete Approved Programmatic Activities**

13. Closure activities typically cover the administrative activities required to close the grant. For Grant Closure cases, excluding Grant Consolidations, the Global Fund may, at its discretion, allow time-limited, programmatic activities after the IP end date to facilitate the completion of discrete projects that have already been substantially started (such as the distribution of bed nets already delivered in-country, or the delivery of procured drugs, which may have faced delays in arriving in-country). The Grant Closure Plan and Grant Closure Budget set forth all Grant

---

a82 Where a grant is continuing from one IP to the next, the closure of the current IP must form part of the new grant making process.

a83 If a Sub-recipient is not continuing under the next IP, the Country Team must discuss and agree with the Principal Recipient the closure activities, timelines and budget pertaining to the outgoing Sub-recipient.

a84 Ibid.

a85 The Grant Closure Plan and Budget must be endorsed by the CCM Chair and Vice-Chair. For Regional Coordinating Mechanisms (RCMs), the RCM Chair and Vice-Chair must endorse the Closure Plan and Budget. This requirement does not apply to Non-CCMs and Regional Organizations.

a86 This is a Global Fund internal document.
Closure activities approved by the Global Fund. Approved activities must be completed and paid for during the Closure Period.

Complete Reporting Requirements

14. To ascertain programmatic and financial achievements of the grant during the last year of the IP and/or during the Closure Period, the Principal Recipient is required to submit the following reports. The reports must conform to the relevant guidelines and will be reviewed and approved by the Country Team. The required reports are the following:

   a. Final Progress Update (“PU”) for the IP487;
   b. Final Tax Report for the IP488;
   c. Audit Report489; and
   d. Financial Closure Report490

Address Financial Commitments and Obligations

15. At IP end date, the Country Team must confirm the Principal Recipient’s outstanding financial commitments and obligations.

16. For IP Reconciliation, financial commitments as at the IP end date must be financed and completed, within six months of the IP end date491. Approved financial obligations, however, must be transferred to the next IP of the grant (see Guidance on Transition between Allocation Utilization Period).

17. For Grant Closures, financial commitments and obligations are financed and completed under the expiring grant and must be addressed in the Grant Closure Plan and Budget. All financial commitments incurred during the IP of that grant need to be addressed within six months following the IP end date.

18. Grant Funds remaining and not otherwise budgeted for under the Grant Closure Plan and Budget under the grant nine months after the IP end date will be automatically decommitted and the Purchase Order (PO) will be closed. If the Country Team anticipates any delays beyond nine months to fulfill commitments, the Country Team must request to keep the PO open. Such requests will be reviewed and authorized by the Chief Finance Officer.

Address Non-Compliant Expenditures and Recoveries

19. Non-compliant expenditures, refunds and/or recoveries must be addressed in accordance with the Global Fund Guidelines for Grant Budgeting492 and OPN on Recovery of Grant Funds493.

489 See Guidelines for Annual Audits of Global Fund Grant Program Financial Statements. In certain cases, an audit will also be required for the closure period such as when: (i) the financial risk level is documented and validated (by the Regional Finance Manager) in the Integrated Risk Module as high or very high; (ii) the Grant Closure Budget is more than 10% of the grant budget or more than US$ 1 million whichever is lower; and/or (iii) the previous audit report has a qualified opinion.
491 Section 2.2.1 of the Global Fund Guidelines for Grant Budgeting.
492 Section 5 of the Global Fund Guidelines for Grant Budgeting.
493 This is a Global Fund internal document.
Transfer Program Assets and Receivables

20. After they can no longer be used under the grant for which they have been purchased, program assets must be used exclusively to fight the three diseases that represent the core mandate of the Global Fund. The Principal Recipient must ensure that all program assets and receivables have been accounted for and appropriately transferred or disposed of as per the Guidance on Asset Management.

21. The transfer or disposal of program assets and receivables depends on the type of closure. For IP Reconciliation and Grant Consolidation, the program assets and receivables must be transferred to be used under the next IP or new grant. The List of Program Assets and Receivables will be reviewed by the Country Team as part of the grant making activities for the next IP or new grant.

22. For Change of the Principal Recipient cases, the program assets and receivables must be transferred to the new Principal Recipient or new and continuing Sub-recipients, with oversight from the CCM. For Transition from Global Fund financing cases, the Principal Recipient and the Country Team must ensure that program assets continue to be used exclusively to fight the three diseases that represent the core mandate of the Global Fund. For these two types of grant closure, a List of Program Assets and Receivables as well as a Transfer Plan is submitted to the Country Team together with the Grant Closure Plan and Grant Closure Budget. All such documents need to be endorsed by the CCM they will also be approved by the Regional Manager or Department Head and Regional Finance Manager through an Implementation Letter, in accordance with the SAP (as amended from time to time).

23. During the Closure Period, the Principal Recipient will submit evidence that the program assets have been transferred in accordance with the approved List of Program Assets and Receivables, and Transfer Plan.

C. Finalize Closure

24. The closure process is finalized when the IP is financially closed (for IP Reconciliation) or both financially and administratively closed (for Grant Closures).

<table>
<thead>
<tr>
<th>Definition</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Financially Closed</td>
<td>The IP/Grant is considered “Financially Closed” when all IP Reconciliation or Grant Closure steps and requirements are considered fulfilled or waived by the Global Fund. The Global Fund will not disburse any further grant funds for the IP/Grant. This, however, does not mean that the Principal Recipient’s legal obligations end when the grant ends.</td>
</tr>
<tr>
<td>Administerively closed (only for Grant)</td>
<td>A grant is considered “Administratively Closed” when the financial closure has been completed and the Grant Closure Notification Letter is sent to the Principal Recipient to confirm both financial and administrative closure of a grant.</td>
</tr>
</tbody>
</table>

494 These documents, alongside the Grant Closure Plan and Grant Closure Budget, must be endorsed by the CCM Chair and Vice-Chair. For Regional Coordinating Mechanisms (“RCMs”), the RCM Chair and Vice-Chair must endorse the Grant Closure Plan and Grant Closure Budget. This requirement does not apply to Non-CCMs and Regional Organizations.

495 Note that the survival provisions which are expected to last beyond the duration of the Grant Agreement are covered in the Framework Agreement entered into between the Global Fund and the relevant Grantee which forms part of the Grant Agreement (or a standalone Grant Agreement where no Framework Agreement has been agreed). This includes, but is not limited to liability for loss, theft or damage of program assets; right of the Global Fund to request for a refund; maintenance of books and records of the program; right of access by the Global Fund, etc.
<table>
<thead>
<tr>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Closure</strong></td>
</tr>
</tbody>
</table>

496 For portfolios in High Impact Department
Annex 1. Definition of Terms

1. **Pre-Closure Period** is the six-month period in advance of the IP end date during which the steps required under the ‘Plan Closure’ stage take place.

2. **Closure Period** is the six-month period from the IP end date during which the steps required under the ‘Implement Closure’ stage take place.

3. **Grant Closure Plan** is the detailed description of the activities that need to be implemented under the ‘Implement Closure’ stage to close the grant in an orderly and responsible manner ("Grant Closure Activities"). The Grant Closure Plan must include a rationale and timeline for the Grant Closure Activities.

4. **Grant Closure Budget** is the itemized costed budget for the Grant Closure Activities.

5. **List of Program Assets and Receivables** is the list of: (a) all goods or other tangible or intangible property acquired wholly or partly using grant funds; and (b) receivables which are grant funds owed to the Principal Recipient by a third party (e.g., a deposit put down on a lease).

6. **Transfer Plan** is a plan for the use, transfer and/or disposal of all the items specified in the List of Program Assets and Receivables, including a rationale for each proposed action.

7. **Financial Commitments** are current contractual obligations to pay a specified amount of cash against goods and services already received, but for which the related payment has not yet been made, fully or partially.

8. **Financial Obligations** are current contractual obligations to pay an agreed amount of cash to a third party for goods/services that are to be received at some point in the future.
Implementation Period Reconciliation and Grant Closure

Approved on: 4 September 2018
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions
Sub-process Owner: Program Finance

Relevant Operational Policies:
- OPN on IP Reconciliation and Grant Closure
- OPN on Recovery of Grant Funds
- OPN on Annual Funding Decision and Disbursements
- Guidelines for Grant Budgeting
- Guidelines for Annual Audits of Global Fund Grants
- Guidelines on Asset Management

4. This document provides procedural guidance on Implementation Period (“IP”) Reconciliation and Grant Closures, for grants financed under the 2014-2016 allocation period and thereafter. The OPN on Grant Closures issued on 18 December 2014 applies to grants financed prior to the 2014-2016 allocation period.

5. Depending on the applicable closure type, Country Teams should refer to the relevant section of this Operational Procedures below:

- **IP Reconciliation** – Section A
- **Grant Closure**
  - Change of the Principal Recipient – Section B
  - Transition from Global Fund Financing – Section C
  - Grant Consolidation – Section D

6. Overview of the IP Reconciliation and Grant Closure types:

---

497 This is an internal Global Fund document

The Global Fund’s Operational Policy Manual 338
7. **Triggers.** IP Reconciliation is triggered when the Global Fund’s support for a particular disease/HSS program continues from one IP to the next, with the same Principal Recipient. In such cases, there are requirements that need to be fulfilled as per the Grant Agreement to ensure the closure of the earlier IP.

8. **IP Reconciliation Activities.** The list of steps and requirements with which the Principal Recipient needs to comply to ensure an orderly reconciliation of the IP are presented below:

*Except for the Financial Closure Report, and in specific cases the audit report, which are submitted during the ‘Finalize Closure’ stage.*

**Non-compliant expenditures and recoveries must be addressed as soon as possible during the ‘Implement Closure’ stage. Depending on timelines agreed with the Global Fund, this activity may extend to the ‘Finalize Closure’ stage.
### Requirements | Timeline | Review and Approval
---|---|---
A. Plan Closure (6 months before the IP end date)  
The Country Team prepares and shares with the Principal Recipient the Guidance Letter on IP Reconciliation to ensure the IP is closed in a timely and orderly manner | 6 months before the IP end date | Fund Portfolio Manager

B. Implement Closure (within 6 months from the IP end date)

#### Complete Reporting Requirements

| Final Progress Update for the IP which includes: | Principal Recipient submission due date: within 2 months from the IP end date | Review by the Local Fund Agent (LFA) | Review by the Country Team:  
- Finance Specialist/Portfolio Services Team (PST), who validates the financial data based on the LFA review  
- Public Health and Monitoring and Evaluation (PHME) Specialist, who validates the programmatic data based on the LFA review  
- Health Product Management (HPM) Specialist, who validates the procurement data based on the LFA review | Approval by:  
- Fund Portfolio Manager, who approves the overall report based on the above |
| Final Tax Report for the IP covering the last year of the IP (including any extensions) | Principal Recipient submission due date: 31 July | Review by the LFA (if applicable) | Review by:  
- Finance Specialist/PST, who validates the tax report based on the LFA review (if applicable) | Approval by:  
- Fund Portfolio Manager, who approves based on the above |
| Audit Report for the last year of the IP (including any extensions) | Principal Recipient submission due date: within 3 months from the IP end date | Review by the LFA (if applicable) | Review by:  
- Finance Specialist/PST, who validates the audit report based on the LFA review (if applicable) | Approval by:  
- Fund Portfolio Manager, who approves based on the above |

---

*Review and approval processes may vary depending on the portfolio categorization. Where appropriate in this table, please refer to the Signature Authority Procedure (as amended from time to time). The Signature Authority Procedure is a Global Fund internal document.*
### Address Financial Commitments and Obligations

| Pay outstanding Financial Commitments under the expiring IP and transfer approved Financial Obligations to the next IP in line with the Guidance on Transition Between Allocation Utilization Periods | Within 6 months from the IP end date | Financial commitments outstanding after 6 months are reviewed by:  
- Finance Specialist/PST; and  
- Fund Portfolio Manager.  
The related Annual Funding Decision and Disbursement will be processed as an exception based on the **OPN on Annual Funding Decision and Disbursements** and upon the signature of a Final Payment Letter by:  
- Regional Manager or Department Head; and  
- Regional Finance Manager. |

### Address Non-Compliant Expenditures and Recoveries

| Address non-compliant expenditures under expiring IP. | Within 6 months from the IP end date | Review and approval follows the **Guidelines for Grant Budgeting** and **OPN on Recovery of Grant Funds**. |

### C. Finalize Closure (within 7 – 12 months from the IP end date)

#### Determine and Take Into Account Remaining Grant Funds

| Submission and validation of the **Financial Closure Report** which includes the:  
- financial reconciliation of the cash balance as at the end of the IP (including any extensions);  
- expenditure report covering the period from the last submitted expenditure report up to the end of the Closure Period; and  
- updated Financial Commitments and Obligations as at the end of the IP  
See **Financial Closure Report Guidelines** | Principal Recipient submission due date: 7.5 months from the IP end date | Review by the LFA  
Review by:  
- Finance Specialist/PST, who validates the Financial Closure Report, based on the LFA review  
Approval by:  
- Fund Portfolio Manager, who approves based on the above |

| Based on the Financial Closure Report, determine final in-country cash balance under the expiring IP to be deducted from the grant amount for the next IP | Within 9-12 months from the IP end date | A reduction of the grant amount for the new IP will entail a revision of the Grant Confirmation table through issuance of an Implementation Letter. |

### Formalize the Closure

| The IP is financially closed when all the closure activities as described above have been considered fulfilled or waived by the Global Fund | Within 12 months from the IP end date | This does not mean that the Principal Recipient’s legal obligations under the Grant Agreement ends. Please refer to the section 25 of the **OPN on IP Reconciliation and Grant Closures**. |
SECTION B: GRANT CLOSURE DUE TO A CHANGE OF PRINCIPAL RECIPIENT

9. **Triggers.** This occurs when the CCM and/or the Global Fund decides to transfer implementation responsibilities of an approved program from one Principal Recipient to another, for example where the Grant Agreement with the current Principal Recipient is being terminated or suspended. This might occur during the IP or at the end of the IP. Under this scenario, the Global Fund support to the disease/HSS program continues but the implementation by the existing Principal Recipient is discontinued.

10. When this happens, the grant with the outgoing Principal Recipient is closed and a new grant is signed with the new Principal Recipient. The change in the Principal Recipient is approved by the Regional Manager or Department Head. The Country Team prepares a new Grant Confirmation. The Grant Confirmation is reviewed and signed by the Global Fund and the new Principal Recipient.

11. **Grant Closure Activities.** When the Principal Recipient changes, grant closure activities must focus on the swift and orderly transfer of the program implementation from the outgoing Principal Recipient to the new Principal Recipient to facilitate the continuity of the program.

### Address Financial Commitments and Financial Obligations (within 6 months from the IP end date)

- **Pay outstanding Financial Commitments and Financial Obligations under the expiring grant**
  - Within 6 months from the IP end date
  - Financial commitments outstanding after 6 months are reviewed by:
    - Finance Specialist/PST
    - Fund Portfolio Manager.
  - The related Annual Funding Decision and Disbursement will be processed as an exception based on the *OPN on Annual Funding Decision and Disbursements* and upon the signature of a Final Payment Letter by:
    - Regional Manager or Department Head; and
    - Regional Finance Manager.

### Address Non-compliant Expenditures and Recoveries (within 9 months from the IP end date)

- **Address non-compliant expenditures and recoveries under the expiring grant**
  - Within 9 months from the IP end date
  - Review and approval follows the *Guidelines for Grant Budgeting* and *OPN on Recovery of Grant Funds*.

### Transfer Contracts

- **The best approach for managing existing contracts should have been agreed with the incoming Principal Recipient before the end of the IP**
  - As soon as the incoming Principal Recipient is nominated
  - To be discussed and agreed between the outgoing and incoming Principal Recipient.

### Transfer Program Assets

- **Transfer Program Assets to incoming Principal Recipient and provide evidence to Global Fund**
  - As soon as possible to be agreed with the incoming Principal Recipient
  - Review by the LFA (if applicable)
  - Review by:
    - HPM Specialist, who validates the reported information, based on the LFA's review (if applicable)

---

<td></td>
<td></td>
</tr>
</tbody>
</table>
12. **Transferring contracts.** It is the responsibility of the outgoing Principal Recipient to take all appropriate and necessary actions to ensure that each Sub-recipient cooperates fully with the new Principal Recipient, the Global Fund and/or the CCM to facilitate any necessary transfers. In addition to the above, the closure process must also determine and implement the best approach for managing existing contracts and agreements with sub-implementers and service providers to ensure continuity of service delivery under the program:

   a. **Contracts for Continuing Services:** The outgoing and incoming Principal Recipients should collaborate to determine if existing contracts for services can be assigned or terminated by the outgoing Principal Recipient and re-negotiated by the new Principal Recipient. Assignment of contracts may be appropriate (if allowed under the terms of the contract) if favorable terms have been negotiated for such contracts. Existing contractual terms and contract termination provisions may be analyzed by the outgoing and new Principal Recipients with their respective legal counsel, as appropriate.

   b. **Contracts with Pending Delivery of Goods:** If the outgoing Principal Recipient has contracts for the procurement of goods, which have not yet been delivered, the Country Team will determine if it is more efficient for the outgoing Principal Recipient to receive and transfer the goods. Factors to be considered include:

      (i) the termination costs and penalties;

      (ii) delays resulting from the termination of the supplier contract, and re-order of goods by the incoming Principal Recipient (which is particularly important for critical health products); and

      (iii) tax benefits that may be gained from the outgoing Principal Recipient’s tax exemption status.

   If the outgoing Principal Recipient continues to serve as the Principal Recipient for receiving an outstanding shipment, arrangements should be put in place with the new Principal Recipient to jointly address non-conforming goods and transfer arrangements.

   c. **Sub-Recipient Agreements:** Outgoing and incoming Principal Recipients should ensure that Sub-recipients that will continue under the program are maintained under contractual arrangements. This may be through an assignment from the outgoing Principal Recipient to the new Principal Recipient, where this is permitted within the terms of the contract, or a simultaneous termination and execution of Sub-recipient agreements on a set closing date. The transfer of Sub-recipients must be coordinated to ensure that Sub-recipients operate under a contract at all times. The particular terms of transfer will depend on the circumstances of each case. If relevant, cash balances at the Sub-recipient level should be documented in the Grant Closure Plan.

---

*505* Section 10.1 of the Grant Regulations

*506* The Global Fund and the Global Fund’s legal department do not represent the Principal Recipient in legal matters. The Principal Recipient must seek independent legal counsel for any contractual arrangements, as appropriate, and to the extent advisable or necessary by the Principal Recipient.
d. **Any Pending Activities:** In limited cases, time-limited, programmatic activities that cannot be transferred to the new Principal Recipient may be approved for continuation by the outgoing Principal Recipient to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of procured drugs, which have faced delays in arriving into the country).\(^{507}\)

\(^{507}\) If approved in the Closure Plan and Budget.
SECTION C: GRANT CLOSURE DUE TO TRANSITION FROM GLOBAL FUND FINANCING

13. **Triggers.** This occurs when the CCM and/or the Global Fund decide:
   a. a country is not eligible for funding from the Global Fund for a disease component, and transition funding is provided. Following completion of the transition funding period, the Global Fund support to the program and implementation arrangements with the Principal Recipient(s) are discontinued; or
   b. the Global Fund decides to no longer support a disease program or a component of the program; or
   c. a country decides to no longer access Global Fund support for a specific or all disease components.

14. **Grant Closure Activities.** When a grant is closing due to transition, the grant closure process must focus on the orderly exit of the Global Fund from the program and take into consideration previously agreed transition plans. The activities will include the following:

   - **A. PLAN CLOSURE**
     - Agree on closure approach and timelines
     - Agree on Grant Closure Plan and Grant Closure Budget, List of Program Assets and Receivables, and Transfer Plan

   - **B. IMPLEMENT CLOSURE**
     - Complete and pay for approved grant closure activities
     - Complete reporting requirements*
     - Address non-compliant expenditures and recoveries**

   - **C. FINALIZE CLOSURE**
     - Determine and return remaining grant funds
     - Formalize closure
     - Address Financial Commitments and Financial Obligations
     - Transfer program assets and receivables

* Except for the Financial Closure Report, and in specific cases\(^ {508} \) the audit report, which are submitted during the 'Finalize Closure' stage.

** Non-compliant expenditures and recoveries must be addressed as soon as possible during the 'Implement Closure' stage. Depending on timelines agreed with the Global Fund, this activity may extend to the 'Finalize Closure' stage.

---

\(^ {508} \) The audit report must also cover the ‘Closure Period’ in the following cases: (a) the financial risk level is documented and validated (by the Regional Finance Manager) in the Integrated Risk Module as high or very high; (b) the Grant Closure Budget is more than 10% of the grant budget or more than US$ 1 million whichever is lower; and/or (c) the previous audit report had a qualified opinion.

</table>
| Principal Recipient submission due date: Within 3 months from the IP end date | Review by the LFA (if applicable) | Review by:  
  - Finance Specialist/PST validates the audit report based on the LFA review (if applicable)  
  Approval by:  
  - Fund Portfolio Manager approves based on the above |

#### Address Financial Commitments and Financial Obligations
- If consolidation happens at the IP end date, **Financial Commitments and Financial Obligations must be settled under the closing grant.**

  Within 6 months from the IP end date

  Financial Commitments outstanding after 6 months are reviewed by:  
  - Finance Specialist/PST; and  
  - Fund Portfolio Manager.

  The related Annual Funding Decision and Disbursement will be processed as an exception
### Requirements

If consolidation happens mid-implementation, Financial Commitments and Financial Obligations are transferred to the new combined grant.

### Address Non-compliant Expenditures and Recoveries

Non-compliant expenditures must be addressed under the closing grant within 9 months from the IP end date. Review and approval follows the Guidelines for Grant Budgeting and OPN on Recovery of Grant Funds.

### C. Finalize Closure (within 7-12 months from the IP end date)

Determine and Take Account of Remaining Grant Funds

Submit and validate the **Financial Closure Report** which includes the:

- reconciliation report of the cash balance as at the end of the IP;
- expenditures report for the Closure Period; and
- updated Financial Commitments and Financial Obligations as at the end of the IP.

Principal Recipient submission due date: Within 7.5 months from the IP end date.

Review by the LFA

Review by:

- Finance Specialist/PST, who validates the reported data, based on the LFA’s review.

Approval by:

- Fund Portfolio Manager, who approves based on the above.

See **Financial Closure Report Guidelines**.

---

512 This is an internal Global Fund document.
The Grant Portfolio Solutions and Services Department.

18. The following data points will be monitored:
   m. Closures initiated and completed;
   n. Types of closure;
   o. Number of grants for which the initial closure period was extended;
   p. Approach used for the IP Reconciliation or Grant Closure (full or with exceptions to the requirements);
   q. Closure Status. This includes the timeline from IP end date to date when grant is assigned “Financially Closed” and “Administratively Closed” status; and
   r. Amount returned to the Global Fund at grant closure.
Grant Closures

Issued on: 18 December 2014

Purpose: To provide guidance to Country Teams on closing a grant agreement signed with a Principal Recipient.

OVERALL OBJECTIVES

81. When a grant reaches the end of an implementation period or ends following a decision by the Country Coordinating Mechanism (CCM) and/or the Global Fund Secretariat, the grant needs to be closed. The purpose of this OPN on Grant Closures is to describe the process through which grants are closed in an organized, efficient, and responsible manner.

POLICY AND PRINCIPLES

82. Four “basic principles” govern the grant closure process. These principles are the minimum requirements for grant closure. Country Teams must ensure that the grant closure approach adheres to these four principles. Provided that they comply with these principles, Country Teams should differentiate the details of the closure process whenever appropriate based on the specific context of the grant or portfolio. Once compliance with these principles is ensured, the grant closure is finalized through a notification letter to the Principal Recipient.

Principle 1: Grant funds should not be left earmarked in the Global Fund Finance systems and/or with implementers for longer than necessary for the implementation of program activities. In the context of grant closure, this means that Country Teams should ascertain the outstanding grants payable, contingent liabilities are cleared and take necessary steps for the swift return to the Global Fund of any grant funds that have not been expended as of the grant expiry or termination date. Any ineligible expenditures should be pursued unless expressly authorized by Global Fund Senior Management.

Principle 2: When they can no longer be used under the grant for which they have been purchased, grant assets should continue to be used exclusively for the purposes of the fight against the three diseases. In the context of grant closure, this means Country Teams should work with the PR to ensure that all assets purchased with grant funds have been accounted for and appropriately transferred or disposed of.

Principle 3: Country Teams should ascertain the extent to which grants have achieved their strategic objectives, and that there is sufficient assurance over the program to confirm any such achievement. For closure, this means that Country Teams needs to ensure that the PR has submitted all relevant reports to ascertain programmatic and financial achievements of the grant during the last year of implementation and closure period.

Principle 4: All activities conducted with grant funds should be discussed and agreed between the PR and the Global Fund, and are governed by the terms and conditions of the grant agreement. For grant closures, this means that closure activities, associated costs and timelines should be agreed well ahead of the grant end date. Grant funds may be used to finance grant closure activities that are approved in the closure plan and budget. An amendment to the grant agreement via an implementation letter is required for authorization of closure activities beyond the end of the grant.
DIFFERENTIATION

If a Country Team has never completed a closure process before, it is advised that they familiarize themselves with the full closure approach before deciding on areas of differentiation.

83. Country Teams can follow the full approach to closure, or a differentiated approach. Country Teams should differentiate in the following circumstances in particular:

a. Where the overall materiality of grant closure does not merit or justify following all the elements of the full approach for grant closure, primarily due to cost in terms of level of effort envisaged compared to amount of refunds and related risk involved; or

b. When the documentation required for the full approach is unavailable, and where Country Team recommends to use other corroborative evidence on cash balances, grant assets, grant or grant closure expenditures, stocks/inventories financed from the grant to facilitate grant closure.

84. The following steps should be followed in deciding on the closure approach:

a. Based on the circumstances of the grant and available information (e.g. recent cash balance reports, inventory-checks, audits, etc.), Country Teams determine whether incremental work needs to be undertaken prior to closing the grant;

b. By filling in the Differentiated Grant-Closure Form, Country Teams make clear what elements of the full/differentiated approach will be used;

c. If a Country Team opts to follow a differentiated closure process, they should discuss and agree on the approach with their Regional Manager or Department Head prior to following it and document it in the Differentiated Grant Closure Form. The Regional Manager or Department Head will involve other Functional Managers (Finance, MECA, HPM, and Legal Grant Management) when their inputs are needed for specific areas pertaining to closure. The form should be signed by the Regional Manager or Department Head;

85. The implementation of the differentiated closure approach will be monitored and reported on. For additional information please see the “Monitoring and Reporting” section below.
Differentiated Grant-Closure Form (SAMPLE)

Principle 1: Ascertain the outstanding in-country cash-balance\textsuperscript{514}, after clearing commitments and liabilities

☐ **Option 1:** The Country Team believes that the circumstances of this grant do not warrant any / warrant limited additional steps towards addressing the outstanding in-country cash balance.

☐ **Option 2:** The Country Team believes the full process for cash should be followed.

**If Option 1: Brief description of these circumstances and suggested CT approach:**

☐ Based on the above, the CT recommends requesting the cash balance as already established on ______________ [date] and closing on this basis.

Or:

☐ Based on the above, the CT recommends not pursuing the recovery of the in-country cash balance and moving towards closure without spending additional effort on recovering cash. The CT has liaised with the Recoveries Team and took this to the Recoveries Committee and ED for write-off (see Recoveries Guidance for additional detail).

Principle 2: Ensure that all assets purchased with grant funds have been accounted for and transferred or disposed of

☐ **Option 1:** The Country Team believes that the circumstances of this grant do not warrant conducting a full inventory of assets or establishment of an “asset transfer plan” prior to grant-closure.

☐ **Option 2:** The Country Team believes the full process for assets should be followed.

**If Option 1: Brief description of the grant’s circumstances and of the Country Team’s approach:**

Principle 3: Reporting requirements and timelines

☐ **Option 1:** The Country Team believes that through the reports mentioned below, they have sufficient assurances about the last year of the program and the closure period. They therefore recommend grant closure without the submission of additional reports.

☐ **Option 2:** The Country Team believes the full process for reporting should be followed for this principle.

**If Option 1: Brief description of the reports and the situation:**

Principle 4: Planning and financing grant closure

☐ **Option 1:** The Country Team has already had the required planning discussions with the PR and CCM and therefore is able to immediately send the grant closure Implementation Letter with agreed high-level milestones rather than a full closure plan and budget.

☐ **Option 2:** The Country Team believes the full process for planning and financing closure should be followed for this principle.

**If Option 1: Brief description of the discussions surrounding milestones for closure:**

\textsuperscript{514} This is defined as outstanding cash balance as per GF calculations based on verified PUDRs/other financial reports (after clearing commitments and liabilities, including approved grant closure budget)

The Global Fund’s Operational Policy Manual 362
FULL CLOSURE APPROACH

86. Types of Grant Closure. The closure approach differs depending on the type of closure involved. There are three types of closure:

a. Closure due to consolidation. This involves the closure of an ongoing grant as a result of a consolidation either with a new grant resulting from a Concept Note or another ongoing grant implemented by the same PR. Under this scenario, following closure of the grant, Global Fund support to the disease/HSS program continues and the contractual relationship with the PR is maintained under a new grant agreement that consolidates activities from the newly closed grant with those under the new grant resulting from a Concept Note or other ongoing grant implemented by the same PR.

b. Closure due to a change in PR. This occurs when the CCM and/or the Global Fund decide to transfer implementation responsibilities of an approved program from one entity to another. Under this scenario, Global Fund support to the disease/HSS program continues but the contractual relationship with a PR is discontinued.

c. Closure due to “transition” from Global Fund financing. This occurs either when
   i. a country is not eligible for funding from the Global Fund for a disease component, transition funding is provided. Following completion of the transition funding period, the Global Fund support to the program and contractual relationships with the PR(s) are discontinued; or
   ii. the Global Fund decides to no longer support a disease program or a component of a program.

87. Stages of grant closure. Grants go through two primary stages of closure:

b. Financial Closure. A grant enters financial closure on the day after the grant end date. Financial closure focuses on completing financial transactions under the grant such as clearing commitments and liabilities, establishing amounts to be returned to the Global Fund, collecting refunds from PR and other parties. After six months from the grant end date, the creation of new commitments, disbursements and liabilities under the grant will no longer be possible by both the Country Team and PR. The Accounting team in Finance will coordinate the automatic clearing of open grants payable (committed not disbursed) and contingent liabilities (signed not committed) within 30 days of the end of financial closure period (i.e. 7 months from the grant end-date) and no later than a maximum of nine month after grant end-date in exceptional circumstances. In exceptional cases, should a payment of commitments made under the grant term need to be paid beyond 6 months after the grant end date, a final payment letter needs to be undertaken. This letter will summarize the full extent of outstanding payments and will be the last financial interaction between the PR or third party entity and the Global Fund under the grant.

515 Includes, without limitations, situations where there has been a decision to terminate the contractual relationship with the PR because of credible and substantial findings of fraud; or when an international organization is handing over its role as PR to a local entity.
c. In the event the Country Team anticipate delays in the establishment the disbursements required for program activities and payment to other third parties, Finance should be notified in writing on grantPO@theglobalfund.org to delay the automatic clearing of undisbursed balances in GFS.

d. A grant is assigned a “financially closed” status when all refunds have been received. This status would end all normal financial obligations between the Global Fund and the Principal Recipient under the Grant agreement.

e. Administrative closure. A grant is considered administratively closed when all liabilities and commitments have been fulfilled, cancelled or transferred, all cash and non-cash assets have been accounted for and appropriately transferred or returned and all reporting requirements have been met to the satisfaction of the Global Fund.

f. The Country Team confirms both financial and administrative closure through a notification letter sent to the PR confirming that the cash balance has been received and all closure requirements have been satisfactorily met. The Country Team updates the grant management system when a grant is closed.

<table>
<thead>
<tr>
<th>Type</th>
<th>Financially Closed</th>
<th>Administrative Closure</th>
</tr>
</thead>
<tbody>
<tr>
<td>Consolidation</td>
<td>Immediately, with the signature of the new grant</td>
<td>6 months</td>
</tr>
<tr>
<td>Change in PR</td>

<td>3 months following the submission of the Audit Report*</td>
</tr>
<tr>
<td>“Transition”</td>
<td>6 months</td>
<td>12 months*</td>
</tr>
</tbody>
</table>

* these timeframes are indicative. Country Teams should strive to complete these phases as soon as possible.

88. Closure Activities. While guided by the “basic principles” above, grant closure should generally focus on the following activities. The detailed approach will depend on the type of closure and the specific circumstance of the grant being closed:

a. Clearing commitments under the closing grants. Outstanding commitments should be cleared under the closing grants.

b. Clearing recoverable amounts between the Global Fund and the PR. When applicable, amounts to be recovered from the PR due to ineligible expenditures and verified claims of the PR for reimbursements must be addressed in accordance with Global Fund policies for addressing recoveries and ineligible expenditures.

c. Determining and transferring or returning cash balances and undisbursed funds. Funds required for closure (i.e., clearing outstanding commitments and liabilities and other closure activities) must be determined. Remaining cash balance and undisbursed funds should be returned to the Global Fund.

d. Accounting and transferring/disposing non-cash assets under a closing grant. All remaining health products with valid shelf life (i.e., health products procured less than three years from grant end date) as well as equipment and infrastructure that are in working condition as of the
grant end date must be accounted for by the PR and the transfer of assets agreed with the Global Fund to ensure that the assets are used to fight the three diseases.

e. **Completing reporting requirements.** PR must submit the programmatic report, annual financial report, and audit report for the last year of the grant and the grant closure period as applicable.

89. Service delivery or programmatic activities should typically stop by the grant end date. In limited cases, time-limited, programmatic activities after the grant end date may be allowed to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of drugs that have already been procured under the program term and that may have faced delays in arriving in country). This should be clearly documented in the closure plan and budget and should be approved by the Regional Manager or Department Head when signing the Implementation Letter approving the closure plan and budget.

**Planning and Financing Grant Closure**

90. Grant closure should be planned well ahead of the grant end date. The Country Team and PR must agree on the approach and requirements for grant closure and establish deadlines for the completion of agreed closure activities. The approach and timelines including budget required should be documented through a closure plan and budget endorsed by the CCM and reviewed by the Country Team. Grant funds may be used to finance grant closure activities that are approved in the closure plan and budget. Once agreed, the closure plan and budget (link forthcoming) should be signed into the grant agreement through an Implementation Letter.

91. **For Closures Due to Consolidation.** Closure of existing grants should be planned as a part of grant making. No separate closure plan and budget is required.

92. **For Closures Due to Change in PR.** Existing arrangements that are essential for continuity of programmatic activities must be maintained or properly transferred. It is the responsibility of the PR\textsuperscript{516} to take all appropriate and necessary actions to ensure that the PR and each SR cooperates fully with the Global Fund and/or the CCM to facilitate any necessary transfers. The closure plan should focus on how the program will transition from the outgoing entity to the incoming PR. In addition to the closure activities, the transition plan should include the following considerations if applicable:

   a. **Contracts for Continuing Services:** The outgoing PR and the incoming PR should work together to determine if existing contracts for services should be assigned or if they should be terminated by the outgoing PR and re-negotiated by the new PR. Assignment of contracts may be appropriate if favorable terms have been negotiated under renewable or requirements contracts. Existing contract terms and contract termination provisions may be analyzed by the PR with the PR’s counsel, as appropriate.\textsuperscript{517}

   b. **Contracts with Pending Delivery of Goods:** If an outgoing PR has contracts for procurement of goods, which have not yet been delivered, the Country Team should consider if it is more efficient for the outgoing PR to receive and transfer the goods. Factors which favor such arrangement are: (i) time delays resulting from the termination of the supplier contract, re-execution and re-order of the goods by the entering PR (particularly important for critical health products); and (ii) tax benefits that may be gained from PR’s tax exempt status. If the outgoing PR continues to serve as PR for receiving an outstanding

\textsuperscript{516} Article 10.1 of the Grant Regulations.

\textsuperscript{517} The Global Fund and the Global Fund’s legal department do not represent the PR in legal matters. The PR should seek independent legal counsel for any contractual arrangements, as appropriate and to the extent necessary by the PR.
shipment, arrangements should be put in place with the entering PR to jointly address non-conforming goods and transfer arrangements.

c. **Sub-Recipient Agreements**: Outgoing and entering PRs should ensure that Sub-recipients that will continue under the program are maintained under contractual arrangements. This may be through an assignment from PR to the entering PR, or a simultaneous termination and execution of SR agreements on a set closing date. The transfer of sub-recipients must be coordinated to ensure that they remain under contract at all times. The particular terms of transfer will depend on the circumstances of each case. If relevant, cash balances at the SR level may also be documented in the transition plan.

d. **Inventory**: The PR should complete an inventory of non-cash assets under the closing grant that will be transferred to and managed under the grant signed with the incoming PR.

e. **Any pending activities**: In limited cases, time-limited, programmatic activities that cannot be transferred to the incoming PR may be allowed to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of drugs that have already been procured under the program term and that may have faced delays in arriving in country).

93. **For Closures due to transition from Global Fund financing**: The closure plan should focus on how the program will be continued and sustained using country resources and the completion of the closure activities.

94. **Sub-recipient closures**: The Global Fund has a direct contractual relationship with the PR. It is the sole responsibility of the PR to provide for closure of SR grant agreement. The PR must ensure that the SRs complete activities and submit information in a timely manner so that the PR is able to comply with the grant closure requirements by the Global Fund.

95. **Escalating Issues**: Should Country Teams face significant challenges, which prevent them from progressing on the grant closure, they should escalate these issues to their Regional Managers (and subsequently to Senior Management, as necessary) as soon as possible to facilitate resolution of issues.

**Determining and Recovering In-Cash Balances**: 

96. **For Closures Due to Consolidation**: When a grant is being consolidated with a new or ongoing grant, the Country Team should focus on rapidly determining in-country cash balances and undisbursed funds under the closing grant. These will be transferred to the new grant after setting aside funds required to settle outstanding commitments and liabilities under the closing grants. Once the new grant agreement is signed, the old grant is considered financially closed.

97. **For closures due to PR change**: When a grant is being closed due to a change in PR, the focus should be on rapidly determining in-country cash balances, including at SR level, and undisbursed funds under the closing grant. These will be transferred to the new grant after setting aside funds required to settle outstanding commitments and liabilities under the closing grants. Given the goal of facilitating a smooth change between PRs, all activities associated with the closure of the former PR’s grant should be complete within 3 months of the grant end date.
98. For closures due to transition from Global Fund financing. During the 6 months following the grant end date, the PR and Country Team should ensure that all outstanding commitments that were made during the grant lifetime are paid. Grants will be considered financially closed 6 months following the grant end date following which time further disbursements cannot be made to the PR.

99. The Country Team cannot close a grant by waiving known ineligible expenditures, known unutilized or outstanding cash balances, or closure steps that will likely to lead to such ineligible expenditures or unutilized cash balances being identified (e.g., waiving audit while knowing that an audit would lead to identification of ineligible expenditures). Waivers or write-offs of ineligible expenditures/refunds/outstanding cash balances should be submitted and approved by the Recoveries Committee.

Transferring or disposing of assets

100. For Closures Due to Consolidation. Where the grant is being closed but implementation continues with the same PR under a new grant number, the PR should focus on completing an inventory of non-cash assets under the closing grant that will be transferred into the new grant. In these instances, the PR shall maintain ownership over the assets, but in conducting the inventory, will have clear documentation of the assets to be managed under the new grant. The timing for completion of this activity should be discussed and agreed between the Country Team and the PR.

101. For closures due to PR change. When the implementation responsibilities are being transferred to another entity, the outgoing PR should complete an inventory of non-cash assets that will be transferred to the new PR. The outgoing PR must transfer all non-cash assets procured under the grant to the new PR using appropriate transfer or assignment agreements.

102. For closures due to transition from Global Fund financing. The country should undertake an inventory of non-cash assets procured under the grant (where relevant) and must seek approval of the Global Fund for the disposal or transfer of these non-cash assets to national entities to be used for the fight against the three diseases.

Fulfilling reporting Requirements

103. In order for a grant to be considered administratively closed, all reporting requirements need to be met (in addition to all liabilities and commitments have been fulfilled, cancelled or transferred, all cash and non-cash assets have been accounted for and appropriately transferred or returned.) This section outlines the reporting requirements for each type of closure.

104. For Closures Due to Consolidation. Once the new grant agreement is signed, the PR should submit the following routine reports related to the old grant as per the outlined timelines\(^5\). The grant is administratively closed when the Global Fund has completed the review and approved the reports.
   a. *Programmatic Progress Report:* The PR should submit report(s) on the progress towards program objectives and targets covering from the last Progress Update date until the day before the new NFM grant start date for the constituent grant(s) no later than 60 days after the end of the reporting period agreed for the constituent grant(s).
   b. *Annual Financial Report (AFR):* The PR should submit AFR(s) for the constituent grant(s) covering the period from the last submitted AFR up to the last day before new grant start.

\(^5\) The relevant reports should be submitted as per the timeline agreed up on the original constituent grant agreement’s and should not delay the first disbursement of NFM agreement.
date, no later than 60 days after the end of the reporting period agreed for the constituent grant(s).

368. **Audit Report:** The PR should submit audit report(s) for the constituent grant(s) covering the audit of financial statement(s) up to the last day before new grant agreement start date, as per the timeline agreed up-on the original constituent grant agreement(s). However, if the financial statement of the constituent grant(s) to be audited covers less than six months, these periods can be audited with the first audit for the NFM grant.

d. **Inventory:** The PR should complete an inventory of non-cash assets under the closing grant that will be transferred to and managed under the new grant.

105. **For closures due to PR change.** As the new grant is negotiated and signed with the new PR, the outgoing PR should submit the following routine reporting documents. The grant is administratively closed when the Global Fund has completed the review and approved the reports.

a. **Programmatic Progress Report:** The PR should submit programmatic progress report for the period from the last progress report to grant end date, no later than 60 days after the grant end date.

b. **Annual Financial Report (AFR):** The PR should submit AFR(s) covering the period from the last submitted AFR up to the grant end date, no later than 60 days after the grant end date.

c. **Audit Report:** The PR should submit audit report covering the audit of financial statement(s) up to the grant end date, as per the timeline agreed in the grant agreement.

d. **Financial Report for the Closure Period:** The PR should submit a financial report covering expenditures during the closure period.

106. **For closures due to transition from Global Fund financing.** During the 12 months following the grant end date, the PR should work to closing the grant including completing reporting requirements and returning all outstanding cash balances. The grant is administratively closed when the Global Fund has completed the review and approved the reports. The PR is required to submit the following routine reports:

a. **Programmatic Progress Report:** The PR should submit programmatic progress report for the period from the last progress report to grant end date, no later than 60 days after the grant end date.

b. **Annual Financial Report (AFR):** The PR should submit AFR(s) covering the period from the last submitted AFR up to the grant end date, no later than 60 days after the grant end date.

c. **Audit Report:** The PR should submit audit report covering the audit of financial statement(s) up to the grant end date, as per the timeline agreed in the grant agreement.

d. **Financial Report for the Closure Period:** The PR should submit a financial report covering expenditures during the closure period.

---

**MONITORING AND REPORTING**

---

520 Enhanced Financial Report (EFR) for existing grant that have not transitioned to the new funding model.
107. The use of the differentiated approach for closures will be monitored and reported to the EGMC by the Operational Support Team. Reports will be generated once a month for the first six months following the approval of this approach, and then on a quarterly basis thereafter.

108. The following information will be reported:
   a. Number of grant closures completed;
   b. Type of grant closure;
   c. Approach used (differentiated or full);
   d. Timeline from grant end date to date when grant is assigned “financially closed” and “administratively closed” status; and
   e. Amount returned to the Global Fund at grant closure.
Annex 2: Grant Closure Process:

### 25 March 2015
**Issue 2.6**
Revised:
- OPN on Pooled Procurement Mechanism
- OPN on Support Costs and Indirect Cost Recovery (ICR) Policy for Non-Governmental Organizations

### 15 December 2014
**Issue 2.5**
Added:
- OPN on Counterpart Financing
- OPN on M&E Systems Strengthening and Data Quality
- OPN on Signing and Amending Grant Agreements
- OPN on Grant Closure
Removed:
- OPN on Grant Renewals
- Non-National Entities as Principal Recipient

### 19 November 2014
**Issue 2.4**
Added:
- OPN on Grant-Making and Approval
Removed:
- OPN on Accessing Global Fund Financing
- OPN on Transition to Single Streams of Funding
- OPN on Implementing MOU with GLC
Revised:
- OPN on Extending Grant Implementation Periods
- OPN on Conditions and Management Actions
- OPN on Implementing the Quality Assurance Policies for Pharmaceutical, Diagnostics and Other Health Products
- OPN on Additional Safeguard Policy

### 14 October 2014
**Issue 2.3**
Removed:
- OPN on Continuity of Services

### 25 September 2014
**Issue 2.2**
Revised:
- OPN on Annual Funding Decisions and Disbursements

### 25 June 2014
**Issue 2.1**
Added:
- OPN on Pooled Procurement Mechanism
- OPN on Pre-Financing Grant Making and Start-Up Activities
- OPN on Supplier Misconduct
Removed:
- OPN on Voluntary Pooled Procurement
- OPN on Pre-allocation of Grant Funds to Principal Recipients
| 9 April 2014 | This is version 2.0 of the Operational Policy Manual. It is now organized by the grant lifecycle and streamlined to focus on operational policies that remain relevant under the new funding model as well as those policies that remain applicable to existing grants that have not yet transitioned. Information Notes and Guidance Documents have been removed and embedded in the relevant part of the Global Fund website. |
