Note to External Users

This Operational Policy Manual has been developed to assist Global Fund Secretariat staff in providing guidance on Global Fund policies and processes relating to grant management. The Operational Policy Notes (OPNs) contained in the Manual are based on policies approved by the Global Fund Board and operational procedures developed by the Secretariat.

The OPNs are updated, as necessary, to reflect changes in grant management policies and approaches. The Global Fund reserves the right to interpret the OPNs set out in the Operational Policy Manual.

Questions relating to their application to specific Global Fund-supported programs should be addressed to the relevant Fund Portfolio Managers.

Questions of a general nature that are not program-specific should be addressed to: operationalpolicy@theglobalfund.org.

3.1 [OPN on Implementation Period Reconciliation and Grant Closure (for 2014-2016 allocation period and thereafter)]
3.2 Operational Procedures on Implementation Period Reconciliation and Grant Closure (for 2014-2016 allocation period and thereafter)
3.3 [OPN on Grant Closure (for grants financed prior to the 2014-2016 allocation period)]
Introduction

The Operational Policy Manual describes how the Global Fund manages all activities at each step of the grant cycle from accessing funding through to grant closure. It captures both Board-approved policies as well as approaches to implementing those policies that have been endorsed at the Secretariat level.

For each step of the grant cycle, the Manual provides:

i. Relevant information and policies that are applicable; and

ii. A brief step-by-step process guide that summarizes important activities and those responsible.

As the Country Team is the primary mechanism to achieve effective and efficient oversight of the Global Fund grant portfolio, the OPM begins with guidance on how Country Teams should function and defines individual Country Team members’ responsibilities.
### Revised Portfolio Categorization Criteria: Approved by EGMC in May 2018

<table>

</tr>
</tbody>
</table>

* Multi-country covers combined country allocation cases (e.g., RAI, MER, MWIP) and regional grants financed from the Multi-country Modality (Catalytic Investments). Multi-country grants are managed by teams based on geographical location (e.g., High Impact department will manage ‘focused’ regional grants located in their regions applying the focused grant management approach).

- Multi-country Western Pacific
- Multi-country Caribbean

- Multi-country categorization only covers combined allocation multi-country programs. Regional grants funded from the 2020-2022 Multi-country Modality (Catalytic Investments) will be categorized following approval of allocation for each grant and based on the categorization criteria for multi-country portfolios. Exceptions to the categorization criteria to be approved by EGM.
- Countries eligible but not receiving 2020-2022 allocation not categorized.
- Cameroon and Malawi categorized as High Impact but located in AMO.

- Middle East Response
- Regional Artemisinin-resistance Initiative
An applicant submits a concept note to the Secretariat reflective of the indicative funding allocation (as determined by the Secretariat), its national strategy, and the outputs of an extensive multi-sectorial country dialogue process between the applicant, technical partners, donors (including the Secretariat) and civil-society organizations. Once the concept note is reviewed by the Secretariat and the TRP, the GAC determines an upper budget ceiling and the grant-making process begins.

The CT enters into negotiations with CCMs and their nominated PRs to develop disbursement-ready grants for submission to the Board approach through the GAC.
OVERALL OBJECTIVES

1. Funding requests that are designed well and are reviewed effectively help the Global Fund achieve maximum impact, in line with Global Fund’s 2017-2022 Strategy: Investing to End Epidemics (Global Fund Strategy)\(^1\) and efforts to strengthen impact in the 2020-2022 allocation period.

2. The Funding Request Design and Review process is guided by the Global Fund Framework Document, the Global Fund Strategy, the Sustainability, Transition and Co-Financing Policy, the Technical Review Panel’s (TRP) terms of reference, and the following core differentiation principles approved by the Board’s Strategy Committee:

---

a. **Differentiated level of independent review:** The TRP will engage in the independent assessment of all funding requests, but with a high degree of differentiation in scope and depth of the assessment².

b. **Country ownership:** The process for design and review of funding requests builds on national systems and strategies, domestic co-financing and engagement of in-country stakeholders, including key and vulnerable populations³, communities and civil society.

c. **Tailored process for funding request development and review:** The basis, scope and nature of the funding request design and review processes will (i) be evidence-informed, building on the challenges, results and impact of previous implementation periods; (ii) be tailored to the different contexts in which countries operate, including but not limited to evolving epidemiology, challenging operating environments, sustainability and transition considerations, multicountry approaches and fiduciary and programmatic risk and (iii) take into consideration national systems and national health strategy plans.

d. **Simplification and refocusing on implementation:** The process for design and review of funding requests should facilitate effective investment and use of Global Fund resources to achieve the highest impact in line with the Global Fund Strategy, recognizing the need to balance the time spent developing and reviewing funding requests versus the time spent implementing grants.

e. **Focused and timely program revision for greater impact:** The process for design and review of funding requests, including the TRP review, encourages and facilitates efforts to achieve greater strategic focus and impact through program revision throughout the grant lifecycle, as appropriate.

f. **Streamlining and refocusing on key information for decision making:** Documentation requirements are tailored to elicit essential information needed to facilitate effective review and decision-making with respect to funding requests, including consistency across the portfolio or categories of the portfolio, building on existing national and portfolio information.

**OPERATIONAL POLICY**

3. This Operational Policy Note (OPN) defines the rules and requirements for accessing the country allocation⁴ for the 2020-2022 allocation period onwards. For guidance on other sources of funding, please refer to Annex 1 and other relevant guidance.

---

² The TRP will assess funding requests with a differentiated lens instead of a standardized “one-size-fits-all” approach (for example, for programs in challenging operating environments, countries in transition, etc.)

³ As defined in the Global Fund Key Populations Action Plan 2014 – 2017

⁴ This includes applicants that will access funding through combined country allocations (e.g. MER, RAI, etc.).
I. Notify the Applicant on Allocation and Application Approach

4. The Global Fund’s Eligibility Policy sets forth eligibility criteria to determine which country components may qualify to receive an allocation from the Global Fund. The eligibility list is published on a yearly basis and is available on the Global Fund website.

5. Eligible applicants receiving an allocation will be notified through the allocation letter with the following information: i) allocation amount for eligible disease components; ii) type of applicant and approach to Country Coordinating Mechanisms’ (CCM) eligibility screening; iii) the application approach; iv) guidance on co-financing requirements and commitments; and v) other information relevant to the country/component. The Global Fund will also share any additional specific guidance to enable the applicant to proceed with the funding request development and submission. The main elements of the allocation letter are detailed below and in the Procedures on the Design and Review of Funding Requests:

Provide Guidance on Country Allocation

6. **Country Allocation.** This is the initial upper ceiling of funding made available by the Global Fund for each eligible country across all eligible disease components for the applicable allocation cycle, in line with the Allocation Methodology. This funding may be

---

* Eligibility to receive an allocation does not guarantee allocation or funding.
* The 2020 Eligibility List determines which country components are eligible for an allocation for the 2020-2022 allocation period.
* Such as allocation-related decisions or outcomes that have intended implications around use of funds (e.g. funding for continuation of essential services, or if countries are expected to be on a continued trajectory for significant reductions in allocations), and any other relevant information.
supplemented by other sources of funds (please see Annex 1), or may be reduced, for example, due to outstanding recoveries⁹ in extraordinary circumstances, or if co-financing commitments from the previous allocation period have not been met. Unused funding from the previous allocation period (e.g. undisbursed funds, in-country cash balances, cash balances at a procurement agent level), and any recovered funds relating to disbursements made with grant funds arising from the previous allocation period cannot increase a country allocation. Please see the Global Fund Guidelines for Grant Budgeting for further details.

7. **Timeframe to Access Allocation**¹⁰. For each country, the allocation for eligible components¹¹ can be accessed, jointly with other components or separately by each component, once per allocation period. The associated grant must be approved by the Board prior to the end of the allocation period (e.g., by 31 December 2022 for the 2020-2022 allocation period)¹². The implementation of grants should, generally, be aligned with country planning cycles, as appropriate. Applicants must consider the end date of their existing Allocation Utilization Period (AUP) and adequately plan for the submission of the funding request, registration for a TRP window, and subsequent grant-making timelines in order to complete the full process well ahead of the end of the AUP.

8. **Timeframe to Use Allocation.** The AUP is the period¹³ (usually three years) during which the country allocation per disease component can be utilized to implement a grant. For grants continuing to the next allocation period, the AUP starts the day after the existing grant(s) ends. Any extension to grants from the previous cycle will consume funds and time from the new AUP and reduce the remaining duration and funding for the next grant. If the AUP is shorter than what is communicated in the allocation letter, the allocation funding available for the new grant(s) related to the same disease component is adjusted proportionately.

---

⁹ Refer to the OPN on Recovery of Grant Funds (for Global Fund Secretariat internal use only).
¹⁰ Portions of the allocation may be used earlier than at the start of a new implementation period (for example through the extension of the previous implementation period or advance payments).
¹¹ Eligibility to receive an allocation does not guarantee allocation or funding.
¹³ Variations from the three-year standard period may be allowed for joint funding requests from Focused countries/applicants where start and end dates for the different grant components are misaligned, and in other circumstances on an exceptional basis. These will be communicated to concerned applicants through the allocation letter.
Define Type of Applicant and Eligibility Screening Approach

9. **Types of Applicants.** An applicant is the entity that requests financing from the Global Fund on behalf of a country or a group of countries. Applicants for Global Fund funding are:

   a. **Country Coordinating Mechanism (CCM).** This is a country-level public-private partnership whose role is, among others, to 1) coordinate the development of funding requests to the Global Fund for relevant program(s) based on priority needs at the national level and 2) oversee the implementation of program activities. CCMs must meet at minimum the [CCM Eligibility Requirements](#).

   b. **Non-Country Coordinating Mechanism (Non-CCM).** In exceptional situations, the CCM in a certain country may not be in the position to carry out its core functions or to fulfill the eligibility requirements. In these cases, a non-CCM applicant submits the funding request. For further details on such situations, see the [Country Coordinating Mechanism Policy Including Principles and Requirements](#).

   c. **Regional Coordinating Mechanism (RCM).** This is a multi-country regional-level public-private partnership whose role is, among others, to 1) coordinate the development of the funding request(s) to the Global Fund for relevant program(s) based on priority needs at the regional level and 2) oversee the implementation of program activities.

   d. **Regional Organization (RO).** This is an entity with independent legal personality that is not a United Nations agency or a multilateral or bilateral organization, which can demonstrate broad regional stakeholder consultation and involvement, including, but not limited to, the endorsement by each CCM of the countries included in the relevant Program, and whose role is, among others, to 1)
coordinate the development of the funding request(s) to the Global Fund for relevant program(s) based on priority needs at the regional level and 2) oversee the implementation of program activities.

10. **Differentiated Screening for CCM Eligibility Requirements 1 and 2.** There is a differentiated review of CCM eligibility requirements 1 and 2 (please refer to paragraph 23). Country components considered to have higher risk of non-compliance with regards to meeting CCM eligibility criteria would therefore require greater scrutiny and in-depth review. Others will undergo a light screening. The determination of the appropriate level of screening for compliance with eligibility requirements 1 and 2 is made by the Compliance Review Panel.

**Determine Funding Request and Review Approach**

11. **Differentiated Application and Review Approaches.** In order to accommodate the diverse portfolio needs with a view of a continuum from one allocation period to the next, there will be different types of funding request and review approaches during the 2020-2022 allocation period. Based on agreed differentiation triggers, the Grant Approvals Committee (GAC) will determine the most suitable type of funding request and corresponding review approach for each country component, which will be communicated to the applicant in the allocation letter. The types of application and review approaches are the following:

i. **Tailored Request and Review.** It is aimed at better accommodating for specific objective(s). It includes the following:

a. **Tailored for Transition:** Country components that: i) are receiving transition funding; or ii) are projected to move to high income; or iii) previously received transition funding and have become re-eligible and received an allocation; or iv) are using a transition workplan as the basis of their funding request; or v) are requested by the Global Fund to submit a tailored for transition funding request because of contextual considerations.

b. **Tailored for NSP:** Country components invited by the Global Fund to apply using their NSP as the primary application source. The invitation will be based on defined criteria that include, but are not restricted to, risk levels, country motivation to apply for funding using their NSP, alignment between country planning and Global Fund allocation cycles, etc.

c. **Tailored for Focused Portfolios:** Country components categorized as Focused as per the Global Fund differentiation framework, that are not selected to use the Tailored for NSP or Tailored for Transition approaches.

ii. **Program Continuation.** The program continuation approach focuses on continuing program implementation, including promotion of on-going program implementation.

---

15 Higher risk of non-compliance may be linked to reports provided by Country Teams, country stakeholders, CRG and/or CCM Hub, etc. indicating potential issues with regards to meeting CCM eligibility requirements (e.g. inclusiveness, lack of transparency in the selection of the Principal Recipient, conflict of interest issues, etc.) and therefore an in-depth scrutiny is recommended at the moment of the funding request submission.

16 Countries or components funded under an existing grant that become ineligible may receive funding for up to one additional allocation period following their change in eligibility (Transition Funding), as detailed in the Eligibility Policy.

17 Instances where the Global Fund may make such request are countries projected to become high income countries in the next few years, countries where the Global Fund determines that the country should account better for transition preparedness in their funding applications and other circumstances. See the Sustainability, Transition and Co-Financing Policy, GF/B35/04, and the Guidance on Transition, Sustainability and Co-Financing of Programs Supported by the Global Fund (STC Guidance).

18 Unlike in the previous funding cycle, Prioritized Above Allocation Request (PAAR) must be submitted at the same time as the Program Continuation request.
monitoring and evaluation activities, with the possibility of processing a program
revision as needed during grant implementation. Identified country components (based
on criteria to be determined by the GAC) can access the allocation through a streamlined
process for program continuation, which significantly reduces the level of effort by the
applicant, the Secretariat and the TRP during the application and review stage.

iii. **Full Request and Review.** This is aimed at comprehensive overall review of a
country’s investment approach and strategic priorities and applies to the following
country components:

a. High Impact and Core country components that are not eligible for Program
   Continuation.

b. High Impact and Core country components that are not invited to submit a
tailored for National Health and Disease-Specific Strategic Plan (NSP)
   application.

12. The applicant may propose to change the application and review approach based on the
outcome of in-country discussions. If the applicant decides to change the application
approach communicated in the allocation letter, this needs to be discussed and agreed with
the Global Fund Secretariat. The figure below provides the rules for changes to the
application and review approach:

![Image](image.png)

**II. Develop and Submit the Funding Request**

Following the receipt of the allocation letter, applicants start developing the funding request
to access their allocation. The funding request development process entails the following
elements:

**Continue Country Dialogue**

---

For multicountry applicants, the dialogue must take place at the regional level and involve stakeholders from countries included in the funding request.
13. An ongoing inclusive country dialogue process must form part of the grant lifecycle, from funding request development and throughout implementation. The findings and conclusions of this ongoing dialogue should be reflected in the submitted funding request. Prospective Principal Recipients are involved in the development of the funding request in order to ensure the resulting request can be implemented. It is also expected that meaningful community engagement is ensured throughout the grant lifecycle including during the differentiated funding request processes, grant-making and oversight of grant implementation. The Global Fund Secretariat shares with the applicant implementation issues that need to be addressed in the funding request, as well as relevant regional and country analysis with the aim of informing the country dialogue process to prioritize highest impact interventions based on epidemiological context and guidance from technical partners, and clarifying relevant policies and processes.

14. **Support to Country Dialogue:** Support to country dialogue in preparation for a funding request submission should be addressed at the country level with support from in-country technical partners and using existing CCM funding resources. In some cases, there are needs for additional technical support or advocacy during country dialogue processes. Where applicants cannot identify the needed technical support, they can liaise with the Global Fund Country Team to discuss possible options.

15. In qualifying cases where additional funding is needed to support a meaningful country dialogue and an inclusive funding request, the applicant and the Country Team may explore one of the below options:
   a. The Community, Rights and Gender Strategic Initiative to provide technical assistance to support the engagement of civil society, key populations, people living with or affected by the diseases, and women’s networks and organizations, independently or in partnership with the CCM.
   b. Reprogramming of savings from existing grants (OPN on Grant Revisions) to support country dialogue up to a maximum amount of US$ 150,000 (per component). Global Fund grant funds, however, cannot be used to cover the costs for a consultant or technical assistance to draft or write a funding request, as has always been the case for Global Fund financing.

**Decide on Program Split**

16. When applicable, and before the submission of the first funding request, the applicant must confirm or propose a revision to the program split communicated in the allocation letter. While doing so, the applicant must be mindful of the following:
   a. Applicants must confirm or propose their revised program split no later than at the time of submitting their first funding request by completing the Program Split Confirmation Template (shared with the allocation letter) and provide a strong

---

20 In countries faced by acute or protracted emergencies as well as refugee influx, relevant humanitarian partners should contribute to the country dialogue and share humanitarian needs and perspectives.
21 At least 15% of the CCM Funding Agreement amount has to be allocated to support constituency engagement for non-governmental sector activities, including civil society and key population groups, and to promote and improve the quality of stakeholder participation.
22 Civil society and community organizations interested in applying for technical cooperation under the community, rights and gender strategic initiative can contact CRGTA@theglobalfund.org for more information.
23 It is critical that countries invest in cross-cutting RSSH and community systems strengthening to improve health outcomes. The funding designated to cross-cutting RSSH interventions does not need to be documented in the program split unless a standalone RSSH funding request is planned.
24 Applicants receiving an allocation for only one disease component do not need to perform this step.
justification and supporting documentation for changes proposed to the original program split, as relevant.

b. The Secretariat will transparently communicate in the allocation letter where allocation-related decisions or outcomes have intended implications around use of funds through the qualitative adjustment process and closely monitor any changes to the program split for those components.

c. Where possible, the Country Team should be involved in the program split discussions to ensure a robust, inclusive process and a clear rationale underlying the CCM’s proposed program split.

d. The Global Fund Secretariat’s approval of the program split is mandatory and must be obtained before the TRP reviews the applicant’s first funding request. The review and approval processes follow the below rules:

<table>
<thead>
<tr>
<th>Program Split</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>Change to component’s allocation is &gt; than 15% and &gt; US$ 5 million</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, and TAP.</td>
</tr>
<tr>
<td>Allocation Team should also be consulted where such changes counter the intended direction of a component’s allocation under the allocation methodology.</td>
<td></td>
</tr>
<tr>
<td>Change moves component below the estimated cost of continuing essential services</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, TAP and Allocation Team.</td>
</tr>
<tr>
<td>Change impacts a qualitative adjustment to a component’s allocation that was intended for a specific use of funds</td>
<td>GMD, Head, based on Country Team’s discussion with RFM, DH, TAP and Allocation Team.</td>
</tr>
<tr>
<td>Any other change</td>
<td>FPM, based on Country Team’s discussion with RFM and DH.</td>
</tr>
</tbody>
</table>

17. Applicants have the flexibility to request a revision the program split multiple times and reallocate funds to other disease components or to a standalone RSSH funding request. Such revisions can be done during the funding request stage or during grant-making.

18. Revisions to the program split for a particular component are no longer possible after the grants for such component have been recommended for Board approval by the GAC. Unused allocation amounts from a disease component whose grants have undergone GAC recommendation can be reallocated to a different component with grants that have not yet been approved by GAC.

**Develop and Submit Funding Request**

19. At this stage, applicants develop their funding requests, ensuring they are strategically focused on the most impactful program areas and interventions by population and geography to maximize progress in ending the 3 epidemics and building (as relevant) Resilient and Sustainable Systems for Health (RSSH) with the available resources. When developing the funding request, applicants should be mindful of the below elements:

25 Countries requiring escalated review under this criteria will be identified by the Allocation Team and communicated to relevant Country Teams.
a. **Alignment with National Strategies.** The Global Fund will look for alignment to NSPs that provide the overall strategic direction for a country's health and disease specific programs over a defined period of time.

b. **Implementers.** At the funding request stage, based on an open and transparent process, the applicant must determine and nominate to the Global Fund the Principal Recipient(s) for the program(s)\(^26\)\(^27\). Based on the nomination, the Country Team must initiate the required capacity assessment for the nominated Principal Recipient, if applicable (see *OPN on Risk Management*). The applicant should also identify potential Sub-Recipients, as early as possible, to avoid delays in the implementation of the program. For more details, please refer to the *Guidelines on Implementers of Global Fund Grants*. If the program is continuing with the same Principal Recipient to the next allocation period, the implementation arrangements’ map must be submitted during the funding request stage, highlighting any changes. If the Principal Recipient is changing, then an implementation arrangements’ map can be submitted later, during the grant-making stage.

c. **Currency.** The funding request and the resulting grant may be denominated in either US dollars or Euros and must be fixed for the relevant grant implementation period. The currency is communicated in the allocation letter.

d. **Compliance with the Sustainability, Transition and Co-Financing Policy and Related Requirements.**

- **Focus of Application:** All funding requests and resulting grants must comply with the focus of application requirements. These are the requirements that govern how Global Fund financing can be used, and which interventions the applicant can request to be funded from the Global Fund. Application focus requirements are differentiated according to a country’s income classification. Please refer to the *STC Policy* for further information.
- **Co-Financing:** All funding requests and resulting grants must comply with the co-financing requirements set forth in the *STC Policy*. For detailed guidance on the co-financing requirements, please refer to the *STC Guidance Note, OPN on Co-Financing* and the allocation letter.
- **Transition Planning and Preparedness:** In line with the *STC Policy*, the Global Fund encourages all Upper-Middle-Income countries, regardless of their disease burden, and Upper Lower-Middle-Income countries with components that have moderate disease burden to proactively prepare for the transition from Global Fund financing and integrate transition considerations and strengthen transition preparedness through Global Fund funding requests. To support advanced planning, a list of country components projected to transition fully from Global Fund financing in the next three allocation cycles due to improvements in income classification and based on current eligibility criteria is published on a yearly basis. These projections are an additional resource for the Secretariat and countries to consider as part of overall sustainability and transition planning and preparedness.
- **Strengthening Sustainability:** The STC Policy emphasizes the importance of strengthening sustainability across the entire Global Fund portfolio. While specific activities and focus areas will vary and depend heavily on country context, the Global Fund encourages all countries to gradually strengthen the sustainability of Global Fund financed programs and interventions. More details are available in the *STC Guidance Note*.

\(^26\) The Global Fund recommends that the applicant implements dual track financing (DTF), i.e. nominate a Principal Recipient from both the government and non-government sectors for the implementation of the program.

\(^27\) Except in instances where a portfolio is managed under the *Additional Safeguard Policy* and the selection of the Principal Recipient is one of the safeguards invoked for the portfolio.
e. **Resilient and Sustainable Systems for Health.** Building resilient and sustainable systems for health (RSSH) is important to ensure people have access to effective and efficient services through well-functioning and responsive health and community systems. Strengthening systems for health is critical to attain universal health coverage, sustain gains, find efficiencies and accelerate the end of the epidemics. Applicants are strongly encouraged to discuss RSSH needs at the beginning of the country dialogue and develop a funding request that addresses common systems constraints faced by disease programs. They can present their RSSH request within a disease-specific funding request or as a standalone RSSH funding request. However, applicants are encouraged to include their entire RSSH request with the first funding request submitted to the Global Fund. When requesting funding for RSSH interventions (e.g. governance, health financing, health management systems, etc.) applicants should consider opportunities for integration across diseases and the broader health system, as integration attains more efficient and sustainable investments and enables the delivery of people-centered health services.

f. **Challenging Operating Environments.** The OPN on Challenging Operating Environments (COEs) provides the overall guidance on Global Fund adaptive engagement to ensure access to essential services and/or maximize coverage and impact in such contexts28, based on the principles of flexibility, partnerships and innovation29.

g. **Streamlining Grant Portfolios and Operations.** The Global Fund encourages applicants to streamline grant portfolios and operations and generate efficiencies and increase the impact of investments. This may include joint funding requests, including two or more components with a single Principal Recipient. This is particularly relevant in countries with smaller allocations, such as in Focused countries. In instances where there is a misalignment between grant start and end dates for two different components, specific guidance will be provided to the applicant in the allocation letter.

h. **Leveraging Joint Investments.** The Global Fund encourages investments through joint platforms to address high-priority areas at the country, or sub-regional levels. Such joint investments leverage the capabilities of development finance institutions with proven track-record, as well as additional funding to maximize the impact in the fight against the diseases and achieve universal health coverage, and health system sustainability. Joint investments are encouraged across the portfolios, and particularly in Focused portfolios to catalyze additional resources and achieve larger scale and more sustainable impact where the Global Fund’s investments are relatively small.

i. **Considering Payment for Results’ Models.** The Global Fund encourages differentiating grant management models, in order to simplify processes, improve results and reward good performers. This means 1) designing simplified grants, linked to impact and outcomes, rather than inputs, 2) enhancing country leadership in the response against the diseases to pave the way for smooth and successful transitions, and 3) ensuring more strategic engagement in support of national program priorities. Payment for results models can be considered in specific circumstances, across well-performing programs and implementers with robust and effective in-country systems. Such differentiated models30 must be discussed and agreed with the Global Fund Secretariat at the time of designing the funding request and cannot be implemented in the absence of a pre-approval. (Link to guidance is forthcoming).

28 GF/B35/DP09.
29 Portfolios facing acute or protracted emergencies may be considered for a pre-shaped application approach. This approach will be used in extreme cases only and will entail an active engagement between the Global Fund Secretariat and in-country partners to define the most effective way to achieve the strategic priority.
30 Applicants can contact their relevant Country Teams for additional information on the different Payment for Results models.
j. Lessons Learned, Evaluations, Results and Key Risks. The applicant is expected to consider lessons learned, challenges, results and impact achieved during the previous implementation period, including findings and recommendations of national program reviews and evaluations of program and data quality assessments, as well as impact assessments\(^{31}\). As part of the early stages of the funding request development, Country Teams will share and discuss with applicants key risks and capacity issues identified during the previous implementation period that impact or may impact the ability of implementers to achieve expected program goals, key objectives and results. The applicant must articulate in the funding request how they will build on the lessons learned and what strategic areas need to be strengthened. Drawing on these assessments, they will specify how each of the key risks, identified in the application, will be addressed (please refer to the [OPN on Risk Management](#)).

k. Progress on Issues Raised by TRP and GAC in the Previous Allocation Period. The applicant must consider key issues raised by the TRP and GAC during the previous allocation period if applicable and demonstrate how these issues have been addressed and/or will be addressed in the current allocation period.

l. Prioritized Above Allocation Request (PAAR). Applicants are required to submit the PAAR with the funding request. This is to ensure a comprehensive and meaningful review of the PAAR within the context of the funding request. However, before completing the PAAR, applicants must ensure that the most critical modules and interventions for their program are covered within the allocation amount. The TRP reviews the PAAR and determines which part of it constitutes Unfunded Quality Demand (UQD). These activities are included in a public UQD register for potential future funding from either the Global Fund (e.g. efficiencies from the grant or Portfolio Optimization), or external sources (e.g. private sector contributions, debt swap agreements, etc.). Throughout the implementation of the grant, the Secretariat may allow or request applicants to submit an updated PAAR for TRP review, if there is a realistic expectation of other sources of funds becoming available\(^{32}\).

20. Application Package. Applicants must ensure submitting all mandatory documents relevant for their application to be deemed complete and eligible for review by the TRP. The application package must be submitted within the deadline set for the applicable TRP review window and is comprised of the following:

<table>
<thead>
<tr>
<th>Document</th>
<th>Full Review</th>
<th>Tailored to NSP</th>
<th>Tailored to Transition</th>
<th>Tailored to Focused Portfolios</th>
<th>Program Continuation</th>
</tr>
</thead>
<tbody>
<tr>
<td>CCM Compliance Statement</td>

<td>•</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>Performance Framework</td>
<td></td>
<td>•</td>
<td>•</td>
<td>•</td>
<td></td>
</tr>
</tbody>
</table>

\(^{31}\) Findings and conclusions following any audits or investigations by the Office of the Inspector General of the Global Fund, should also be considered. For countries applying through the tailored transition approach, specific attention should be paid to the lessons learned related to sustainability gaps and challenges to the transition of Global Fund financed interventions to domestic sources of funding.

\(^{32}\) The applicant must reach out to the Country Team if they are considering submitting an update to PAAR. The Country Team will advise, following consultations within the Secretariat, whether to proceed or not.
*Grant-making documents can be downloaded by the Country Teams as soon as the funding request documents are submitted to the Global Fund. This is meant to help the Principal Recipient advance in completing the grant-making documents and avoid delays in signing.

### III. Review of Applicant’s CCM Eligibility and Funding Request

21. To ensure applications are complete and applicants are compliant with the CCM eligibility requirements, where relevant, and that funding requests are recommended for funding based on technical merit, the Global Fund Secretariat and TRP members will screen and review the applications for completeness, compliance with CCM eligibility requirements and technical soundness, respectively.

**Screen for Completeness and Consistency**

22. After the submission of the funding request, the Global Fund Secretariat performs completeness and consistency checks. The applicant has a limited window to provide

---

33 PAARs are required with the funding request.
34 Only for applicants who are requesting funding to cover Health Products and/or associated management costs.
35 Updated Implement Arrangements Map, only if the program is continuing with the same Principal Recipient to the next allocation period.
clarifications and missing information in response to clarification requests from the Secretariat.

Assess Compliance with the CCM Eligibility Requirements

23. When the applicant is a CCM or a RCM, the Global Fund Secretariat will assess the application to ensure compliance with the following CCM Eligibility Requirements:
   a. **Requirement 1:** The Global Fund requires all CCMs to:
      i. Coordinate the development of all funding requests through transparent and documented processes that engage a broad range of stakeholders, including CCM members and non-members, in the solicitation and the review of activities to be included in the funding request; and
      ii. Clearly document efforts to engage key populations in the development of funding requests.
   b. **Requirement 2:** The Global Fund requires all CCMs to:
      i. Nominate one or more Principal Recipient(s) at the time of submission of the funding request(s);
      ii. Document a transparent process for the nomination of all new and continuing Principal Recipient(s) based on clearly defined and objective criteria; and
      iii. Document the management of any conflicts of interest that may affect the Principal Recipient(s) nomination process.

24. **Non-CCM and RO Applications.** Applications submitted by Non-CCMs and ROs need to comply with the overall principle of inclusiveness, as appropriate, given the Country or multicountry context.

25. **Differentiated Screening of CCM Eligibility Requirements 1 and 2.** Upon receiving a funding request, the Secretariat conducts a screening for CCM Eligibility Requirements 1 and 2 in accordance with the screening approach communicated in the allocation letter.

26. Following the eligibility assessment, CCMs may be considered in one of the following categories:
   a. **Compliant:** This is in instances where the applicant fully complies with the eligibility requirements and relevant indicators.
   b. **Compliant with Issues:** This is in instances where some indicators are not fully met, but the applicant demonstrates credible intent to comply.
   c. **Indeterminate Compliant:** This is in instances where further information is required to make an assessment.
   d. **Non-Compliant:** This is in instances where most or all of the eligibility criteria indicators are not met.

27. Instances where the applicant is deemed, “Indeterminate Compliant” or “Non-Compliant” will be escalated to the Compliance Review Panel who will assess the findings and recommendations made by the A2F department and make a final decision, i.e.:
   a. whether the funding request will be shared with the TRP for review with specific recommendations to be met by the CCM at the time of grant making; or
   b. whether the funding request will be rejected and sent back to the applicant with clear recommendations on how to comply with the eligibility requirements before resubmitting at a subsequent TRP window.

---

36 Except in instances where a portfolio is managed under the Additional Safeguard Policy and the selection of the Principal Recipient is one of the safeguards invoked for the portfolio.

37 Please refer to the Country Coordinating Mechanism Policy Including Principles and Requirements.
TRP Review and Recommendation

28. **TRP Review.** In line with the criteria specified in their Terms of Reference, the TRP reviews38 the funding request received from the applicant and provides an independent assessment on the strategic focus, technical soundness and potential for impact of the proposed program to ensure the Global Fund’s investments are positioned for the highest impact in line with Global Fund Strategy.

29. Country Teams may provide additional contextual analysis or considerations to inform the TRP review. The Secretariat analysis will be captured in a differentiated Secretariat Briefing Note. This input is intended to be an upfront and objective presentation of the Secretariat’s analysis of the proposed investment and an overview of contextual information. It is not intended to influence the TRP’s independent review of the application.

30. The results of the TRP review are captured in the TRP Review and Recommendation Form which is used to communicate recommendations to the applicant, Secretariat, and the Board. The form also lists issues identified during the review of the funding request and provides corresponding actions.

31. The TRP may provide two (2) outcomes following their review of funding requests:
   a. **Proceed to grant-making.** Where the funding request is deemed technically sound and strategically focused, the TRP shall recommend to the Global Fund Secretariat and Board that the applicant proceeds to grant-making. The TRP may issue recommendations to the applicant to be cleared either by the TRP or the Secretariat during grant-making or during grant implementation. Funding requests that are “recommended for grant-making with issues to be cleared by the TRP,” go through the TRP clarifications process. The TRP clarifications process is an engagement between the TRP and the applicant, which allows the TRP to ensure that important technical concerns identified during the review of the funding request are addressed to the satisfaction of the TRP during grant-making or implementation.
   b. **Further iteration required.** The TRP decides that the funding request is not ready to advance to grant-making and requires further iteration before resubmission for another TRP review.

GAC Review

32. GAC Review during the funding request stage is conducted on an as-needed basis in line with the GAC review criteria and terms of reference39. It may be requested by a Country Team or the GAC Secretariat at any time after the TRP review. For some portfolios, a GAC discussion may be needed to:
   a. Provide strategic steer for critical management concerns for and during grant-making.
   b. Award funding additional to the allocations, such as matching funds from catalytic investments based on TRP recommendations; including taking investment decisions in line with priorities for portfolio optimization, private sector contributions and financing items on the UQD register.

---

38 In certain instances, the TRP may be engaged at an earlier stage of the process and before the submission of the application, to help shape the funding request. This may be particularly relevant in instances where innovative financing elements are being explored or joint investments with other financing institutions are sought.

39 Currently under revision. The OPN will be updated to reflect the revised GAC TORs, once approved, in line with efforts to strengthen impact in the next cycle of grants.
c. Revise or determine the upper ceiling for grant-making, as applicable, including recommending adjustments due to non-realization of government commitments in the previous allocation period.

33. GAC review following a TRP review should not prevent the start of grant-making unless the nature of the steer needed from GAC is integral to commencing grant negotiations.

34. **TRP and/or GAC Issues and Clarifications**: The applicant and the Country Team must ensure that required clarifications or actions are addressed and are fed into the grant-making process in line with the set timelines. At the end of the grant-making process, the Country Team must report to the GAC how TRP and/or GAC issues were addressed through the Final Grant Making Review Form. Please refer to the OPN on Grant Making and Signing (OPN and link forthcoming).
Annex 1. Sources of Funding

Subject to the eligibility criteria specific to each source of funding, applicants may receive funding from the following sources during the funding request design and submission:

a. **Funding for Country Allocations**: These funds are apportioned to countries in line with the Board-approved Eligibility Policy and Allocation Methodology\(^4^0\).

b. **Catalytic Investments**: The Board may approve a portion of resources in addition to country allocations in order to address issues which cannot be adequately addressed by the country allocations alone\(^4^1\):
   
   i. **Matching Funds**. These funds are available to selected countries to incentivize the investment of a country allocation in key strategic priorities. Matching funds will be communicated in the allocation letter and matching funds requests will be reviewed along with the allocation funding request. For more details refer to Instructions and Guidance for Matching Funds Applications.
   
   ii. **Multicountry Funding**. These funds are available to target a limited number of key, strategic multi-country priorities deemed critical to meet the aims of the Global Fund Strategy and not able to be addressed through country allocations alone. Catalytic funding for a multicountry approach may be the only source of funding for the program, or may be provided in addition to funding provided from the country allocations of constituent country components. Certain multicountry programs may also be comprised fully of the combined allocations of constituent country components\(^4^2\). In any case, close coordination between national programs and the implementation of multicountry initiatives must be demonstrated. For more details, please refer to Guidance on Multicountry Funding Applications.
   
   iii. **Strategic Initiatives**. These limited funds are available for centrally managed approaches for strategic areas that cannot be addressed through country allocations due to their cross-cutting, innovative or off-cycle nature, but are critical to ensure country allocations deliver against the Global Fund Strategy (e.g., the Emergency Fund, and funding to strengthen community and civil society engagement). These are not covered by this OPN.

c. **External Complementary Restricted Financial Contributions**: These include contributions by eligible Global Fund donors including corporations, foundations, High Net Worth Individuals and a limited number of authorized public mechanisms i.e. UNITAID and Debt2Health. This type of funding is restricted towards investments listed in the UQD Register, effectively resulting in additional or complementary amounts of funding to Board-approved grants. Please refer to the Policy on Restricted Financial Contributions and the procedures that guide how to access these types of funds once they have been secured.

Design and Review of Funding Requests  
(2020-2022 Allocation Period)

Issued on: 2 September 2019  
Approved by: Executive Grant Management Committee  
Process Owner: Access to Funding Department

Relevant Operational Policies and Guidance Documents:
- OPN on Design and Review of Funding Requests
- Country Coordinating Mechanism Policy Including Principles and Requirements
- Guidelines on Implementers of Global Fund Grants
- Guidelines for Grant Budgeting

1. This document provides procedural guidance on the different process steps that constitute an integral part of the design and review of funding requests for the 2020-2022 allocation period43.

2. Regardless of the applicable funding request and review approach, Country Teams should refer to the relevant section of the Operational Procedures below for guidance on the applicable process:

   I. Notify the Applicant on Allocation and Application Approach

   II. Develop and Submit the Funding Request

   III. Review the Applicant's Eligibility and Funding Request

43 Unless specified in these Procedures, capitalized terms are defined in the OPN on Design and Review of Funding Requests.
I. NOTIFY THE APPLICANT ON ALLOCATION AND APPLICATION MODALITY

44 Shared with the allocation letter.
45 Grant-making documents can be downloaded by the Country Teams as soon as the funding request documents are submitted to the Global Fund. This is meant to help the Principal Recipient advance in completing the grant-making documents and avoid delays in signing.
III. REVIEW THE APPLICANT’S ELIGIBILITY AND FUNDING REQUEST

5. **Process.** Funding requests submitted to the Global Fund are evaluated for technical merit and strategic focus by an independent group of experts, the TRP. The TRP assesses funding requests for strategic focus, technical soundness and potential for impact in accordance with the Global Fund strategy and guidance from the Board. To ensure the TRP has access to complete documentation prior to undertaking their review, and that applicants are compliant with the CCM eligibility requirements, where relevant, the Global Fund Secretariat undertakes a screening process prior to the TRP’s review.

46 Currently under revision. The procedures will be updated to reflect the revised GAC TORs, once approved, in line with efforts to strengthen impact in the next cycle of grants.
5. Notify the applicant on:
   • TRP recommendation and GAC steer (as relevant)
   • Guidance on grant making (as relevant)

   On average, 5 working days (English only) or 10 working days (for translation) from the receipt of the Final TRP and Recommendation Form from the TRP Leadership

   • Country Team

### MONITORING AND REPORTING

6. The design and review of funding request processes will be monitored by the Access to Funding Department.

7. The following data points will be monitored:

   a. Number of funding requests registered, submitted, reviewed, recommended for grant-making by review window and cumulatively;

   b. Application approaches used;

   c. Number of funding requests iterated;

   d. Amounts recommended for funding by the TRP from the allocation;

   e. Amounts requested and recommended by the TRP for catalytic matching funds and multicountry requests;

   f. Amounts requested for above allocation, and interventions and amounts recommended as UQD;

   g. Number of days from the submission of the funding request to notifying the applicant of the outcome (broken down as follows: number of days from submission to TRP review meeting, TRP review meeting to finalization of form, finalization of form to notifying the applicant);

   h. Number and types of issues raised by the TRP during their review; and

   i. TRP observations and lessons learned from the different review windows.
MAKE, APPROVE AND SIGN GRANTS
(2020-2022 Allocation Period)

Approved on: 18 March 2020
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions and Support Department

OVERALL OBJECTIVE

1. Grant-making is the process of translating the funding request, including recommendations from the Technical Review Panel\(^47\) (TRP) and the Grant Approvals Committee (GAC), as relevant, into quality grants\(^48\) that are (1) disbursement-ready for GAC recommendation and Board approval, and (2) implementation-ready at Implementation Period start date.

<table>
<thead>
<tr>
<th>Disbursement-ready</th>
<th>Disbursement readiness is achieved when:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>i. all grant documents(^49) required for GAC review are in their final form and agreed by the Global Fund Country Team (CT) and the Principal Recipient (PR);</td>
</tr>
<tr>
<td></td>
<td>ii. issues and strategic actions identified by the TRP that need to be addressed during the grant-making process have been addressed by the Country Coordinating Mechanism (CCM)(^50) to the satisfaction of the TRP and/or the Secretariat (where delegated);</td>
</tr>
<tr>
<td></td>
<td>iii. all critical issues that need to be addressed prior to release of first annual funding decision and disbursement are resolved;</td>
</tr>
<tr>
<td></td>
<td>iv. residual risks have been identified and prioritized, with actions and controls defined to mitigate each risks to an acceptable level.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Implementation-ready</th>
<th>Implementation readiness is achieved when: a disbursement-ready grant has been approved and signed, and the PR can begin implementing Program Activities(^51) immediately on the Implementation Period start date. This requires advance preparation, such as</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>i. early identification and contracting of PR human resources;</td>
</tr>
<tr>
<td></td>
<td>ii. early identification and contracting of Sub-recipients;</td>
</tr>
<tr>
<td></td>
<td>iii. early identification and contracting of Suppliers of health products and critical services(^52); and</td>
</tr>
<tr>
<td></td>
<td>iv. an agreed implementation work plan(^53) for year one of the Implementation Period.</td>
</tr>
</tbody>
</table>

\(^{47}\) Unless defined in this Operational Policy Note or the context otherwise requires, all capitalized terms used in this Operational Policy Note shall have the same meaning set out in the Global Fund Grant Regulations (2014).

\(^{48}\) A quality grant is defined as a grant positioned to effectively deliver its strategic objectives and achieve the targeted impact as reviewed by the Technical Review Panel (TRP) and as approved by the Global Fund Board.

\(^{49}\) As defined in Annex 1.

\(^{50}\) Throughout this OPN, references to CCM include any Regional Coordinating Mechanism (RCM), Regional Organization (RO) or other applicant, as applicable.

\(^{51}\) Excluding preparatory activities required to be undertaken prior to Implementation Period start date.

\(^{52}\) Where required, CTs ensure the early identification and contracting of fiscal or fiduciary agents.

\(^{53}\) The Global Fund does not have a prescribed template for the implementation work plan.
2. Disbursement readiness and implementation readiness facilitate (i) timely implementation of Program Activities from start date of the Implementation Period; (ii) continuity of programs across Implementation Periods, and (iii) high absorption of funds in the first year of implementation.

The grant-making diagram below identifies key steps of this process with indicative timelines:

**OPERATIONAL POLICY**

3. This Operational Policy Note (OPN) applies to grants financed under the 2020-2022 allocation period and thereafter. The OPN on Access to Funding, Grant Making and Approval issued on 4 December 2017 applies to grants financed prior to the 2020-2022 allocation period.

4. This OPN defines the differentiated rules and requirements for the grant-making stage for country and multi-country grants (any multi-country specific rules and requirements are listed in a dedicated section).

A. PLAN
5. Robust planning and preparation, incorporating lessons learned, are crucial to ensure timely grant-making.

**Accelerate Grant-making**

6. The Global Fund expects the CT, CCM, PR and Local Fund Agent (LFA) to exploit all available opportunities to accelerate the grant-making process by the most efficient means possible. A key element in accelerating grant-making and producing quality grants is a strong collaboration between the CCM and PR to develop detailed grant documents as early as possible during the funding request stage prior to submission to the TRP. Key documents to be developed at this stage are:
   i. Performance Framework;
   ii. Detailed and Summary Budget;
   iii. Health Product Management Template (HPMT); and
   iv. Implementation Arrangement Map.

7. Early work on grant-making will reduce the overall time from funding request to grant signing, and allow the PR and the CT additional time to ensure implementation readiness before the Implementation Period start date.

8. Early work on grant-making should be considered for all portfolios with specific grants strongly recommended by the Global Fund Secretariat to follow this approach. These grants (“accelerated grant-making cohort”) have demonstrated good programmatic\(^{54}\) and financial\(^{55}\) performance, with continuing PRs and no foreseen material\(^{56}\) programmatic changes for the new allocation period.

9. The defined cohort of grants will be subject to streamlined document requirements for GAC recommendation (see *Annex 1 of this OPN*) and, in most cases, will not receive TRP clarifications to be addressed during grant-making.

**Agree on Deliverables and Timelines**

10. The Global Fund CT, CCM, PR and LFA are required to plan early for the grant-making deliverables, key milestones (e.g., GAC recommendation) and timelines as part of the planning for the funding request. The grant-making project plan will also cover the time required to undertake preparation activities to ensure implementation readiness.

11. The grant-making project plan is to be agreed as early as possible and before the funding request is submitted for TRP review, to guide the grant-making process and ensure that the translation of the funding request into a disbursement-ready and implementation-ready grant occurs in a timely manner.

12. *Annex 1 to this OPN* provides an overview of the differentiated grant-making deliverables based on portfolio categorization and other considerations (e.g., multicountry grants, challenging operating environments, payment for results). The CT will apply differentiated requirements accordingly.

13. As part of the planning, the engagement and inputs from relevant in-country stakeholders, the Global Fund Secretariat teams and LFA must be defined. LFA services are tailored according to the assurance needs of the CT using relevant LFA tools and guidelines.

---

\(^{54}\) Demonstrated good grant performance (A1, A2, B1) during the 2017-2019 allocation period based on the most recent grant rating.

\(^{55}\) Good absorption scores and expenditure rates based on criteria used for Key Performance Indicator (KPI) reporting and the Qualitative Adjustment process.

\(^{56}\) As defined in the *OPN on Grant Revisions*, and confirmed by the Country Team with the Technical Advisors.
14. The grant-making diagram within this document provides the standard timeline for completion of each grant-making phase. CTs and PRs should use these timelines as guidance in their planning and negotiation. For all grants, signing of the Grant Confirmation by all parties should ideally occur two months before the Implementation Period start date to allow critical time for PRs to undertake preparatory measures to ensure implementation readiness.

**Confirm Resourcing**

15. For continuing grants, the CT and PR will determine if additional PR human resources are needed to support grant-making, noting that implementation of the existing grant and Implementation Period reconciliation activities will overlap. Should the PR require additional human resources to support grant-making, funds from the existing grants may be used subject to Global Fund approval and processed through a grant revision (see *OPN on Grant Revisions*). For new PRs or existing PRs implementing a grant in a different disease component, the CT and PR will determine if resources are required for PR capacity building and start-up activities and apply for advance payment accordingly. (See section on *Apply for Advance Payment* of this OPN).

**Complete Capacity Assessment (if applicable)**

16. A capacity assessment is required for:
   - i. all new PRs who have not previously implemented a grant for the disease component; and
   - ii. existing PRs who will be implementing new activities for which their capacity has not been previously assessed (e.g. a PR previously implemented LLIN campaigns and will now also implement case management activities).

17. Outside of the two mandatory situations described above, a Country Team may also conduct a capacity assessment for an existing PR if necessary to manage risks. The *OPN on Risk Management* provides the process for determining if a capacity assessment is required for a nominated PR.

18. Capacity Assessments are initiated immediately after the funding request is submitted to the TRP and completed prior to the receipt of TRP recommendations. Based on the capacity assessment and the recommendation of the Country Team, the Regional Manager/Department Head, will decide to accept or reject the nominated PR prior to proceeding to grant-making. In the event that a nominated PR is rejected, a request for the nomination of an alternative PR will be made to the relevant CCM and another capacity assessment will be conducted as required.

19. While the assessment of Sub-recipient (SR) capacities is a PR responsibility, the Global Fund reserves the right to undertake such capacity assessment in unique circumstances. (see *OPN on Additional Safeguards Policy*)

**Complete Grant Entity Data**

20. Grant Entity Data (formerly Master Data) includes data and information required to process grant documentation and disbursements. The successful execution of a grant is underpinned by the timely input of up-to-date Grant Entity Data for each PR, LFA, CCM, and third-party organization into the dedicated Global Fund Partner Portal. See *Master Data Guidance Notes*.

---

57 For High Impact Departments.
58 To be replaced by *OPN on Grant Entity Date (forthcoming)*
21. During grant-making, the following information will be provided to and validated by the Global Fund:

   i. **PR, CCM, LFA and/or Third-Party information**: containing critical entity information, including name, type and address of the organization and contact details.

   ii. **PR and/or Third-Party Banking Information**: containing the bank account details, including name, address, account holder name and routing requirements.

   iii. **PR, CCM, and LFA Signatory Information**: containing authorized Signatories for legally-binding agreements and disbursement requests and/or representative for notices (including name and job title), together with a certified specimen signature.

22. **Due diligence screening**. As part of the Grant Entity Data process, the Global Fund conducts a due diligence screening of key grant stakeholders against (a) international terrorism, and (b) sanctions lists. Signature of the Grant Confirmation cannot proceed until due diligence clearance is received from the Global Fund.

B. NEGOTIATE

23. During the negotiate phase all grant documents required prior to GAC review are completed and TRP clarifications due at grant-making are addressed, resulting in a finalized disbursement-ready grant for submission to GAC.

---

### Request GAC Steer or Decision (if applicable)

24. As indicated in the *OPN on Design and Review Funding Request*, CTs, GAC or partners may request a GAC review at any time after the TRP review based on certain pre-identified triggers, including but not limited to risk, need for strategic or operational steer, size of investment or strategic priorities. For some portfolios, a GAC discussion may be needed to:

   i. Provide strategic steer for critical management concerns for and during grant-making;

---

59 Certified Specimen Signature is provided on a template letter which is shared by the Country Team.
60 Technical and donor partners that participate in the GAC.
ii. Award funding additional to the allocations, such as matching funds from catalytic investments based on TRP recommendations; including taking investment decisions in line with priorities for portfolio optimization, private sector contributions and financing items on the unfunded quality demand (UQD) register; and

iii. Revise or determine the upper ceiling for grant-making, as applicable, including recommending adjustments due to non-realization of government commitments in the previous allocation period.

25. GAC steer following a TRP review should not prevent the start of grant-making unless the nature of the steer needed from GAC is integral to commencing negotiations.

Finalize Grant Documents

26. The development of grant documents starts during the funding request stage and continues into grant-making. The final grant documents are developed and reviewed by the PR, CT and LFA in an iterative manner to arrive to final grant documents that are:

i. accurate and clear to ensure quality and timely implementation, monitoring and reporting for the next Implementation Period;

ii. streamlined\(^{61}\), in that they respond to the need for detail without becoming overly complex and difficult to report against;

iii. aligned with the funding request that has been reviewed and recommended by the TRP (including required clarifications);

iv. aligned and consistent with one another (especially the key documents being the Performance Framework, Detailed and Summary Budget, Health Product Management Template and Grant Confirmation); and

v. compliant with relevant Global Fund policies, guidelines and templates as applicable.

27. Reinvesting efficiencies identified during grant-making. During the grant-making stage, CTs will work with PRs and LFAs, as applicable, to ensure resources are invested to maximize impact and achieve efficiency. Based on interventions recommended by the TRP for the UQD register, the PR will define specific activities and capture them in the Detailed Budget (see Instructions for Completing the Detailed Budget Template). Any efficiencies identified during grant-making can be reinvested to fund these UQD activities or in line with TRP recommendations. The reinvestment of foreign exchange savings during grant-making should be aligned with Guidelines on Grant Budgeting. The inclusion of new activities that constitute a material\(^{62}\) programmatic change to the TRP-recommended funding request will require re-submission for TRP review.

28. Under the Sustainability, Transition & Co-Financing (STC) policy, all countries are strongly encouraged to strengthen attention to sustainability in their national planning, programs and grant design. During grant-making, all CTs are required consider the major challenges and risk to sustainability and work with PRs to incorporate mitigating actions in grant design, such as grant requirements, management actions, and co-financing commitments, and or relevant technical assistance. Specifically, for all Upper Middle-Income Countries (UMIC) and Lower Middle-Income Countries (LMIC) with “Not High” disease burden, CTs will work with PRs to address sustainability and transition considerations and consider investing efficiencies identified during grant-making in activities designed to strengthen transition preparedness. For more information on the

\(^{61}\) CTs and PRs are expected to use flexibilities available to simplify grant documents such as budget and performance frameworks for focused portfolios.

\(^{62}\) As defined in the OPN on Grant Revisions to be determined by the CT and Technical Advisors.
Global Fund’s overall approach to STC, see *Sustainability, Transition and Co-Financing Guidance Note*.

**Address TRP Clarifications**

29. The CCM, PR and CT will collaborate to ensure that time-bound TRP clarifications, required to be addressed during grant-making, are completed and reflected in the final grant documents. The CT will report on status of completion (i.e., met, in progress, delayed, not started) to the GAC. Outstanding (i.e., all unmet) TRP clarifications (including clarifications to be addressed during implementation) are captured in the Integrated Risk Management Module and followed-up during grant implementation.

**Agree on Co-financing Commitments**

30. To achieve lasting impact, increased domestic financing of health and the three diseases is essential to meeting targets and goals included in national strategies. Global Fund co-financing requirements encourage progressive increases in overall health spending and gradual domestic uptake of key program costs, including those financed by the Global Fund. Specific co-financing commitments that help address strategic sustainability and/or transition challenges will be agreed between the Global Fund and the Grantee during grant-making. See *OPN on Co-Financing* for more details on these requirements.

**Identify Residual Risks and Mitigating Actions**

31. The initial risk assessment performed during the funding request stage is further developed during grant-making, based on a completed capacity assessment and known risks and gaps (as applicable), and review of grant documents. Risks and capacity gaps that are required to be addressed as part of the design of the grant and implementation arrangements must be reflected in the finalization of grant documents.

32. Key residual risks, capacity gaps and mitigating actions are required to be reported to the GAC. Depending on criticality, the Country Team will decide if mitigating actions will be captured (i) as legally-binding grant requirements in the Grant Confirmation to address a critical risk or issue related to program implementation, or (ii) as management actions to be communicated in a Notification Letter upon completion of grant-making, and monitored during implementation for other non-critical risks/issues.

**Agree on Audit Arrangements**

33. During grant-making and prior to signing the Grant Confirmation, the CT and PR agree on audit arrangements such as the type and scope of audit, overall approach to selection and approval of the auditor. The auditor should be selected within three months from grant signing. (see *Guidelines for Annual Audit of Global Fund Grants*).

**Ensure Implementation Readiness**

34. In addition to approval and signature of a disbursement-ready grant, the four principal criteria of implementation readiness are as follows:

i. **early identification and contracting of PR human resources.** The PR will define the staffing structure and identify /select PR staff with approved Terms of Reference (ToRs) and contracts. PR staff contracts can be signed immediately after Global Fund Board approval of the grant (subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014)\(^63\)). For PRs continuing to the next Implementation Period, this would entail updating already

---

\(^{63}\) As incorporated into the Framework Agreement with the Grantee.
existing ToRs and extending contracts of well-performing staff64 into the next Implementation Period. The Global Fund does not require a competitive re-selection of well-performing staff for each Implementation Period, provided the re-selection of staff is in compliance with the Global Fund Grant Regulations (2014) and other applicable laws and regulations.

ii. **early identification and contracting of SRs.** Based on the defined implementation arrangements, the PR will select the SRs with approved ToRs and contracts. Contracts can be signed immediately after the Global Fund Board approves the grant, subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014)65. The Global Fund does not require competitive re-selection of existing SR(s) if they have demonstrated good performance and there is no change in the programmatic areas of work in the new Implementation Period, and providing the re-selection of the SR is in compliance with the Global Fund Grant Regulations (2014) and other applicable laws and regulations.

iii. **early identification and contracting of Suppliers for health products and critical services**66. For grants requiring procurement of health products and critical services for the first year of implementation, the PR will initiate the procurement process immediately after TRP recommendation of the grant. Early procurement of health products requires approval by the Global Fund (see Annex 2 on Advance Payment Mechanism) and procurement may be done through the (i) Pooled Procurement Mechanism (see OPN on Pooled Procurement Mechanism), or (ii) the PR’s own procurement process, if the PR cannot register with PPM.

For PRs using PPM, it is expected that the PPM purchase requisition has been completed by the PR and approved by the Global Fund by the Implementation Period start date.

For PRs procuring through their own processes, it is expected that Suppliers are selected with approved ToRs and contracts. Contracts can be signed immediately after the Global Fund Board approves the grant, subject to applicable laws and regulations and in compliance with the Global Fund Grant Regulations (2014)67.

iv. **agreed implementation work plan for year one of the Implementation Period.** The CT and PR will agree on an implementation work plan, including fully defined implementation arrangements for the first year of implementation which details the planned activities, timelines and assigned responsibilities to deliver the agreed targets in the Performance Framework and in line with the Detailed Budget.

35. **The CT’s role in achieving implementation readiness.** PRs are primarily responsible for achieving implementation readiness at the Implementation Period start date. CTs have a crucial role in assisting PRs to achieve this objective. The CT will work with the PR to identify support mechanisms, as appropriate, depending on the PR type and its circumstances. (see Annex 2 on Advance Payment Mechanism).

**Apply for Advance Payment (if applicable)**

36. To support PRs in completing grant-making with minimal delay, certain expenditures may be financed prior to the signing of the Grant Confirmation, subject to the conditions detailed in Annex 2 on Advance Payment Mechanism. Advance payments are limited to

---

64 As determined by the Principal Recipient.
65 As incorporated into the Framework Agreement with the Grantee.
66 Such as fiscal/fiduciary agents
67 As incorporated into the Framework Agreement with the Grantee
two types of activities with unique eligibility requirements: (1) capacity building and start-up activities, and (2) health product procurement.

C. APPROVE

![Grant-Making Stage Diagram]

GAC Recommendation

37. The CT summarizes the outcomes of grant-making into the Grant-Making Final Review Form. On behalf of the CT, the Fund Portfolio Manager certifies that the final grant is disbursement-ready (as defined in the Overall Objectives section of this OPN) and confirms that all CT members, Risk Specialist\(^{68}\) and other relevant teams have reviewed and endorsed the grant documents based on their areas of responsibilities. Areas of disagreement among CT members and other teams will be resolved per the escalation procedure defined in the Country Team Approach. Any unresolved critical issues that impact the disbursement readiness of the grant are captured in the Grant-Making Final Review Form.

38. Prior to submission to GAC, the Regional Manager or Department Head\(^{69}\) reviews the outcomes of grant-making and confirms the disbursement-readiness of the grant. The Regional Finance Manager provides confirmation of the grant financial information and a pre-approval of the first annual funding decision for the grant provided this is processed within 30 days of signature of the Grant Confirmation.

39. The GAC will make the final determination of disbursement readiness in line with its Terms of Reference, which includes the responsibility to review grant targets as they relate to the Global Fund Strategy targets and the relevant co-financing commitments.

40. Based on its review, the GAC may (a) recommend the grant, if deemed disbursement-ready, for the Global Fund Board’s approval; (b) refer the proposed grant back to the CT for revision or adjustments in response to GAC comments and critical issues observed; or (c) refer the proposed grant back to the TRP if there are material\(^{70}\) programmatic changes to the TRP-recommended funding request as a result of grant-making. The GAC may also recommend further actions for follow-up during grant implementation.

---

\(^{68}\) Risk Specialist reviews only for core and high impact portfolios.  
\(^{69}\) For High Impact Departments  
\(^{70}\) Based on material programmatic changes defined in the OPN on Grant Revisions to be determined by CT and Technical Advisors.
41. **Update UQD Register.** Following GAC recommendation, the UQD Register must be updated by the CT to add activities arising from the prioritized above allocation request (PAAR), or remove activities that are funded using efficiencies, catalytic investments or portfolio optimization. This information will be updated as necessary throughout the grant-lifecycle.

**Global Fund Board Approval**

42. Board approval of disbursement-ready grants is requested via an electronic report in which the Global Fund Secretariat will present the scope of interventions and investments agreed by the Global Fund Secretariat for the grant. The Board approves the grants on a no-objection basis over a 10-working-day voting period.

43. For each grant, the Board approves funding for each country disease component, and its constituent grants.

**Plan for Implementation Reconciliation or Grant Closure**

44. In parallel with grant-making and approximately six months before the end-date of the current Implementation Period, the CT and the PR are required to also initiate the reconciliation of Implementation Period or closure process for expiring grants. See **OPN on Implementation Period Reconciliation and Grant Closure.**

**D. SIGN**

45. The signed Grant Confirmation is the legal instrument that, together with the Framework Agreement (where applicable), forms the basis of the contractual obligations between the Global Fund and the PR.

46. Following Board approval, a Grant Confirmation is signed for each grant. The Grant Confirmation is signed as soon as possible after Board approval. The document is signed by the PR (or Grantee) followed by acknowledgement of the CCM Chair or Vice-Chair and the Civil Society Representative. Once the signature and acknowledgements are received, the Global Fund will sign. Global Fund signature follows the Delegations of Signature Authority (as amended from time to time).
**E. GET READY**

47. Following signature of the Grant Confirmation, the PR and CT will continue to collaborate to ensure implementation readiness of the grant and process the first annual funding decision.

---

**Confirm Implementation Readiness**

48. Prior to Implementation Period start date, the CT will assess the overall status of implementation readiness of each grant. In the event that implementation readiness is not achieved, the CT and the PR will define time-bound mitigating actions for each grant to address the outstanding issues.

---

**Process First Annual Funding Decision and Disbursement**

49. Processing of the first annual funding decision and disbursement is completed after the Grant Confirmation is signed, taking into account the pre-approval by the Regional Finance Manager (prior to submission to GAC) for AFD processed within 30 days from Grant Confirmation signature. (see the OPN Annual Funding Decisions and Disbursements).

50. The first disbursement release is based on cash requirements in line with the approved budget.

---

**SPECIFIC MULTICOUNTRY CONSIDERATIONS**

51. Multicountry grants refer to (i) grants financed through combined country allocations (e.g. Multicountry Western Pacific and Multicountry Caribbean), and (ii) regional grants financed through the Catalytic Investments – Multicountry Modality. Multicountry grants generally follow the grant-making approach and requirements defined above with the following specific considerations.

52. For multicountry grants, reference to CCM includes engagement of the Regional Organization (if applicable), Regional Coordinating Mechanism (RCM) and CCM representatives of all countries included within the grant.
53. During planning, relevant stakeholder engagement will include all countries that form part of the grant application and also PRs of existing Global Fund grants in the countries. The tailoring of LFA services will take into account the legal and political considerations and logistics of cross-border implementation.

54. The capacity assessment for multicountry grants will assess, among others, (1) the legal capacity of the PR (and subsequently, any SR) to operate in all jurisdictions covered by the grant, and (2) the PR’s and any SR’s ability to effectively manage a grant across multiple jurisdictions.

55. For multicountry grants financed under the Multicountry Catalytic Investments, the updated Programmatic Table, the updated Funding Landscape Table and National M&E plan are not required as part of grant-making.

56. Required co-financing commitments for multicountry grants are defined in the *OPN on Co-Financing*. 
Annex 1. DIFFERENTIATED GRANT-MAKING REQUIREMENTS

The table below defines the differentiated grant-making requirements for each portfolio category (focused, core and high impact) for country and multicountry portfolios. Additional flexibilities for multicountry portfolios financed under the Multicountry Catalytic Investments, challenging operating environment (COE) portfolios and grants with payment for results (PfR) elements are also captured in the footnotes for the CT to consider when providing guidance to PRs.

**Due Date for Finalization: Implementation Period Start Date**

| Updated Implementation Readiness Checklist | Yes | Yes | Yes | Yes |
| Approved Staff ToRs and Contracting of Staff (except where applicable laws or regulations do not allow) | Yes | Yes | Yes | Yes |
| Approved ToRs and Contracting of SRs (except where applicable laws or regulations do not allow) | Yes | Yes | Yes | Yes |
| Approved ToRs and Contracts of Suppliers for health products and/or critical services (except where applicable laws or regulations do not allow); and/or Approved PPM purchase requisition for health products (if using PPM) | Yes | Yes | Yes | Yes |
| Agreed Implementation Workplan for Year 1 | Yes | Yes | Yes | Yes |

**Notes:**

1. For **focused portfolios**: (i) the Performance Frameworks is recommended to have limited number of indicators (e.g., 1-5 impact/outcome and 3-5 coverage indicators, approximately 6-8 in total) covering only the key program area/modules supported by the grant, and (ii) the Summary and Detailed Budget will use broad categories by intervention and cost-groupings unless instructed otherwise by the Country Team (see *Guidelines on Grant Budgeting*).

2. For **multicountry grants financed under the Catalytic Investments - Multicountry modality**, the Updated Programmatic Table, the Updated Funding Landscape Table and National Monitoring and Evaluation (M&E) plan are not required.

3. The **PfR modality** includes Results-based Financing (RBF) grants, Activity-based Contracts, Incentive Payments (see *Guidelines on Grant Budgeting*). (i) For RBF grants, the Performance Framework is recommended to have limited indicators (e.g., 1-5 indicators and/or workplan tracking measures); (ii) For all grants with a PfR element, the payment scheme for the PfR element is developed as part of the program design and is expected to be submitted with the Summary and Detailed Budget; (iii) For all grants with a PfR element, the Summary and Detailed Budget should be in accordance with the Guidelines on Budgeting; (iv) For RBF grants, the HPM Template is not required.

4. For **challenging operating environments**, the CT may request to have a Summary and Detailed Budget and HPM Template (if required) for 18 months with the budget for the remainder of the Implementation Period being displayed as a lump sum to be detailed further by month 15 of implementation. The Summary and Detailed Budget can be adjusted through an Implementation Letter (IL). Please refer to the *OPN on Challenging Operating Environment* on the process for requesting this flexibility.

5. Quality assurance of the Performance Frameworks: all Performance Frameworks must undergo an in-depth review at Grant-making using Performance Framework Quality Assurance approach and checklist.

6. These are internal Global Fund Secretariat documents.
Annex 2. ADVANCE PAYMENT MECHANISM

1. Advance payment refers to the approval and pre-financing of specific activities prior to signature of the Grant Confirmation. Approved advance payment activities are pre-financed either through:

   i. **advance by the PR or CCM.** The PR or CCM uses its own resources, which will be reimbursed from Grant Funds after the Grant Confirmation is signed; or
   
   ii. **advance by the Global Fund.** A transfer of funds by the Global Fund which will be deducted from Grant Funds after the Grant Confirmation is signed.

2. Advance payments are intended for use on an exceptional, last-resort basis only when the following criteria is met to the satisfaction of the relevant approval authority following review by the CT:

   i. the nominated PR meets the requirements for eligible Global Fund implementers and has been accepted by the Global Fund (based on capacity assessment, as applicable);
   
   ii. there is a high likelihood that the grant will be approved by the Global Fund Board, and the Grant Confirmation signed with the PR;
   
   iii. the request is for funding eligible activities (as described below);
   
   iv. if the advance payment request is rejected (a), in the case of eligible capacity-building and start-up activities, there is a high likelihood that there will be significant delays in completing grant-making and a risk of not achieving disbursement readiness and implementation readiness, and (b) in the case of eligible health product procurement, there is a risk of treatment disruption; and
   
   v. no other source of funding is available, including from partners, strategic initiatives or funding made available through grant revision\(^7\) of existing grants (in-country cash balances will be taken into consideration when assessing the availability of funding).

3. A PR may request advance payment after TRP recommendation to proceed to grant-making has been received, and is responsible for preparing and submitting the advance payment request and supporting documentation. No advance of funds by the Global Fund is permitted prior to approval of such request, nor will any expenditures incurred prior to such approval be reimbursed from Grant Funds.

4. Advance payments are limited to **two types of activities** with distinct eligibility requirements: (1) capacity building and start-up activities and (2) health product procurement:

<table>
<thead>
<tr>
<th>Category</th>
<th>Eligible PRs</th>
<th>Eligible Activities</th>
<th>Maximum Amount</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. PR Capacity Building and Start-Up Activities; to expedite grant-making to facilitate program start with minimal delay</td>
<td>Local PRs (governmental and non-governmental entities) which are first time implementers of a Global Fund grant for a particular</td>
<td>Project management set-up, e.g. remuneration of essential core staff PR training and technical support to address weaknesses</td>
<td>US$ 500,000</td>
<td>Up to US$ 200,000, approval by: Regional Manager/Department Head, and Regional Finance Manager Between US $200,000 and US $500,000, approval by:</td>
</tr>
</tbody>
</table>

\(^7\) In line with the **OPN on Grant Revisions.**
disease component in a specific portfolio and/or capacity gaps as identified during the capacity assessment

<table>
<thead>
<tr>
<th>Capacity Assessment of SRs</th>
<th>Head of Grant Management Division and Chief Financial Officer</th>
</tr>
</thead>
</table>

2. Early Procurement of Health Products: to initiate procurement of health products (e.g., time sensitive products such as bed nets) to ensure timely delivery and avert stock-outs

- PRs that cannot register to Pooled Procurement Mechanism due to national procurement restrictions.
- In the event of treatment disruption risks, International Organizations, whose regulations do not allow the advance of own funds for order placement.

Planned health product procurement for the first year based on approved Health Product Management Template

Equivalent to planned procurement order amount for the first year based on approved Health Product Management Template

Up to US$ 200,000, approval by: Regional Manager/Department Head, and Regional Finance Manager

Between US $200,000 and US $1,000,000, approval by: Head of Grant Management Division and Chief Financial Officer

Over US $1,000,000 approval by: Head of Grant Management Division and Chief Financial Officer, with notifications to GAC.

5. Following approval of the request for advance payment, Global Fund will issue a letter of commitment to the PR in accordance with the Global Fund Delegations of Signature Authority.

6. The PR is required to include the approved grant-making activities in the final grant budget. If advance payment utilizes the PR’s own resources, the funds will be reimbursed from Grant Funds following grant signing. The relevant expenditures will be reimbursed to the PR as part of the first annual funding decision, see OPN on Annual Funding Decisions and Disbursements.

7. If the Global Fund determines that a grant agreement will not be signed with the PR:
   
   i. any funds advanced by the PR will not be reimbursed by the Global Fund;
   
   ii. any funds advanced by the Global Fund will be deducted from the country’s disease allocation.

---

PRs that will undertake advance procurement through the Pooled Procurement Mechanism (PPM) must follow the approval process defined in the OPN on Pooled Procurement Mechanism.
8. These Operational Procedures provide guidance on process steps during grant-making and applies to grants financed during the 2020-2022 allocation period and onwards.

9. Whereas the Operational Policy Note (OPN) on Make, Approve and Sign Grants includes a dedicated section for multicountry grants, the specific considerations for multicountry grants within this Operational Procedures are contained within each grant-making phase, as relevant.

10. The grant-making steps are outlined in the following graph with indicative timelines:
Planning for grant-making is required to take place concurrently to the planning for the funding request, as soon as a country receives the allocation letter from the Global Fund.

During this phase, the Global Fund Secretariat, including the Country Team (CT), the Country Coordinating Mechanism\textsuperscript{73} (CCM), the Principal Recipient (PR), and the Local Fund Agent (LFA) collaborate in the following areas:

<table>

</tr>
<tr>
<td>6. Agree on Audit Arrangements</td>
<td>Secretariat, PR</td>
</tr>
<tr>
<td>7. Complete Grant Entity Data</td>
<td>PR, CCM, LFA, Secretariat</td>
</tr>
<tr>
<td>8. Ensure Implementation readiness</td>
<td>PR, Secretariat, LFA (if applicable)</td>
</tr>
<tr>
<td>9. Apply for Advance Payment (if applicable)</td>
<td>PR, Secretariat</td>
</tr>
</tbody>
</table>

1. Request for GAC Steer or Decision (If Applicable)

<table>
<thead>
<tr>
<th>Outputs</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td>GAC steer or decision (if applicable)</td>
<td>After receipt of TRP recommendation</td>
<td>Initiated by: CT or GAC Secretariat Guidance by: GAC</td>
</tr>
</tbody>
</table>
## 2. Finalize Grant Documents

<table>
<thead>
<tr>
<th>Outputs</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
</table>
| **Performance Framework for each grant** | Initiated at funding request stage; finalization pre-requisite for grant submission to GAC. | Review by:  
- LFA, if required  
- PHME Specialist verifies that the Performance Framework:  
  i. has appropriate indicators with required disaggregation categories<sup>78</sup>;  
  ii. is aligned with the TRP-recommended funding request; and  
  iii. the negotiated targets are aligned to the funding available for the National Strategic Plan<sup>79</sup>. |
| **Resources:**  
  - Guidance on Performance Framework Template | Quality Assurance<sup>80</sup> by: Monitoring & Evaluation and Country Analysis (MECA) Team | Approval by: FPM reviews overall completeness and quality and approves based on the above. |
| **Detailed and Summary Budget for each grant**<sup>81</sup> | Initiated at funding request; finalization pre-requisite for grant submission to GAC. | Review by:  
- LFA, if required  
- Finance Specialist verifies that the Detailed and Summary Budget are:  
  i. aligned with the Performance Framework, HPM Template. Verification against the Performance Framework and the HPM Template is based on a high-level analysis of the Summary Budget, and on a reconciliation of the total amount in the HPM Template;  
  ii. aligned with the Guidelines on Grant Budgeting and can be executed by the PR. |
| **Resources:**  
  - Guidelines on Grant Budgeting | - For focused portfolios, PST Specialist reviews based on the LFA review and on the list of budget triggers completed by the PR/LFA. | |

<sup>79</sup> In cases where NSP is outdated any other target that is agreed among the in-country stakeholders could be used.

<sup>80</sup> Quality assurance of the Performance Frameworks: all Performance Frameworks must undergo an in-depth review at grant-making using Performance Framework Quality assurance approach and checklist.

<sup>81</sup> As part of the TRP review of funding request, the TRP also review the Prioritized Above Allocation Request and recommended interventions to be registered as unfunded quality demand (UQD). During grant-making, as part of the development of the Detailed Budget, the PR will define detailed activities to implement the UQD interventions. These activities will be used as basis for re-investing identified efficiencies during grant-making, grant implementation or for portfolio optimization exercises.

</table>
| **First Annual Funding Decision (AFD) and Disbursement** | As soon as possible after complete signature of Grant Confirmation | Prepared by: FPM and Finance Specialist  
Approval by:  
- No additional approval required if first AFD processed within 30 days of Grant Confirmation signature.  
- per *OPN Annual Funding Decisions and Disbursements* |
ANNEX 1:

MONITORING AND REPORTING

35. The grant-making processes will be monitored by the Grant Portfolio Solutions and Support Department.

36. The following data points will be monitored:

- Process completion status for each grant-making step as per the OPN.
- Grant-making timelines:
  - time between funding request submission and TRP recommendations;
  - time between funding request submission and grant submission to GAC;
  - time between Global Fund signature of Grant Confirmation and Implementation Period start date;
  - time between Global Fund signature of Grant Confirmation and first Annual Funding Decision;
  - time between Purchase Order approval and the Implementation Period start date.
- Number and type of TRP clarifications required to be addressed during grant-making.
- Number and details of grants with continuing PRs having pending refund/recoveries from previous allocation periods.
- Types of PR (continuing PR or new PR).
- Full Sub-recipient names recorded in the Summary Budget
- First time right submission to GAC.
- Purchase Order initiation prior to GAC submission.
- Time between PO approval and IP start date.
- Number of grants approved for advance payment.
- Implementation readiness status prior to Implementation Period start date.
OVERALL OBJECTIVES

1. In April 2016, the Global Fund Board approved the Policy on Challenging Operating Environments (COEs) to provide overall guidance on future Global Fund engagement in such contexts\(^4\), based on the principles of flexibility, partnerships and innovation. COEs are critical to the Global Fund mission as they account for a third of the global disease burden and a third of Global Fund investments. However, COE portfolios often face heightened programmatic and implementation challenges. A differentiated approach is hence needed to increase the impact of Global Fund investments in COEs.

2. The objective of this Operational Policy Note (OPN) is to provide operational guidance including flexibilities for Country Teams to manage COE portfolios in an agile and timely manner, within the principles defined in the approved COE policy.

3. Flexibilities are not limited to those described in this OPN. Additional flexibilities to the Board or Secretariat policies may be granted through EGMC normal approval channels to ensure an adequate response in these environments, in accordance with Global Fund policies and processes.

4. Categorization as a COE does not automatically guarantee eligibility for a flexibility. Country Teams need to obtain EGMC approval for the package of portfolio management flexibilities proposed for each COE portfolio through a memo. COE portfolios that are categorized as “High Impact” under the Global Fund differentiation framework will be generally managed following the standard approach for High Impact portfolios as defined in relevant OPNs.

5. This OPN will continue to be updated based on lessons learned and best practices.

PRINCIPLES AND POLICIES

Principles

6. The approach for managing COE portfolios is guided by the following principles defined in the COE policy with the aim to maximize access to essential services and/or coverage:

- **Flexibility.** The grant management approach will be tailored to each COE context, with the types of flexibilities differing based on each situation. Flexibilities should increase impact through enhanced grant design, implementation, management and assurance. They should allow for greater responsiveness and timeliness of Global Fund investments, reduce administrative burden for implementing partners and Country Teams, and facilitate more effective service delivery to populations in need.

\(^4\) GF/B45/DP09.
• **Partnerships.** The Global Fund will optimize the types of partners in COEs to address implementation weaknesses and strengthen grant performance. Given that the Global Fund does not have in-country presence, operational collaboration with development, humanitarian, private sector and non-traditional partners are essential for impact especially in COEs.

• **Innovations.** New approaches will be encouraged throughout the grant cycle in order to maximize results in COEs.

### COE Classification

7. COEs refer to countries or unstable parts of countries or regions, characterized by weak governance, poor access to health services, limited capacity and fragility due to man-made or natural crises. COEs may be experiencing either acute or chronic instability which will be considered in tailoring the country approach (see Annex 1).

8. The Global Fund classifies COEs based on an external risk index (ERI). The ERI is a composite index that is derived by compiling data from 10 authoritative indices\(^\text{85}\) and is updated annually by the Risk Department.

9. The ERI categorization drives the classification of a portfolio under COEs. The list is based on the countries under the “very high risk” category of the ERI. Depending on emerging needs, ad-hoc adjustments can be made to the COE portfolios list, in line with the ERI updates and other contextual factors during the allocation period. For instance, countries facing an emergency situation can also be classified as a COE. An emergency is defined as an event or a series of events which has resulted in a critical threat to the health, safety, security or well-being of a large group of people. It can be the result of an armed conflict and coup-d’état, natural disasters, epidemics or famine, and often involves population displacement. Moreover, countries recovering from acute emergencies but continuing to face critical threats may, on a case-by-case basis, continue to be classified by the Secretariat as a COE.

10. The list of country portfolio classified as COE is determined for every allocation period and reviewed annually with the possibility to add countries based on updates to the ERI and emergency status by the Executive Grant Management Committee (EGMC). Once a country is categorized as COE, it will remain in the list for the corresponding allocation period.

11. The Operational Policy Hub in the Grant Management Division, working closely with the Risk Department and the Policy Hub, is responsible for defining the list of countries classified as COEs. Potential additions to the COE list can be triggered by the Country Team, the Operational Policy Hub or the Risk Department.

12. Annex 2 provides the existing list of COEs for the allocation period 2017-2019\(^\text{86}\).

---

\(^{85}\) The 10 indices used to establish the ERI are: The Fragile States Index (Fund for Peace); INFORM Index (Inter-Agency Standing Committee Task Team for Preparedness and Resilience); Global Peace Index (Institute for Economics and Peace); UN’s Safety & Security Index; Ease of Doing Business Index (World Bank); and five of the six World Bank Governance Indices (Voice and Accountability Index, Government Effectiveness Index, Regulatory Quality Index, Rule of Law Index; and Control of Corruption Index).

\(^{86}\) Annex 2 will be revised based on updates to the COE list.
PORTFOLIO ANALYSIS AND OPERATIONAL STRATEGY

Overall Management Approach

13. Given governance and capacity challenges in COEs, the overall engagement approach for a particular country will be determined by the Country Team, who will define an operational strategy for the portfolio that shall be tailored to achieving impact within the context and needs of the COE based on an analysis of the portfolio. The portfolio analysis and operational strategy will be reviewed by a Secretariat advisory committee and approved by EGMC, prior to its application.

14. Each Country Team managing a COE portfolio shall undertake a portfolio analysis to define a strategic approach for the portfolio management. The portfolio analysis and operational strategy will cover, to the extent possible, the following:
   • Country and epidemiological context;
   • Lessons learned from past implementation;
   • Portfolio risks and challenges;
   • Potential areas for Global Fund investment for the next allocation period (what is the impact that the country needs to achieve in a COE and how can the investment be best focused to achieve that?)
   • Potential activities that may not be achieved given the country context;
   • Proposed implementation arrangements;
   • Proposed policy flexibilities for the portfolio.

15. Ideally, the Country Team should prepare the portfolio analysis and operational strategy before the initiation of the country dialogue and funding request development process, namely if the Country Team is planning to access flexibilities at the country dialogue and funding request stages. In case the Country Team is not able to finalize the portfolio analysis and operational strategy within this timeline, an extension of the timeline may be considered on a case-by-case basis.

16. The portfolio analysis and operational strategy can serve as the Global Fund engagement and investment approach in a COE during the next allocation period. Changes to the EGMC-approved operational strategy will require EGMC approval again, if the changes are deemed material. Materiality will be determined by the Country Team, in consultation with the advisory committee.

DIFFERENTIATED APPROACH THROUGH GRANT LIFECYCLE

17. This section captures differentiated approaches and flexibilities that may be applied for COE portfolios depending on the context. As indicated in the section above, a Secretariat advisory committee will review and advise on the tailored approach, before submitting to EGMC for final approval. Additional flexibilities may be accessed at any point in time through the normal EGMC approval channels. Examples of such flexibilities are summarized below:

---

87 The advisory committee membership and ToRs will be defined soon.
ACCESS TO FUNDING AND GRANT MAKING

18. **Sources of Funding.** Global Fund financing for COEs is provided through country allocations. Under exceptional circumstances, funding may be provided to COEs through the Emergency Fund.

19. **Eligibility for Allocation.** To be able to access an allocation, a country should be eligible to receive Global Fund financing as defined in the Global Fund Eligibility Policy. Country components with existing grants that would otherwise be ineligible to receive an allocation and apply for funding under the Eligibility Policy due to either disease burden or income level, will be eligible to continue to receive an allocation as long as their country remains classified as a COE. The application of this flexibility to a particular COE should be requested by the relevant Country Team and approved by the EGMC, prior to the country allocation exercise which is undertaken every three (3) years.

20. **Use of the Allocation.** In situations of significant cross-border displacement, the funding allocated by the Global Fund to a host country can be used to cover services and access to medicines and health commodities for the populations seeking refuge in the host country, in addition to providing services for the host population. The funding allocation from the country of origin may also be used for services in the relevant country hosting displaced populations from the country of origin, including where the host country is not eligible for Global Fund financing, taking into account whether:

- The host country lacks the capacity and resources to deliver the necessary services through their national health systems; and
- The provision of services for populations remaining in the country of origin continue, wherever possible.

The use of a country’s allocation for supporting displaced populations in a host country is determined on a case-by-case basis by the EGMC.

21. **Country Dialogue.** The manner in which country dialogue is conducted may be differentiated in COEs, including how to engage relevant stakeholders appropriately given the context. The country should, however, ensure the principle of striving for partner and stakeholder engagement is achieved as optimally as possible within the prevailing context.

22. **CCM and Non-CCM Arrangements.** Country Coordinating Mechanisms (CCMs) are central to the Global Fund’s commitment to country ownership and participatory decision-making processes. Where possible, this multi-stakeholder partnership at the country level should be the main body to develop and submit grant proposals to the Global Fund based on priority needs and oversee the progress during implementation.

23. COE Countries that historically applied through CCMs that wish to continue doing so, may benefit from a lighter review of compliance with the CCM requirements provided they have a track record of compliance with these requirements, as demonstrated by previous Eligibility and Performance Assessment (EPA) results. As such, those CCMs may submit simplified supporting documentation to confirm compliance with CCM requirements. The CCM EPA conducted on an annual basis to determine the level of functionality of a CCM may also be tailored to the context to focus on self-assessment and light review (see CCM Eligibility and Performance Assessment Guidelines).

24. The Global Fund Framework document states that the Global Fund will consider proposals arising from partnerships in circumstances such as (i) where there is no legitimate

---

88 As noted in the COE Policy, the Emergency Fund is expected to be used for funding beyond COE country allocations to support activities that cannot be funded through the reprogramming of existing grants during emergency situations. In such circumstances, Country Teams will consider charging back to a grant funded by the country allocation to replenish the Emergency Fund.
government; (ii) where there is conflict, or natural disasters; (iii) countries that suppress or have not established partnership with civil society and non-government organizations.

25. In exceptional circumstances, alternative governance arrangements will be coordinated by the Global Fund, on a case-by-case basis, depending on the context of the COE and may include partner coordination mechanisms such as health clusters or use of one integrated regional grant management platform.

26. **Application Channel.** In accessing the allocation, COEs will be subject to any of the following application channels:

<table>
<thead>
<tr>
<th>Program Continuation</th>
<th>Components with no material change needed or with less than 2 years of implementation under an existing grant (High Impact country components may be considered on a case-by-case basis).</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tailored Review</td>
<td>Components involving material changes, in line with the OPN on Grant Revisions</td>
</tr>
<tr>
<td>Full Review</td>
<td>Components in COEs categorized as High Impact</td>
</tr>
</tbody>
</table>

Each application channel follows a distinct process with its specific set of application materials. The Grant Approvals Committee (GAC) and the TRP decides on the application track for each of the disease component. For further details on these processes, please refer to the **OPN on Access to Funding and Grant Making**.

In its review of funding requests from COEs, the Technical Review Panel (TRP) will tailor their standard review criteria on a case-by-case basis, by applying considerations and flexibilities as appropriate to the specific COE context.

27. **Funding Request and Program Designs**
   a. Funding requests to use the allocation shall be based on the country’s National Strategic Plan or Health Recovery Plan, if available and updated, capturing the most current context and epidemiology of the COE.

   b. Global Fund investments in COEs aim to increase coverage of HIV, TB and malaria preventive and therapeutic services, to reach key and vulnerable populations, and maximize efficiency in existing country partnerships. Investments in COEs also aim to build resilience through stronger community and health systems; and to address gender-related and human rights barriers to services. During emergencies, the scope of Global Fund investments may be more limited, aiming to provide continuity of essential treatment and prevention services for people affected by the three diseases, as well as to help identify, prevent and contain outbreaks. During recovery, the scope of Global Fund investments may be more expansive and support countries rebuild health and community systems. For additional information on focusing and tailoring investments in COEs, please refer to the Guidance Notes on HIV, Tuberculosis, Malaria and Resilient and Sustainable Systems for Health (RSSH) in COEs (links forthcoming).

   c. Global Fund investments shall be tailored to the specific context, with flexibility to rapidly respond to the changing environments. As part of their funding request, COE portfolios, in countries facing crisis and emergencies, may indicate their emergency preparedness plans, if available, i.e., define the minimum or altered scope that will be implemented if circumstances deteriorate, including the triggers for shifting to an emergency plan. Where such plans do not exist, Country Teams will work with in-country stakeholders and partners in COE portfolios to identify potential suitable

---

89 This was the approach followed for the Middle East Regional Grant.
90 In line with the OPN on Grant Revisions – Link forthcoming.
options to implement the grants when situations escalate, namely in acute emergency and volatile settings.

**d.** Where there are weak capacities in program management, the program should be simplified to ensure operational feasibility. Country Teams may also explore innovative program designs and grant management approaches such as:

- Consolidating three disease components into one grant for synergy and operational efficiency, if the Principal Recipient has a relatively strong capacity to manage and coordinate activities across multiple components;
- Payment for results where data quality is sufficient and routine results monitoring and verification are possible;
- Direct payment from the Global Fund to identified service providers as part of a payment for results contractual framework;
- Participating in pooled funding with other donors if this ensures a more coordinated and synergistic response and reduces transaction costs, provided adequate measures are in place to ensure appropriate access and audit rights are maintained, including attribution and traceability of Global Fund funding.

### 28. Implementation Arrangements

**a.** In COE countries managed under the Additional Safeguard Policy (ASP), the Global Fund may directly appoint the Principal Recipient and/or Sub-Recipients and/or Service Providers which are best placed to implement the grant given the country circumstances. During implementation, Country Teams will continue to adjust implementation arrangements as necessary to address operational bottlenecks, including changing the Principal Recipient, or recommending the Principal Recipient to discontinue working with one or more Sub-Recipients, if their performance was deemed unsatisfactory. For COE countries that are managed under ASP, Country Teams may consider one of the organizations pre-qualified under the Emergency Fund following a competitive tender process.

**b.** To address weaknesses in project implementation capacities in COEs, service contract arrangements may be applied to support and build capacity of implementers in project, financial, procurement and supply chain management. This includes the flexibility for Country Teams to appoint a combination of fiscal, fiduciary or procurement agents for specific programs, as required. Such arrangements will not only ensure achievement of project objectives but also build the capacity of implementers.

### 29. Co-Financing Requirement

COEs may be exempt from meeting the co-financing requirement. Such an exception may be granted if the country experiences a protracted emergency, or in situations where a transitional government is in place, and where partners and/or the government shared with the Global Fund an official and substantiated communication confirming the country’s inability to meet the co-financing requirement. Exceptions to the co-financing requirement are approved by the Head of Grant Management Division.

### 30. Grant Documents

**a.** **Performance Framework.** The Performance Framework for COE portfolios may be tailored to the context and simplified (i.e., include a limited number of indicators, in line with the Performance Framework simplification guidelines for the Focused portfolios or work plan tracking measures). Indicators and targets should be realistic in acute emergencies with volatile and rapidly changing context, and more ambitious in chronic instability situations. Country Teams should work closely with their Public Health and Monitoring and Evaluation (PHME) Specialists, the Monitoring, Evaluation and Country Analysis (MECA) Team and selected implementers to
determine the indicators and targets to be included in the Performance Framework given the context.

b. **Monitoring and Evaluation (M&E) Plan.** In acute emergencies and unstable contexts, the M&E plan and any subsequent updates should focus on critical components such as: 1) the indicators, data collection methods and reporting; 2) the identified needs for strengthening capacity and Strategic Information, where possible as part of health systems strengthening; and 3) analysis of available data and possible surveys, studies and assessments to further generate data to improve situational awareness and programs.

In acute emergencies and unstable contexts, the M&E plan and any subsequent updates should focus on critical components such as: 1) the indicators, data collection methods and reporting; 2) the identified needs for strengthening capacity and Strategic Information, where possible as part of health systems strengthening; and 3) analysis of available data and possible surveys, studies and assessments to further generate data to improve situational awareness and programs.

**Budget.** In COEs, and as part of the differentiated approach provided for in the **Guidelines for Grant Budgeting** for low value grants (below US$ 15 million), implementers are authorized and strongly encouraged to budget and report using the broad categories by interventions and cost groupings.

In some instances, where the context is volatile and long-term planning is difficult, COE implementers shall be allowed to submit a budget, with quarterly details only for the first 18 months (i.e. 12 months execution period and 6 months of buffer period to allow for the processing of the first Annual Funding Decision) and annual budget for the remaining periods. The quarterly budgeting breakdown for the remaining period will be submitted with the PU/DR and finalized when processing the next Annual Funding Decision. An Implementation Letter (IL) will then be signed to detail the budget for the remaining periods upon agreement.

d. **List of Health Products, Quantities and Related Costs.** Where appropriate, COE implementers shall provide detailed information on the health products to be procured on a quarterly basis through the Global Fund financing for a period of 18 months only and annual estimate for the rest of the implementation period. The subsequent quarterly forecasting can be finalized through the annual updating of the procurement forecast. This is a good practice to ensure the forecast is adjusted to correspond to the changing situation and the most updated circumstances in-country.

**GRANT IMPLEMENTATION**

31. COEs will generally follow the defined grant implementation approach for the portfolio category that they fall under in the differentiation framework (focused, core and high impact). The Overview of Grant Implementation provides a summary of the grant implementation approach that is applicable for each portfolio category. Flexibilities outside of the defined grant implementation approach may be applied for COEs.

32. **Reporting**

a. A semi-annual progress report will be generally applicable only to COEs in Core and High Impact portfolios using the Global Fund Progress Update template. Recognizing capacity challenges in data collection and reporting in COEs, the due date of semi-annual reporting will be 60 days after reporting period, instead of the usual 45 days.

b. In emergency situations, the Country Team may decide to focus reporting on selected indicators that are relevant for tracking. This will be determined in consultation with the MECA Team. In such case, the remaining indicators will be deactivated for the relevant period, hence not affecting the grant rating. Such revisions will be documented through amending the Grant Agreement.
c. In case of pooled funding with other donors, reporting and annual funding decision timelines should align with the defined reporting and reviews for the program agreed among donors.

d. In compelling circumstances, the Global Fund may at its own discretion accept alternative, suitable and appropriate financial and programmatic reporting for the purposes of assessing progress where it is impossible for the implementer to submit the standard Global Fund reports. Such alternative reports may include available reports from another project, program or development partner with relevant information that the Global Fund can use to assess the progress of its programs.

33. **Monitoring and Evaluation**
   a. Monitoring and evaluation arrangements should be tailored to best enable impact. Programmatic assurance providers could be expanded outside of the traditional service providers especially when there is poor accessibility to certain areas. The Country Team should consider alternative service provider approaches when Local Fund Agents do not have access to certain service sites in some geographic regions. For example, the Country Team may plan for grant budgets to remunerate service providers for M&E verification and assurance work.

   b. COEs shall follow the approach for program and data quality assurance as defined in the *OPN on Program and Data Quality*. The OPN allows for customization to the country context to best respond to the situation and the identified program and data quality risks in the country. For example, in acute situations, Country Teams may opt for spot checks whenever the access permits. Other possibilities may include triangulation of different data sources and real-time data from partners on the ground, where possible, to verify the program quality, instead of using LFA/service providers reviews in such settings.

34. **Procurement and Supply Chain Management**
   a. The Country Team should conduct a thorough assessment of the Principal Recipient’s procurement capacity. Principal Recipients deemed to have weak capacities in procurement may be registered to the Pooled Procurement Mechanism (PPM), or use a recognized procurement agent.

   b. In areas of difficult access or where supply chain management and governance are poor, Country Teams may opt for contracting established supply chain management agents or services acceptable to the Global Fund, such as humanitarian agencies to manage the transfer of goods and commodities financed with grant funds until they reach the target populations.

35. **Financial Management**
   a. Where the Principal Recipient systems are weak, the Country Team may outsource financial management, in its entirety, to fiscal agents (i.e. private consultancy and accounting firms), or use fiscal/payment agents to monitor payments. In such cases, the Country Team should ensure to include in the grants’ budget a provision to strengthen the Principal Recipient’s financial management capacity.

   a. On an annual basis, and in accordance with the Grant Agreement, the transactions and balances of Principal Recipients and Sub-Recipients have to be audited, as well as at the closure of the grant. Depending on the context and the Principal Recipient, the auditor may have up to six (6) months after the end of the reporting period to submit the audit report, instead of the usual three (3) months.
36. **Grant Revisions**

a. Grants implemented in COEs experiencing high volatility and rapidly changing environments require regular revision to the approved grants to quickly address the changing situation. In such cases, all COE portfolios, including in Focused countries, will be allowed to submit programmatic revision requests any time during the grant implementation, if warranted by the program context. The OPN on Grant Revisions (*Link Forthcoming*) has several built-in flexibilities to support regular programmatic revisions for COEs.

b. Adjustments that are purely budgetary and that do not affect the performance framework are governed by the Global Fund’s *Guidelines for Grant Budgeting*, and shall follow the approval process defined for the relevant thresholds.

c. In some acute emergency situations where one Principal Recipient in a certain country is not absorbing funding, the Country Team may authorize shifting activities and budgets from one Principal Recipient to another for the same approved application with the approval of the Regional Manager or Department Head (please see OPN on Grant Revisions – *Link Forthcoming*).

d. Where an emergency preparedness plan was included and approved as part of the funding request, the program may shift to the emergency plan when the triggers are met. This shift will be approved by the Department Head and will not require a review by the TRP. If the emergency plan changes materially, as determined by the Country Team in consultation with the advisory committee, by the time it is triggered or if the plan was not initially reviewed by the TRP at the time of the funding request, TRP review will be required.

### RISK MANAGEMENT APPROACH FOR COEs

37. Risk management should be informed by the Board, Strategy, Investment and Impact Committee (SIIC)* and TERG conclusions** that “among the multiple risks, the main risk for the Global Fund in fragile states is operational: the risk of not achieving its mission, due to not reaching key affected populations with priority services and thus not achieving impact in the three diseases.”

38. Risk analysis for COEs shall be conducted through the portfolio analysis and operational strategy discussed above. Portfolio risks will be captured in a Key Risk Matrix which will clearly define the key risks preventing achievement of impact, as well as the controls and risk mitigation measures to help address and overcome those risks.

39. On an annual basis, or whenever the context changes, the Country Team will update the Key Risk Matrix and assurance plan and present an update to a Secretariat advisory committee. Updates to the portfolio risk profile that result in significant changes to the operational strategy and the program’s implementation modalities should be presented to a Secretariat advisory committee.

### PARTNERSHIP AND TECHNICAL SUPPORT

40. Partnerships are central to an effective engagement in COEs. As part of the portfolio analysis and operational strategy, Country Team should undertake a mapping of existing in-country partners. This mapping exercise will facilitate Country Teams work in further defining how these partnerships could be leveraged to strengthen in-country governance,

---

* SIIC paper on COEs from June 2015.
** TERG Position Paper on fragile states presented to the SIIC in June 2014.
enhance service delivery and improve technical assistance, to increase the effectiveness and efficiency of the grants implementation.

41. **Strengthening in-country governance.** Country Team should leverage existing in country coordination and partnerships mechanisms whenever possible, including meaningful engagement of national key stakeholders and communities in decision making and oversight. Linkages with health, logistics, protection, gender-based violence and other clusters/sectors, where applicable, should be made both at national and global levels to improve coordination and foster integrated approaches during emergencies.

42. **Enhancing service delivery.** To enhance service delivery, the Country Team will work closely with national stakeholders and relevant partners to ensure coordination and harmonization of the suggested interventions and implementation approaches. Country Teams should explore the involvement of non-traditional implementation partners such as civil society organization and communities and the private sector, particularly in settings where public health services are primarily provided by the informal sector.

43. **Improving technical assistance.** Country Teams will collaborate with academic institutions, technical partners, civil society organizations, and other relevant actors with expertise in COEs to provide medium to long-term support and capacity building for COEs such as project management, monitoring and evaluation, data collection and reporting, financial management and supply chain management. Country Teams should also link with existing rosters of COEs specialists which can be mobilized to provide short term technical assistance to implementers. Capacity building initiatives may be supported through the Global Fund grants and partners’ support and commitment shall be formalized at the approval of the grant.

**ROLES AND RESPONSIBILITIES**

44. **Oversight.** Within the Secretariat, the EGMC oversees the implementation of the differentiated approach for COEs, including the flexibilities for each COE.

45. **Secretariat advisory committee.** This committee will review the portfolio analysis and operational strategies submitted by Country Teams, advise on best approaches before the tailored strategies and flexibilities are submitted to EGMC for approval. It will be open to relevant external humanitarian partners on ad-hoc basis.

46. **Country Teams.** Led by the Fund Portfolio Manager, the Country Team is primarily responsible for defining and implementing a tailored operational strategy for each COE portfolio they manage.

47. **Support to COEs.** Several teams within the Secretariat provide support to Country Teams in managing COE portfolios:

<table>
<thead>
<tr>
<th>COE Support Team</th>
<th>- Support Country Teams in accessing proposed flexibilities</th>

Annex 3. Tailoring LFA/Assurance Services in Challenging Operating Environments

The below guidance outlines some key principles and considerations for engaging assurance providers, and specifically LFAs, in COEs and for tailoring their assurance work.

<table>
<thead>
<tr>
<th>Engaging assurance providers, including LFAs, in Challenging Operating Environments (COEs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. The volatile nature of many crises and the continuously changing context in which grants are being implemented in many COEs, but also the distinct architecture of these countries’ grants and implementation arrangements require risk management and assurance responses that are flexible and tailor-made to each country specific situation.</td>
</tr>
<tr>
<td>2. The management of a COE portfolio does not necessarily require more assurance work but rather smart assurance approaches that are rigorous and yet adapted to the challenges presented in the given country and grant context.</td>
</tr>
<tr>
<td>3. Important considerations to take into account when defining the scope and nature of assurance, including the LFA role are:</td>
</tr>
<tr>
<td>(i) the complexity of the grants/country environment;</td>
</tr>
<tr>
<td>(ii) the volume of funding, scope and geographical coverage of program activities;</td>
</tr>
<tr>
<td>(iii) the capacity and performance of the country systems and implementers;</td>
</tr>
<tr>
<td>(iv) historical grant performance;</td>
</tr>
<tr>
<td>(v) the risk levels and prioritized mitigation actions</td>
</tr>
<tr>
<td>(vi) Global Fund Country Team resources and capacity;</td>
</tr>
<tr>
<td>(vii) Availability and capacity of partners/assurance providers in country</td>
</tr>
<tr>
<td>(viii) Reliance on partners’ work;</td>
</tr>
<tr>
<td>(ix) Effectiveness of implementers’ controls and/or risk mitigating mechanisms</td>
</tr>
<tr>
<td>(x) Existence of early warning systems</td>
</tr>
<tr>
<td>(xi) LFAs having adequate access to PR/SR information and program locations;</td>
</tr>
<tr>
<td>(xii) Security to operate in country.</td>
</tr>
<tr>
<td>4. As far as available and appropriate, the Country Team may need to use various assurance providers in country to allow for a timely and adequate response to the crisis. The LFA can be one such assurance provider and important source of information.</td>
</tr>
<tr>
<td>5. The LFA’s ability to operate as much as possible in country is critical to managing the COE. This, however, may not always be feasible. The Country Team should assess and discuss with the LFA whether the latter is able to execute the Country Team’s tailored assurance plan that guides the LFA work. In cases where the LFA cannot access certain areas of the country or restricts its staff from travelling to the country due to security concerns, the Country Team may need to consider using partner agencies or contracting other independent assurance providers that are well versed in operating in insecure/COE environments to undertake required verification tasks in country complementing LFA routine desk reviews. In addition to working with the LFA and other assurance providers, as relevant, the Country Team should coordinate closely with the PRs (particularly where these are international agencies such as MSF, Save the Children, IRC etc.) to devise an assurance plan that builds on the PRs’ institutional experience in operating in COEs.</td>
</tr>
<tr>
<td>6. The nature of the crisis and associated risks/mitigations, which drive the assurance responses vary greatly from country to country. Hence, the management of risks in COEs is based on a flexible application of and differentiated country-specific approach to assurance requirements and controls, including LFA services.</td>
</tr>
</tbody>
</table>
7. This means that based on its risk analysis the Country Team has full flexibility to adapt the level of LFA verification and the scope of LFA service Terms of References to the needs of the COE portfolio. For some COEs this may result in a significant reduction of the LFA scope of work while in others a shift of focus of LFA work may be required, depending on the Country Team’s consideration of the above listed factors (points 3 above).

8. For instance, settings with programs of very limited scope (e.g. only focus on treatment), a small number of implementation locations or beneficiaries and trusted implementers with a good track record may require only a limited involvement of an LFA, e.g. spot checks to address specific risks.

9. In other settings with weak implementation capacities and more complex programs, e.g. including large procurement and wide geographical coverage with limited or no access to sites, tighter fiduciary and programmatic controls are likely to be required. Here, the Country Team may decide to engage the LFA in more regular financial, programmatic and procurement checks, particular in countries where reliable information from partners/other assurance providers is not available.

10. Where feasible, the Country Team may also choose to use the LFA, or another country-based assurance provider in the absence of the LFA in country, as one of the resources for early warning as part of the ongoing monitoring of the situation and to act as the ear on the ground to be able to inform the Country Team as timely as possible of any issues/risks that require mitigation and management. Such information, for instance, can inform the reprogramming of grants as the implementation adapts to the evolving situation in country. In order for the LFA to provide up-to-date information to the Country Team it is critical that it engages regularly with relevant actors in country under the guidance of the Country Team.

11. As it determines the assurance strategy and plan for the grant portfolio, the Country Team should from the start seek the advice and closely consult with the Regional Manager/Department Head and the Regional Finance Manager for finance-related matters to ensure there is a shared understanding of the risks to adapt to and of the operational requirements to mitigate them. Further, the outcomes from the review of the portfolio by the Operational Risk Committee, and updated assurance plans are opportunities for making course corrections to the assurance activities based on the prioritized risks and mitigations.

12. The Country Team’s close communication, timely information sharing, planning and coordination with all relevant assurance providers, including the LFA, are key to setting expectations and managing programs in COEs. This, for instance, can comprise regular joint briefings from risk monitoring and updates to action plans and risk maps.

Competencies of LFAs operating in COEs

13. While most of the below competencies are expected of LFAs in any setting, they are of particular importance for LFAs operating in COEs:

- Experience in providing LFA services in COE countries;
- Good understanding of the national health system, government processes and procedures; incl. Ministries of Finance and other aid / governing bodies;
- Good intelligence insight with regards to the Ministry of Health and Government;
- Good intelligence on partner environment - organizations and entities involved in the fight against the three diseases in the country
- Previous experience in the country where services are proposed or at least three key staff (Team Leader, Finance and Programmatic/M&E Expert) have minimum one year experience in the country context and have been performing ground work;
- Ability to be flexible and adaptable upon requests from the Country Team, including making staff available as and when required, and able to adjust under changing workload;
✓ Able to move around the country according to security protocols; and open to building partnerships for areas which may not be accessible due to security protocols;
✓ Able to manage Country Team requests within the proposed timelines, able to provide high quality and practical reviews and propose solutions based on experience with the country context;
✓ LFAs have their own security protocols or base the security protocols on professional security organization.

**Examples of tailoring LFA services in COEs**

14. The following examples may serve as guidance to the Country Teams when determining the LFA scope of work for COEs (this list is not exhaustive):

   (i) In the case of COEs where LFAs are limited in the services they can provide due to their travel and security policies restricting their staff from travelling to and within certain COE countries, engaging vetted organizations could be considered to provide assurance services in country, as needed, to complement LFA routine desk work.

   (ii) The Country Team may consider to host workshops with the PR, CCM and LFA outside the country, e.g. at the GF in Geneva, to discuss roles and responsibilities, including how reporting and risk would be managed. This can help to set expectations and resolve blockages.

   (iii) Where the LFA has no access to a country, the Country Team may consider flying the PR to the neighbouring country for PU/DR reviews or other verification activities.

   (iv) Moreover, if the LFA is unable to operate in the country, the Country Team may consider financing a consultant (e.g. emergency health professionals) on the ground to monitor risks and follow grant implementation. This may be done through close cooperation and sharing of such resources with partner organisations, such as UNHCR or ICRC.

   (v) In some COEs, the Country Team may consider investing in alternative data collection methods that ensures the greatest reliable information, e.g. using cell phones.

   (vi) The Country Team may need to review the staffing of the LFA team and discuss the required competencies for the given COE context with the LFA to ensure competent and experienced experts are in place who are well versed in operating in challenging environments.

**Important considerations for tailoring LFA services in COEs**

15. When considering the level and scope of engagement of LFAs in COEs the following needs to be taken into account:

   (i) The flexible tailor-made approach to defining the LFA role in a given COE requires close coordination and timely planning with the LFA and relevant actors internally to ensure that required LFA resources are available when needed.

   (ii) Depending on the severity of the crisis, as a last resort the LFA may have to relocate some or all of its staff, either to other safer parts of the country or to a neighboring country. While an in-country presence of the LFA is preferable, the LFA’s own risk management procedures to ensure the wellbeing of its staff need to be acknowledged and respected. While the LFA would not be able to perform certain
tasks, such as spot checks, it may still be requested to perform other desk-based reviews and to keep itself abreast of the latest developments in country. At the same time, the Country Team needs to explore which, if any, other entities in country could assist with providing some assurance tasks, e.g. local NGOs.

(iii) In cases where unforeseen events in the country require significantly more LFA work than was originally included in the annual work plan/LFA budget the Country Team should consult the Regional Manager/Department Head, Regional Finance Manager and the LFA Coordination Team to decide on next steps.

(iv) In some security sensitive COEs the LFAs’ costs for providing security to their staff in country can be substantial. Such costs are normally covered by the LFA budget under Other Direct Costs (ODC). However, before agreeing to include such costs in the LFA budget, the Country Team should request the LFA for a breakdown of security related costs and consult the Regional Manager/Department Head, Sourcing and the LFA Coordination Team.
Support Costs and Indirect Cost Recovery (ICR) Policy for Non-Governmental Organizations

Issue Date: 13 March 2015
Purpose: To define the policy and principles related to Support Costs/Indirect Cost Recovery (ICR) for non-governmental organizations.

OVERALL OBJECTIVES

1. International non-governmental organizations (INGOs) implementing programs funded by Global Fund grants may request to include funds in their budgets to compensate for services that are provided by their headquarters, regional offices and/or parent organization (together referred to as “Headquarters” in this policy). Headquarters are generally located outside the country where the grant is implemented and support the in-country office of the organization to fulfill their activities and meet the grant’s objectives. This may be the case either when the Grant Agreement is signed directly by the in-country office or when it is signed by the Headquarters while the program is implemented by the local office.

2. The Global Fund encourages the development of in-country capacity and strives to ensure optimal allocation of resources to service delivery and maintaining the overall level of administrative costs at a minimum level.

3. Local non-governmental organizations (local NGOs) are generally expected and strongly encouraged to include all costs associated with the implementation of program activities as direct charges to the grant. In exceptional circumstances as indicated in the Global Fund guidelines for grant budgeting and reporting, and at the sole discretion of the Global Fund, where a local NGO is implementing programs and activities supported by several donors and has the financial system and capacity to demonstrate transparent cost recovery, the Global Fund at its sole discretion may authorize the relevant local NGO to charge a percentage of direct costs as ICR.

POLICY AND PRINCIPLES

4. This policy does not apply to UN agencies for which separate arrangements for ICR apply.

5. The in-country common costs of implementing entities (e.g. salaries, office rent, utilities, security, etc.) related to the management and administration of Global Fund programs should generally be charged directly to the grant “as direct costs” and are not affected by this policy.

6. Funding for support costs and ICR shall not be applied when a financial management intermediary (i.e. a “fiduciary agent” or “fiscal agent”) is appointed to oversee and verify expenditures of grant funds, unless there is a prior approval of the Grant Approvals Committee.

---

93 This may include a clear audit trail on cost recovery mechanisms that are in place and subject to independent external audit review.

94 If a UN agency is selected as an implementer for a grant financed under the Emergency Fund, they must comply with this policy on indirect cost recovery.
7. The maximum rates which an eligible non-governmental organization may charge to support costs/ICR under Global Fund grant agreements and grant extensions signed are established in Annexes 1 and 2 of this OPN. However, where an organization is currently charging rates on Global Fund grants which are below or above the maximum rates established in Annexes 1 and 2, but in accordance with the approved budgets, these rates may be maintained until the end of the current implementation period. Any requests for support costs funding via ICR under a new implementation period or grant extension must be in accordance with this policy.

8. In the event the nomination of the Principal Recipient (PR) is not finalized at the time of Concept Note development and approval (as permitted under Global Fund policies and procedures), support costs/ICR costs of eligible PRs may be incorporated in the grant-making budget within the limits of the total funding ceiling. The budgetary implications of such costs should be disclosed to the CCM before submitting the final grant-making budget to the Global Fund.

9. If the Global Fund at its sole discretion approves funding for support costs/ICR, the Global Fund may include a special condition in the relevant Grant Agreement to specify terms such as the applicable rates, approved budget, description of services to be covered or other terms it may deem appropriate in accordance with this policy.

10. Each PR that receives funding for support costs or ICR is required to acknowledge and agree in the relevant Grant Agreement that it shall use such funding only in compliance with the Global Fund’s policy and principles on Support Costs/ICR for non-governmental organizations and any conditions relating thereto in the Grant Agreement.

11. The support costs/ICR may be used exclusively to finance the following activities in support of the program:
   a) accounting, treasury management, reporting support and internal audit;
   b) human resources administration support;
   c) procurement services;
   d) management support and oversight;
   e) legal support;
   f) IT support; and
   g) routine technical assistance and capacity building of in-country staff and structures

12. The PR shall ensure that support costs/ICR generated from grant funds are not used for fundraising, marketing, or for costs related to the development of Concept Notes.

13. All funds generated and costs charged will form part of the organization’s Annual Financial Statements which will be subject to external audit. In the event that this is part of the Statutory Financial Statements, a copy of the audit report for the organization as a whole may be requested by the Global Fund. The audit report and auditor opinion should be submitted no later than six (6) months following the end of the organization’s regular fiscal year.

14. Accepting support costs commits the Headquarters organization to providing timely support to the country office for the effective and efficient implementation of grant activities and reporting. It is also expected that should weaknesses be identified in the management and administration of the grant by the country office, the Headquarters services or entity (in the case of local NGO) would implement appropriate and/or recommended actions in a timely manner.

---

95 The Global Fund at its sole discretion may in exceptional circumstances approve the use of such funds to support the country dialogue and Concept Note process.

96 The Annual Financial Statement referred to in this OPN for purposes of support costs/ICR may be an integral annex in the Global Fund grant external audit or the Statutory Financial Statements of the Principal Recipient.
15. The organization commits to providing the Global Fund with all the necessary information to allow the Global Fund to confirm that funds have been charged to the grant in accordance with the approved budget (including any budgetary adjustments as per section 3.5.1 of the Guidelines for Grant Budgeting) and to confirm that the Headquarters have provided any agreed services (when applicable).

16. The disbursement of funding for support costs/ICR by the Global Fund will follow the Global Fund’s standard annual funding and disbursement procedures and may be charged to the grant in proportion of the actual expenditures incurred.

17. Support costs/ICR will be considered eligible expenditures when charged to the grant based on actual expenditures and disbursement to Sub-Recipients (SRs) made by the PR. For SRs, the eligibility is based on actual expenditures.

18. In the event that a PR charges SR disbursements to a grant as support costs eligible for ICR, but the services not rendered by the SR, the SR shall refund in full the disbursed amounts to the PR. The PR shall be required to make an adjustment to ICR in its accounts based on amount refunded by the SR and the original rates applied.

19. Any support costs/ICR charges on accrued expenses and/or budget will be considered as ineligible expenditures by the Global Fund.

International Non-Governmental Organizations (INGO) Implementers

20. Eligible implementers, whose legal structure, reporting line and historical relationships demonstrate strong Headquarters involvement in their operations, may request financing for the support they receive from their Headquarters to be included in the Global Fund’s grant budget.

21. Costs related to the Headquarters’ own public relations, marketing and fundraising activities are not eligible for funding.

22. The percentage-based charge is designed to contribute to costs incurred by the Headquarters of an INGO and therefore costs related to the Regional Office or Headquarters should not be budgeted as direct costs in the grant. In certain instances based on the operational structure of the INGO, the Global Fund at its own discretion may approve charging limited costs incurred at the Regional Office or Headquarters level as direct costs under the grants.

23. In cases where the PR identifies an activity which would be undertaken in the most cost-efficient way by an employee of the INGO Headquarters office, these costs may be included as direct costs in the grant budget, provided that they are not part of the services to be provided against the payment of the ICR/support costs. The PR should provide justification demonstrating value-for-money, efficiency in the execution of activities using Headquarters staff, the nature of the activity, deliverable, costs, and the expected outcome. Such direct costs should be classified as “consultants” and managed using internal invoicing mechanisms and not considered as human resources costs.

24. Some INGOs may have a robust mechanism of charging local administrative costs using a “shared-costs” approach. Shared costs can be defined as expenses that can be allocated to two or more funding sources (government, the Global Fund, other donors etc.) or different Global Fund grants on the basis of shared benefits and administrative efficiency. Such mechanisms should be clearly outlined in the framework agreement to be considered as eligible expenditure under Global Fund grants. Section 2.6 of the Guidelines for Grant Budgeting. Provide additional information on the “shared-cost” concept.
Local Non-Governmental Organizations (NGO) Implementers

25. Percentage-based ICR is generally not applicable when the Global Fund is the main funder\(^7\) of the NGO’s operations.

26. Local NGOs implementing programs and projects for multiple donors are encouraged for the purpose of the Global Fund budgeting and expenditure reporting, to apply a cost sharing methodology across the different funders based on the principles in section 2.6 of the Guidelines for Grant Budgeting.

27. The same assumptions and methodology used for apportionment of budgets of shared activities in the latest approved budget should be applied for expenditure apportionment. The actual shared costs expended and reported to the Global Fund should be based on the actual expenditures incurred by the implementer and not the budgeted amount.

28. In the event the provisions in paragraph 26 create additional administrative burden and inefficiencies in the management of shared-costs, local NGOs with the appropriate financial management capacity may be allowed to charge a percentage-based support costs/ICR. The Global Fund in approving this mechanism expects a proportional reduction in direct costs charged to the grant for administrative overhead to avoid duplication of costs for the same purposes.

RESPONSIBILITIES & PROCESSES

Responsibilities

29. The Principal Recipient:
   a) includes in the request for funding for support costs/ICR in the budget submitted to the Global Fund as part of the concept note and/or grant-making budget. The rates applied shall be in accordance with the Global Fund rates in effect as described in Annexes 1 or 2 for new grant agreements and grant extensions signed from 18 December 2014;
   b) provides the Secretariat with a narrative description of the services to be provided by Headquarters and/or the services that will charged as ICR as part of the grant-making documents when support costs/ICR provisions are not included in the signed framework agreement. In the event of any exceptional requests for Headquarters related direct costs for an individual grant, the narrative description shall be updated to ensure it is specific to the country context and grant implementation needs;
   c) integrates in the Annual Financial Report (AFR)\(^8\) that include support costs/ICR charged to the grant, both at the PR and SR level. These amounts for each grant could be included in available annexes to the AFR by disclosing the calculations; and
   d) submits to the Global Fund a copy of the Annual Financial Statements for the organization no later than six months following the end of the organization’s fiscal year. All funds generated and costs charged will form part of the organization’s Annual Financial Statements which will be subject to external audit.

30. The Country Coordinating Mechanism endorsement the budget submitted in the concept note including the support costs or ICR. In the event that support costs/ICR costs was not included in the concept note submission, the Principal Recipient is expected to inform the Country Coordination Mechanism on the implication of such changes in the overall budget.

---

\(^7\) The Global Fund annual budget represent 70\% or more of the implementers (PR or SR) operations.

\(^8\) Enhanced Financial Report for grants that are not part of the new funding model.
31. The **Local Fund Agent**, as requested by the country team:
   a) ensures that the budgeted support costs/ICR are within the maximum upper ceiling defined in Annexes 1 or 2;
   b) verifies on a regular basis that rates charged to the grant are in accordance with the agreed rates per the detailed budget; and
   c) assesses the NGO implementers (including INGO) capacity to perform transactions falling under their responsibility may be done on an annual basis. This assessment shall not be done by the LFA for each grant-making involving this organization but may be mandated by the Global Fund once a year or more frequently as necessary with the view to inform all relevant grant-makings, confirm that any agreed services to be provided by the NGO implementers (including INGO) have been performed, and assess any relevant issues related to the ongoing implementation of grants managed by this organization. The assessment will be coordinated by the Global Fund LFA team.

32. The **Country Team**:
   a) reviews the request for ICR in the budget submitted by the PR and the recommendations of the LFA (if applicable);
   b) notifies the PR of the outcome of the concept note review, including the budget; and
   c) verifies that rates charged to the grant are in accordance with the agreed rates in the detailed budget.

ANNEX 1: Maximum Headquarters Support Costs/ICR Applicable to International NGOs (INGO) Implementing Global Fund grants.

These rates are the maximum that may be applied to any eligible INGO requesting Headquarters support costs/ICR for new grant agreements or grant extensions signed from December 18, 2014

<table>
<thead>
<tr>
<th>Entity</th>
<th>Type of Cost</th>
<th>Maximum Percentage Rates</th>
<th>Indicative guidance on the application of rates in the budget</th>
</tr>
</thead>
</table>
| INGO Principal Recipient (PR) | Health Products\textsuperscript{99} | 3% | • Where a procurement agent is used, the maximum rate that can be applied is 1%.  
• If the SR is procuring directly, the PR may only charge a maximum of 1% on the value of the procurement in addition to a maximum of 3% which may be charged by an INGO SR and 2% by NGO SR |
| All other Direct costs incurred by the PR | 7% | | |
| Funds managed by Sub Recipients | 5% | • The PR may charge up to a maximum of 5% on SR direct costs.  
• If the SR is also an INGO claiming ICR, the SR may charge up to a maximum of 5% on their own direct costs, and the PR may charge a maximum of 2% on the SR direct costs (the calculation should exclude the SR ICR)  
• If the SR is NGO claiming ICR, the SR may charge up to a maximum of 3% on their own direct costs, and the PR may charge a maximum of 4% on the SR direct costs (the calculation should exclude the SR ICR) |
| INGO Sub Recipient | Health Products\textsuperscript{1} | 3% | • Where a procurement agent is contracted by the SR, the maximum rate that can be applied is 1%.  
• If the PR is managing the procurement, the SR is not entitled to charge any overheads on these amounts. |
| All other Direct costs incurred by the SR | 5% | | |
| Additional Safeguard Countries | All Rates remain the same with the following exceptions  
- The PR may charge up to a maximum of 7% on SR direct costs.  
- If the SR is also an INGO claiming ICR, the SR may charge up to a maximum of 7% on their own direct costs, and the PR may charge a |

\textsuperscript{99} All costs included in the cost categories Health Products-Pharmaceutical Products (category 4), Health Products - Non-Pharmaceuticals (category 5), Health Products – Equipment (Category 6), and cost input 7.2.
maximum of 3% on the SR direct costs (the calculation should exclude the SR ICR).
- If the SR is an NGO claiming ICR, the SR may charge up to a maximum of 5% on their own direct costs, and the PR may charge a maximum of 5% on the SR direct costs (the calculation should exclude the SR ICR).
- Where an INGO is an SR of a UN agency, they may charge up to 7% on their own direct costs.
- If a fiscal agent is contracted, no ICR should be paid to the PR.

| Direct Costs from Headquarters | The percentage based fee is designed to contribute to costs incurred by the Regional or Headquarters of an INGO and therefore no direct costs related to the Regional Office or Headquarters should be budgeted in the grant, unless approved as part of the Framework agreement signed with the Global Fund.
- However, in cases where the PR requests to directly charge a limited number of costs incurred at Headquarters level or where the Global Fund has requested the Headquarters to provide a specific service to the Country (e.g. more than 1 internal audit per year from the Headquarters), the PR should provide sufficient justification as to why the costs are not part of the normal Regional or Headquarters support to the grant. Requests for inclusion of these costs should normally be addressed during the grant making process and should include a detailed description of the activity, a detailed budget for the activity, and a confirmation that none of the related costs are included in the indirect costs of the Headquarters and the services specified. |
| CALCULATION NOTE: | The PR charge on funds managed by SRs should be exclusive of the percentage based charges applied by the SR.
- These rates may only be charged to the grant based on actual cash expenditure and disbursement to SRs. Therefore they may not be charged based on accrued expenses. |
ANNEX 2: Maximum ICR Applicable to Local NGOs (NGO) Implementing Global Fund grants.

These rates are the maximum that may be applied to any eligible INGO requesting Headquarters support costs/ICR for new grant agreements or grant extensions signed from December 18, 2014

ANNEX 3: Sample Calculation

GRANT X – an INGO PR with 2 SRs (1 INGO and 1 NGO). The PR and SRs require ICR.

**Budget Breakdown**

PR – 10,000,000 (8,000,000 Health Products, 2,000,000 Other Direct Costs)

SR 1 (INGO) – 5,000,000 (Other Direct Costs)

SR 2 (NGO) – 3,000,000 (Total Budget including common costs which are detailed)

Total Budget before Support/ICR – 18,000,000

**Headquarters Support/ICR Calculation**

PR – Health Products – 8,000,000 X 3% = 240,000

PR – Direct Costs – 2,000,000 x 7% = 140,000

PR – Disbursements to SR 1 (INGO) – 5,000,000 X 2% = 100,000

PR – Disbursements to SR 2 (NGO) – 3,000,000 X 2% = 60,000

Total Percentage Charge by PR – 540,000

SR 1 (INGO) – 5,000,000 X 5% = 250,000

SR 2 (NGO) – 3,000,000 X 5% = 150,000

TOTAL GRANT VALUE – 18,940,000

Total Headquarters Support Costs/ICR levied on the grant at both PR/SR combined = 5.2% or 940,000

Additional Safeguard Policy

**Approved on:** 1 May 2019  
**Approved by:** Executive Grant Management Committee  
**Process Owner:** Grant Management Division

### OVERALL OBJECTIVES

1. The Additional Safeguard Policy (the “ASP”) is one of an array of Global Fund risk management tools. It was instituted by the Board at its Seventh Meeting.

2. ASP can be invoked in full or in part whenever “existing systems to ensure accountable use of Global Fund financing suggest that Global Fund monies could be placed in jeopardy without the use of additional measures” (see ASP Policy). The ASP is primarily focused on addressing material issues that arise when program implementers (e.g., Principal Recipients and Sub-Recipients) have demonstrated a lack of capacity or failure to effectively deploy, implement and/or safeguard Global Fund grant funding and assets as a result of factors within and beyond the control of existing implementers in a particular country (e.g., civil unrest, an influx of displaced persons, governmental instability, and inadequate national program capacity).

3. This OPN situates the ASP within the overall portfolio risk management framework of the Global Fund and provides the parameters for the application of the ASP within that risk framework. This OPN complements the existing policies on Challenging Operating Environments (COE) and Risk Management across the grant life cycle.

### OPERATIONAL POLICY

#### Scope of ASP

4. The ASP may be invoked for an entire portfolio of Global Fund grants in a particular country or for a specific disease component.

5. The ASP may be invoked when there are significant portfolio or disease-specific risks that compel the Global Fund to take the primary role in prescribing and deciding the implementation arrangements for a particular portfolio or disease component.

6. **Triggers.** Applying the ASP may be prompted by the following:
   - Global Fund Secretariat assessments;
   - Findings of the Office of the Inspector General;
   - Reports from Local Fund Agents (“LFAs”);
   - External auditor reports; and
   - Assessments from partners or other sources assessing risk factors in a particular portfolio.

---

101 Report of the Governance and Partnership Committee GF/B7/7 - https://www.theglobalfund.org/board-decisions/b07-dp14/
7. Examples of these triggers include (but are not limited to):
   - Political instability or lack of a functioning government;
   - Poorly developed or lack of civil society participation;
   - Lack of a transparent process for identifying appropriate implementing partners;
   - Identified fraud or misuse of Global Fund financing and/or any other funds; and
   - Recent or ongoing conflict limiting capacity for the Country Coordinating Mechanism (“CCM”) to conduct a transparent selection process for implementers.

8. **ASP safeguards.** In determining specific implementation arrangements under the ASP, the Global Fund may select the Principal Recipient(s) (“PR(s)”), and/or Sub-recipient(s) (“SR(s)”) and other implementing entities.
   - **Selection of PRs.** The Global Fund may elect to lead the selection of implementers for the program. The nomination of the PR(s) may be made directly by the Global Fund, in consultation with the CCM and other development partners. Such PR(s) may include multilateral or bilateral organizations, NGOs or other suitable entities as determined by the Global Fund.

   When selecting a PR, the applicable Global Fund Country Team is expected to conduct a capacity assessment of potential organizations to transparently select the most suitable entity for the implementation of the grant(s). The capacity assessment will be tailored to identified risks specific to the portfolio or disease component and consider existing assessments.

   - **Selection of SRs and Other Implementing Partners.** The Global Fund may also select or make final decisions on the nominated SR(s) and implementing entities. The selection will be based on assessment of risks which may include review of existing financial management systems, institutional and programmatic structures, procurement systems, and where applicable, monitoring and evaluation structures.

9. **Additional Risk Mitigation Measures.** The ASP safeguards, whereby Global Fund selects the implementer(s), can complement or be complemented by risk mitigation measures such as the installation of fiscal/fiduciary agents, restricted cash policy, use of GF Pooled Procurement Mechanism and other measures as specified in the Risk Management OPN and the Global Fund Guidelines on Financial Risk Management. The proposed additional risk mitigation measures and the ASP safeguards form part of the overall risk management approach for a particular portfolio and/or disease component.

**Invoking the ASP**

10. The decision to invoke and subsequently revoke the ASP for a particular portfolio is taken by the Global Fund Executive Director based on recommendation from the Head, Grant Management Division in consultation with the Portfolio Performance Committee (PPC). In emergency and crisis situations, the Head, Grant Management Division can recommend invoking the ASP to the Executive Director in consultation with the Chief Risk Officer as PPC Co-Chairs. The decision to invoke the ASP by the Executive Director will be succeeded by a PPC Executive Session to further discuss the situation and review the overall risk mitigation measures applied to the country.

11. A decision to invoke the ASP can be taken prior to or during the submission of a funding request for a particular funding cycle, so that the decision to invoke ASP can inform the design of funding requests and resulting grants. However, in some cases, significant risks

---

102 In the event that UNDP is selected as Principal Recipient, the special ASP standards terms and conditions of the grant agreement for UNDP should be used.
may arise during the implementation stage which would justify the subsequent invocation of ASP for a particular portfolio.

12. A Country Team proposal to apply ASP for a portfolio should be supported by a comprehensive risk assessment. In proposing to invoke the ASP, the Country Team should clearly state:

   a. the rationale for proposed invocation of the ASP and clear identification of applicable risk factors;
   b. the proposed implementation arrangements that will be determined by the Global Fund
   c. any additional risk mitigation measures that are or will be applied to the portfolio proposed for ASP; and
   d. specific conditions to be met to revoke the ASP status.

13. Proposed conditions to revoke ASP status include clear, time-bound, strategic actions to be implemented by the CCM and/or the PR(s), for factors that are within their control, as a precondition to the revocation of ASP status.

14. Risk factors and Country Team recommendations to invoke the ASP should be discussed with the CCM including the implications of invoking ASP for the applicable country portfolio. The CCM should be notified about the final decision to invoke the ASP status.

15. ASP status is valid until the Global Fund has made a decision to revoke the ASP for a particular portfolio or disease component based on an analysis of risks, the effectiveness of implementation arrangements, the status of the additional risk mitigation measures and the extent to which the conditions to revoke ASP status have been met.

**Monitoring and Revoking the ASP**

16. As part of the routine operational risk management functions, the Country Team monitors risk factors, the implementation arrangements, the additional risk mitigation measures and the conditions related to ASP.

17. For High Impact and Core portfolios, the review of ASP-related risks will be conducted as part of the annual review of portfolio risks by Country Team and Risk Department as captured in the Key Risk Matrix (see **OPN on Risk Management**). For Focused portfolios, such review will be conducted annually as part of the Annual Funding Decision-making process. The review will focus on the current status of relevant risks and the effectiveness of the implementation arrangements, the existing risk mitigation measures and conditions previously identified to revoke the ASP status. When assessing the mitigation measures in place, such as a requirement to use an international organization as PR, the value for money of management costs are a factor to be considered but should not be the sole basis for a transition to a national PR and must always be part of a risk-based discussion with approvals at the appropriate level.

18. As part of the regular ASP monitoring process, the Country Team may propose the revocation of ASP status for a particular portfolio. The proposal to revoke ASP status will be presented to the PPC. This review may occur through scheduled country portfolio reviews as applicable or through a PPC Executive Session (as defined by the PPC TORs). In proposing to revoke ASP status, the Country Team should clearly indicate to the PPC:

   a. the rationale for the proposed revocation, providing an update on the status of risk mitigation measures and fulfilment of conditions to revoke the ASP for the applicable portfolio; and
   b. the continuing relevance of the implementation arrangements that were originally imposed on the portfolio.

19. The PPC will review the proposal and analysis conducted by the Country Team. The ASP may be revoked if:
a. circumstances that gave rise to the original decision to invoke the ASP for the specific country portfolio have materially changed and/or the country or grant implementers have put in place systems and safeguards to ensure accountable use of Global Fund financing; or
b. further grant implementation experience has demonstrated that the risks identified at the time the ASP was invoked have not materialized, such that the applicable ASP measures are no longer necessary.

20. In circumstances where the annual risk review reveals a negative upward risk trend and worsening situation of a specific country portfolio, the PPC will review the full scope of risk mitigation measures and flexibilities in place including the ASP.

Secretariat Tracking and Reporting of ASP

21. The Secretariat will report cases in which the ASP has been invoked or revoked to the Strategy Committee on a regular basis.

22. The Operational Efficiency Team, GPS Department will track the status of ASP countries and the Head, Grant Management Division will report newly added and removed ASP countries to the Strategy Committee.

Amendments to this Policy

23. The ASP, as set forth in this Operational Policy Note, will be reviewed and updated as necessary based on specific cases and experiences.

RESPONSIBILITIES AND PROCEDURES

Responsibilities

24. The **Country Team** is responsible for the monitoring of the ASP within the risk management of country portfolios and in proposing to the Portfolio Performance Committee whether:
   - Any country portfolio should be managed under the ASP;
   - The imposed implementation arrangements and additional risk mitigation measures imposed on the country portfolio managed under the ASP are effective or require revision; and
   - The ASP should be revoked for any country portfolio currently being managed under the ASP, based on the fulfilment of the special conditions to revoke the ASP status.

25. The **Risk Specialist** is responsible for reviewing the risk analysis undertaken by the CT, ahead of the PPC review for invoking, revoking or monitoring the progress of the ASP. The Risk Specialist conducts annual review with the Country Team of the portfolio risks as a part of the annual update of the Key Risk Matrix.

26. The **Operational Efficiency Team, GPS Department** is responsible for managing the list of ASP countries and updating the ASP portfolio categorization in the Global Fund Operating System (GOS).

27. The **Portfolio Performance Committee (PPC)** reviews the proposals to invoke or revoke the ASP for a particular portfolio. The PPC also reviews the progress on the additional risk mitigation measures and ASP conditions.

28. The **Head, Grant Management Division** is responsible for reporting to the Strategy Committee on country portfolios where ASP is invoked or revoked. The Head, Grant Management Division will recommend invoking or revoking the ASP status to the Executive Director for final decision.

29. The **Executive Director** considers the recommendation from the Head, Grant Management Division and makes final decision to invoke or revoke ASP in a particular portfolio.
30. The **Country Coordinating Mechanism** is informed of the Secretariat risk assessment and decision to invoke or revoke ASP. The CCM oversees the implementation of ASP conditions as part of its in-country oversight and holds the relevant stakeholders accountable.

31. The **Principal Recipient** is responsible for safeguarding the Global Fund investments and implementing the grant as agreed with the Global Fund. They are responsible for ensuring the implementation of the specific risk mitigation measures and reports to the CCM on the status of mitigation measures.

32. The **LFA** assists the Country Team, by assessing the risks of a particular country portfolio and recommending appropriate risk mitigation measures and/or conditions and, as requested, oversee ASP mitigation measures such as in-depth assessments of the PR and SRs and review progress on conditions to revoke the ASP status.

**Procedures**

**Annex 1** provides detailed procedures and RACI on invoking, revoking and monitoring of ASP.

OPERATIONAL POLICY NOTE

Conditions and Management Actions

Issued on: 10 November 2014
Purpose: To define Conditions and Management Actions and the process for setting and managing them.

OVERALL OBJECTIVES

1. Under the new funding model, following the review of a concept note by the TRP and the GAC, the proposed Principal Recipient(s) and the Country Team enter the grant-making phase. During grant-making, capacity gaps and risks associated with the program, if any, will be identified and final grant documents will be negotiated. The grant-making phase will result in “disbursement-ready grant(s)” for submission to the Board for approval, such that all critical issues that impact the first annual funding decision and disbursement release are addressed by the time of grant signature, though adequate risk mitigation measures. Where issues that impact overall grant implementation are not resolved by the time of signature of the Grant Agreement, risk mitigating measures that remain to be addressed are incorporated into the grant documentation as conditions or are dealt with through management actions. These are tailored to take into account the contextual and programmatic aspect of each grant (i.e., varying levels of capacity among Principal Recipients and implementation arrangements).

POLICY, PRINCIPLES, ROLES AND RESPONSIBILITIES

Definitions

2. References to the “Country Team” should be read in line with the Guidance on Country Team Approach.

3. A condition is a legal obligation to address a critical risk or issue related to program implementation. Conditions are captured in the Grant Confirmation of the Grant Agreement. There are two types of conditions:

   (i) A condition precedent is a measure to address a critical risk or an issue which must be fulfilled before a specific event (e.g., use of funds for a specific activity, disbursement or annual funding decision, depending on severity of the issue) relevant to the grant can take place; and

   (ii) A special condition is a measure to address a critical risk or an issue which must be fulfilled by a specified deadline during the term of the grant, and then, if relevant, remain fulfilled throughout the term of the grant.

4. Because grants are meant to be “disbursement-ready” (see OPN on Make, Approve and Sign Grants), as a matter of principle, critical issues that need to be addressed prior to a first annual funding decision or disbursement release should be resolved during grant-making. The Country Team must undertake specific actions during grant-making to ensure that the grant is ready for implementation. Country Teams should therefore endeavor to minimize the use of conditions precedent to the first annual funding decision or to the first disbursement release, applying them on an exceptional basis. Only those actions that have

---

106 For additional details for the requirements for grant-making, please refer to OPN on Make, Approve and Sign Grants.
not been acted upon by the Principal Recipient prior to grant signing or that require longer
time to implement should be included in the Grant Confirmation as conditions.

5. Conditions included in a Grant Confirmation must be actionable by the Principal Recipient. For example, risk mitigating measures that the Principal Recipient has no legal authority to implement or otherwise is not in a position to act on (e.g., a civil society or INGO PR does not have control over a national process) should be phrased accordingly (e.g., by requiring the Principal Recipient to facilitate the relevant measure, including through creating contractual obligations between the PR and relevant implementers) or dealt with outside of the Grant Agreement (e.g., if the condition is more actionable by another stakeholder).

6. A management action is a measure to ensure timely program implementation but
   (i) is not necessarily addressing a critical risk,
   (ii) does not need to be countersigned by the Principal Recipient, and
   (iii) is not legally binding but is a management tool used at the discretion of the Country Team to ensure sound program management practices by the Principal Recipient.

Setting Conditions and Management Actions

7. Conditions are captured in the Grant Confirmation while management actions (also see paragraph 11 below) are communicated to the Principal Recipient through a performance letter, other formal written communication and are captured in the ADMF.

8. Country Teams should categorize risks to determine whether they are critical (and need to be addressed through a condition) or less critical (and to be addressed through a management action) in accordance with the Guidance on Country Team Approach, based on the assessment of risks in each specific context and grant risk profile generated through the QUART and/or other tool(s), if available.

9. Risks should be identified and dealt with as early as possible as part of the country dialogue process. While efforts should be made to address any remaining risks during grant-making, the Grant Confirmation presented to the GAC2 and the Board for approval may need to incorporate conditions addressing identified risks that remain to be mitigated during grant implementation.

10. Any condition incorporated in a Grant Confirmation must be discussed with the Principal Recipient prior to their inclusion in a Grant Agreement.

11. During grant implementation, the Country Team may set additional conditions and/or management actions to address risks and other issues that may arise, following the submission of any reports to the Global Fund, further to Country Team mission reports or based on findings from the Capacity Assessment (CAT action plan), OSDVs, audits, progress updates and/or disbursement requests, etc. Additional conditions are set through the process set out in Paragraph 19 below, while additional management actions are communicated to the Principal Recipient through a performance letter and documented in the ADMF.

Managing Conditions

12. Tracking Conditions. The Country Team is responsible for tracking the status of each condition on a regular basis. The Country Team inputs the conditions precedent, special conditions and management actions into the Grant Management System (GMS). Reports documenting all conditions can also be generated through Business Analysis and Reporting Tool (BART). All conditions that are unmet and are relevant to the commitment period in question should be listed in a given ADMF.

---

104 For certain Principal Recipients, there may exist certain standard practices previously agreed with the Global Fund at the institutional level (e.g., UNDP), which are relevant to how conditions and management actions should be negotiated in a given grant.
13. Determining Fulfillment of Conditions. The fulfillment of conditions is reviewed by the Country Team in connection with each disbursement release. If requested by the Country Team, LFAs review the status of fulfillment of conditions either in connection with the LFA review of the PUDR or as a separate service and make recommendations to the Country Team.

14. The Country Team is responsible for determining whether a condition has been fulfilled. In cases where consensus is not achieved within the Country Team, the issue should be resolved through a standard escalation procedure set forth in the Guidance on Country Team Approach.

15. The fulfillment of conditions is inputted in and documented through GMS. Conditions that are fulfilled should be removed from the grant documentation in the next Implementation Letter signed following such fulfillment (i.e., when and if an Implementation letter is signed in connection with other amendment to the Grant Confirmation).

16. Waiving Conditions. A condition precedent may be waived when a Country Team would like to process a milestone (e.g., an annual funding decision or a transfer of funds that is otherwise subject to the fulfillment of the condition) despite the condition not being met. A special condition may be waived when a Country Team considers that a disbursement should be released despite the condition not being met by the due date. Situations that may give rise to a waiver of a condition include the case where the risk addressed by the condition no longer exists, or the measure put forth by the condition has become irrelevant, but the activity for which the condition originally sought to limit an identified risk is still happening under the grant. In addition, a waiver is required in connection with a substantive amendment to a condition (see paragraph 20 below). A condition can only be waived if:

(i) The Country Team is in full agreement with the approach;

(ii) The rationale for the waiver and the position of the Country Team are duly inputted in GMS and reflected in the ADMF; and

(iii) The Head of Grant Management Division has approved the recommendation to waive the condition through an email or a memo. The Country Team, in its request seeking approval of the waiver of a condition, must provide alternative risk management measures if appropriate.

17. To the extent an activity for which a condition originally sought to limit an identified risk is no longer happening under the grant (e.g., as a result of a reprogramming or an extension, each done in compliance with Global Fund policies), the waiver procedure described above does not need to be followed. Only the Regional Manager’s approval (or the Department Head for High-Impact countries) is required to treat the condition as non-applicable.

18. Postponing Conditions. The postponement of a condition refers to the deferral of its due-date. Only special conditions may be postponed. A postponement of a condition is appropriate when the risk that the condition was designed to mitigate will not materialize before the specified due-date (e.g., the condition addresses procurement risks, but no procurement takes place until its fulfilment) or sufficient progress has been made towards fulfilling the condition. A condition can only be postponed if:

(i) The Country Team is in full agreement with the approach; and

(ii) The rationale for the postponement and the Country Team’s position are duly inputted in GMS and reflected in the ADMF together with the date to which the condition is postponed.

19. Adding Conditions: New conditions may be added by the Country Team to address critical risks that may arise during grant implementation. Additional conditions are set by
amendment to the Grant Confirmation through an Implementation Letter signed in accordance with the Signature Authority Procedure (SAP).

20. **Amending Conditions:** Minor editorial amendments (i.e. correcting typos or clarifying edits that do not change the substance of the condition) may be made to existing conditions by the Country Team during grant implementation. Such minor editorial amendments to conditions will be made by amendment to the Grant Confirmation through an Implementation Letter signed in accordance with the Signature Authority Procedure (SAP). Major amendments that change the substance of the condition require a waiver of the existing condition (in accordance with the waiver procedure set forth in Paragraph 16 above) and addition of a new condition (in accordance with the adding conditions procedure set forth in Paragraph 19 above) to reflect the amendments.

22. **Review of Conditions:** Conditions are systematically tracked and reviewed as part of ongoing management of a grant, including during the progress update and/or disbursement request review process. Conditions should also be reviewed at the time of signing a new grant (resulting from a new concept note) with an existing Principal Recipient. Outstanding conditions from the existing grant should be reviewed to determine which remain relevant to address existing risks and implementation arrangements. Conditions that are still relevant should be rolled over into the new Grant Confirmation to apply to the new Implementation Period.

23. In order to facilitate a proactive management of a grant during implementation or at the time of a reprogramming, an ad hoc comprehensive review of all conditions may be undertaken. Annex 1 of the OPN provides a process overview for undertaking such a comprehensive review exercise, when needed.

**Funding Decisions and Disbursement Releases**

24. The status of conditions and management actions is taken into account in annual funding decisions and in determining disbursement releases, in accordance with the *OPN on Annual Funding Decisions and Disbursements*.

25. If a condition precedent is tied to a funding decision and such condition remains unfulfilled at the time of the funding decision, part or all, as applicable, of the funding decision must be withheld.

26. If a condition precedent is tied to a transfer/use of funds and such condition remains unfulfilled at the time of the disbursement release, the Country Team may withhold the transfer or prohibit the Principal Recipient to use the relevant funds until the condition is fulfilled.

27. If a special condition is unfulfilled, no disbursement may be made unless the condition is waived or postponed.

28. In the ADMF and in the cash transfer form, the rationale for determining the fulfilment of any given condition should make reference to specific evidence used by the Country Team as well as the extent to which technical team inputs were considered as applicable. The Regional Teams/Country Teams must keep the supporting evidence on file.

**Overseeing Management Actions**

29. **Tracking Management Actions.** As a part of pro-active grant management, the Country Team is responsible for monitoring, overseeing and tracking management actions and determining whether they have been fulfilled or partially fulfilled, whether the deadline should be postponed, or whether the management action should be waived or removed.

30. **Determining Fulfillment of Management Actions.** Progress on the fulfilment of management actions is reported on and reviewed during the progress update and/or disbursement request review process. After each progress update and/or disbursement request review, the status of each relevant management action is shared with the PR through a performance letter and captured in the ADMF, where unmet and applicable for the period in question. Further, the
fulfillment of management actions is reviewed by the Country Team in connection with each disbursement release.

31. Management actions are dealt with at the Country Team level. In cases where consensus is not achieved within the Country Team, the issue should be resolved through a standard escalation procedure set forth in the Guidance on Country Team Approach.

Annex 1: Comprehensive review of Conditions in existing Grant Agreements: Process Overview for ad hoc reviews.

COMPREHENSIVE REVIEW OF CONDITIONS IN EXISTING GRANT AGREEMENTS: PROCESS OVERVIEW

<table>
<thead>
<tr>
<th>Actor</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>COUNTRY TEAM COMPREHENSIVE REVIEW OF CONDITIONS</td>
<td>Based on assessment of risks and the context of the grant, the Country Team assesses if each condition needs to be:</td>
</tr>
</tbody>
</table>
| Country Team | 1. **Retained**, if the measure put forth in the condition is still relevant based on the risk assessment. The CT may decide to:  
- Keep the original condition without any changes;  
- Revise Measures - the Country Team may determine (as necessary) adjustments in the current formulation (amendment) as well as agreed deadlines (postponement) and need for new conditions (adding) to reflect current realities and context.  
- Reclassify Measures - the Country Team may agree to reclassify the conditions. Measures addressing critical risks should be retained as conditions (condition precedent or special condition). Measures which do not address critical risks may be reclassified as management actions. A decision to reclassify a condition into a management action is considered a waiver of a condition.  
2. **Waived** if the risk addressed by a condition no longer exists or the measure put forth by the condition is no longer relevant, but the activity for which the condition originally sought to limit an identified risk is still happening under the grant.  
3. **Removed** if the program activities have changed in accordance with Global Fund policies (e.g., extension, reprogramming, etc.) and the condition becomes irrelevant because of the removal of certain activities from the grant. |

PR DISCUSSION AND AGREEMENT

| Principal Recipient | The proposed recommendations of the Country Team need to be discussed with a Principal Recipient, subject to the Panel’s recommendation and final decision. |

FINAL DECISION AND SIGN OFF

| Regional Manager/Department Head (for High Impact countries), Functional Hub Managers (PSM, MEPH, Finance and Legal) | A Panel consisting of a Regional Manager or Department Head (for High Impact countries) and Functional Hub Managers, including the Legal Grant Manager, reviews the Country Team’s proposed recommendation on the comprehensive review of conditions and endorses or revises the proposed recommendation in a Panel recommendation to the relevant head as described below.  
**Addition, Amendment, Postponement and Removal of Conditions:** If the Panel recommendation includes only addition, amendment, postponement and removal of conditions in the context of programmatic change (without waiver of conditions), the relevant Head, Grant Management Department signs off on the Panel. |

---

105 This process should only be applicable when a one-time comprehensive review and streamlining of all conditions and management actions for a grant or group of grants is needed. For the routine management of conditions and management actions, the standard process in the OPN should be followed.
**Waiving Conditions:** If the Panel recommendation includes a waiver of a condition or a reclassification of a condition into a management action, the Panel recommendation is submitted to the Head, Grant Management Division for sign off. Recommendations to waive conditions with a risk element must be accompanied with appropriate risk mitigating measures.

The Head, Grant Management Division reviews the Panel recommendations and decides to sign off on a recommendation or to object to a recommendation. The Head, Grant Management Division may consult with the Operational Risk Committee when a critical risk element pertaining to the specific country or grant is involved, before making a decision.

| Relevant signatory under Signature Authority Procedure | Once the Panel recommendations are approved, an Implementation Letter is issued to document the changes to the conditions in the Grant Confirmation. Implementation Letters are signed in accordance with the Signature Authority Procedure (SAP). |
OPERATIONAL POLICY NOTE

Country Coordinating Mechanism Funding

Approved on: 25 September 2019
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions & Support – CCM Hub
Sub-process Owner: Program Finance and Controlling Department

OVERALL OBJECTIVES

1. The Global Fund provides Country Coordinating Mechanism funding (CCM Funding) through performance-based agreements tied to achievement of performance objectives. CCM Funding aims to support:
   a. CCM core functions as set forth in the CCM Policy Including Principles and Requirements;
   b. CCM performance and maturity in oversight, key populations engagement, linkages, and CCM functioning, as set forth in the CCM Policy Including Principles and Requirements.

2. The framework below provides an overview of the CCM Funding process:

   ![CCM Funding Process Diagram]

   - **Assess CCM Funding Eligibility**
   - **Negotiate and Sign CCM Funding Agreement**
   - **Disburse & Report on CCM Funding**
   - **Close CCM Funding Agreement**

   **AGREEMENT PROCESS:** 1-2 MONTHS
   **FUNDING PERIOD:** UP TO 3 YEARS

OPERATIONAL POLICY

3. This Operational Policy Note (OPN) describes the rules and requirements that Country Coordinating Mechanisms (CCMs) must follow to receive CCM Funding.

4. Unless otherwise stated in this OPN or agreed in writing with the Global Fund, CCMs must comply with the Global Fund Guidelines for Grant Budgeting when using CCM Funding.

5. The CCM Hub, within the Grant Management Division, centrally manages CCM Funding, including the CCM Funding Agreement negotiation and execution, disbursement, monitoring & reporting, and closure processes. This is done in close consultation with Country Teams.

---

106 As set forth in the CCM Policy Including Principles and Requirements.
107 This document replaces previous CCM Funding OPN and CCM Funding Guidelines.
108 For purposes of this document, the term “Country Coordinating Mechanism” or “CCM” includes all coordinating mechanisms fulfilling CCM functions as they are set forth in the CCM Policy Including Principles and Requirements.
Assess CCM Funding Eligibility

6. Eligibility for CCM Funding is determined by compliance with the six CCM Eligibility Requirements, as set forth in the CCM Policy Including Principles and Requirements, until the last Global Fund grant is closed. Eligibility for CCM Funding does not guarantee an allocation of funding for CCMs.

7. Compliance with CCM Eligibility Requirements 1 and 2 is assessed by the Global Fund’s Access to Funding Department, at the time of submission of the national request for funding through the country’s allocation, as set forth in the CCM Policy Including Principles and Requirements, and in the OPN on Design and Review of Funding Request.

8. Compliance with CCM Eligibility Requirements 3 to 6 is assessed at the time request for funding stage and on a yearly basis, as set forth in the CCM Policy Including Principles and Requirements. An Eligibility and Performance Assessment must be carried out as an evaluation tool to assess compliance with CCM Eligibility Requirements 3 to 6.

Negotiate and Sign CCM Funding Agreement

CCM Funding Period and Amount

9. CCM Funding is approved for a three-year funding period, and no overlap between funding periods is allowed: the earlier CCM Funding Agreement is automatically terminated when the new CCM Funding Agreement is signed.

10. A CCM Funding Performance Framework is determined at the beginning of each funding period. The Performance Framework must be consistent with the country-context and composed of a set of indicators targeting the performance objectives each CCM is required to report on annually. Failure to meet the agreed objectives affects the disbursement decisions in subsequent years, in line with the principle of performance-based CCM Funding.

11. The Global Fund determines at the beginning of each funding period an annual funding envelope amount for each CCM (“Funding Envelope”), which is based on the achievements of the performance objectives set in the preceding funding period. The total CCM Funding Agreement amount corresponds to three Funding Envelopes, that are distributed and spent over the three-year funding period. This amount cannot be increased during the funding period.

12. For CCM Funding Agreement amounts higher than US$ 300,000, the CCMs must demonstrate mobilization of additional external funding, which must be at least 20 percent of the amount exceeding US$ 300,000. The CCMs must report annually on the use of such external funds.

---

109 The three-year funding period is not necessarily aligned with the national grant allocation cycle.
110 Indicators may be defined by CCM Hub in cooperation with CCMs, Global Fund Country Teams and other relevant teams within the Global Fund Secretariat.
13. The CCM Secretariat operational costs and CCM activities must be agreed and endorsed by all CCM members. They must be included in a Costed Work Plan by cost grouping, performance area, and respective budget cost. Costed Work Plans must be submitted to and approved by the Global Fund annually.

14. The following categories of operational costs and activities are eligible for CCM Funding:
   a. Human Resources (CCM Secretariat staff)
   b. Travel Related Costs (includes meeting expenses)
   c. External Professional Services
   d. Non-health Equipment (office furniture and equipment)
   e. Communication Materials and Publications
   f. Indirect and Overhead Costs

15. The Human Resources budget is validated as a fixed cost and cannot increase during the three-year funding period. Any annual salary increases aligned with national or organizational policy of the hiring entity must be budgeted for within the agreement. The budget shall not exceed 2 full-time equivalent headcounts.

16. CCM Secretariat staff must (i) be accountable to the CCM as a whole, and not to any single constituency or member, (ii) have clear terms of reference, (iii) be recruited through a transparent and documented process based on capacity for the role and global good practices, and (iv) be rigorously evaluated on a regular basis, with participation of all CCM constituencies. Global Fund support to HR costs is dependent on the performance of the CCM Secretariat.

17. Activities linked to the CCM’s role in strengthening sustainability and / or preparing for transition from Global Fund financing can be financed via the CCM Funding Agreements. CCMs whose country is notified by the Global Fund that they have disease components that are a “transition preparedness” priority or that they are receiving transition funding must use a portion of CCM Funding to implement activities that support the sustainability of the national responses to the three diseases. Other activities included in this category are those related to the continuation of the role of the CCM or activities to ensure the continuation of the principles of Global Fund CCMs in other national governance mechanisms after full transition from Global Fund financing.

---

111 Please refer to Instructions included in the Costed Work Plan template for more details on each category.
112 Employees supporting CCM Secretariat’s cleaning and other services not related to the CCMs’ core functions must be included in the category Indirect Overhead Costs.
113 This principle applies the approach set forth in the Sustainability, Transition and Co-financing Policy (GF/B35/04 – Revision 1 Board Decision).
114 Under the Sustainability, Transition and Co-financing (STC) Policy, all Upper Middle Income (UMI) countries (regardless of disease burden) and Low Middle Income (LMI) countries with disease components that have a low burden are considered transition preparedness priorities. While this does not mean that all the disease components in this category are transitioning from Global Fund financing immediately, it does mean that these components should proactively prepare for transition from Global Fund financing and that transition considerations should be included in Funding Requests, grant design, program design, and co-financing commitments. For more information, please consult the STC Guidance Note.
115 While these activities will depend heavily on country context, they may include activities such as strengthening oversight of sustainability or transition work-plans, oversight of compliance with co-financing commitments, support for implementation of recommendations from Transition Readiness assessments or other comparable analyses, etc. More information on the Global Fund’s overall approach to sustainability and transition can be found in the Global Fund’s STC Guidance Note.
18. CCMs must allocate at least 15% of the CCM Funding Agreement amount to support
counsituuency engagement for non-governmental sector activities, in order to facilitate non-
governmental constituency consultations, including civil society and key population groups,
and to promote and improve the quality of stakeholder participation. Failure to comply with
this requirement may affect disbursement decisions in subsequent years and calculation of
the Funding Envelope.

19. The use of CCM Funding has the following limitations:
   a. cannot be used to remunerate CCM members;
   b. cannot be used to finance Principal Recipient’s activities;
   c. cannot be used for consultancy costs associated with writing national funding
      requests for Global Fund financing;\textsuperscript{116}
   d. cannot be used to finance international travels;
   e. cannot be used to purchase a vehicle, nor for long-term lease of a vehicle;
   f. cannot be used for CCM member per diems, except for CCM members representing
      Civil Society; and
   g. cannot be used to cover travel costs for CCM members, with the exception of Civil
      Society representatives.

20. The costs included in the Costed Work Plan are reviewed and validated by the Global Fund to
determine their eligibility, reasonableness, and consistency with local prices, salaries,
operating costs, and historical reports. The CCM Hub Manager approves the Costed Work
Plan.

**CCM Funding Agreement**

21. CCM Funding Agreements are signed by the Global Fund, the CCM and, when applicable, a
third entity acting as CCM Funding Recipient.

22. The CCM must nominate two signatory authorities for the signature of a CCM Funding
Agreement: CCM Chair or CCM Vice-chair\textsuperscript{117} and a Civil Society representative.

23. In cases where the CCM is not a legally incorporated body, a CCM Funding Recipient is
designated by the CCM to be responsible for receiving and managing CCM Funding on behalf
of the CCM. The Global Fund verifies the legal capacity of this entity to receive and manage
funds with the support of the Local Fund Agent (LFA).

24. All CCM and CCM Funding Recipient signatory authorities are subject to the Global Fund’s
anti-terrorism screening.

25. The CCM Hub Manager is the Global Fund’s signatory authority for CCM Funding
Agreements, as well as related amendments and disbursement decisions\textsuperscript{118}.

\textsuperscript{116} Country Dialogue consultations can however be supported through CCM Funding.
\textsuperscript{117} A different CCM member, duly appointed and acting on behalf of the CCM Chair or CCM Vice Chair, could sign the agreement.
\textsuperscript{118} The signature of CCM Funding Agreements, related disbursements and amendments is regulated by the Global Fund Signature
Authority Procedure.
26. A CCM Funding Agreement must incorporate:
   a. Agreement Face Sheet
   b. Costed Work Plan for Year 1119
   c. CCM Funding Performance Framework for Year 1120
   d. Standard Terms and Conditions.

27. A CCM Funding Agreement enters into force once it has been signed by all the necessary signatory authorities, as detailed in the CCM Funding Agreement Face Sheet.

28. For transparency purposes, the Global Fund reserves the right to publish the CCM Funding Agreements, including the CCM Funding Performance Frameworks and the Costed Work Plans, on its website.

29. Amendments to CCM Funding Agreements must be done through Implementation Letters or Notifications Letters. They become effective after the signature and written acknowledgment of the modification by the signatory authorities, as detailed in the CCM Funding Agreement Face Sheet.

**Disburse & Report on CCM Funding**

**Disbursement Decision**

30. CCM Funding disbursement decisions are taken annually and approved by the CCM Hub Manager. The first disbursement is processed after the CCM Funding Agreement is signed. The subsequent disbursements are conditioned upon reporting on expenditure and achievement of the performance objectives set forth in the Performance Framework. Late reporting may result in a reduction in the subsequent disbursement decision, which the Global Fund reserves the right to apply.

31. The Global Fund deducts from the disbursement decisions the in-country cash balance, as determined by the Global Fund in its sole discretion, from the preceding CCM Funding Agreement.

32. Failure to meet the performance objectives reduces the subsequent disbursement decisions, with performance-based reductions up to 10% per indicator targeting CCM’s performance, and up to 5% per indicator targeting CCM Secretariat’s performance121. The Global Fund determines the rate to be applied based on the CCM’s historic and overall performance, absorption rate and Funding Envelope.

---

119 Costed Work Plans for the succeeding funding years are approved annually. No Implementation Letters are required.
120 CCM Funding Performance Frameworks for the succeeding funding years are approved annually. No Implementation Letters are required.
121 The base used to apply the performance-based reductions is the Funding Envelope.
Reporting Requirements

33. Notwithstanding the involvement of the CCM Secretariat, and the CCM Funding Recipient when applicable, CCMs are solely responsible and accountable for the implementation of their Costed Work Plans, and reporting obligations set forth in this OPN.

34. CCMs must document all activities and operational costs incurred during a funding period, in accordance with the Standard Terms and Conditions of the CCM Funding Agreements.

35. No later than one month after the completion of each funding year, CCMs must report to the Global Fund their expenditure and achievement of the performance objectives set forth in their Performance Framework, using Global Fund’s templates.

36. The unspent funds at the end of a funding year may be reprogrammed and included in the Costed Work Plan for the succeeding funding year within the same funding period and for the implementation of CCM activities without seeking Global Fund’s written approval. The in-country cash balance at the end of a three-year funding period is deducted from disbursements for the next CCM Funding Agreement, or, in the absence of a new CCM Funding Agreement, returned to the Global Fund.

37. The Global Fund reserves the right to request at the end of each funding year, based on in-country risk level, financial review, audit, or any other action that it deems necessary to ensure CCM’s accountability, as set forth in the Standard Terms and Conditions of the CCM Funding Agreement, through an external agent or LFA.

38. Expenses incurred must be verified at the end of each 3-year funding period by an external audit. The Global Fund reserves the right to request at any time a financial review, audit, or any other action that it deems necessary to ensure CCMs’ accountability, as set forth in the Standard Terms and Conditions of the CCM Funding Agreement, through an external agent or LFA.

39. A recovery process (as defined in the Global Fund Budgeting Guidelines) is triggered when the Global Fund determines that expenditures incurred by the CCM, or when applicable by the CCM Funding Recipient, were not compliant with the relevant CCM Funding Agreement, this OPN or the Global Fund Budgeting Guidelines.

40. Cash refund of the full recoverable amount in the currency in which the funds were disbursed is the default mode of resolution for all recovery cases. Where the recovery and other possible leverages have failed to resolve a recovery matter, the Global Fund’s Recoveries Committee may approve, without limitation, a reduction to a CCM’s annual Funding Envelope by an amount equal to double the outstanding recoverable amount122.

---

122 Refer to the Recovery Process set forth in the Global Fund Guidelines for Grant Budgeting.
Close CCM Funding Agreement

Types of closure

41. There are three types of closure of CCM Funding Agreement with differentiated requirements.

42. **Closure due to end of CCM Funding:** CCM Funding stops being allocated to the CCM.

43. **Closure due to a change of the CCM Funding Recipient:** the CCM decides to transfer the CCM Funding Recipient role from one entity to another. CCM Funding is continued through a new CCM Funding Agreement signed with the newly appointed CCM Funding Recipient.

44. For the two above-mentioned cases, the CCM must complete the following requirements to close the CCM Funding Agreement:
   
a. Report on the last year of expenditure\(^{123}\) and achievement of performance targets;
   
b. Transfer the in-country cash balance to the new Funding Recipient, or returning to the Global Fund\(^{124}\);
   
c. Clear outstanding commitments and refund to the Global Fund non-eligible expenses;
   
d. Account for and transfer or dispose non-cash assets: the outgoing entity (CCM or CCM Funding Recipient) must complete an inventory of non-cash assets procured with CCM Funding. In accordance with the [Standard Terms and Conditions](#) of the CCM Funding Agreements, these assets must be transferred to the new CCM Funding Recipient or, in case of termination of CCM Funding, to national entities. The transfer must follow the necessary legal processes of the country, be endorsed by CCM members and approved in writing by the Global Fund.

45. **Closure due to end of a three-year funding period:** CCM Funding is continued through a new CCM Funding Agreement signed by the same parties. CCMs must in this case:
   
a. Report on last year expenditure and achievement of performance targets; and
   
b. Clear\(^{125}\) outstanding commitments and refund of non-eligible expenses.

---

\(^{123}\) The report must be audited and, if applicable, subject to LFA verification, as described in Paragraph 38.

\(^{124}\) The choice between the two options depends on CCM Funding Recipient’s regulations, and timeline for the verification of closing cash balance.

\(^{125}\) The report must be audited and, if applicable, subject to LFA verification, as described in Paragraph 38.
Annex 1. Definition of Terms

1. **Country Coordinating Mechanisms (CCM):** mechanisms for public-private partnership in the coordination with disease programs at country and/or regional level, as set forth in Paragraphs 7 to 12 of the [CCM Policy including Principles and Requirements](#).

2. **CCM Secretariat.** The CCM Secretariat performs day-to-day operations on behalf of the CCM, supports the implementation of the CCM’s decisions, facilitates the participation of all CCM members in CCM meetings and decision-making processes and helps the CCM achieve its strategic mandate. The CCM Secretariat’s duties include extensive coordination, meeting logistics and oversight visits, and communication between the Global Fund and in-country (or regional, as the case may be) stakeholders. To limit actual and potential conflicts of interest, the CCM Secretariat shall be independent from Principal Recipients (PRs), Sub-Recipient (SRs), and other implementing entities.

3. **CCM Funding Recipient:** The CCM Funding Recipient is a legally incorporated body with the authority to enter into legally binding agreements with third parties. When a CCM does not comply with these requirements, it designates a third entity responsible for receiving and managing funds on its behalf. As set forth in the [Standard Terms and Conditions of CCM Funding Agreements](#), the CCM Funding Recipient shall ensure that all funds are prudently managed and shall ensure all the necessary actions to ensure that the funds are used solely to pay for activities in accordance with the agreed Costed Work Plan.
Private Sector Co-Payment Mechanism for ACTs

Issued on: 16 December 2013
Purpose: To provide guidance on operationalizing the establishment of a Private Sector Co-payment Mechanism for ACTs in Global Fund Grants

OVERALL OBJECTIVES

1. The Private Sector Co-payment Mechanism (“Co-payment Mechanism”) is a financing model to expand access to artemisinin-based combination therapies (ACTs) in the private sector, particularly in countries where the private retail sector is a major provider of malaria case management. It is based on the results of the Affordable Medicines Facility-malaria (AMFm) Phase 1 Independent Evaluation, which showed that the combination of price negotiations, a subsidy provided directly to manufacturers, and large-scale mass communications led to rapid and large changes in price, availability, and market share of quality-assured ACTs.

2. This OPN provides guidance to relevant parties (including CCMs, PRs, and the Global Fund Secretariat) on how to establish such a mechanism for those countries that choose to allocate Global Fund funding to the Co-payment Mechanism in new malaria grants or to integrate the Co-payment Mechanism into existing malaria grants supported by the Global Fund. Annexes 1 and 2 describe the process for integrating the Co-payment Mechanism into existing and new malaria grants, respectively.

POLICY AND PRINCIPLES

Co-payment Mechanism Components

3. The Co-payment Mechanism can be used for quality-assured ACTs only (as described in the first footnote of this OPN) and is limited to private for-profit and private not-for-profit first-line buyers. Public sector entities will continue accessing ACTs through traditional grant procurement channels.

4. The Co-payment Mechanism model is comprised of three elements:
   a. **Price negotiations**: Regular negotiations by the Global Fund Sourcing Department at the global-level with manufacturers to establish maximum allowable ex-factory prices of quality-assured ACTs procured using Global Fund grant resources;
   b. **Subsidy provided directly to manufacturers**: Further reductions of the price paid by first-line buyers through a partial payment made directly to manufacturers using grant funds for the procurement of ACTs (a “co-payment”); and
   c. **Supporting interventions**: Country-level activities funded by Global Fund grants or

---

126 An assessment by the World Health Organization of the feasibility to include diagnostic testing in the Co-payment Mechanism has been submitted to the Global Fund, and some countries have requested funding for scaling up diagnostic testing in the private sector. The results of this study will help shape operationalization of the co-payment mechanism for diagnostic testing, in addition to any early experience of these countries. Based on this work, this OPN may be amended for the inclusion of co-payments for malaria diagnostic tests or a separate OPN will be developed subsequently.

127 First-line buyers for the Co-payment Mechanism include international, regional and national buyers/importers from the private not-for-profit and for-profit sectors who purchase ACTs directly from the manufacturer.

128 A partial payment is made by the Global Fund directly to manufacturers on behalf of eligible first-line buyers to cover a proportion of the ex-factory price of quality-assured ACTs plus freight and insurance. The first-line buyer is responsible for any remaining costs of the ACTs not covered by the co-payment plus all direct in-country supply-chain costs, including distribution and storage.
the national government to facilitate the safe and effective scale-up of access to ACTs in the private sector. The following activities represent the minimum bundle of activities identified by the AMFm Phase 1 Independent Evaluation as essential to achieve the greatest impact.

- Mass communication campaigns to increase public awareness about the co-payment and important attributes of co-paid products. These messages may complement existing campaigns to improve malaria case management and the use of ACTs in the public and private sectors.
- Private sector provider training.
- Periodic (e.g. quarterly) monitoring of retail price and availability implemented by an independent entity in order to guide management decisions on implementation of the Co-payment Mechanism by the PR and Co-payment Task Force.\textsuperscript{129}
- Policy and/or regulatory changes at the country level (e.g. banning sales and importation of artemisinin monotherapies, granting waivers for import duties and taxes).

**Accessing Funding for the Co-payment Mechanism**

5. The decision by the CCM to include the Co-payment Mechanism in a funding request to the Global Fund or to allocate funding to the Co-payment Mechanism in their existing Global Fund–supported malaria programs\textsuperscript{130} should be informed by the country’s relevant national malaria control strategy, which defines the role of the private sector in achieving a country’s malaria case management targets.\textsuperscript{131}

6. The review and approval of a request for funding the Co-payment Mechanism will be in accordance with the access to funding process. Discussions about funding for the Co-payment Mechanism should be done through the country dialogue process. Once a decision is made, the Concept Note should indicate relevant parameters and design factors to implement the Co-payment Mechanism in a given context,\textsuperscript{132} including but not limited to, key supporting interventions (described above, to ensure maximum impact of the subsidy), the role of diagnostic testing based on national guidelines and regulatory policies.

\textsuperscript{129} Standard, validated methodologies exist that permit a systematic approach to data collection and analysis without a hefty price tag for monitoring availability and price at the retail level; examples of the tracking survey approach used across AMFm Phase 1 pilots are available.

\textsuperscript{130} Countries which participated in AMFm Phase 1 will be able to allocate funding to the Co-payment Mechanism through existing Global Fund grants through reprogramming of existing malaria grants, including at the time of Grant renewal.

\textsuperscript{131} The Co-payment Mechanism should be implemented in the context of a country’s long-term strategy to increase access to basic primary health services, given that all patients, whether presenting with fever in the public, private and/or community sectors, should be able to receive a diagnostic test and appropriate treatment, and be captured by national reporting systems. While the availability of diagnostic testing in the private sector remains low and there are limited mechanisms for private retailers to report cases through national malaria control systems, the Co-payment Mechanism provides a proven mechanism to expand access to quality-assured malaria treatment through the private sector in the immediate/short-term.

\textsuperscript{132} Please see the [Technical Brief on Malaria Case Management in the Private Sector](#).
7. **Co-payment Task Force:** The PR will be required to establish an operational Co-payment Task Force responsible for providing guidance (i.e., including minimizing conflicts of interest and monitoring contracting), supporting the PR on the implementation of the Co-payment Mechanism (e.g., first-line buyer conditions of participation, reviewing and approving proposed co-payment approvals and taking action on the results of the retail price and availability surveys and first-line buyer spot checks), and linking with the country PSM coordination mechanism. The Task Force should be comprised of relevant stakeholders, including but not limited to: government, private sector first-line buyers, professional societies, regulatory bodies, civil society organizations/non-governmental organizations and academia. The CCM (through its Oversight committee) will provide oversight of the implementation of the Co-payment Mechanism, as per its mandate.

8. **Principal Recipient:** The CCM may consider appointing a separate, public or private sector PR to be responsible for the Co-payment Mechanism. The PR must have the capacity to implement the activities described in Table 1 as well as meet the relevant minimum standards, in close collaboration with the CCM and private sector.

9. **First-line Buyer Agreements:** With the support of the Co-payment Task Force, the PR will maintain First-line Buyer Agreements with all eligible first-line buyers. These non-negotiable agreements, pursuant to a standard form provided by the Global Fund, are signed by the PR and first-line buyer and establish the terms and conditions with which first-line buyers must comply in order to participate in the Co-payment Mechanism. The PR, in consultation with the Co-payment Task Force, sets the conditions of participation, in line with standards utilized during AMFm Phase 1. At a minimum, first-line buyers should be from the private for-profit or private not-for-profit sector, with all regulatory licenses, waivers, or other governmental approvals, if required and as relevant, to import, sell, market, store and distribute ACTs in the host country; however the PR and Co-payment Task Force, may opt to prioritize first-line buyers based on, for example, distribution networks, supply capacities, or other characteristics.

10. First-line buyers will not be treated as sub-recipients under the Grant Agreement. However, the First Line Buyer Agreement will contain legal obligations under which first line buyers will be required to, among other things, appropriately purchase and re-sell/distribute products procured under the Co-payment Mechanism and document such activities, and the first line buyer will be responsible to the PR should they fail to do so.

11. The PR will be responsible, under the Grant Agreement between the PR and the Global Fund, for compliance by the first line buyer with its obligations under the First Line Buyer Agreement, as if they were its obligations. The PR shall also be required to conduct periodic

---

133 Countries that established operational AMFm Task Forces in AMFm Phase 1 may wish to build on these existing bodies to fulfil these functions.
spot checks of first-line buyers for compliance with their obligations. Special Terms and Conditions will be added to the PR's Grant Agreement to reflect this arrangement. On behalf of the Secretariat, the LFA will verify compliance of a smaller sample of first-line buyers on an annual basis.

FINANCING ARRANGEMENTS

Figure 2. Co-payment Mechanism Funding and Commodity Flow

12. **Disbursement.** Approved funding for the Co-payment Mechanism will not be released to the PR but will be managed by the Global Fund Secretariat through a pooled procurement sub-account and based on the Co-payment Mechanism Implementation Arrangements. The Co-payment Mechanism budget will be disbursed to the pooled procurement account in line with the grant disbursement schedule, and no co-payment commitment for any ACT order can be made until sufficient funding has been transferred. The full budget for co-payments (e.g., for 12 months if on an annual disbursement schedule) will be disbursed (i.e., no partial cash transfer).

13. **Co-payment Approval and Invoicing System.** The Global Fund Sourcing Department will manage the co-payment approval and invoicing system.

   a. **Approvals:** Using an automated and transparent process, the Global Fund Sourcing Department will prepare a periodic (e.g., quarterly) proposal for co-payment allocation against requests for co-payment submitted by manufacturers on behalf of eligible first-line buyers (according to the conditions of participation set by the PR and described in the Implementation Arrangements plan) for all grants which have allocated resources to the Co-payment Mechanism. The “demand-shaping levers”\(^{134}\) (set by Co-payment Task Force) and first-line buyer capacity assessments described in the Co-payment Mechanism Implementation Arrangements will be built into the allocation system and can be updated over the life of the grant, as needed. PR approval of the quarterly allocation will be built into workflow management before the co-payment commitment is processed through the GFS-based Co-payment Approval and Invoicing System.

   b. **Invoices:** Manufacturers will submit invoices to the Global Fund, along with acceptable proof of delivery. These will be reviewed and approved by the Co-payment Mechanism focal point at the Global Fund Secretariat.

   c. **Public Reporting/Tracking of Co-payment:** Each round of co-payment allocation will be automatically posted on a public Web Report. This Web Report will include all relevant information (e.g., prices, co-payment, products and quantities procured and delivered, manufacturers, first-line buyers) needed for monitoring co-payment approval. All co-payment approvals and invoices will be tagged with the relevant grant number and will directly interface with the Global Fund’s Price and Quality Reporting mechanism (PQR) and the relevant finance and grant management information systems.

---

\(^{134}\) Demand shaping levers are order prioritization criteria used to determine which requests for co-payment are to be approved in the event that demand for co-payment exceeds available financing. Some examples of demand shaping levers applied during AMFm Phase 1 can be found in Annex 3 of this OPN.
14. Reprogramming. The PR (with CCM endorsement) may reprogram funding to and from the ring-fenced Co-payment Mechanism funding for a particular grant, once approved, in line with grant management processes and policies. Reprogramming from the ring-fenced Co-payment Mechanism funding is limited to funds which have not already been committed to ACT co-payments.

PROCUREMENT AND SUPPLY MANAGEMENT ARRANGEMENTS

15. Through the Co-payment Mechanism, grant funds will be used to make a co-payment towards procurement which is carried out by private sector first-line buyers; all direct in-country supply-chain costs, including distribution and storage, will be borne by the private sector, not by the Global Fund grant.

16. The PR will complete components of the Implementation Assessment Tool describing the following elements: list of ACTs eligible for co-payment, conditions of participation for first-line buyers, first-line buyer assessment, list of first line buyers if available, subsidy level and demand levers (described below). The PR will complete the Modular tool detailing the quantification for ACTs eligible for copayment, the co-payment subsidies budget per year (i.e. copayments as well as freight and insurance) and all costs related to product management that will be funded by the grant.

   a. First-line Buyer Assessment: The PR will describe a maximum annual allocation of co-paid ACTs for each first-line buyer, based on an assessment of distribution network and capacity by the PR, with guidance by the Co-payment Task Force. The proposed allocation across first-line buyers will be approved by the Country Team (LFA review, as needed), and revisited every 6 months in light of requests for co-payment received, new first-line buyers registered, or the findings from first-line buyer spot checks and retail price tracking surveys.

   b. ACT Quantification: Estimating the total market for antimalarials in the private sector can be a challenge, due to the lack of available data and the fact that the private sector market is based on demand. The PR should estimate the ACT needs based on the country’s overall case management strategy or link to any national gap analysis.

   c. Demand Levers: The Co-payment Task Force will establish the parameters for the automated system to allocate co-payment managed by the Global Fund Secretariat, particularly in the event that demand for co-payment is greater than the available funding.\[^{135}\]

17. Procurement: Each first-line buyer will procure ACTs from eligible manufacturers with signed agreements with the Global Fund at or below the maximum prices negotiated by the Global Fund Sourcing Department. The first-line buyer is responsible for clearance/import duties and all storage and in-country distribution costs. Through the Co-payment Mechanism, grant funds for co-payment and transport to the first port of entry are paid directly to the manufacturer after confirmation of delivery.

18. Quality Assurance: The Global Fund’s Quality Assurance Policy will apply to procurement, pre-shipment inspection and quality control testing of ACTs purchases through the Co-payment Mechanism. PRs will be responsible for allocating resources for post-shipment inspection and quality monitoring for products co-paid on behalf of private sector first-line buyers.

REPORTING ARRANGEMENTS

Figure 3. Co-payment Mechanism Data and Reporting Arrangements

\[^{135}\] Please see Annex 3 for examples of possible demand levers.
19. In addition to monitoring progress against the National Malaria Strategy in the modular tool, which may include tracking the capacity of the health system to report out on malaria testing and treatment, private sector grants with allocations to the Co-payment Mechanism will be required to report out on the following:

a. Co-payment commitments and deliveries: The Secretariat will make all relevant information (e.g., prices, co-payment, products and quantities procured and delivered, manufacturers, first-line buyers) available via a publicly available Web Report.

b. Implementation of key supporting interventions: The price and availability surveys will provide visibility regarding the retail level, and findings from these reports will be submitted by the PR to the CCM, Co-payment Task Force and Secretariat. If the implementation of key supporting interventions (namely, mass communication campaign) is not well synchronized with the arrival in country of co-paid ACTs, a decision by the Co-payment Task Force will need to be taken regarding whether to continue co-payment approvals in the absence of critical supporting interventions.

c. Programmatic Reviews and Thematic Evaluations: As the Co-payment Mechanism will be part of the National Strategy, this will be assessed during periodic Malaria Program Reviews. In addition, a country may decide to implement a special “thematic evaluation” of the Co-payment Mechanism after two years to inform decisions regarding continuation of the investment. Findings from national-level household surveys (DHS, MIS, MICS, ACTwatch) can be considered.

Table 1: Summary of Co-payment Mechanism Roles and Responsibilities
Annex 1: Process for integrating the Private Sector Co-payment Mechanism into existing malaria grants
Annex 2: Process for integrating and implementation of the Private Sector Co-payment Mechanism in new grants
Annex 3: Description of examples of “demand levers” applied by the Secretariat at the end of AMFm Phase 1
## RESPONSIBILITIES AND PROCESSES

### Table 1: Summary of Co-payment Mechanism Roles and Responsibilities

<table>
<thead>
<tr>
<th>Actor</th>
<th>Responsibility</th>
</tr>
</thead>
</table>
| **National Government**           | • Develop National Malaria Control Strategy, defining role of the private sector in malaria case management  
• Provide supportive policy environment for the Co-payment Mechanism (e.g., waivers on import duties/taxes)                                                                                                                                                                                                                                                                                                                                                                          |
| **Country Coordinating Mechanism**| • Include the Co-payment Mechanism in Concept Note (or allocate funding to the Co-payment Mechanism in the existing malaria grants) and select implementing PR  
• Ensures that the CCM Oversight Committee has included 'Co-payment' related activities in its scope of oversight                                                                                                                                                                                                                                                                                                                                                   |
| **Co-payment Task Force**         | • Advise and provide guidance to PR on the implementation of the Co-Payment Mechanism (including PR's review and approval of results of each round of co-payment allocation) and minimize potential conflicts of interest  
• With PR, establish and periodically review first-line buyer conditions of participation, proposed allocation across first-line buyers and demand shaping levers  
• Monitor co-payment mechanism contracting arrangements  
• Take action on the results of retail price and availability surveys and first-line buyer spot checks as necessary  
• Link with the country PSM coordination mechanism                                                                                                                                                                                                                                                                                                                                                   |
| **Principal Recipient**           | • Assess first-line buyer capacity (storage, distribution network/coverage) to inform proposed allocation across first-line buyers with guidance from the Co-payment Task Force  
• Maintain and oversee First-line Buyer Agreements  
• Conduct periodic spot checks of first-line buyers for compliance with terms and conditions of the First-line Buyer Agreement  
• Manage implementation of the grant that includes the Co-payment Mechanism, including execution of the approved Implementation Arrangements plan and supporting interventions  
• Ensure that grant funds are used solely for program purposes and properly managed in implementing the Co-payment Mechanism  
• With guidance from Co-payment Task Force, review, validate and approve results of each round of co-payment allocations proposed by the Secretariat in accordance with demand levers and first-line buyer assessments                                                                                                                                                                                                                 |
| **First-line Buyer**              | • Procure and distribute co-paid ACTs in accordance with terms and conditions of First-line Buyer Agreement                                                                                                                                                                                                                                                                                                                                                             |
| **LFA**                           | • As requested by the Secretariat, verify compliance of a sample of first line buyers with terms and conditions of the First-line Buyer Agreement on an annual basis                                                                                                                                                                                                                                                                                                                                                 |
| **Global Fund Secretariat**       | **Country Team:**  
• Lead Global Fund engagement with Co-payment Mechanism-implementing country throughout all stages of grant cycle  
• Manage LFA engagement for First-Line Buyer spot checks commissioned by the Global Fund  
• Review first-line buyer assessments and co-payment allocations for compliance with the Co-payment Implementation Arrangements Plan and potential conflicts of interest  

**Sourcing Department:**  
• Own and protect ACTm™ logo (as its use will be licensed to manufacturers and appropriate entities responsible for marketing campaigns and communication activities in countries making use of the Co-payment Mechanism)  
• Negotiate prices of ACTs with manufacturers including applicable ceiling prices  
• Establish and manage Master Supply Agreements with manufacturers subject to consultation and sign-off from the Legal and Compliance Department  
• Manage co-payment approval and invoicing system, including periodic co-payment allocation and Web Report  

---

The PR will describe the list of ACTs eligible for co-payment, conditions of participation for first-line buyers, first-line buyer assessment, list of first line buyers if available, subsidy level and demand levers in the Co-payment Implementation Arrangements Plan.
20. The integration of funding for the Co-payment Mechanism into Global Fund grants requires the CCM and PR to take on more responsibility for the management of co-payment funding (relative to AMFm Phase 1). The CCM and PR are responsible for allocating resources (quantification, budgeting, rationing), exercising oversight of first-line buyers (including management of conflicts of interest), and commissioning quarterly price and availability surveys. These modifications imply some changes in the level of risks associated with the Co-payment Mechanism.

<td></td>
</tr>
</tbody>
</table>

\[137\] For the three grant agreements incorporating the Private Sector Co-payment Mechanism signed prior to the issuance of this OPN, “Identify Co-Payment Task Force” and “Initiate assessment of first-line buyers” (per Step 3) are expected to be the only pre-grant implementation steps that will still need to be undertaken upon issuance of this OPN. For these grants, to avoid a potential interruption in supplies of co-paid ACTs, PRs may request the Secretariat to continue to manage the co-payment allocations on their behalf for a three month grace period while steps 7 to 11 are completed; in this instance, the PR will agree that one quarter of the annual allocation be transferred to the pooled procurement account for co-payments.

<td>Country Teams prepare their program scorecard in advance of the TRP and GAC meeting. They also prepare a presentation, and address questions and provide clarifications during the TRP review meeting (tbc).</td>
</tr>
</tbody>
</table>

## Technical Review of the Concept Note

| 11 | TRP | The TRP independently reviews all funding requests for strategic focus and technical soundness, including the rationale for inclusion of the Private Sector Co-payment mechanism. It makes recommendations to the GAC on the award of available incentive funding, and what unfunded quality demand should be added to the Register of Unfunded Quality Demand. It also makes technical recommendations on what needs to be clarified or adjusted during grant-making or grant implementation. |

## GAC Review (prior to grant-making)

| 12 | GAC | After the TRP review, the Secretariat’s Grant Approvals Committee (GAC) reviews the Concept Note and recommends the upper ceiling and related parameters for grant making. |

## Grant making

| 13 | Co-payment Task Force and PR | Finalize ACT quantification, first-line buyer conditions of participation, annual procurement expected from private sector first-line buyers, detailed budget for co-payment (including freight and insurance). |
| 14 | PR | Complete assessment of eligible first-line buyers. |
| 15 | Co-payment Task Force and PR | Upon completion of first-line buyer assessment and based on the findings, communicate to the Secretariat the proposed annual co-payment allocation split across first-line buyers. (This may be periodically updated and resubmitted for consideration in light of requests for co-payment received, new first-line buyers registered, or the findings from first-line buyer spot checks and retail price tracking surveys.) |
| 16 | CT and Sourcing Department | Review and approve proposed allocation across first-line buyers (with LFA review, as needed). |

## Grant approval

| 17 | GAC | The GAC reviews the outcomes of the grant making stage and decides whether to recommend the proposed grant for Board approval. |
| 18 | Board | Board approves the grant through an electronic report |

## Grant implementation

<p>| 17 | PR | Ensure that the Secretariat has received copies of signed First-Line Buyer Agreements for all participating first-line buyers and implement key supporting interventions, including price and availability surveys. |
| 18 | CT and Sourcing Department | When updated, review and approve proposed allocation across first-line buyers (with LFA review, as needed). |
| 19 | Sourcing Department | Propose co-payment allocation across first-line buyers against requests received for co-payments in accordance with demand levers and submit to PR for review and approval. |
| 20 | PR (under oversight of) | Review, validate and approve results of each round of co-payment allocation proposed by the Secretariat in accordance with demand levers. |</p>

Co-Financing

Issued on: 31 March 2017
Issued by: Strategic Information Department
Approved by: Executive Grant Management Committee
Purpose: To describe the operational policies and processes in the grant management lifecycle necessary to fulfill the Board’s requirements for ‘co-financing’.

BACKGROUND AND OBJECTIVES

3. The Global Fund’s co-financing policy is set forth in the Global Fund’s Sustainability, Transition and Co-financing (STC) Policy; which is aimed at
   1. Enabling long term sustainability of Global Fund supported programs and successful transitions from Global Fund financing;

4. This Operational Policy Note (OPN) describes the key grant management processes through which to implement the co-financing policy for grants arising from the 2017-2019 allocation period onwards. The OPN also describes implications to grants in countries due to non-compliance with willingness to pay requirements under the 2014-2016 allocation period.

KEY PRINCIPLES

1. The STC policy aims to strengthen the sustainability and impact of Global Fund supported programs through measures that include stimulating increased co-financing for the health sector, health systems, and for the three disease programs.

2. Co-financing, in the context of the Global Fund, pertains to domestic public resources and domestic private contributions that finance the health sector and the national response against HIV, tuberculosis and malaria. Domestic public resources include: government revenues, government borrowings, social health insurance, and debt relief proceeds (including Debt2Health arrangements with the Global Fund). With the exception of loans and debt relief, all other forms of international assistance, even when channelled through government budgets, are not considered as co-financing.

3. The operationalization of the co-financing policy and requirements is guided by the following principles:
   a. **Maximizing leveraging of domestic financing.** The overarching goal of country engagement on co-financing is to leverage additional domestic financing in line with overall health need, National Strategy Plan targets, and fiscal capacity of the country.

---

138 The Global Fund Sustainability, Transition and Co-financing Policy, as set forth in Annex 1 to GF/B35/04 – Revision 1, and approved by the Board in April 2016 under decision point GF/B35/DP08: https://www.theglobalfund.org/media/4221/bm35_04_sustainabilitytransitionandcofinancing_policy_en.pdf
141 Co-financing requirements (previously called counterpart financing and willingness-to-pay requirements) for grants arising from the 2014-2016 allocation period is as set forth in the OPN on Counterpart Financing.
142 Restricted to verifiable contributions from domestic corporations and philanthropies that finance National Strategic Plans (excludes direct out of pocket expenditures borne by households).
143 This pertains to expenditure from loan proceeds in a grant implementation period and excludes repayment and interest.
144 Debt2Health contributions to the Global Fund are considered towards co-financing of disease programs subsequent to Board decision GF/BM32/DP13.
While this OPN specifies minimum additional co-financing investments required to access the full Global Fund allocation across country income groups, the overall focus is to use provisions of the co-financing policy to maximize leveraging of domestic financing;

b. **Systematic assessment of co-financing, and implementation of the policy.** It is important to more systematically enforce implications of non-compliance with co-financing requirements, while at the same time providing maximum flexibility for Country Teams and the Secretariat to enforce such implications in a manner that minimizes negative consequences on grant performance and overall impact. This includes flexibility to enforce implications either via current grants or future allocations, taking into account relevant contextual factors;

c. **Tailoring requirements and differentiation.** Co-financing requirements are tailored along the development continuum according to income level, disease burden and other contextual factors to enable long-term sustainability and successful transitions of disease programs from Global Fund support. The Secretariat’s approach to engaging with countries and monitoring co-financing commitments is also differentiated to focus efforts on mitigating sustainability and transition risks;

d. **Alignment with existing in-country and Global Fund systems and processes.** Rather than establishing parallel processes, co-financing considerations should be aligned to country systems and processes, to the extent possible. For the Global Fund, the implementation of the co-financing policy is integrated with existing operational policies and processes throughout the grant lifecycle. Unless otherwise specified, the processes for implementing the co-financing policy shall follow the existing decision-making processes for access to funding and grant management; and

e. **Clear communication of co-financing requirements and implications of non-compliance to key country stakeholders.** All communication on co-financing requirements and implications of non-realization of commitments should be addressed to key stakeholders beyond the Principal Recipient and Country Coordination Mechanism, including Ministry of Finance, the Ministry of Planning and other authorities, as relevant. In general, Country Teams should seek to communicate the implications of non-realization of commitments to the highest authorities to which the Global Fund Secretariat has access and with whom the Global Fund has an established relationship.

**POLICY**

**Scope and Applicability:**

6. All countries receiving an allocation from the Global Fund for a particular disease component must comply with the co-financing requirements to access the allocation, irrespective of whether the Principal Recipient is a governmental or non-governmental (including the private sector) entity.

7. Multi-country priorities (comprised solely of catalytic funding), non-CCM applicants and countries included in multi-country grants that are no longer eligible for a standalone Global Fund grant for the same disease component are exempt from co-financing requirements. However, countries included in multi-country grants composed of individual allocations must show that they comply with co-financing requirements, on a country by country basis. Applicability of co-financing requirements for such countries is communicated through the Allocation Letter.

8. Co-financing requirements for accessing funds beyond country allocations\(^{145}\), will be subject to the rules governing the use of such funding, if applicable.

---

\(^{145}\) OPNs on Access to Funding, Grant-making and Approval, Grant Revisions, Annual Funding Decisions and Disbursements and Signature Authority Procedure as of date

\(^{146}\) E.g. catalytic funds or additional funding through portfolio optimization as per terms of GAC approval
Core Co-financing Requirements

9. The STC Policy outlines two core Co-Financing Requirements that are prerequisites for countries to access the full allocation. These requirements serve to strengthen the overall financing for the health sector and the sustainability of HIV/AIDS, TB and/or malaria programs. Countries must demonstrate during the implementation period of grants arising from the allocation, the following:

   a. Requirement-1: Progressive government expenditure on health to meet national universal health coverage (UHC) goals; and

   b. Requirement-2: Increasing co-financing of Global Fund supported programs, focused on progressively taking up key costs of national disease plans.

Requirement 1: Progressive government expenditure on health

10. Governments should increase their health expenditure in accordance with recognized international declarations\textsuperscript{147} and national strategies. Specifically, applicants should demonstrate:

   a. For countries where government spending on health is less than 8%: this share will increase over the implementation period of grants arising from the allocation;

   b. For countries where government spending on health is equal to or greater than 8%: health expenditure will increase in line with government expenditure such that the current share is at least maintained, if not increased during the implementation period of grants arising from the allocation.

   c. For countries with high’, ‘severe’ or ‘extreme’ disease burden\textsuperscript{148} for two or more disease components who have a low prioritization of government spending on health and/or low capacity for domestic revenue capture\textsuperscript{149}: development a robust health financing strategy and incorporation of its provisions in national development frameworks (such as medium term expenditure frameworks) before the end of 2020.

Requirement 2: Increasing co-financing of Global Fund supported programs

11. During the implementation period of grants arising from the allocation, applicants should demonstrate increasing co-financing to progressively absorb costs of key program components such as human resources, procurement of essential drugs and commodities, programs that address human rights and gender related barriers and programs for key and vulnerable populations\textsuperscript{150}.

12. In line with fiscal capacity and health system capabilities, countries should ensure co-financing for priority interventions of the National Strategic Plan to reduce over-dependence on external resources and pave the way for longer term sustainability of Global Fund supported programs.

Co-Financing Incentive

13. In order to encourage additional domestic investments, a co-financing incentive is included as part of the allocation for each country component. The ‘co-financing incentive’ is at least 15 percent of the Global Fund allocation (as specified in the Allocation Letter). In order to access the co-financing incentive, countries must: (1) provide commitments of additional domestic investments to the relevant disease programs and/or related Resilient and Sustainable Systems for Health (RSSH) over the implementation period of the grant arising from the allocation, as per the requirements in the STC policy; and (2) demonstrate realization of such commitments (See Annex-3).

14. To access the co-financing incentive for each relevant disease component, the additional domestic investments must be:

\textsuperscript{147} Such as the Abuja Declaration of 2001
\textsuperscript{148} As defined in Annex 1 of the Eligibility Policy
\textsuperscript{149} Less than 8% of government expenditure on health and/or tax revenues are lower than 15% of the GDP.
\textsuperscript{150} Indicative list of requirements for assessment and will be assessed on a case by case basis.
138

a. More than the domestic investments made in the corresponding implementation period of the grants arising from the prior allocation period, by at least:
   i. 50 percent of the co-financing incentive for low income countries
   ii. 100 percent of the co-financing incentive for 'middle income countries' and
   b. Invested in priority areas of national strategic plans, in line with the investment guidance developed with partners (including region specific guidance, as applicable); and
   c. Evidenced through allocations to specific budget lines, or other agreed assurance mechanisms.

15. The focus of additional domestic investments required to access the co-financing incentive must be agreed upon during country dialogue or grant making. As per the STC policy, the following requirements will apply for additional co-financing contributions to access the co-financing incentive:

<table>
<thead>
<tr>
<th>Country Income Classification</th>
<th>Disease Burden</th>
<th>Additional Co-Financing Investments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Income</td>
<td>Any</td>
<td>Invested in either disease programs or RSSH. Flexibility to demonstrate 100% of their additional investments are towards RSSH</td>
</tr>
<tr>
<td>Lower-LMI</td>
<td>Any</td>
<td>At least 50 percent invested in priority areas within the disease program. Remainder can be in RSSH</td>
</tr>
<tr>
<td>Upper LMI</td>
<td>High, Severe,</td>
<td>At least 75 percent invested in priority areas within the disease program. Remainder can be in RSSH</td>
</tr>
<tr>
<td></td>
<td>Extreme</td>
<td></td>
</tr>
<tr>
<td>Upper LMI</td>
<td>Low and Moderate</td>
<td>Focused on addressing systemic bottlenecks for transition and sustainability, with at least 75 percent in priority areas within the disease program.</td>
</tr>
<tr>
<td>UMI</td>
<td>Any</td>
<td>Focused on disease components and RSSH activities to address roadblocks to transition, with a minimum of 50% invested in specific disease components targeting key and vulnerable populations</td>
</tr>
</tbody>
</table>

16. By default, the co-financing incentive available for each component is the same percentage across the allocations for each component following the final program split. However, on an exceptional basis, based on country context and priorities, Country Teams may negotiate with country stakeholders and agree to a different distribution of the additional domestic investments to access the co-financing incentive among eligible components, provided that:

a. The revised distribution that is agreed upon will determine (1) the co-financing incentive for each component and (2) the additional investments per component to access the co-financing incentive and (see annex-5 for illustration);

b. The aggregate amount of the co-financing incentive across all disease components remains unchanged;

---

151 In assessing additional domestic investments to a disease program, one-off line contributions or capital investments for infrastructure development in the prior period can be discounted. Where major efficiencies are targeted in disease program spending in line with technical partner guidance (example: shift from hospitalized TB care to ambulatory DOTS), re-investment of savings to priority areas can be considered as additional domestic investments.

152 According to the Global Fund Eligibility List, based on World Bank’s income classification.

153 Identified by the country either through a transition readiness assessment or transition work plan or through national strategic plans or other relevant assessments.

154 Ibid

155 As defined in the Global Fund Key Populations Action Plan 2014 – 2017

https://www.theglobalfund.org/media/1270/publication_keypopulations_actionplan_en.pdf

156 Among others, such priorities could include substantive scale up of domestic funding required for a component due to reductions in Global Fund allocation or other donor funding for such component; or where the focus is not to just increase domestic contribution to a disease component but rather to channel efficiencies to a component with already high levels of domestic funding to priority interventions by changing delivery models or provider payment systems (example: shift from hospitalized TB care to ambulatory DOTS)
c. Co-financing commitments for all components are available prior to the final Grant Approvals Committee (GAC) review of the first component;

d. The deviation from the default level of additional co-financing for a component is approved by the GMD Department Head/Regional Manager and communicated to the GAC through the Grant-making Final Review and Sign-off Form.

e. The additional investments per component to access the co-financing incentive and the co-financing incentive for each component will be communicated by the Country Team to the CCM and country stakeholders through a ‘management letter’

17. **Extenuating Circumstances:** In exceptional circumstances, where the country is not in a position to meet the co-financing requirements, the Country Team may recommend a full or partial exemption from the requirements. Any waiver of co-financing requirements will require strong justification, as well as a plan for addressing funding shortfalls, where applicable. Exemptions from co-financing requirements may be considered in limited cases of strongly justified and/or exceptional circumstances, such as:

a. The country is a Challenging Operating Environment (COE), where in-country engagement on domestic financing is not feasible;

b. Severe economic/fiscal crisis impacting government revenues/expenditure, which results in lower health and disease spending;

c. **Force majeure** events such as natural disasters, sudden outbreaks of disease, sudden or unforeseen outbreaks of war, civil or political unrest that result in severe disruption of program implementation or in the reallocation of government resources to address emergencies.

18. Partial or full exemptions must be approved by the Head, Grant Management Division through a memo (standardized memo template [link forthcoming]) and may be granted prior to communication of the allocation, during country dialogue, at the time of review of the funding request, at grant making and/or during grant implementation. The Head, Grant Management Division, may seek guidance from the GAC on the request for exemption. Once approved, the exemption applies for the duration of the implementation period. If a full exemption is granted, the applicant has access to the total allocation, including the funding that would be provided as co-financing incentive. If a partial exemption is sought and granted, the country will be reviewed and monitored for the approved lower level of requirements, as outlined in the memo seeking the partial exemption. Exemptions will be communicated by the Country Team to the CCM and country stakeholders through a ‘management letter’. All exemptions will be reported to the Board and captured in the relevant GAC Report to the Board (See Annex-2).

**DETERMINING AND COMMUNICATING THE CO-FINANCING INCENTIVE**

19. By default, 15% of a country component’s allocation will be available as a co-financing incentive if the country makes additional domestic commitments to three diseases as well as RSSH, as per policy requirements.

20. The co-financing incentive may be set at greater than 15% based on the following factors: evidence of less than 8% of government spending on health; the need to proactively strengthen transition preparedness and plan for transition if the country is a UMI (regardless of disease burden) or LMI with low/moderate disease burden; and/or other country specific contextual factors. Such other country specific contextual factors include but are not limited to: how the country compares with peers of the same income classification and region, macro-economic and fiscal trends, programmatic performance and impact against the three diseases, the overall funding landscape for the three diseases, and previous co-financing commitments.

---

157 In instances, where country is in a position to make additional investments in the next phase but not sufficient to access the full co-financing incentive

158 The classification of a country as a COE does not automatically guarantee the application of flexibilities.
21. The key parameters, guidance, and background data to determine the share of co-financing incentive is developed by the Health Financing Team of the Strategic Information Department as part of the Access to Funding processes for finalizing the Allocation Letter.

22. The share of the co-financing incentive of each country component is determined by the Country Team taking into account contextual priorities and considerations, with support from the Health Financing team, where appropriate. Country Team’s recommendations are endorsed by the Department Head/Regional Manager. The proposed co-financing incentive share of the allocations are then reviewed and validated by the Grant Approvals Committee (GAC).

23. Countries are informed of their total allocation across eligible disease components and the share of the allocation for each eligible component that is available as a co-financing incentive, through the Allocation Letter. The required level and focus of domestic investments to access the co-financing incentive is also communicated through the Allocation Letter.

24. The requirements that apply to access the co-financing incentive component of the allocation are based on ‘country income classification’ as per the latest Eligibility List published prior to communication of the allocation. If there is a change to the income classification during an allocation period, requirements associated with the new income level will apply only to the subsequent allocation.

COUNTRY DIALOGUE AND DEVELOPMENT OF FUNDING REQUEST

25. Co-financing of Global Fund supported disease programs and RSSH, as applicable, will be agreed upon during the country dialogue and/or grant making. In addition to the minimum additional investments to access the co-financing incentive, overall co-financing commitments should take into account funding need, existing commitments, fiscal space, sustainability and transition considerations; as applicable.

26. Country dialogue should include engagement on:
   a. The realization of co-financing commitments for the implementation period of the grants arising from the previous allocation period, as applicable;
   b. Co-financing investments in the health sector and disease programs over the implementation period of the grant arising from the next allocation;
   c. Leveraging the co-financing incentive to increase strategic domestic investments for health, in line with country priorities and STC policy requirements;
   d. Ensuring that the funding request for UMICs irrespective of disease burden and LMICs with low and disease burden describes the major bottlenecks to financial sustainability and how these bottlenecks will be strategically addressed with additional domestic investments that comply with the co-financing requirements.

27. Realization of co-financing commitments for the implementation period of the grants arising from the previous allocation period: Evidence of realization of previous co-financing commitments is required to assess implications to grant funds tied to co-financing commitments and/or the subsequent allocation, as well as establish the baseline to determine additional investments for the next implementation period.

28. Evidence of realization of co-financing commitments (see Annex-3) and any justification for not meeting commitments (if applicable) must be formally submitted to the Global Fund prior or along with the submission of first funding request. Evidence of realization of co-financing commitments may be requested earlier, if the Country Team perceives a risk in materialization of commitments. If not at risk of realizing commitments, a country whose first funding request is through the ‘program continuation’ application modality can submit evidence on realization of co-financing commitments during grant making, as per the schedule agreed with the Country Team.

\[159\] Country income classification used for the 2014-16 allocation period applies to previous ‘Willingness to Pay’ requirements.

\[160\] Was referred to as ‘willingness to pay’ in the 2014-16 allocation period.
29. **Co-financing investments in the health sector and disease programs in the next implementation period:** Domestic financing of the broader health sector and of disease programs should be a focus of country dialogue, engaging key stakeholders including the Ministries of Finance and Health.

30. In high burden\textsuperscript{161} countries with low government spending on health and/or low revenue capture\textsuperscript{162} and countries where there is a declining trend in government health expenditure, country dialogue should explore government plans to develop and/or implement health financing strategies to increase domestic financing of health. With partners and through global platforms\textsuperscript{163}, Country Teams and CCMs are encouraged to discuss needs of additional support through grants to accelerate the implementation of health financing strategies, if relevant. Where there are no specific initiatives in place to develop or implement a health financing strategy, the Secretariat and CCMs may explore, in consultation with partners, support for developing health financing strategies through grants.

31. The development of the funding request should include a review of available resources and funding gaps for Global Fund supported programs, preferably based on costed National Strategic Plans. Through the CCM and key stakeholder engagement, country dialogue should discuss co-financing contributions over the next implementation period as well as longer-term strategies for sustaining programs with increased domestic investments.

32. **Leveraging the co-financing incentive for strategic domestic investments for health, in line with country priorities:** Country dialogue should aim to establish strategic actions and co-financing commitments to meet the co-financing requirements and access the total co-financing incentive. See Annex-3 for examples of the types of commitments and elements of a commitment plan.

33. The ongoing country dialogue process must ensure a clear understanding of:
   a. Mechanisms through which government will finance the disease program or RSSH (central/regional/local government revenues, loans, debt relief and/or social health insurance);
   b. Current and planned additional domestic financing of disease programs and RSSH in terms of the extent of funding and the interventions supported;
   c. Timing or annual cycle of co-financing investments; and
   d. The mechanism by which co-financing will be tracked and reported (see Annex-3 for indicative examples), including assurance provided by the country’s public finance management systems and ‘supreme audit institutions’ for reliable monitoring of realization of co-financing commitments.

---

**FUNDING REQUEST REVIEW AND ASSESSING COMPLIANCE WITH CO-FINANCING REQUIREMENTS**

34. The Country Team (supported by inputs from the Strategic Information Department) will review and assess (a) compliance with core co-financing requirements (see paragraphs 9-12) based on qualitative assessment of co-financing trends, taking into account relevant contextual factors; (b) realization of co-financing commitments for the implementation period of the grant arising from the previous allocation period; and (c) co-financing commitments to access the co-financing incentive for the grant arising from the subsequent allocation period. The Country Team’s assessment is captured in the Secretariat Briefing Note submitted to the TRP.\textsuperscript{164} The Country Team’s assessment of compliance will also be captured in the Grant-making Final Review and Sign-off Form, and reviewed by the GAC (see paragraph 50)

---

\textsuperscript{161} Countries with high’, ‘severe’ or ‘extreme’ disease burden for two or more disease components, as defined by Eligibility Policy
\textsuperscript{162} Defined as less than 8% of government expenditure on health and tax revenues are lower than 15% of the GDP
\textsuperscript{163} Such as the Global Financing Facility.
\textsuperscript{164} For program continuation, the Country Team will present the assessment of compliance to the GAC
PREVIOUS ALLOCATION PERIOD\textsuperscript{165}:

35. Realization of a co-financing commitment is defined as reasonable assurance of either execution of funds for agreed upon activities or implementation of agreed upon activities (See Annex-3 for illustrative examples of evidence that supports realization of co-financing commitments).

36. In assessing co-financing in the implementation period of grant (s) arising from the previous allocation, it is expected that information on budget execution for completed fiscal years and the budget of the final implementation year will be reviewed. With respect to the execution/or budgeting of funds, countries will be considered as compliant with requirements to access the co-financing incentive of the previous allocation\textsuperscript{166}, if:
   a. Realization of co-financing commitment in completed fiscal years plus budget allocated for the final year in USD/EURO\textsuperscript{167} is equal to or higher than the requirements to access the co-financing incentive (willingness to pay of the 2014-16 allocation), as per policy existing at time of the previous allocation;\textsuperscript{168} OR
   b. Realization of co-financing commitment in completed fiscal years plus budget allocated for the final year in local currency, adjusted for inflation is equal to or higher than the requirements to access the co-financing incentive (willingness to pay of the 2014-16 allocation) as per policy existing at the time of the previous allocation

37. In High Impact and Core countries, the Finance Specialist, with support of Health Financing Team (if applicable) will be responsible for assessing evidence on execution of funds and allocation of budget funds committed towards meeting co-financing requirements and the extent to which the required co-financing commitments were realized. The Fund Portfolio Manager, taking into consideration the assessment of the Finance Officer and supplementary evidence on implementation of agreed upon activities, determines compliance with co-financing requirements in consultation with the Legal Officer and other Country Team members (as applicable). In Focused countries, the Fund Portfolio Manager will determine compliance with support from the Health Financing Team and/or STC Specialists (as applicable) and in consultation with the Legal Officer\textsuperscript{169}

38. The possible outcomes of the compliance determination and their implications are summarized below:
   a. Requirements Met: Requirements are considered met if execution of funds or implementation of agreed activities in completed fiscal years (a) is greater than requirements to access the co-financing incentive OR (b) meets the requirements together with budget/approved implementation plan for the final year and there are no identified risks for execution of the allocated budget/ implementation plan
      Implications: There are no implications to existing grant(s) or the new allocation, if requirements are met
   b. Requirements Conditionally Met: Requirements are considered conditionally met, if execution of funds or implementation of agreed activities has been inconsistent with actual commitments, but allocated budget/approved implementation plan for the final year implies that the country will meet the requirements to access the co-financing incentive. Implications: If requirements are deemed conditionally met, the implications are the following:
      i. Country teams, with the support of the Health Financing Team, should monitor realization of commitments during the remainder of the implementation period;
      ii. Where feasible and appropriate\textsuperscript{170}, Country Teams should consider tying subsequent disbursements to realization of commitments;

\textsuperscript{165} Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\textsuperscript{166} Was referred to as ‘willingness to pay’ in the 2014-16 allocation period
\textsuperscript{167} Depending on which currency the country had used to provide commitments
\textsuperscript{168} For the 2014-16 allocation; the minimum requirements of additional investments was 25% of the co-financing incentive (referred to earlier as ‘willingness to pay’) for low income countries, 50% for lower LMI, 100% of upper LMI, and 200% for UMI. For subsequent allocations, as per the STC Policy, outlined in paragraphs 14-15
\textsuperscript{169} The same process will be applicable for assessment of compliance during grant implementation
\textsuperscript{170} Disbursement can be linked to specific co-financing milestones based on an assessment of potential impact of its withholding, should co-financing not materialize
iii. Subsequent actions based on whether requirements were ultimately met or not met

c. **Requirements Not Met with Justifiable Circumstances:** If country does not meet requirements to access the co-financing incentive, but has justifiable reasons for non-compliance (see paragraph 17). **Implications:** Exemption of requirements, approved by the Head, Grant Management Division through a memo based on a standardized memo template (see paragraph 18 and Annex 2).

d. **Requirements Not Met:** If country does not meet requirements to access the co-financing incentive, and has no justifiable reasons (see paragraph 17) for non-compliance. **Implications:** The implications of not meeting requirements include the following:

t. Withholding of disbursements or reduction of grant funds during the current grant implementation period, where feasible and appropriate; or

ii. Downward adjustment of subsequent allocation, proportionate to the level of non-realization of commitments, where feasible and appropriate.

39. **Applying consequences of non-realization of co-financing on existing grants:** Disbursements may be withheld or the grant funds amount may be reduced, for the grant(s) arising from the prior allocation period, in the event of non-realization of commitments to access the co-financing incentive. The proportion of realized co-financing commitments will be applied to the amount provided as co-financing incentive, and the residual amount either withheld as disbursement or reduced from the grant funds amount (See Annex-4 for illustration).

40. Disbursements may be withheld for non-realization of co-financing commitments at any point of time during the implementation period. The Principal Recipient will receive notification of the reduced disbursement through a Management Letter accompanying Disbursement Notification Letter (see Annex-2).

41. The grant funds amount may be reduced for non-realization of co-financing commitments, in the final year of implementation. Reduction of grant funds and the related program revisions (if applicable) should be processed following the OPN on Grant Revisions. After approval, reductions in grant funds amount due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

42. **Applying consequences of non-realization of co-financing on subsequent allocation:** Non-compliance with co-financing requirements will result in reduction of subsequent allocation, if the country is not exempted from requirements and did not have consequences of not meeting co-financing requirements applied to existing grants. The amount to be deducted from the subsequent allocation will be calculated in the same manner as outlined in paragraph 39. However, given potential for significant reductions in subsequent allocations, any adjustments to future allocations because of non-realization of co-financing commitments will be proportional to any reductions in allocations (See Annex-4 for illustration). The reduction will be prorated across the eligible components of the subsequent allocation. Any reductions to the allocation will have to be approved by the GAC. A GAC review can be requested by Country Teams, in consultation with A2F, for downward adjustments to the allocation due to non-realization of co-financing commitments (See OPN on Access to Funding, Grant-making and Approval). GAC review for downward adjustment of allocation should be scheduled sufficiently in advance of the final GAC review of the disbursement-ready grants to provide the necessary time to negotiate budgets for the revised upper-ceiling amount. After approval, reductions in allocation due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

---

171 Was referred to as 'willingness to pay' in the 2014-16 allocation period

172 Was referred to as 'willingness to pay' in the 2014-16 allocation period

173 The reductions will be applied to individual grant components, proportionate to share of co-financing incentive applicable to each component. However, for grants under the 2014-16 allocation, reductions can apply to any grant component in any proportion as per strategic requirements of the portfolio since willingness to pay commitments were not tied to a specific component.

174 Withholding of disbursements or reduction of grant funds

175 Proportion will be capped at 100%, for countries receiving a higher level of funding in the current allocation
ASSESSING CO-FINANCING COMMITMENTS TO ACCESS THE CO-FINANCING INCENTIVE FOR THE NEXT ALLOCATION:

43. The amount of the ‘co-financing incentive’ available to each component will be proportional to the level of additional co-financing commitments provided by the country, unless justified by extenuating circumstances (see paragraph 17).

44. For countries applying via program continuation’ application modality, co-financing commitments should be provided during grant-making, prior to the final GAC approval of the grant. For full and tailored funding requests, it is expected that co-financing commitments to access the full co-financing incentive for a component is submitted along with the funding request. If additional time is required for country processes, the commitments can be formalized at grant-making or during grant implementation, provided indicative commitments are available prior to final GAC. If the time required for formal commitments extends into grant implementation period, grant agreements must have ‘grant requirements’ specifying the time-frame when the co-financing commitments will be provided and the expectations of realization of these commitments.

45. If during grant making sufficient commitments (either indicative or formal) to access the full co-financing incentive are not forthcoming, the allocation will be proportionally reduced based on available co-financing commitments, unless exempted. Any reductions to the allocation will have to be approved by the GAC. A GAC review can be requested by Country Teams, in consultation with A2F, for downward adjustments to the allocation (See OPN on Access to Funding, Grant-making and Approval).

46. After approval, reductions in allocation due to non-compliance with co-financing requirements will be communicated to the country, through a management letter.

GRANT APPROVAL

47. Co-financing considerations at grant approval as well as subsequent monitoring during grant implementation will be differentiated based on whether there is a material risk for realization of commitments. Figure-1 provides an illustrative list of key risks that should be considered by the Country Team.

Figure-1 Risk based approach for Approval and Monitoring of Co-Financing Commitments

<table>
<thead>
<tr>
<th>Illustrative Risks</th>
</tr>
</thead>
<tbody>
<tr>
<td>Poor track record of meeting previous commitments (less than 75% unless justified)</td>
</tr>
<tr>
<td>Significant increases in government spending committed in one or more program areas and/or substantive commitments to absorb historical Global Fund support in specific areas (more than 50%)</td>
</tr>
<tr>
<td>Investments committed to key population interventions, that were not previously funded by the government</td>
</tr>
<tr>
<td>Co-financing risks for transition (as per Organizational Risk Register)</td>
</tr>
<tr>
<td>High burden countries with low government health spending/low revenue capture</td>
</tr>
<tr>
<td>Medium term macroeconomic and fiscal constraints</td>
</tr>
<tr>
<td>Constraints in tracking expenditure through existing country systems and processes</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Material Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sign-off on commitments from MOF or other relevant bodies/processes</td>
</tr>
<tr>
<td>Specific grant requirements</td>
</tr>
<tr>
<td>Monitoring through grant management processes for managing conditions</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Low Risk</th>
</tr>
</thead>
<tbody>
<tr>
<td>MOF Sign-off encouraged</td>
</tr>
<tr>
<td>Generic grant condition</td>
</tr>
<tr>
<td>Formal monitoring through A2F processes, informally through country engagement</td>
</tr>
</tbody>
</table>

48. If the Country Team determines that there is a material risk of non-realization of co-financing commitments, appropriate mitigation measures such as endorsement of co-financing commitments at grant approval will be considered.

176 Ongoing processes for budget formulation, parliamentary approval, development of medium term expenditure frameworks, approval of national strategy plans, development of sustainability plans, resource tracking etc.

177 As part of the ORR, a framework is currently being defined to measure and monitor key risks levels across the organization, including co-financing risks.
commitments by the Ministry of Finance/other relevant bodies specific to the country and/or specific grant requirements should be presented to the GAC for approval.

49. Country Teams should consult their Legal Officer to capture co-financing requirements in the grant agreement, which will depend on the Country Team’s assessment of risk and endorsement by the GAC. Accordingly, two options are available:

- No Material Risk: If it is determined that there is a low risk of non-realization of domestic commitments, a generic grant requirement must be included in the grant agreement that reserves the right of the Global Fund to withhold funding during the implementation period of the grant (through withholding of disbursements or reduction of the grant funds amount), or from the subsequent allocation proportionate to non-compliance with the additional domestic commitments.

- Material Risk: If it is determined that there is a material risk of non-realization of domestic commitments, country-specific grant requirement(s) that will formalize the co-financing commitments for the implementation period must be included in the grant agreement. The grant requirement will specify annual co-financing investments or specific outputs related to co-financing commitments (as applicable), and the mechanisms and time-frame for reporting realization of co-financing commitments. If appropriate, the grant requirement should specify the disbursement amount per year that is tied to realization of co-financing commitments. The amount tied per year will generally be proportional to the amount of co-financing commitment per year as confirmed to the Global Fund. If appropriate, the Country Team may at its discretion tie specific components of the grant budget to realization of co-financing commitments.

50. The Country Team captures its assessment of risk of non-compliance with co-financing requirements and the outcome of the grant-making considerations on co-financing in the Grant-making Final Review and Sign-off Form. By recommending the proposed grant for Board approval, the GAC will also be endorsing the assessment of risk of non-compliance with co-financing requirements and the option recommended by the Country Team for the monitoring of realization of additional domestic commitments during the implementation period.

### MONITORING CO-FINANCING COMMITMENTS DURING GRANT IMPLEMENTATION

51. The monitoring of co-financing commitments and implications of non-compliance will be differentiated as presented in the table below:

<table>
<thead>
<tr>
<th>Option</th>
<th>Grant Agreement</th>
<th>Approval of Approach</th>
<th>Monitoring</th>
<th>Implications for Non-Compliance</th>
<th>Approval of Implications</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Generic grant requirement in grant agreement for countries with low risk of non-realization of co-financing commitments, that reserves the right of Global Fund to withhold funding proportionate to non-compliance</td>
<td>GAC</td>
<td>Periodically followed up through country engagement, budget execution reports, NHA, NASA, and partner data</td>
<td>If evidence of non-compliance, based on country context, strategic requirements and impact on the program; one or more of the following actions: (a) withholding of disbursement</td>
<td>Withholding of disbursement as per OPN on Annual Funding Decisions and Disbursements Reduction of grant funds amount as per OPN on Grant</td>
</tr>
<tr>
<td>Option</td>
<td>Grant Agreement</td>
<td>Approval of Approach</td>

<td>---------------------------------</td>
<td>-------------------------</td>
</tr>
<tr>
<td>2</td>
<td>Country specific requirement in grant agreement for countries where there is a material risk of non-realization of co-financing commitments</td>
<td>GAC</td>
<td>Monitoring of specific commitments as per the terms of the grant requirement in the grant agreement (i.e. at the time of an Annual Funding Decision or other specified date).</td>
<td>(b) reduction in grant funds amount (c) reduction of subsequent allocation</td>
<td>Revisions Reduction of Allocation – GAC Approval</td>
</tr>
</tbody>
</table>

52. In exceptional cases, depending on the context, risk profile and country specific requirements, verification of realization of co-financing commitments may be included within the terms of reference of the external audit or LFA services.

53. If a country does not meet its additional co-financing commitments, it is mandatory to have a country-specific requirement in all subsequent grant agreements until a track record of compliance can be (re-) established.

**PROCESS AND RESPONSIBILITIES**

**RESPONSIBILITIES**

54. **Country Team:** Strategic engagement and negotiation of co-financing to enhance sustainability of Global Fund supported programs, appropriate to the country context. Provide necessary guidance to country stakeholders on co-financing requirements and articulation of its compliance through relevant documentation and mechanisms at the time of accessing funding and grant implementation. With support from the health financing team, assess compliance, with co-financing requirements at the time of accessing funding and reflect the assessment in ‘Secretariat Briefing Notes’ and GAC documentation. Incorporate ‘requirements’ related to co-financing commitments in Grant Agreements based on country context and requirements, and accordingly track their materialization during grant implementation. Take appropriate actions for non-compliance in line with guidance provided in the OPN based on country context, strategic requirements and impact on the supported program(s).

**High Impact and Core Countries**

a. **Fund Portfolio Manager (FPM) supported by Program Officer(s):** Lead Global Fund negotiations and decision making related to co-financing requirements in the grant lifecycle. Ensure timely communication of co-financing requirements and decisions related to co-financing to country stakeholders. Leverage Secretariat resources’ and strategically engage with country stakeholders to advocate and support actions for improving co-financing and sustainability of Global Fund supported programs.

b. **Finance Specialists:** Finance Specialists advise and strengthen Country Team understanding of public financing mechanisms in the country; monitor grant conditions related to co-financing; responsible for assessing evidence on execution of funds committed towards meeting co-financing requirements, with support of the Health Financing Team, where applicable; incorporate verification of co-financing
within the terms of reference of the external audit or LFA services, where appropriate; and provide internal clearance prior to approval of withholding of disbursements, reduction in grant funds and/or reduction of future allocation for non-realization of co-financing commitments, as per normal processes for disbursements, modifications in grant agreements, and GAC approvals.

**Focused Countries**

c. **Fund Portfolio Manager (FPM):** Lead Global Fund negotiations and decision making related to co-financing requirements in the grant lifecycle. Leverage Secretariat resources and strategically engage with country stakeholders to advocate and support actions for improving co-financing and sustainability of Global Fund supported programs. Responsible for assessing evidence on execution of funds committed towards meeting co-financing requirements, with support of the Health Financing Team and/or STC Specialists, where applicable.

d. **Portfolio Support Team:** With support of the Health Financing Team and/or Sustainability and Transition Specialists, if applicable, the PST provides internal clearance prior to approval of withholding of disbursements, reduction in grant funds and/or reduction of future allocation for non-realization of co-financing commitments, as per normal processes for disbursements, modifications in grant agreements, and GAC approvals. Incorporates verification of co-financing within the terms of reference of the external audit or LFA services, where applicable.

**All Countries**

e. **Legal Officer:** Incorporates co-financing requirements in grant agreements in a manner that is enforceable and consistent with Board and Secretariat policies; advises on determination and legal implications of non-compliance with co-financing requirements; and provides the internal clearance prior to approval of actions to enforce consequences of non-compliance.

f. **Public Health and Monitoring & Evaluation Officer** Where appropriate, support negotiations by identifying key programmatic gaps that could be potentially supported by the government; assess commitments to absorb existing support and/or scale up program provided through previous requests to the Global Fund; support assessment of evidence with regard to implementation of agreed upon activities.

g. **Health Product Management Specialist:** Where appropriate, assess implications of commitments for absorbing and/or scaling up procurement of drugs and commodities. Support as required tracking of realization of specific co-financing commitments related to procurement.

55. **Health Financing Team:** Based on requests from Country Teams, provides technical support and advice for co-financing negotiations, assessment of public financing mechanisms, macroeconomic and fiscal outlook, updated data and other information inputs on program and health sector financing; capacity building of Secretariat staff and sharing of best practice; supports assessment of compliance with requirements at the time of accessing funding and tracking materialization of co-financing commitments during grant implementation. Responsible for tracking and reporting of progress on co-financing at the portfolio level including KPI on domestic financing and actions taken for non-realization of commitments; and facilitating support of technical partners in expenditure tracking and development of sustainability plans.

56. **Sustainability and Transition Specialists:** Supports negotiation of increased domestic financing to enable the gradual absorption of Global Fund financed interventions into government-supported programs and to comply with the requirements of the co-financing policy; supports country engagement on transition plans and related co-financing; supports strategic initiatives to strengthen co-financing, sustainability, and transition preparedness, including (as appropriate and relevant) enhanced access of transition countries to favorable
prices for health products, innovative financing schemes, etc.; supports monitoring and assessing compliance with co-financing requirements in applicable focused countries, within the context of ongoing country work on sustainability and transition.

57. **Sustainability, Transition and Co-Financing Coordination Mechanism (including STC Working Group and Steering Committee, as applicable):** Support integration and mainstreaming of co-financing considerations within grant management processes; identify needs and facilitate development of guidance, tools, training and skill-sets required to effectively operationalize co-financing policy requirements; coordinate internal and external communication on co-financing issues.

58. **External Relations Department:** Implement multi-sector advocacy strategy to promote increased domestic financing for health by reaching key decision-makers through country engagement, global and regional platforms; facilitate targeted country support for domestic resource mobilization for health; private sector engagement on domestic financing; support the development and implementation of innovative financing mechanisms such as Debt2Health, Social Impact Bonds, and Blended Finance, based on direction provided by the Audit and Finance Committee.

59. **Policy Hub:** Coordinate development of Global Fund strategies and Board policies on sustainability, transition and co-financing; incorporation of co-financing considerations in Strategy Implementation Plan and its monitoring.

60. **Access to Funding Department:** Facilitate and support TRP/GAC review process and GAC reports to the Board; provide applicant support for submission of funding requests; and facilitate GAC reviews for con-compliance with co-financing requirements, where applicable. In addition, take an active role in advising country teams on the requirements of Global Fund co-financing policies, and develop best practices examples of how co-financing has strengthened sustainability and transition preparedness.

61. **Risk Department:** As part of the Risk Specialist’s oversight role in the grant cycle, the co-financing risks will be analyzed in selected High Impact and Core portfolios, especially during grant-making and disbursements\(^\text{178}\). As necessary, the Risk Specialist will also input in identifying options for applying consequences of non-compliance with co-financing requirements.

62. **Technical Review Panel:** Reviews Secretariat Briefing Notes and Funding Requests to assess implications of co-financing on program targets and sustainability of programs; and assess material program impact of reduction of grant funds amount due to non-compliance with co-financing requirements, as per OPN on Grant Revisions.

63. **Grant Approvals Committee:** Validates share of co-financing incentive for each disease allocation and exceptional revision in distribution of co-financing incentive among components; through normal GAC review process prior to making funding recommendation to the Global Fund Board, approves assessment of compliance with co-financing requirements, assessment of co-financing risks, grant requirements for co-financing, approach for monitoring co-financing; approves reduction of allocation due to non-compliance with co-financing requirements.

64. **External Auditor/Local Fund Agent:** Where relevant, external audit or LFA services to be used as a source of assurance for appropriate monitoring and verification of compliance with co-financing requirement.

65. **National Government:** (as represented by the ministries of health, finance and/or other relevant authorities) is expected to engage in negotiations to augment sustainability of Global Fund supported programs, commit additional government investments to Global Fund supported programs according to specific timelines that can be tracked and reported, and

\(^\text{178}\) Refer to OPN on Risk Management Across the Grant Lifecycle
provide official documentation as evidence of government commitments and spending during grant implementation.

66. CCM: Responsible for facilitating engagement with country stakeholders and advocates for additional domestic investments in Global Fund supported programs with key country stakeholders, including appropriate government authorities as required. Ensures submission of co-financing commitments with the funding requests, and facilitates monitoring and reporting of materialized commitments during grant implementation.

**MONITORING AND REPORTING**

67. Progress on co-financing will be monitored and reported to the Board and within the Secretariat by the Strategy, Investment and Impact Division, as part of the oversight of the overall Global Fund portfolio:

   e. **Corporate KPI on Domestic financing (KPI 11).** Annual reporting on progress with realization of co-financing commitments. Reporting to provide supplementary information on co-financing commitments to Global Fund supported programs and RSSH

   f. **GAC Report to the Board.** GAC recommendations to the Board for grant approval to include the amount of additional domestic commitments made by countries reviewed in each wave.

   g. **Strategy Implementation Plan:** Implementation KPIs and milestones under Strategic Objectives 1 and 4

**ANNEXES**

68. The following Annexes provide guidance on the relevant processes:

   - **Annex 1:** Snapshot of Co-financing considerations in Grant cycle
   - **Annex 2:** Decision Making Process for Co-financing
   - **Annex 3:** Negotiation and Tracking Additional Domestic Investments
   - **Annex-4:** Illustration for reduction of grant funds and subsequent allocation for noncompliance with co-financing requirements
   - **Annex-5:** Illustration for revision of default co-financing incentive among eligible components
   - **Annex-6:** Data Sources for Co-Financing
   - **Annex-7:** Assessment and Reporting of Compliance with Co-Financing Requirements

Annex 3: Negotiation and Tracking Additional Co-Financing Investments

1. Illustrative areas for additional domestic investments include:
   i. Strategic benchmarks set internally by Global Fund regional management, if applicable;
   ii. Direct investments to scale coverage of key intervention in accordance with national targets (example: targeted interventions such as harm reduction, drugs, commodities, equipment);
   iii. Absorption of existing Global Fund support (example: recurrent costs such as human resources, targeted interventions, drugs, commodities); allowing the release of Global Fund resources to other priority areas;
   iv. Co-financing of specific Global Fund support. Examples include:
      a. In-country storage and distribution costs of drugs and commodities procured with Global Fund support;
      b. Mass campaign distribution costs of LLINs procured with Global Fund support;
   v. Investments to address health systems bottlenecks to sustainability and transition
   vi. Reinvestment of savings from reform of service delivery (example: shift from hospitalized TB care to ambulatory care) in priority interventions
   vii. Progressive increases in the total health budget, particularly in low income settings, where the Global Fund is a major source of health funding;
   viii. Innovative financing mechanisms developed by the country such as health funds or approved Global Fund mechanisms for innovative financing (example: Debt2Health)

2. Types of commitments acceptable to the Global Fund will depend on the country context, official nature of commitments, trends in government spending and past history of meeting commitments.
   i. Commitments that are based on approved national strategic plans, medium-term expenditure frameworks, budget program, budgeted transition plans or other official documents are acceptable, provided the government has a reasonable track record of meeting its commitments.
   ii. In case of countries where government spending show strong increasing trends but official medium-term commitments is not available, commitments negotiated during country dialogue and confirmed by the CCM as part of the concept note submission, should be sufficient.
   iii. In case of other countries which have a poor track record of government spending or require significant increases in government spending to avail the co-financing incentive, commitments negotiated as part of the country dialogue need to be formalized by the Ministry of Finance or other relevant authorities, as appropriate. A formal commitment should specify:
      a. Annual cycle of investments
      b. Specific activities financed
      c. When information of budget allocation and execution will be available
      d. How realization of commitment will be verified and reported (budget line, implementer accounts etc.)

3. Illustrative examples of mechanisms for tracking realization of co-financing commitments during grant implementation include:
   i. Disbursement/expenditure against earmarked budget allocations;
   ii. Funds release for procurement orders;
   iii. Funds release to implementing agencies;
   iv. Estimates of expenditure approved by appropriate authorities Ministry of Finance/Finance Department of Ministry of Health along with supporting evidence;
   v. Outputs of routine expenditure tracking exercises such as National Health Accounts, National AIDS Spending Assessment, Public Expenditure Review, etc.
   vi. Evidence of absorption of specified human resources on government payroll;
   vii. Evidence of implementation of provisions of an agreed sustainability plan

---

*Global Fund investments in recurrent costs, such as that for human resources in the public sector, should be considered only if it is strategic to the objectives of grant support. To ensure sustainability, the country needs to develop a medium-term plan for transitioning such support to the government budget.*
viii. Evidence of implementation of other agreed upon activity such as distribution of drugs, harm reduction interventions, scale up of services, conduct of special surveys or training
Annex-4: Illustration for reduction of grant funds and 2017-19 allocation for noncompliance with co-financing requirements under 2014-2016 allocation period

A. Reduction of Grant Funds under grant arising from 2014-2016 allocation period (Example of UMIC) - Reference to paragraph 39

<table>
<thead>
<tr>
<th>A. 2014-16 Allocation</th>
<th>100 M</th>
</tr>
</thead>
<tbody>

<td>36 M</td>
</tr>
</tbody>
</table>

*Proportion will be capped at 100% for countries with higher allocation for the 2017-19 allocation period.
Annex-5: Illustration of exceptional revision of default level of additional co-financing among eligible components- Reference paragraph 16
(Example of a Country with a US$120 M Allocation with a 20% Co-Financing Incentive)
Annex 6: Data Sources for Co-Financing

Global Fund Resources

- Historical data reported to Global Fund in previous proposals and requests for continued funding
- Data and background information elicited in funding request
- LFA assessment report
- Program financing database maintained by the health financing team

Partner Resources

- HIV: http://www.pepfar.gov/countries/cop/
- Health: http://apps.who.int/nha/database/ChoiceDataExplorerRegime.aspx
- Health: http://www.who.int/nha/country/en/
- Disease and Health: http://www.healthsystems2020.org/section/resources/

Country Resources

- Health and disease strategy documents
- Medium Term Expenditure Framework (MTEF)
- Government Budgets and Supporting Documents
- Budget Outturns/Obligations
- Government Accounts
- Accounts of Autonomous entities such as NACs/Disease Funds
- Beneficiary Payment Statement of Social Security Spending
- National Health Accounts (NHA) with disease sub-accounts
- National AIDS Spending Assessment (NASA)
- Public Expenditure Reviews (PER)
- Public Expenditure Tracking Surveys (PETS)
- Program Evaluation/Review Reports
Annex 7: Considerations for Assessing and Reporting of Compliance with Co-Financing Requirements

A. Non-exhaustive list of issues for consideration in assessment of co-financing requirements

1. Understanding of public financing mechanisms
   a. How is government contribution to the disease program financed—through revenue resources, loans, social health insurance, and/or debt relief?
   b. Which levels of government incur disease spending—central, regional, and local?
   c. Through which ministries, departments, or agencies at each level of government does government spending occur?
   d. Is all lower-level government spending from its own resources or do they include transfers from a higher level of government?
   e. What interventions or actions do government contributions fund?
   f. Do government budgets have earmarked budget heads or line items to capture government disease spending?
   g. Is all government disease spending captured by earmarked budget heads or line items?
   h. When earmarked budget heads or line items are not available or if they do not capture all government disease spending, how is government spending reported?
   i. Are loans availed from international sources reported under government spending or under external funding?
   j. When funding from external sources is routed through government budgets, how are they accounted for?
   k. What are the data sources for the reported spending, which can be verified?
   l. Are there bottlenecks in budgeting, financial management, audit, or reporting systems that make it difficult for the country to report actual expenditure on disease programs?
   m. If there are bottlenecks hindering routine reporting of expenditure data, can they be addressed through support provided through grants? Has any support been provided by the Global Fund to improve expenditure reporting?

2. Data availability
   a. Is data on government spending on disease program reported to Global Fund through proposals and requests for continued funding and/or technical partners available?
   b. What does the reported government spending figure represent?
      i. All or part of government spending
      ii. Earmarked disease spending only or do they include apportioned health system costs or estimates based on assumptions regarding proportion of human resources deployed, general health services utilized etc.
      iii. Recurrent programmatic spending or do they include capital investments also
      iv. Budget allocation, budget outturns, actual expenditure or estimates of spending based on historical trends
   c. Is data reported to Global Fund consistent across different periods of time and with that reported to partners? If not, are reasons for inconsistencies known?

4. Analysis of past spending:
   a. Based on historical data what has been actual spending compared to budget allocations and previous commitments
   b. Based on trends available from data on past spending, what is the likelihood of the country meeting the co-financing requirements in the next implementation period
   c. What activities/interventions did the government invest its resources in
   d. Do trends of past government spending show a stable or increasing trend?
   e. Is there a likelihood of skewing of government spending trends due to severe exchange rate fluctuations, intermittent capital investments etc.

5. Assessment of existing commitments:
   a. Nature of commitments—Are projections for future government spending realistic based on past spending trends? If not, are they based on official commitments either publically available or communicated to Global Fund
b. Implications of country systems, macroeconomic, policy and financing context, in allocation of resources for health/disease programs; and,
c. Likelihood of accessing allocation that is available as co-financing incentive.

5. Identifying priority areas for strategic country engagement for co-financing:
   a. Potential areas of additional domestic investments based on country context and requirements;
   b. Potential areas of take-over of existing Global Fund support which will free Global Fund resources to be reinvested in strategic areas;
   c. Assessment of where the country stands, vis-a-vis, regional strategy targets, if applicable.

B: Examples of actions to improve compliance with co-financing requirements
   i. Incorporating requirements for additional domestic investments within national planning processes such for national development plans, medium term budgeting and expenditure frameworks, national disease/health strategies, health sector development plans, budget cycle etc.;
   ii. Plans for utilizing debt relief proceeds or availing loans from agencies, such as the World Bank for the disease program and/or health sector;
   iii. Additional allocation to support specific high impact interventions from discretionary funds available to the government;
   iv. Actions to improve absorption and execution rates of allocated budget;
   v. Incorporating specific budget heads for earmarked allocation to disease program;
   vi. Strengthening systems for expenditure tracking;
   vii. Actions to improve routine reporting of government disease spending in official country documents and/or to technical partners.
Once a grant is signed, work begins to implement the grant. Funds for the first year are committed based on the first annual funding decision and the first disbursement is released to the account of the Principal Recipient. Subsequent disbursements are released based on defined schedules, and the funds for the remainder of the implementation period are committed on an annual basis.

Implementation is monitored by the Secretariat on an ongoing basis. Country Teams, in coordination with LFAs and in-country partners, monitor programmatic activities through regular progress updates, country visits, and programmatic assurance activities. In addition, financial activities are monitored and verified through financial reports and annual external audits.

The ongoing monitoring and reporting feed into regular decision-making on determining grant performance ratings, making annual funding decisions, setting operational risk levels and putting in place management actions and other requirements. It may also lead to adjustments to the grant (programmatic and/or financial) to respond to the implementation environment as well as to maximize the impact of programs.

The approaches and requirements during grant implementation are differentiated depending on the portfolio category and are summarized below.

---

84 As part of AIM, the capacity assessment tool and QUART are being integrated into one risk assessment tool. Relevant guidelines will also be integrated.

85 ITP countries currently undertaking quarterly expenditure reporting will shift to semi-annual expenditure reporting (1 mid-year expenditure report with the mid-year PU and end of year AFR as part of the PU/DR. The end of year AFR should cover the full year). With this, the quarterly expenditure report covering July – September 2016 will not be required anymore. For high impact countries that were not covered by ITP, the semi-annual expenditure report should be included in the next scheduled mid-year PU.

Annual Funding Decisions and Disbursements

Issued on: 12 July 2016 (effective 22 July 2016)
Issued by: Grant Management Support, FISA and MECA
Approved by: Executive Grant Management Committee
Purpose: To consolidate all policies and outline processes and responsibilities related to reporting, annual funding decisions and disbursements.

OVERALL OBJECTIVES

1. The annual funding decision and disbursement processes are key grant management functions aimed at:
   i. reviewing implementation progress of each grant (programmatic, financial and management aspects) and assigning an overall grant rating;
   ii. determining and committing the funding to be disbursed to each eligible grant recipient for a period of up to 12 months (plus a buffer period), and establishing the schedule for the disbursements; and,
   iii. identifying implementation issues and risks, as well as the corresponding mitigating measures.

2. The annual funding decision and disbursement processes must ensure that:
   i. grant funds are used for agreed objectives and outputs in an accountable manner where known risks are minimized and mitigated;
   ii. Annual Funding Decisions are linked to performance to encourage grant recipients to focus on results and timely implementation; and
   iii. Annual Funding Decisions are well documented and justified.

POLICY AND PRINCIPLES

ANNUAL FUNDING DECISION

3. An annual funding decision is the process of determining and setting aside (i.e., “committing”) grant funds to be disbursed on a staggered basis to the Principal Recipient, and third parties as relevant, in accordance with the relevant Grant Agreement. All commitments to the grant are processed through the annual funding decision except commitments related to procurement of health products through the Pooled Procurement Mechanism (PPM), the private sector co-payment mechanism for ACTs (AMFm) and Wambo-related transactions, which are processed directly in the Grant Financial System using the Internal Order Confirmation Form (IOCF) or an automated interface with Wambo (refer to the OPN on Pooled Procurement Mechanism – To be updated).

4. Each annual funding decision is processed through an annual decision making form (ADMF) which includes the total amount that may be disbursed over a specified 12-month period188 (the “execution period”), and may include a buffer of up to six months for all grants (“buffer period”).

5. The “annual funding decision period” is the total of the execution period and the buffer period and can be a maximum of 18 months. The commitments approved under an annual funding decision are disbursed during the 18-month period or up to 21 months

---

188 In some cases, an execution period may be six months in high-risk environments. The same policies and processes apply except where indicated otherwise.
(“disbursement period”). While there is flexibility in the disbursement period, Country Teams should ensure that Principal Recipients adhere to agreed progress reporting schedules to facilitate timely performance-based funding decisions.

6. The sum of all funds committed through annual funding decisions, Wambo orders, and the PPM IOCF for the full implementation period and closure period of a grant must not exceed the amount stipulated in the relevant grant agreement.

7. **Alignment of Annual Funding Decisions.** The annual funding decision and disbursement schedule should align with the progress reporting period\(^{68}\) which in turn should be aligned with the national reporting cycle. If the grant start date is not aligned with the national reporting cycle, the first annual funding decision should be lengthened or shortened to ensure alignment. For example, if the grant starts on 1 April and the programmatic reporting period for the grant is January to December, the disbursement request should cover the remaining nine months of that period (plus a buffer). This will align the execution period and allow the Secretariat to make a full annual funding decision for the second execution period.

8. **First Annual Funding Decision.** The first annual funding decision for a new grant or implementation period is taken immediately after the grant signing and is based on the approved grant budget. The first annual funding decision is not performance-based. It should, however, consider any issues or actions identified at the time of grant making.

9. The first annual funding decision should be processed by the Country Team\(^{69}\) immediately once the Grant Agreement has been signed and the purchase order (PO) has been approved by the Chief Financial Officer (or designated Finance official) in the Grant Financial Systems. If the first funding decision is completed within 30 days of the PO approval, no signatures are required to process the first funding decision. If there is a delay of more than 30 days in processing the first funding decision, the relevant signatory authority stipulated in Annex 1 will be invoked.

10. **Standard Annual Funding Decision.** The subsequent annual funding decisions are typically for years 2 and 3 of the grant implementation period and are established based on demonstrated performance and financial needs as reported through the Progress Update/Disbursement Request (see Guidelines on Progress Update/Disbursement Request – to be updated), and financial assurance through the external audit (see Guidelines on Audits of Global Fund grants) or the Local Fund Agent, as relevant.

11. The annual funding decision is based on the principle of **performance-based funding** which makes additional funding available to grant recipients based on results achieved in a defined timeframe. The methodology for determining the indicator rating, overall grant rating and annual funding decision amount is summarized in the diagram below and explained in Annex 2 - Grant Performance Rating Methodology).

---

\(^{68}\) The progress reporting period should be aligned with the national reporting cycle and is not necessarily linked to calendar year or implementation years from the program start date. Alignment to this period is necessary to ensure availability of programmatic results required for informed annual funding decisions.

\(^{69}\) The composition of the Country Team varies depending on the portfolio category. For Focused Countries, the Country Team is comprised of the Fund Portfolio Manager, Senior Fund Portfolio Assistant, the Public Health and M&E Specialist, the Health Product Management Specialist and the Legal Officer. For Core and High Impact Countries, the Country Team includes the Fund Portfolio Manager, Program Officer, Public Health and M&E Specialist, HPM Specialist, Finance Specialist and Legal Officer.
12. **Risk Management during Annual Funding Decisions.** In determining the grant rating and annual funding decision, the Country Team undertakes a review of management issues and risks. While Country Teams remain the overall risk owner and responsible manager for all grant risks, the Risk Department provides independent and objective oversight over grants to ensure that key risks are adequately identified, prioritized and mitigated with appropriate assurance mechanisms in place. This is a key element of the risk engagement for High Impact and Core portfolios. The Risk Department and Country Teams are expected to engage on an ongoing basis throughout the grant cycle, so that issues or differences of opinion are identified early in the processes and resolved.

13. In preparing the annual funding decision, Country Teams for High Impact and Core portfolios should engage with the Risk Department in the review of management issues and risks. Before submitting the ADMF for sign-off by the relevant approval authority, the ADMF will be shared with the Risk Management Department via an email seeking “no objection” on the ADMF risk section within 48 hours\(^{191}\). If the Risk Department does not raise an objection within that period, their agreement with the risk analysis is assumed. If an objection is raised, the issue is escalated to the next management level in accordance with the process outlined in the Guidance on Country Team Approach.

14. **Approval Authority for Annual Funding Decisions.** Annex 1 provides the delegated authority for annual funding decisions.

15. **Notification and Performance Letters.** The Principal Recipient will be informed of the annual funding decision amount and the planned disbursements through an *Annual Funding Decision Notification Letter*. The notification letter should be sent within 15 days from the approval of the annual funding decision. In addition, a Performance Letter will be issued to the Principal Recipient outlining issues arising from the Secretariat’s review of the Progress Update/Disbursement Request, recommended actions to address these issues, and a timeline for completion.

16. **Supplementary Funding Decision.** A supplementary funding decision may be processed for the following cases:
   - there is insufficient commitment under the initial funding decision to support grant activities for the Principal Recipient or third parties; and
   - to disburse for closure activities, after the grant end date, as long as the Implementation Letter approving the grant closure plan and budget, and/or Final Payment Letter has been signed by the Principal Recipient.

---
\(^{191}\) Given the ongoing engagement, it is expected that the 48 hours-period for raising an objection will be used rarely. In case of frequent use, it would reflect poorly on the engagement between the Country Team and Risk Department and should be escalated to Grant Management Department Head and the Chief Risk Officer.
17. Supplementary funding decisions may be processed up to 18 months from the start date of the annual funding decision period. It is possible to process more than one supplementary funding decision in an annual funding decision period. This would be done through completing an additional supplementary ADMF that would be generated to supplement the existing decision.

18. Supplementary funding decisions follow the delegated authority matrix (Annex 1) based on the cumulative amount of funding decisions.

**DISBURSEMENT DECISIONS**

19. A disbursement is the actual transfer of cash from the Global Fund to the Principal Recipient or to third parties on behalf of the Principal Recipient for the payment of goods and services. Disbursements are generally in the currency(ies) of the signed grant agreement unless there is a specific framework agreement between the Global Fund Secretariat under a corporate initiative with third party entities (e.g. Green Light Committee) requiring the use of another currency or currencies. Disbursements can also be processed in multiple currencies, if deemed by the Global Fund to be more advantageous in terms of managing and neutralizing foreign exchange impact on grant activities.

20. **Direct Disbursement to Third Parties.** A direct disbursement to a third party can be initiated by the Principal Recipient or mandated by the Global Fund. Third parties that can receive direct disbursements include:
   i. procurement service agents;
   ii. agents that are directly contracted by the Global Fund Secretariat (e.g., fiduciary agents, fiscal agents);
   iii. auditors and other service providers providing independent assurance to the Global Fund on grant implementation (external audit, diagnostics and other independent reviews);
   iv. private entities and internationally recognized technical assistance agencies and service providers with which the Global Fund has signed partnership agreements (including the official travel agent of the Global Fund when it is deemed more optimal and efficient for the Secretariat to arrange implementers’ travel on grant related missions to Geneva);
   v. Green Light Committee (for the payment of the cost-sharing element pursuant to the MoU with the Green Light Committee);
   vi. Sub-Recipients, in cases where Sub-Recipients are acting as procurement agents, Sub-Recipients in Additional Safeguard Policy (ASP) countries or in countries where the political and/or the financial context does not enable the Principal Recipient to disburse to the Sub-Recipient, and Sub-Recipients that are in different geographical locations than the Principal Recipient and where risks relating to potential foreign exchange exposure and/or inefficient banking regulations exist.

Third party payments outside of the above cases should be strongly justified and signed off on exceptional basis (see Annex 1).

21. For direct disbursements to third parties, the following information needs to be provided in order to register the relevant entity in the system:
   i. A communication from the Principal Recipient requesting the Global Fund to process direct disbursements to the relevant third party;
   ii. A signed agreement between the third party and the Principal Recipient or the Global Fund;

---

992 Supplementary funding decisions related to grant closures can be processed until six months after grant end date (see *OPN on Grant Closures*).

993 For example, for regional grants where the Principal Recipient and Sub-Recipients are located in different countries.
iii. A bank letter filled with the relevant third party’s bank details
iv. An anti-terrorism screening performed prior to approving the direct disbursement process.

22. **Disbursement amounts and schedule.** The disbursement schedule and forecasted amounts will be established by the Country Team as an integral part of the annual funding decision process based on the grant risk profile and the forecasted cash requirements for the execution period covered by the annual funding decision. The cumulative amount of the disbursement schedule may exceed the total funding decision for the related execution period if there are Grant Payable (committed undisbursed) funds remaining with the grant from previous execution periods. However, the cumulative amount of the disbursement schedule cannot exceed the available total Grant Payable (including the amount being committed through the annual funding decision being made).

23. Disbursements are typically done quarterly or when the Principal Recipient requires cash during the execution period covered by the funding decision.

24. The disbursement schedule is determined at the discretion of the Country Team to accommodate for operational requirements. In certain instances, the Country Team may propose the release of disbursements outside the regular quarterly cycle due to country or grant specific circumstances. For such decisions, the Country Team should provide a valid rationale taking into account efficiency, cash optimization, grant risk profile (including currency risks), grant context, nature of interventions/activities, implementation arrangements, cash needs and cash absorption rate. The rationale should be duly documented and captured in the ADMF.

25. Issues on disbursement schedule that cannot be resolved at the Country Team level should be escalated in accordance with the process outlined in the Guidance on Country Team Approach.

26. **Approval Authority for Disbursements.** Annex 1 provides the delegated authority for disbursements. Disbursements are approved either through physical signature or through an automated workflow approval. Fund Portfolio Managers and Finance Specialists will have the options to approve (affirmative action or no-objection), modify/reschedule or cancel the scheduled disbursement. For focused portfolios, the authorization of scheduled disbursements will be operationalized through no-objection basis unless the Fund Portfolio Manager and/or Finance Specialist modify or cancel the scheduled disbursement or the disbursement is exceptional requiring additional sign-off.

27. Country Teams should base its disbursement decision on the most recent Progress Report taking into account the cash forecasted by the Principal Recipient, open commitments/obligations, advances and cash balance.

28. **Modifying or Stopping Scheduled Disbursements.** Country Teams are responsible for ongoing grant monitoring and determining if circumstances have changed between the time of the Annual Funding Decision and the scheduled disbursements. All changes on dates and amounts for payees as originally planned and within the overall Annual Funding Decision are done through an automated workflow approval.

---

94 For example, the grant has multiple Sub-Recipients and splitting small annual funding decision into quarterly disbursements will result into inefficient multiple transaction costs for the PR.
95 For example, the full amount of the annual funding decision is needed for the payment of health products and the PR/Procurement Agent does not have a procurement commitment agreement with the Treasury Team.
96 For Focused Countries, this refers to the Portfolio Services Team (PST).
97 Most recent Quarterly Cash Balance Report for High Impact and Core portfolios, and most recent annual Progress Update/Disbursement Request for Focused portfolios.
98 Country Teams will continue releasing disbursements through the Disbursement Release Request Form until the automated workflow approval is implemented in the system.
29. The following provides indicative guidance that Country Teams can follow when determining whether a scheduled disbursement (including the buffer) should be modified downward or upward, stopped or postponed:
   i. progress on requirements related to the scheduled disbursement as well as compliance with requirements due during the annual funding decision period;
   ii. Low cash burn rate\(^{199}\); and
   iii. Increased cash needs due to accelerated implementation.

30. Where the Country Team is modifying or canceling the scheduled disbursement a rationale should be provided to justify such action.

31. It may also be necessary in exceptional circumstances for some disbursements to be released outside of the schedule defined at the time of the Annual Funding Decision, such as large procurement orders or direct payments requiring final supplier invoice (please see Annex 1 for the delegated authority on annual funding decisions and disbursements). Where the Country Team would like to increase or advance the disbursement amount, they should provide a rationale of this decision including the cash absorption rate at the Principal Recipient level in the last 12 months based on the last submitted cash balance information or Progress Update/Disbursement Request received (see footnote 10).

32. **Disbursement Notification Letter.** A Notification Letter is sent from the Country Team\(^{200}\) to the Principal Recipient and/or third party, within 15 days from the release of the disbursement, to inform them of the disbursement. The Country Team should provide additional contextual information to the Principal Recipient if the relevant disbursement amount differs from what was originally approved in the annual funding decision. The Principal Recipient and/or third party does not have to sign the disbursement Notification Letter to confirm receipt of the funds. The funds will be deemed to have been received unless notification to the contrary is sent by the Principal Recipient and/or funds recipient to the Fund Portfolio Manager within 30 days of the date of the disbursement notification letter.

**PROCESS AND RESPONSIBILITIES**

33. The following Annexes provide guidance on the relevant processes:
   - Annex 1: Delegated Authority for Annual Funding and Disbursement Release Decisions
   - Annex 2: Grant Performance Rating Methodology
   - Annex 3: Scoring Methodology for Workplan Tracking Measures
   - Annex 4: Annual Funding Decision Process and RACI - *to be developed with AIM*
   - Annex 5: Disbursement Decision Process and RACI – *to be developed with AIM*
   - Annex 6: Standard Checklist for Management Issues

---

\(^{199}\) Significant unspent cash balances which are not required before the next disbursement — more than 25-50\% not spent of the previous cash disbursed under the current Annual Funding Decision as evidenced by the latest progress reports or updates in cash balances.

\(^{200}\) This can be done through an automatic process once the functionality is implemented in the system.
## CHANGE HISTORY:

<table>
<thead>
<tr>
<th>No.</th>
<th>Approved By</th>
<th>Change Description</th>
<th>Date</th>
<th>Version No</th>
</tr>
</thead>
</table>
| 1.  | EGMC        | • Clarified rules that buffer should not be release before 12 months of the execution period, but if required, the disbursement must be approved by Treasury.  
• Clarified definition of annual funding decision (not incremental commitment but total disbursement over the execution and buffer period) and included rules on disbursing beyond the buffer period (up to 6 months after the buffer).  
• A differentiated approach for rolling out the new requirement for PRs to submit quarterly financial reporting on cash balances and (ii) clarification that the EFR remains applicable for old grants, while the new Annual Financial Report (AFR) is applicable for grants signed under the new funding model.  
• Introduces workplan tracking measures for use in grants without service delivery components as well as the rating methodology for grants converting the milestone tracking into a standard indicator rating.  
• Clarifies the simplified process for making a first annual funding decision based on the recently signed budget in the grant agreement.                                                                 | 18 September 2014 | 2.2        |
| 2.  | EGMC        | • Standard 6 months buffer for annual funding decisions for focused countries. 6 months buffer is also allowed for core and high impact countries.  
• For Focused Countries, disbursements approved either through a no-objection basis except when the disbursement is modified, cancelled or requires additional sign-off.  
• PPM, AMFm and Wambo-related commitments will not be processed through the ADMF but through the IOCF process.  
• Provision for multi-currency disbursements if deemed more advantageous in terms of managing foreign exchange fluctuations.  
• Revised delegated authority for annual funding decisions and disbursements.  
• Additional flexibilities on disbursements to third parties.  
• Revised grant rating methodology.                                                                                                                                                                                                 | 22 July 2016   | 2.3        |
ANNEX 1. DELEGATED AUTHORITY ON ANNUAL FUNDING DECISION AND DISBURSEMENTS

1. The purpose of this annex is to determine the delegated authority and approval limits for Annual Funding Decisions and Disbursement Decisions.

2. Delegation of authority is the assignment to certain officers or staff members of the Global Fund the responsibility and power to authorize certain transactions. The delegated authority of an officer or staff member can only be approved within the approval limits specifying the value of the transactions which such officer or staff member may authorize.

3. Officers and staff members receiving a delegation of authority under this annex are responsible for the delegated authorities and approval limits granted to them. Sub-delegations of authority and approval limits, however, must be specified in writing and no sub-delegated authority or approval limit should ever be assumed in the absence of a written sub-delegation of authority.

4. Delegated authority and approval limit can only be sub-delegated together to a person holding a similar function (e.g. Fund Portfolio Manager to Fund Portfolio Manager, Regional Finance Manager to Regional Finance Manager, Department Head to Department Head etc..) or to the direct supervisor of the approver. They may never be delegated to subordinates.

5. The exercise of a delegated authority is performed through an approval process to record approval actions whether within an automated workflow system, paper-based, or e-signature. For purposes of the annual funding and disbursement decisions, the transactions will require an affirmative action by the holder of the delegated authority (i.e. physical signature or automated workflow approval), except for certain transactions which will be authorized on a no-objection basis.

6. No-objection approval is defined as approval granted by an officer(s) or staff member with delegated approval authority, implying that they have no objection to proceed with a given transaction and/or request as per agreed upon procedures. If (i) one or more approver(s) with delegated authority expresses an objection within the stipulated timeframe; or (ii) any of the exceptions outlined in paragraph 11 below is applicable, the no-objection approval process is no longer applicable for the transaction and/or request. The initiator of the transaction or request would need to provide the additional information for regular affirmative action approval.

Annual Funding Decision

7. Approval limits for purposes of the annual funding decisions are broken-down into three categories (as outlined in the table below):
   a. Up to and including US$ 20 million
   b. Above US$ 20 million and up to (and including) US$ 40 million
   c. Above US$ 40 million

---

201 Function is a key determinant and not just the grade level of the individuals. For example, a Fund Portfolio Manager can sign on behalf of a Senior Fund Portfolio Manager. However, the Senior Manager Risks & Assurance cannot sign on behalf of the Regional Finance Manager, as the function is different.

202 The initial pilot for a no-objection based approval for disbursement release will soon be initiated for Focused Countries.
Disbursement Decisions

8. As a general principle, the Fund Portfolio Manager and Finance Specialist have the approval authority to release disbursements for the grant (excluding Wambo and PPM). Release of exceptional disbursements outlined in paragraph 11 below shall trigger the additional approval of the Regional Manager (Head of Department for High Impact) and the Regional Finance Manager.

9. Disbursements are approved either through physical signature, e-signature or through an automated workflow approval. Fund Portfolio Managers and Finance Specialists will have the option to approve (affirmative action or no-objection), modify/reschedule or cancel the scheduled disbursement. For Focused Countries, scheduled disbursements approved in the annual funding decision shall proceed and be authorized by the Fund Portfolio Manager and Finance Specialist through a no-objection basis except when the disbursement is modified or cancelled, or requires additional sign-off due to an exceptional case (as defined in the table of exceptional cases below).

10. The Financial Services Team will perform a final compliance and due-diligence review to ensure compliance with established procedures as outlined in the OPN and accurate matching the payee details (name and associated bank account). There will be a 2-step verification within Financial Services as follows:

   a. Step 1: Analyst, Financial Services – verification
   b. Step 2: Supervisor or Manager, Financial Services – Review and approval203

---

203 This includes the Batch Release Approval for execution of the transaction by the Treasury and banking institution.
### 11. Exceptional Cases

Exceptional cases are classified into 3-levels as follows:

<table>
<thead>
<tr>
<th>Exception Level 1</th>
<th>Exception Level 2</th>
<th>Exception Level 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>• The Grant Agreement has reached the implementation period end-date plus the 6 months closure period to liquidate financial liabilities.</td>
<td>• The Secretariat has been informed in writing that the Inspector General has made a “determination there is credible and substantive evidence of fraud, abuse, misappropriation or corruption” relating to the grant in question and the Executive Director has subsequently approved the continued implementation of the grant in accordance with the Board Decision B19/DP25 (May/2009).</td>
<td>• Release of buffer during the execution period.</td>
</tr>
<tr>
<td>• Funding decision amount that deviates by +/-10% of the agreed corporate forecast amount for the specific grant.</td>
<td>• The Secretariat has been informed of credible and substantive evidence of fraud, abuse, misappropriation or corruption” relating to the grant in question from non-OIG sources.</td>
<td>Note: In cases where the execution and buffer period is within 12months, the exception is not applicable and regular approval authority applies.</td>
</tr>
<tr>
<td>• Critical issues (programmatic &amp; financial) raised by the LFA and/or other assurance providers and validated by the Country Team.</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>• Audit report not received or received with a qualified opinion or major disclaimers and issues</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>• Progress Update/Disbursement Request was not received, significant issues were highlighted or the Quarterly Cash balance report was not compliant in the last reporting window.</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>• Cumulative ineligible expenditure represent the lower of 1% of the total funds disbursed or US$ 200K for a specific grant.</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>• The Secretariat is aware and/or has been informed by the OIG or other sources of ongoing investigations of the Principal Recipient/implementer.</td>
<td>•</td>
<td></td>
</tr>
<tr>
<td>• The disbursement is to a third party not listed in this OPN.</td>
<td>•</td>
<td></td>
</tr>
</tbody>
</table>

---

204 The level-2 exceptions and signature authority takes precedence even when there are more level-1 factors in the same decision.

205 Applicable to core and high impact countries only. Focused portfolios do not always submit corporate forecast at grant level.

206 The report was incomplete or inaccurate information was reported, etc.
12. The approval authority for exceptions management will follow the regular approval limit as outlined in paragraph 7 above in addition to the following approvers.

<table>
<thead>
<tr>
<th>Approval Limit</th>
<th>Level 1</th>
<th>Level 2**</th>
<th>Level 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Up to (and including) US$ 20M</td>
<td>Head of Department, Grant Management</td>
<td>Head of Division, Grant Management</td>
<td></td>
</tr>
<tr>
<td>Above US$ 20M and Up to (and including) US$ 40M</td>
<td>Head of Division, Grant Management</td>
<td>Head of Division, Grant Management</td>
<td>Treasurer</td>
</tr>
<tr>
<td>Above US$40M</td>
<td>Head of Division, Grant Management</td>
<td>Head of Division, Grant Management</td>
<td></td>
</tr>
</tbody>
</table>

*Generally, the Delegated Authority for Finance remains with the Regional Finance Managers. For Level 2 exceptions, RFM is expected to consult with the Head of Program Finance and Controlling & CFO as appropriate.*

**The Executive Director approval is required in cases where there is an OIG-confirmed misuse of funds.**

13. In addition to the Regional Manager and Regional Finance Manager approval, the exceptional release of the buffer amount within the 12-month execution period (Level 3 Exception) requires the additional signature of the Treasurer (or an authorized representative from the Treasury Team) to ensure the availability of resources in terms of the timing and amount, to cover the buffer amount to be disbursed. Treasury sign-off is not required in cases when a grant’s execution period and buffer period are less than 12 months.
## ANNEX 2: GRANT PERFORMANCE RATING METHODOLOGY

### References:

### CALCULATE INDICATOR RATING

<table>
<thead>
<tr>
<th>Seq No</th>
<th>Responsible</th>
<th>Process Description</th>
<th>Output</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Country Team</td>
<td>Inputs data from the PU/DR into GMS.*** If the grant’s quantitative indicator rating will be based on Work-Plan Tracking Measures, please follow the guidance in Annex 3 on how to convert the Country Team’s evaluation of progress against the work-plan into a quantitative indicator rating. The results shall be entered into GMS.</td>
<td></td>
</tr>
</tbody>
</table>
| 2.     | GMS (GRT)    | The Grant Rating Tool within GMS produces a quantitative indicator rating that is automatically extracted by the Annual Decision Making Form (ADMF). Depending on the type of indicator and target setting in the Performance Framework, the results will be aggregated over the reporting periods for Annual Funding decision. Indicator ratings will be calculated as follows:  
• “Non-cumulative” targets: These reflect period specific targets/results, irrespective of the targets/results in the previous periods. In such cases, the relevant periodic targets/results will be added up to calculate the indicator rating for the Annual Funding Decision.
• “Non-cumulative (other)” targets: This is applied to indicators that refer to people currently receiving services irrespective of the targets/results in previous periods. Therefore, the targets/results in the last reporting period will be used to calculate the indicator rating for the Annual Funding Decision.
• “Cumulative annually” targets: These targets are already cumulated over the year or the reporting period*. In such cases, the targets in the last reporting period will be used to calculate the indicator rating for the Annual Funding Decision.  
  *This is to avoid cumulating targets over the entire Grant Implementation Period, which is no longer permissible.

The calculated Indicator Rating is automatically downgraded by one rating if one indicator has less than 60% achievement. The downgrade only applies to grants with an Indicator Rating of a1 and/or a2. The final rating, however, remains the same if the Indicator Rating is b1, b2 or c, i.e., no further downgrading shall be applied in such cases.

<table>
<thead>
<tr>
<th>Seq No</th>
<th>Responsible</th>
<th>Process Description</th>
<th>Output</th>
</tr>
</thead>
</table>
| 3.     | Country Team | - Assesses the quality of reported data and whether the calculated quantitative indicator rating adequately reflects the programmatic performance of the grant.  
- If not, the Country Team adjusts the quantitative rating to reach the final indicator rating. Appropriate and documented justification must be included in the ADMF for any changes to the quantitative rating. Grant management and contextual factors (force majeure, political and civil issues at the country level, etc.) do not form part of the indicator rating. |

### DETERMINE INDICATIVE FUNDING RANGES

<table>
<thead>
<tr>
<th>Seq No</th>
<th>Responsible</th>
<th>Process Description</th>
<th>Output</th>
</tr>
</thead>
</table>
| 4.     | ADMF Tool   | Calculates the indicative annual funding range based on the indicator rating and the cumulative budget (including the period covered by funding decision). The indicative annual funding ranges are linked to indicator rating and are intended to ensure that the funding decisions are commensurate with the program performance. The indicative funding ranges for each Indicator Rating, before other factors are taken into consideration, are as follows:  

<table>
<thead>
<tr>
<th>Indicator Rating</th>
<th>Average Achievement (Result/Target) (%)</th>
<th>Cumulative Budget Amount (including current funding request)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Seq No</td>
<td>Responsible</td>
<td>Process Description</td>
</tr>
<tr>
<td>--------</td>
<td>-------------</td>
<td>---------------------</td>
</tr>
<tr>
<td>a1</td>
<td>Exceeding expectations</td>
<td>&gt;100%</td>
</tr>
<tr>
<td>a2</td>
<td>Meet expectations</td>
<td>100-90%</td>
</tr>
<tr>
<td>b1</td>
<td>Adequate</td>
<td>60-89%</td>
</tr>
<tr>
<td>b2</td>
<td>Inadequate but potential demonstrated</td>
<td>30-59%</td>
</tr>
<tr>
<td>c</td>
<td>Unacceptable</td>
<td>&lt;30%</td>
</tr>
</tbody>
</table>

Funding ranges are only indicative; they serve as a “starting point” for the Country Team in determining the annual funding amount. There are many valid reasons for disbursing outside the indicative ranges and these should be documented in the ADMF.

<table>
<thead>
<tr>
<th>Indicator Rating</th>
<th>Cumulative Budget</th>
<th>Indicative Funding Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>b2 $16,743,641</td>
<td>30-59%</td>
<td>$5,023,092 - $9,878,748</td>
</tr>
</tbody>
</table>

**IDENTIFY MANAGEMENT ISSUES**

5. Country Team - Determines whether there are management issues in each of the following four functional areas:
   (i) Monitoring and Evaluation (M&E);
   (ii) Program Management (PM);
   (iii) Financial Management and Systems (FM&S); and
   (iv) Health Product Management (HPM).
   - Assigns a score of no, minor, or major issues for each functional area
   - Captures these scores in the ADMF including the remedial actions and/or capacity-building measures to be implemented by the Principal Recipient. These actions and measures shall also be communicated to the Principal Recipient through the Performance Letter. Where appropriate, the additional costs for capacity strengthening should be specified and explained in the annual funding decision.
   - When processing the ADMF, ensure that significant discrepancies between expenditures, program performance and results are identified. Country Teams should also perform a comprehensive analysis to justify and document the cause of the discrepancy, including identifying any corrective actions where necessary.

**DERIVE THE OVERALL GRANT RATING**

6. Country Team - Determines the overall grant rating:
   - The overall grant rating should be one rating lower than the indicator rating if one or more of the functional areas (M&E, PM, PHP, FM&S) receive a score of “Major Issues”.
   - In severe cases where there are two or more functional areas scoring as “Major Issues”, the Country Team may exceptionally consider an overall grant rating that is two ratings lower than the indicator rating.

<table>
<thead>
<tr>
<th>Indicator Rating</th>
<th>Overall Grant Rating</th>
<th>Rationale for Overall Grant Rating</th>
</tr>
</thead>
<tbody>
<tr>
<td>a2</td>
<td>b1</td>
<td>Grant Management Issues</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Prog Mgt</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Minor</td>
</tr>
</tbody>
</table>

Insert one sentence describing the rationale for Grant Rating.

Includes in the ADMF:
<table>
<thead>
<tr>
<th>Seq No</th>
<th>Responsible</th>
<th>Process Description</th>
<th>Output</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>- An explanation of important deviations, if any, between results and targets for individual indicators;</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>- A description of how overall performance, including any available information related to progress toward outcome and impact supports the annual funding decision; and,</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Identifies management issues that affected the overall grant rating (including quality of services and progress against work-plan tracking measures, requirements, strengthening measures identified, capacity assessment and other reviews, etc.), as well as required follow-up actions.</td>
<td></td>
</tr>
</tbody>
</table>

**DETERMINE ANNUAL FUNDING DECISION AMOUNT**

<table>
<thead>
<tr>
<th></th>
<th>Country Team</th>
<th>The annual funding amount should be based on the indicative range based on the indicator rating; expenditure rate; grant management issues (including quality of services where available), including the mitigating actions needed to address them.</th>
<th><strong>Recommended AFD Amount</strong></th>

</thead>
<tbody>
<tr>
<td>7.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
ANNEX 3: SCORING METHODOLOGY FOR WORK-PLAN TRACKING MEASURES

There are some program areas (modules) and interventions that constitute essential investments in Global Fund grants but cannot be measured using available coverage indicators during the execution period being assessed and will therefore not result in a standard indicator rating. Moreover, these areas require additional qualitative measures to assess their effectiveness.

To address this, the Global Fund has developed a specific M&E framework for modules that do not have a service delivery component and will request the Principal Recipient to report on progress through the Progress Update/Disbursement Request on the agreed upon work-plan tracking measures (WPTM) in country specific, multi-country and regional grants (see the M&E Framework for the Global Fund Grants with Insufficient Coverage Indicators for Performance Based Funding for further information).

A differentiated approach will be applied in using these measures for determining an indicator rating and in making performance-based annual funding decisions:

i. When grants do not include any coverage/output indicators, a scoring methodology will be applied to measure progress against WPTMs to arrive at an indicator rating.

ii. When grants include both coverage/output indicators as well as the WPTMs, only the coverage/output indicators will be used to calculate the indicator rating. In these instances, WPTM may be additionally used at the discretion of the Country Team in determining the overall grant rating and adjusting the annual funding decision amount.

The following scoring methodology will be applied to derive scores and equivalent indicative funding range at each reporting period.

1. The progress on work-plan tracking measures (i.e. milestones and targets for input and process indicators) will be categorized as:

<table>
<thead>
<tr>
<th>Implementation progress during the reporting period</th>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>No progress against planned milestone or target</td>
<td>Not started</td>
</tr>
<tr>
<td>Less than 50% completion of the milestone or target</td>
<td>Started</td>
</tr>
<tr>
<td>50% or more completion of planned milestone or target</td>
<td>Advancing</td>
</tr>
<tr>
<td>100% achievement of planned milestone or target</td>
<td>Completed</td>
</tr>
</tbody>
</table>

2. Achievement against each work-plan tracking measure (milestones and targets) will be graded on a four point scale from 0 to 3:

<table>
<thead>
<tr>
<th>Category</th>
<th>Score</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not started</td>
<td>0</td>
</tr>
<tr>
<td>Started</td>
<td>1</td>
</tr>
<tr>
<td>Advancing</td>
<td>2</td>
</tr>
<tr>
<td>Completed</td>
<td>3</td>
</tr>
</tbody>
</table>

3. At each reporting period, depending on the progress in implementation of various activities, respective score will be allotted to each measure.

4. Based on reported progress, the sum of all scores during the reporting period will be compared against the maximum score for that period to obtain the default rating.

---

207 Examples of such modules/interventions include removing legal barriers to access or changes in policy and governance under HSS.

208 At the time of Grant Making, the Country Team decides and agrees with the PR whether the indicator rating will be based on Coverage Indicators or Work-Plan Tracking Measures.
5. The default rating determines the indicative funding range. The indicative funding ranges for each Indicator Rating, before other factors are taken into consideration, are as follows:

<table>
<thead>
<tr>
<th>(Total score/Maximum score)</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>100% or above</td>
<td>a1</td>
<td></td>
</tr>
<tr>
<td>90-99%</td>
<td>a2</td>
<td></td>
</tr>
<tr>
<td>60-89%</td>
<td>b1</td>
<td></td>
</tr>
<tr>
<td>30-59%</td>
<td>b2</td>
<td></td>
</tr>
<tr>
<td>&lt;30%</td>
<td>c</td>
<td></td>
</tr>
</tbody>
</table>

Default WPTM Rating | Cumulative Budget Amount (including current funding request)  
____________________|_________________________________________________________
 a1        | Between 90-100% of Cumulative Budget through the next reporting period  
 a2        | Between 60-89% of Cumulative Budget through the next reporting period  
 b1        | Between 30-59% of Cumulative Budget through the next reporting period  
 b2        | To be discussed individually  
 c         |
ANNEX 4: STANDARD CHECKLIST OF MANAGEMENT ISSUES

This list has been compiled to assist Country Teams in evaluating management performance issues in the four functional areas. This is not an exhaustive list. Country Teams may identify and document other grant-specific management issues as appropriate.

<table>

Grant Revisions

Issued on: 22 February 2018
Issued by: Grant Portfolio Solutions
Approved by: Executive Grant Management Committee
Purpose: To provide guidance to Country Teams on the policy and process for revising an existing grant.

INTRODUCTION

The goal of a grant revision is to allow Global Fund investments to adjust to programmatic requirements during grant implementation, in order to ensure the continued effective and efficient use of Global Fund resources invested to achieve maximum impact in line with the Global Fund’s 2017-2022 Strategy. A grant revision may also occur due to other changed circumstances and arrangements.

HOW TO READ THIS DOCUMENT

As this OPN covers all types of revisions, only parts of this document will be relevant to Country Teams at any given time, depending on the type of revision planned.

First, it is recommended that Country Teams determine the type of revision required, based on the decision tree on page 2, and then proceed directly to the appropriate section. The types of revisions and relevant sections of this OPN are:

Extensions (End-Date Revisions)
if extending the grant’s implementation period (IP)  Section A

Additional Funding Revisions
if increasing total funds, but not extending IP  Section B

Program Revisions
if revising programmatic scope/scale, but not extending IP or adjusting total funds  Section C

Budget Revisions
if changes are solely budgetary and do not impact Performance Framework  Section D

Administrative Revisions
if changes are only being made to master data contained in Grant Agreement (e.g., PR/LFA contact details)  Section E

For each type of revision, the comprehensive process and requirements are defined in the specified section in the OPN. For example, extensions which involve changes to both budget and performance framework would follow only the extensions process defined in Section A and do not need to go through the program revisions and budget revisions processes.

This Operational Policy Note (OPN) supersedes former OPN on Signing and Amending Grant Agreements (sections pertaining to amending grant agreements), OPN on Extending Grant Implementation Periods, and OPN on Reprogramming During Grant Implementation.

This Operational Policy Note is designed as an interim document, to provide guidance to Country Teams, until potential revisions to the Board-approved extension policy (GF/B31/DP12) are approved.

If a Country Team is unclear as to which type of revision is most relevant given the context, please consult with the Operational Policy Hub or Legal Officer for guidance.

---

209 This Operational Policy Note (OPN) supersedes former OPN on Signing and Amending Grant Agreements (sections pertaining to amending grant agreements), OPN on Extending Grant Implementation Periods, and OPN on Reprogramming During Grant Implementation.
210 This Operational Policy Note is designed as an interim document, to provide guidance to Country Teams, until potential revisions to the Board-approved extension policy (GF/B31/DP12) are approved.
211 If a Country Team is unclear as to which type of revision is most relevant given the context, please consult with the Operational Policy Hub or Legal Officer for guidance.
61. It is critical that grant revisions should be processed prior to effectivity date of the grant revisions. Retroactive grant revisions (such as processing of an extension request past the grant end-date) are not allowed.

62. Second, for more detailed guidance on the specific steps required by each stakeholder, please refer to Grant Revision Process Flow.

63. Third, there are frequently asked questions related to Grant Revisions on Service Now.

64. Finally, a list of key concepts related to Grant Revisions, as well as an overview of stakeholder roles and responsibilities can be found on pages 2-4.

Figure 1: Decision tree to determine the type of grant revision to pursue

KEY CONCEPTS

65. **Allocation period.** The allocation period is the three-year period, aligned to each replenishment period, during which eligible applicants may apply for, and the Board may approve, such funding for grant programs. For the 2017-2019 allocation period, this period starts on 1 January 2017 and ends on 31 December 2019. For key concepts related to grant making, refer to the OPN on Access to Funding, Grant-making, and Approval.
Allocation Utilization Period (AUP). The Allocation Utilization Period is the 3-year period during which the country allocation per disease component can be utilized to implement programs. It starts the day after the original end-date of existing grant(s). The start date of the Allocation Utilization Period per disease component is documented in the Allocation Letter.

![Figure 2. The Allocation, Allocation Utilization and Implementation Periods.](image)

Implementation Period. An implementation period is the period during which a Principal Recipient implements programmatic activities, as reflected in the grant agreement. An Extension of an existing grant will extend the end-date of the implementation period of the existing grant, however the end-date of the current Allocation Utilization Period will not be extended. This means that all Extensions will use time from the subsequent Allocation Utilization Period, with funding used during the Extension period to be deducted from the subsequent allocation amount; the remaining balance will then become the maximum amount of funds available for the remainder of the subsequent Allocation Utilization Period (figures 2 and 3).

![Figure 3. Example of an Extension of an existing implementation period.](image)

Unutilized Funds (undisbursed funds + uncommitted in-country cash balance). Funds from a previous allocation period that remain unutilized at the end of the relevant implementation period cannot be carried over to increase the designated country allocation for the new Allocation Utilization Period. Instead, unutilized funds will be returned to the general

---

212 Justifications for variations from the three-year standard will be provided to the Board as part of the Secretariat’s grant approval requests - Annex 1, GF/B35/09 Allocation Methodology 2017-2019. Should the allocation utilization period be more than three years, the maximum funding available remains the same.

213 In order to incentivize joint programming and enable effective and efficient management of such grants in exceptional cases, flexibilities to the grant implementation periods may be applied.

214 An implementation period is not necessarily the same as a grant; a single grant can span multiple implementation periods. For example, a grant implemented by the same PR for the same disease component and with the same grant name in the subsequent implementation period will continue as the same grant, but in a new implementation period.
funding pool and become available for portfolio optimization investment. For further guidance, please refer to the OPN on Grant Closures.

**HIGH-LEVEL ROLES & RESPONSIBILITIES**

69. At a high-level, the roles and responsibilities associated with pursuing a grant revision are roughly similar, regardless of which type of revision is being pursued. For further information on the detailed process steps, see Annex I.

70. **Principal Recipient (PR)** initiates a revision (in coordination with the Country Team and Country Coordinating Mechanism); accesses the relevant revision documents in the Partner Portal; completes relevant sections of the *Grant Revision Request Form* and the amended grant documents (including Performance Framework, Detailed Budget, and List of Health Products, if applicable) and submits to the Country Team through the Grant Operating System (GOS); and countersigns the Implementation Letter required to amend the Grant Agreement (if applicable).

71. **Lead Implementer (LI)** is the entity (organization or office) that is operationally responsible for the implementation of the grant’s activities. In terms of grant revisions, the LI supports the PR in preparing the relevant revision documents and is notified of key steps and deliverables in the process (e.g., approvals). Note that the Lead Implementer is not reflected in the Grant Agreement, and for many grants, the Principal Recipient and Lead Implementer are the same entity.

72. **Country Coordinating Mechanism (CCM)** endorses the revision request (for Extensions, Additional Funding, and Program Revisions) or is notified about the request (for Budget and Administrative Revisions).

73. **Local Fund Agent (LFA)**, if requested by the Country Team, reviews the Performance Framework and Budget documents (and others, if applicable) and makes recommendations to the Country Team.

74. **Country Team** initiates revisions (in coordination with the PR and CCM); provides grant revision templates for PR/LI to complete; reviews PR/LI-submitted documents (including the *Grant Revision Request Form*, Budget, Performance Framework, List of Health Products, etc.); determines the type of revision required; finalizes the *Grant Revision Request Form* for review by the relevant approval authority, if applicable; facilitates and executes the review and approval process of the revision request; coordinates with other teams within the Secretariat to notify the Board and Grant Approvals Committee, as applicable; approves revision requests in line with delegated approval authority; and prepares and signs the relevant amendments to the grant agreements (e.g., through an Implementation Letter), if applicable.

**SECTION A: EXTENSIONS (END-DATE REVISIONS)**

75. **Definition:** An Extension (End-date Revision) amends and extends the end-date of the relevant implementation period to allow for continued grant implementation and to avoid program disruptions while operational challenges are addressed or a new allocation is being accessed.

76. **Triggers:** Extensions should be sought on the grounds of strongly justified circumstances, such as:

---

215 This section operationalizes the policy related to extending grant implementation periods as approved by the Global Fund Board (GF/31/DP12 – Extension Policy under the New Funding Model).

216 Operational policy on the possible use of extensions will be updated should there be amendments to the Board-approved extension policy (GF/B31/DP12).
i. To facilitate the submission of single funding requests for multiple disease components (e.g., joint HIV and TB concept notes for high co-infection countries);

ii. To address challenges in timely submission of funding requests due to circumstances that are beyond the control of the applicants;

iii. To compensate for delays in the review and processing of relevant funding requests by the Global Fund, such as unexpected delays caused by the Grant Approvals Committee (GAC) or Technical Review Panel (TRP) review processes, or when the Global Fund Board objects to relevant funding recommendations from the Secretariat;

iv. To compensate for delays in grant making and signing due to circumstances that are beyond the control of the applicants (e.g., matters related to the work of the Office of the Inspector General, changes to nominated Principal Recipients); and/or

v. To compensate for delays in implementation due to circumstances that are beyond the control of the implementers.

77. **Initiators:** An Extension may be initiated by the Principal Recipient, the CCM, or the Country Team. The CCM must be informed of all Extensions, and shall endorse all requests for Extensions as these will be financed from the country’s subsequent allocation.

78. **Timing:** An Extension should ideally be approved at least three months prior to the current implementation period end-date, to avoid any gaps between current implementation period end-date and Extension period start-date. To meet this deadline, it is recommended that countries begin the process at least 6 months prior to the current implementation period end-date.

79. **Key Design Considerations:** When designing an Extension, Principal Recipients and Country Teams should adhere to the following guidelines:

   a. **Source of Funding:** Although Extensions amend the Implementation Period, they do not amend the Allocation Utilization Period. Therefore, all Extensions will use time from the subsequent Allocation Utilization Period and will be funded from the subsequent allocation, reducing the amount of time and funds available for the next Implementation Period. In addition, the Allocation Utilization Period in which goods and services are delivered determines the allocation from which it will be funded; therefore, if goods and services are delivered during an Extension period, they will be funded from the subsequent allocation.

   b. **Sustainability:** As all Extensions will be financed by the subsequent allocation, Country Teams and PRs must ensure that programmatic and cost implications beyond the Extension period have been fully considered. The activities and budget for the Extension period should enable a proper transition to the next Implementation Period and consider the expected trajectory of future funding. This is to ensure that a disproportionate amount of the subsequent allocation is not consumed during the Extension period (e.g., to ensure that 50% of the subsequent allocation for a component is not consumed during a 6 month Extension) and that sufficient funds exist to cover the entire 3-year Allocation Utilization Period. Such disproportionate spending could set the program on an unsustainable spending trajectory or one not reflective of the epidemiological context.

   c. **Maximizing Impact:** Country Teams should ensure that all programmatic activities during the Extension period maximize impact given the available resources, align with the core objectives of the Global Fund’s 2017-2022 Strategy, and allow for a seamless transition to the new implementation period.

   d. **Targets and Activities:** The Country Team and PR shall work to determine key programmatic activities and targets during the Extension period. The targets for the period

---

217 The composition of the Country Team varies depending on the portfolio category. For Focused Countries, the Country Team is comprised of the Fund Portfolio Manager, Senior Fund Portfolio Assistant, the Public Health and M&E Specialist, and the Legal Officer. For Core and High Impact Countries, the Country Team includes the Fund Portfolio Manager, Program Officer, Public Health and M&E Specialist, Health Products Management Specialist, Finance Specialist and Legal Officer.
of the Extension should be the same as those specified in the last reporting period, or if an adjustment is required, should be in line with the trajectory of the allocation for that country component going forward.\textsuperscript{218} Programmatic adjustments may be undertaken as necessary to ensure Global Fund resources are strategically invested to achieve maximum impact during the Extension period.\textsuperscript{219} If such programmatic adjustments are deemed to be “Material Program Revisions”, then the process for reviewing Material Program Revisions should be followed in addition to the process for reviewing Extensions (see Section C, paragraph 43).

e. **Length:** Other than with Global Fund Board approval, an Extension cannot extend the current implementation period of the grant for more than 12 months. This maximum length of 12 months is cumulative for all Extensions approved for the current implementation period.

f. **Procurement:** Procurement orders can be placed during the Extension period, but only in instances where 1) procurement is required to avoid stock outs and interruption of program implementation and service delivery during the new implementation period; and 2) where the subsequent grant is in advance stages of the grant making process (must have completed TRP review).\textsuperscript{220} For further information, please refer to the *OPN on Advanced Payment Mechanism (forthcoming)* and the *OPN on Pre-Financing.*

**Approval Authority**

80. A number of criteria are used to determine the appropriate approval authorities required for Extensions (see table on following page). These criteria include:

   a. **The unutilized funds from the current implementation period are sufficient to fully cover the budget for the extension period.**\textsuperscript{221} While this criteria will be used to determine the level of approval required for an Extension, it is important to note that all funds used during the Extension period will be deducted from the subsequent allocation. See Figure 4 for an illustration of the two scenarios.

   b. **The length of the Extension period** (e.g., how much the current implementation period’s end-date will be extended, on a cumulative basis – and therefore, how much time from the Allocation Utilization Period will be left available for the subsequent implementation period);

   c. **The percentage of the subsequent country allocation for the relevant disease component to be used during the Extension period** (e.g., what the Extension period budget will be – and therefore, how much funding for the disease component will be available for the remainder of the Allocation Utilization Period).

81. When assessing the criteria above, the following should be taken into consideration:

a. When determining the percentage of the subsequent allocation amount designated for the relevant disease component to be used during the Extension period, the Country Team should use the most recent program split, as defined through country dialogue during the access to funding and grant-making process (for further details please refer to the *Guidance Note on Program Split*). If such country dialogue has not yet taken place, the Country Team should use the indicative program split, as communicated in the allocation letter for the new allocation period. For multi-component grants, the Country Team should use the sum of the allocation of the relevant components.

\textsuperscript{218} For example, if the country component is facing a subsequent allocation that is significantly smaller than the current one, targets for certain interventions could be adjusted downward in order to reflect the new funding reality. Such decisions should involve consultation with the Country Team and relevant disease advisor.

\textsuperscript{219} This is particularly important when it is known that specific activities are unlikely to continue in the new implementation period due to the amount of the new allocation (e.g., if the amount is reduced).

\textsuperscript{220} Commodities required must be clearly identified and agreed in the List of Health Products in the detailed budget. See OPN on the Pooled Procurement Mechanism for further detail on the mitigating measures required in this situation or the OPN on Advanced Payment Mechanism (forthcoming).

\textsuperscript{221} This criteria will apply until potential revisions to the Board-approved extension policy (*GF/B31/DP12*) are approved.
b. When determining the length and the percentage of allocation amount for the relevant disease component to be utilized during the Extension period, both time and funds should be cumulative for all Extensions requested for that implementation period (e.g., those already signed, if applicable, and the Extension requested).  

**Scenario 1: Unutilized approved funds greater than or equal to Extension period budget**

<table>
<thead>
<tr>
<th>Cumulative Extension Period</th>
<th>% of the next allocation for relevant disease component to be used during Extension period</th>
<th>Approval Authority</th>
</tr>
</thead>
</table>
| Up to 3 months              | Up to 10%                                                                                | Country Team

(And PST for Focused)

**Scenario 2: Unutilized approved funds less than Extension period budget**

Figure 4. Illustration of examples where sufficient unutilized funds do or do not exist in current implementation period to cover the budget for the Extension period.

---

222 For example, if a grant is approved by a Department Head for a six month Extension (assuming sufficient unutilized funds from current implementation period available to finance the Extension budget) accounting for 10% of the new allocation amount for the relevant disease component, and then the country requests an additional two month Extension (assuming sufficient unutilized funds, as well) accounting for 7% of the new allocation amount for the relevant disease component, the second Extension is subject to an elevated approval authority and must be approved by the GAC as it will cumulatively be a nine month Extension accounting for 17% of the new allocation for the relevant disease component.

223 Formerly “non-costed extension”

224 In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the Country Team Approach.
More than 10%

Regional Manager or Department Head *(for High Impact)*

More than 15%

Grant Approvals Committee (GAC)

From 6 up to 12 months

More than 12 months

N/A

Board (with GAC recommendation)

Scenario 1 extensions of 6 to 12 months require approval from GAC regardless of the percent of the next allocation to be used; similarly, Scenario 1 extensions of more than 12 months require Board approval regardless of percentage of the next allocation used.
**Scenario 2: Unutilized funds from the current implementation period are not sufficient to fully cover the extension budget**

<table>
<thead>
<tr>
<th>Cumulative Extension Period</th>
<th>Cumulative amount of additional funding needed for Extension period</th>
<th>Approval Authority</th>

</thead>
<tbody>
<tr>
<td>Up to 12 months</td>
<td>Up to USD 10 million and up to the equivalent of 6 months of additional funding</td>
<td>Grant Approvals Committee</td>
</tr>
<tr>
<td>More than 12 months</td>
<td>More than USD 10 million or more than the equivalent of 6 months of additional funding</td>
<td>Board (with GAC recommendation)</td>
</tr>
<tr>
<td>Any other Extension request</td>
<td>N/A</td>
<td></td>
</tr>
</tbody>
</table>

**Reporting and Impact on Legal Documents**

82. **Reporting:** The *Grant Revision Request Form* should be used to submit all Extension requests. The Country Team provides to the PR the Grant Revision Request Form together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest List of Health Products (LOHP) (as applicable) to complete/update. Using the information compiled by the PR in the *Request Form* and the updated grant documents, the Country Team will finalize the *Request Form* for securing Global Fund approval, with the following documents accompanying the form:

- An amended Performance Framework for the full implementation period (including the Extension period);
- An updated Summary Budget for the full implementation period (including Extension period) and Financial Calculator approved by FO/PST and RFM;
- The CCM Chair and Vice Chair endorsement of the Extension request and the use of allocation for the revision. This endorsement will be captured in the *Grant Revision Request Form*.

---

226 Formerly “costed extension”

227 According to Board-approved extension policy (GF/31/DP12), the GAC is authorized to approve Scenario 2 Extensions as long as the amount of additional funding required (the funding required for the Extension period minus the unutilized funds approved by the Board for the current IP) does not exceed USD 10 million and is not equivalent to more than 6 months of additional funding. To calculate the equivalent months of additional funding, first, determine the additional funding requested, as a percentage of the total Extension period budget. Then, multiply this percentage by the number of months of the Extension request; if more than 6, Board approval is required. For example, if there is an Extension request of 8 months, with a total revision budget of USD 8 million and additional funds requested of USD 4 million, the percentage of additional funds requested over total revision budget is 50%, and the months of funding required is 50% multiplied by 8 months, or 4 months. Therefore, this revision request requires GAC approval. However, if instead, the Extension request is for 8 months, with a total revision budget of USD 8 million and additional funds requested of USD 7 million, the percentage of additional funds requested over total revision budget is 87.5%. Therefore, the months of funding required is 87.5% multiplied by 8 months, or 7 months; this revision request requires Board approval.

228 The Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.

229 If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.

230 Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).

231 In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice
83. For all extensions request, Country Team should consult and inform Access to Funding Department for tracking and reporting of extensions to the Board. For extension requests in High Impact or Core countries requiring GAC and Board approval, Country Teams should consult with the Risk Department on the grant’s key risk and mitigating actions.

84. **Implementation Letter:** Once approval of the Extension has been secured, an amendment to the Grant Agreement is required, which takes the form of an Implementation Letter.
   - **Documents to be included:** This should include an updated Summary Budget and Performance Framework, as applicable.
   - **Signatories:** The Implementation Letter must be signed by the authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

85. **Notification to Board and GAC:** All Extensions approved by the Secretariat must be notified to the Board and GAC through Grant Approvals Committee Reports.

86. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION B: ADDITIONAL FUNDING REVISIONS**

87. **Definition:** An Additional Funding Revision increases the total approved funding for the relevant implementation period during grant implementation, with no amendment to the length of the implementation period.

88. Reductions to the total approved funding for a relevant implementation period should be managed through regular grant management processes. Depending on the trigger of such reductions, further guidance could be sought in the OPN on Co-Financing or the OPN on Recovery of Grant Funds. Where such an approach is not possible, the Country Team may escalate the request to the GAC for review.

89. **Triggers:** Additional funds may be made available at the aggregate portfolio level as a result of, among other factors:
   - Additional pledges and contributions by donors, including permitted restricted financial contributions by private donors;
   - The portfolio optimization process, upon the review and endorsement of the Audit and Finance Committee.

90. **Initiators:** An Additional Funding Revision may be initiated by the Country Team and managed in consultation with CCM, PR(s), LI(s) and technical partners.

91. **Timing:** An Additional Funding Revision may be proposed at any time during grant-making or during grant implementation. For revisions during grant-making, please refer to the OPN on Access to Funding, Grant-making, and Approval.

92. **Key Design Considerations:** When designing an Additional Funding Revision, Principal Recipients and Country Teams should adhere to the following guideline:
   - **Targets and Activities:** The Country Team and PR shall work to determine how to adjust the key programmatic activities and targets for the implementation period. Typically, targets should be adjusted upwards as a result of an Additional Funding Revision, considering the additional resources provided. If, however, the Country Team and PR

---

232 Additional funding from the Emergency Fund follows the Emergency Fund review and approval process as captured in the Guidelines on Emergency Fund.
determine that increasing the targets is not possible, justification in the Grant Revision Request Form is required.

Approval Authority

93. The approval process for Additional Funding Revisions is differentiated based on the percentage increase compared to the original grant funds.

94. The thresholds for percentage increase are cumulative for the entire implementation period and are always compared to the original approved budget at the time of grant signing.

95. It should be noted that if funding becomes available during grant implementation through channels with clearly defined and distinct approval processes and requirements (e.g., special initiatives), or through channels where funding has already been approved for specific country components, the approval authorities and requirements as defined below do not need to be pursued, in addition.

<table>
<thead>
<tr>
<th>Threshold</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Additional Funding Revision of up to 30% of approved fund for the implementation period</td>
<td>Board (with GAC recommendation)</td>
</tr>
<tr>
<td>- Additional Funding Revision of more than 30% (if additional funds will finance TRP-reviewed Unfunded Quality Demand)</td>
<td>Board (with GAC and TRP recommendation)</td>
</tr>
</tbody>
</table>

Reporting and Impact on Legal Documents

96. Reporting: The Grant Revision Request Form should be used to submit Additional Funding Revision requests. The Country Team provides to the PR the Grant Revision Request Form template, together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest LOHP (as applicable), to complete/update. Using the information compiled by the PR in the Request Form and the updated grant documents, the Country Team can then finalize the Request Form for securing Global Fund approval, with the following documents accompanying the form:

a. An amended Performance Framework for the full implementation period;
b. An amended Summary Budget and Financial Calculator approved by FO/PST and RFM;
c. The CCM Chair and Vice Chair endorsement of the revision request. This endorsement will be captured in the Grant Revision Request Form.

---

233 If the additional funding is used to finance TRP-recommended unfunded quality demand (UQD), the PR section of the Grant Revision Form is not required. Agreed elements of the UQD to be funded by additional funding will be captured in the Country Team Section of the Grant Revision Form. In reviewing additional funding revisions, the Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.

234 If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.

235 Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).

236 CCM input will be with respect to programmatic implications of additional funding. In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice & Partnerships Team within the Strategy, Investment and Impact Division (SIID) and to the extent possible in-country partners.
97. **Implementation Letter:** Once finalized and approved by the Global Fund, an Additional Funding Revision must be reflected in the grant agreement, by issuing an Implementation Letter to amend the Performance Framework and Budget.
   a. **Documents to be included:** This should include an updated Summary Budget and Performance Framework.
   b. **Signatories:** The Implementation Letter must be signed by the authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

98. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

### SECTION C: PROGRAM REVISIONS

99. **Definition:** A Program Revision (formerly referred to as a “reprogramming”) is the process of changing the scope and/or scale of a Global Fund-supported program within already approved funding ceiling and current implementation period. The goal of a Program Revision is to promote and enable the adjustments of programs to ensure the continued effective and efficient use of Global Fund resources invested to achieve maximum impact in line with the Global Fund’s 2017-2022 Strategy.
   a. Changing the **scope** is the process of (i) adding or deleting goals and/or objectives, or (ii) changing key interventions\(^{237}\), (including those related to RSSH, Human Rights, and Gender Equality) either at the level of a grant, or at the level of the Global Fund supported disease or HSS program.
   b. Changing **scale** is the process of increasing or decreasing targets for goals and objectives for key interventions.

100. **Triggers:** There are a number of potential scenarios which might trigger a Program Revision. These include, but are not limited to:
   a. The need to invest more strategically, e.g., in case of changes in NSP, epidemiological trends, new data from national surveys, or program evaluations, etc.
   b. Emerging scientific evidence or normative guidance
   c. Changes in the national context
   d. Changes in unit costs and budgetary changes
   e. Changes in implementation arrangements
   f. Scale up effective interventions
   g. Risk mitigation purposes
   h. Shifting activities and budget from one grant / PR to another grant / PR emanating from one funding request
   i. The need to advance transition planning, particularly in the event that a country is nearing the end of its funding relationship with the Global Fund.

101. **Initiators:** A Program Revision may be initiated by the Country Coordinating Mechanism (CCM), Principal Recipient (PR), or the Global Fund Country Team and managed in consultation with CCM, PR/LI(s), and technical partners.

102. **Timing:** A Program Revision may be proposed during grant implementation. The timing of submission of a Program Revision request during grant implementation depends on the defined portfolio category of the country component:

\(^{237}\) For example, key interventions within a defined epidemiological context, as confirmed by the relevant disease advisor: interventions that are not adequately funded at present and/or interventions that meet one or more of the following criteria: i) address emerging threats to disease control, ii) lift barriers to the broader disease response and/or create conditions for improved service delivery; AND/OR iii) enable the roll-out of new technologies that represent best practice.
<table>
<thead>
<tr>
<th>Portfolio Category</th>
<th>When a Program Revision request may be submitted</th>
</tr>
</thead>
<tbody>
<tr>
<td>Focused</td>
<td>Once a year, if warranted by the program context.</td>
</tr>
<tr>
<td>Core</td>
<td>Any time during grant implementation, if warranted by the program context.</td>
</tr>
<tr>
<td>High Impact</td>
<td>Any time during grant implementation, if warranted by the program context.</td>
</tr>
</tbody>
</table>

**Types of Program Revisions**

103. A Program Revision request is classified as either “material” or “non-material”. The materiality of a Program Revision request is assessed at the disease or HSS program level (supported by the Global Fund) and not at the individual grant level.

104. **Material Program Revision.** A Program Revision is considered material when:
   a. It contradicts the TRP’s original or modified review and recommendation on the funding request (e.g. intervention originally removed by TRP is being re-introduced to the program; there is a significant redesign or shift of balance of original approved funding request/grant, i.e. a prevention program is shifting to treatment; a key intervention is removed from the grant without evidence of alternative funding in the country); OR
   b. There is a lack of agreement in the normative guidance, significant gaps in evidence to support a Program Revision, unexplained lack of impact, or difficult trade-offs in decision making (e.g. the grant is operating in a context where there is no national strategy or there is a lack of strategic focus of additional investments or interventions), which therefore requires an independent technical review of the Program Revision request.

105. **Non-Material Program Revision.** A Program Revision request is considered non-material if it falls outside the definition of materiality described in paragraph 44 above.
   a. In addition, funding activities that are included and prioritized in the UQD register generally will be considered non-material and therefore will not require a TRP review. (For further information, please refer to the OPN on Access to Funding, Grant-making, and Approval).
   b. A request involving a shift of activities and respective budget from one PR to another PR from the same approved funding request will not be considered material\(^\text{238}\).

**Determining Materiality**

106. The Country Team, in consultation with relevant Disease Advisors and Regional Managers/Department Heads, reviews the Program Revision request and makes a preliminary determination of whether the revision is material or non-material, as defined above. If no agreement is reached among parties involved in the consultations in determining the materiality of the request, the decision-making will be escalated as per the standard escalation procedure, as determined in the Country Team Approach.

107. All cases identified as Material Program Revisions by the Country Team must be reviewed by the GAC. The GAC confirms whether a Program Revision identified by the Country Team as material is indeed material. If the GAC determines the request to be non-material, the GAC approves the request.

\(^{238}\) During a reallocation of activities and accompanying budget between PRs in the same program, Country Team must ensure that (i) PR(s) to whom the activities will be reallocated has achieved satisfactory past performance and has relevant capacity to perform the activities; (ii) the proposed reallocation is aligned with the program goals and objectives; and (iii) the proposed reallocation is consistent with the TRP recommendations for the program.
If the GAC determines the request to be material, the request is referred to the TRP for review\(^{239}\). The TRP makes a recommendation to the GAC on the strategic focus, technical soundness, and potential for impact of a Program Revision request. Following the TRP review and recommendation, the GAC then makes the decision on the Program Revision request.

### Approval Authority

The approval process for Program Revisions is differentiated based whether the revision is deemed material or non-material:

<table>
<thead>
<tr>
<th>Threshold</th>

### Reporting and Impact on Legal Documents

**Reporting:** The *Grant Revision Request Form* should be used to submit Program Revision requests\(^{241}\). The Country Team provides to the PR the *Grant Revision Request Form* together with the latest Performance Framework (generated from GOS), latest Detailed Budget, and latest LOHP\(^{32}\) (as applicable) to complete/update. Using the information compiled by the PR in the

---

\(^{239}\) See Annex III for the TRP review process of revision requests.

\(^{240}\) In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the *Country Team Approach*.

\(^{241}\) Program Revisions that do not increase or decrease targets in the Performance Framework (e.g., changes to reporting schedules, aligning terminologies of indicators) do not require the Grant Revision Form. In reviewing program revision requests, the Country Team may require an LFA review of the request or a specific element of it. The scope of the LFA review is to be agreed between the Country Team and the LFA, on a case-by-case basis.
Request Form and the updated grant documents, the Country Team can then finalize the Request Form for securing Global Fund approval, with the following documents accompanying the form:

a. An amended Performance Framework\textsuperscript{242} for the full implementation period;

b. An amended Summary Budget (if revision impacts budget)\textsuperscript{243} and Financial Calculator approved by FO/PST and RFM;

c. The CCM Chair and Vice Chair endorsement of the revision request\textsuperscript{244}. This endorsement will be captured in the Grant Revision Request Form.

112. For Material Program Revision requests in High Impact or Core countries, Country Teams should consult with the Risk Department on the grant’s key risk and mitigating actions.

113. **Implementation Letter:** Once finalized and approved by the Global Fund, a Program Revision must be reflected in the grant agreement, by issuing an Implementation Letter. This should be done for both Material and Non-material Program Revisions.

a. **Documents to be included:** An updated Summary Budget and a Performance Framework, regardless of the scale or materiality of the change.

b. **Signatories:** The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

114. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

### SECTION D: BUDGET REVISIONS\textsuperscript{245}

115. **Definition:** Adjustments that are purely budgetary in nature, do not represent a change in the total approved funding for the relevant implementation period, and do not affect the Performance Framework.

116. **Triggers:** A Budget Revision can take place periodically in the normal course of grant implementation in order to respond to program realities (e.g., to reflect changes in administrative or operational costs, changes in unit costs of items being purchased or to allow for programmatic assurance activities like Health Facility Assessments or Data Quality Reviews).

117. **Initiators:** A Budget Revision may be initiated by the Principal Recipient (PR) or the Country Team and is managed in consultation with CCM, Secretariat (if applicable), PR, Lead Implementer(s), and technical partners.

#### Types of Budget Revisions

118. Budget revisions can take two forms (**Material** and **Non-material**), depending on the percentage increase or decrease of the detailed budget (on an intervention or cost grouping basis, as applicable).

\textsuperscript{242} If the Performance Framework contains custom indicators, the Performance Framework should be sent to the Monitoring, Evaluation & Country Analysis (MECA) Team Specialist for validation before submission to the relevant approval authorities.

\textsuperscript{243} Based on a detailed budget reviewed and signed off by the Country Team (and PST for Focused countries).

\textsuperscript{244} In the absence of a CCM or an alternative coordinating platform in the country, the Country Team must seek endorsement from the Regional Manager (or for High Impact departments, relevant Department Head), after consulting with the Manager of the Monitoring, Evaluation & Country Analysis (MECA) Team, the Head of the Technical Advice & Partnerships Team within the Strategy, Investment and Impact Division (SIID) and to the extent possible in-country partners.

\textsuperscript{245} The operational policy on Budget Revisions is intended to be aligned with the *Global Fund Guidelines for Grant Budgeting*. In the event of any conflict or inconsistency between the OPN and the Budgeting Guidelines, the terms of the Budgeting Guidelines will control.
The discretionary categories may be pre-defined taking into account country context and grant-associated risks. The general definition of discretionary categories for Global Fund grants includes: human resources, vehicles, travel-related costs (per diems, etc.), indirect costs/overheads, and any other pre-defined activities, at the discretion of the Global Fund.

The inclusion of new modules and interventions on the official approved budget would also involve a corresponding change to the Performance Framework. In such cases, the Program Revision (Section C) process should be followed.

As attached to the grant agreement or an implementation letter.
Material Budget Revisions  

| Country Team | (FPM and Finance Officer) |

122. In addition to the above thresholds, there are some circumstances where Country Team approval may be required even if the revision is deemed “Non-material” (e.g., any increase in salary or incentive or top-ups above those already planned in the budget to staff / agents working for the Global Fund). For further information, please refer to The Global Fund Guidelines for Grant Budgeting.

123. For Non-material Budget Revisions, PRs have the flexibility to make adjustments and incur expenditures relating to such non-material budgetary adjustment. Implementers have to follow their own procedures of budget modification with an explanatory note and the formal approval of the relevant authority at the implementer level. PR should track non-material budget revisions over the entire implementation period and compare to the original budget (approved during grant signing). If the cumulative non-material budget revisions reach the materiality thresholds, subsequent budget revisions should be processed as material budget revisions and will require Global Fund pre-approval.

124. For Material Budget Revisions, the revision request must be submitted to the Country Team for pre-approval prior to the initiation of the activity and the related payment.

**Reporting and Impact on Legal Documents**

125. Material Budget Revisions: If a Budget Revision is deemed material, the submission should be in the form of a revised detailed budget incorporating the proposed adjustments for the future periods (and actuals for the prior quarters) within the overall ceiling of the initial approved budget and a rationale for the proposed adjustments. When reviewing and approving the material budget revision, the Country Team will decide whether the revised budget should be reflected in the grant agreement through an Implementation Letter and captured in GOS (e.g., if the revised detailed budget needs to be reflected in the PR reporting template and used for subsequent PR reporting).

126. Once finalized and approved by the Global Fund and there is a decision to capture in GOS and issue an Implementation Letter:
   a. Documents to be included: An updated Summary Budget.
   b. Signatories: The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the Signatory Authority Procedures).

127. Non-material Budget Revisions: The PR tracks non-material budget revisions. The PR, as part of the expenditure reporting in the Progress Update/Disbursement Request, will report non-material budget revisions to Global Fund as regular expenditures and provide comments in the budget variance analysis. (see Global Fund Guidelines on Progress Update and Disbursement Request).

128. See Grant Revision Process Flow for more detailed steps on how to amend a grant agreement.

**SECTION E: ADMINISTRATIVE REVISIONS**

249 The inclusion of new modules and interventions on the official approved budget would also involve a corresponding change to the Performance Framework. In such cases, the Program Revision (Section C) process should be followed.

250 In cases where there is disagreement among members of the Country Team, the decision-making will be escalated as per the standard escalation procedure, as determined in the Country Team Approach.

251 Only legally agreed information captured through an implementation letter will be imported into GOS.
129. **Definition:** Adjustments that have no impact on the Budget or the Performance Framework and are purely of an administrative nature (e.g., changes to Master Data reflected in a grant agreement), which require modifications to grant agreements.

130. **Triggers:** An administrative revision can take place periodically in the normal course of grant making and grant implementation and could be triggered by (among other reasons):

   a. A change in the organizational representative for legal notices (for PR) and notices (for LFA)
   b. A change in PR / LFA contact details (e.g., address, name)

131. Changes to other types of Master Data that are not reflected in the Grant Agreement, therefore do not require an Administrative Revision under this OPN. In such circumstances, Country Teams should refer to the *Guidance on Updating Master Data*, to ensure the changes to data are appropriately reflected in GOS.

132. **Initiators:** An administrative revision may be initiated by the Principal Recipient (PR), LFA, or the Country Team, and is managed in consultation with CCM, PR/LI(s).

133. **Approval Authority:** For an Administrative Revision, the final approval authority is the Fund Portfolio Manager.

<table>
<thead>
<tr>
<th>Threshold</th>
<th>Approval Authority</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Administrative Revisions</td>
<td>Fund Portfolio Manager</td>
</tr>
</tbody>
</table>

**Reporting and Impact on Legal Documents**

134. The categories of Master Data highlighted in paragraphs 72a and 72b are included as part of the Grant Agreement. Therefore any changes to this Master Data should be reflected in GOS (see *Guidance on Updating Master Data* for further details), and subsequently, need to be reflected in the Grant Agreement through an Implementation Letter.

135. **Implementation Letter:** Once finalized and approved by the Global Fund, an Administrative Revision must be reflected in the grant agreement, by issuing an Implementation Letter.

   a. **Signatories:** The Implementation Letter must be signed by authorized signatories of the Principal Recipient on behalf of the Grantee and of the Global Fund (in accordance with the *Signatory Authority Procedures*).

   b. **Timing:** For the majority of Administrative Revisions, the changes to Master Data do not need to be reflected immediately in the Grant Agreement, and therefore do not require the immediate issuing of an Implementation Letter. Instead, it is recommended that the County Team wait until an Implementation Letter is required for another type of grant revision (e.g., a Program Revision or Extension) and then any changes to Master Data can be included in that Implementation Letter. This approach is suggested to reduce the need for Country Teams to issue multiple Implementation Letters. However, in cases where the LFA changes or PR/LFA name changes, an Implementation Letter is required to be issued immediately, to reflect the change promptly in the Grant Agreement.

   c. **Consultation:** The Country Team should consult with their Legal Officer on whether and when to issue an Implementation Letter for an Administrative Revision.

136. See *Grant Revision Process Flow* for more detailed steps on how to amend a grant agreement.

---

*For revisions during grant-making, please refer to the OPN on Access to Funding, Grant-making, and Approval.*

Pooled Procurement Mechanism

Approved on: 25 March 2019  
Approved by: Executive Grant Management Committee  
Process Owner: Sourcing and Supply Chain  
Sub-Owners: Program Finance and Controlling

OVERALL OBJECTIVES

1. The Pooled Procurement Mechanism (PPM) is a key tool used to implement the Global Fund’s Market Shaping Strategy. PPM enables the Global Fund Secretariat to aggregate order volumes from participating Principal Recipients to leverage the Global Fund’s market spend aiming to:
   a. secure quality-assured products;
   b. obtain better Value for Money through best pricing and delivery conditions;
   c. reduce lead times for critical health products by engaging with manufacturers using framework contracts; and
   d. contribute to sustainable markets for core life-saving health products as defined in paragraph 4 (i) below.

2. The framework below provides a summary overview of the PPM process:

   [Diagram of PPM process]

---

254 Unless otherwise defined, all capitalized terms used in this Operational Policy Note shall have the same meaning as set forth in the Global Fund Grant Regulations (2014) available at: [https://www.theglobalfund.org/grantregulations](https://www.theglobalfund.org/grantregulations).
255 Value for Money as defined under the Global Fund Procurement Policy (2008) as amended from time to time.
OPERATIONAL POLICY

3. This operational policy describes critical rules and requirements for implementation of the Pooled Procurement Mechanism. Detailed procedural guidance to implement these rules are provided in the Operational Procedures. It applies to grants financed under the 2017-2019 allocation period and thereafter.

Eligible Health Products

4. Health products that may be procured by Principal Recipients through the PPM are categorized as PPM core or non-core products. The list, which may be updated from time to time, is as follows:

(i) **Core products**: anti-retrovirals (ARVs); rapid diagnostic tests for HIV (HIV RDTs); CD4 and viral load tests; Artemisinin-based combination therapy (ACTs); long-lasting insecticide treated nets (LLINs); anti-malarial pharmaceutical products (other than ACTs); and rapid diagnostic tests for malaria (malaria RDTs).

(ii) **Non-core products**: drugs for opportunistic infections and sexually transmitted infections; other diagnostic products and laboratory supplies; post-exposure prophylaxis kits; condoms; re-treatment tablets for bednets; insecticides for indoor residual spraying (IRS) and related equipment/consumables; and other products agreed with the Sourcing Team.

Procurement Service Agents and Suppliers

5. Through the PPM, the Global Fund facilitates the procurement of eligible health products identified at paragraph 4 above for Principal Recipients using the services of Procurement Services Agents (PSAs). PSAs are external service providers contracted by the Global Fund to perform procurement and delivery services on behalf of PPM-participating Principal Recipients, including order and logistics management, while ensuring quality assurance and timely deliveries. The selection of PSAs is done by the Global Fund through a competitive process, and their performance is managed through long-term performance-based agreements.

6. As part of the PPM, the Global Fund also manages the selection of suppliers for certain core health products. Supplier performance is managed by the Global Fund through long-term performance-based agreements which are signed according to the Global Fund Delegations of Signature Authority (which may be amended from time to time). Supplier-specific prices negotiated by the Sourcing Team for health products are uploaded onto the wambo.org platform and are updated from time to time.

7. In order to efficiently manage the overall PPM mechanism, the Global Fund may issue an annual Payment Limit Letter to each PSA as a guarantee up to a defined ceiling amount for grant-funded PPM procurement. The Payment Limit Letter is based on the estimated consolidated forecast of grant-funded health products compiled by the Sourcing Team to be procured by Principal Recipients through PPM.

8. The Payment Limit Letter will take the form of an annual Purchase Order as created in the Global Fund Financial System (GFS) by the Sourcing Team, and approved and signed in accordance with the Global Fund Delegations of Signature Authority (which may be amended from time to time).

---

256 For certain categories of health products, the Global Fund may use partner organizations, acting as agents of the Principal Recipients.

257 Previously referred to as a Letter of Commitment.
A. Principal Recipient Registration

9. Principal Recipients may wish, on a voluntary basis, to take advantage of the benefits (e.g., reliable delivery) and negotiated PPM prices which may provide better Value for Money. In the event that a Principal Recipient does not volunteer, the Country Team may require a Principal Recipient to use this mechanism for some or all Global Fund-financed health products as a risk-mitigating measure where the Principal Recipient or the designated procurement entity has demonstrated inadequate capacity to procure health products effectively and efficiently. At its own discretion, the Global Fund may for any Principal Recipient, regardless of their participation in PPM, limit health product budgets to the negotiated PPM unit prices to ensure that the Global Fund will not pay for health products purchased by non-PPM participating Principal Recipients more than the PPM negotiated prices for similar commodities.258

10. To participate in PPM, Principal Recipients must comply with defined PPM registration requirements. A registration application may be submitted and processed at any time during grant making or implementation.

11. Participation in PPM is, in principle, for the duration of the grant managed by the same Principal Recipient. Registration remains effective until they cease to be Principal Recipient or the Principal Recipient’s participation in PPM ends. The Principal Recipient’s participation in PPM may be ended through written notice only, at least ninety (90) calendar days prior to the desired end date.259

12. Only PPM-registered Principal Recipients are allowed to use PPM, including the Rapid Supply Mechanism (RSM).

B. Earmarking Funding for PPM

13. PPM-related funding is committed outside of the grant-based annual funding decision process. From the grant signed amount, Grant Funds are earmarked for PPM orders directly in GFS by setting the PPM ceiling amount, which, for orders processed through wambo.org, is automatically interfaced with wambo.org.

14. The PPM ceiling amount can be based either on the approved PPM-related procurement budget for the implementation period of the grant as per the approved List of Health Products, as applicable, or adjusted over time as each PPM order request is received from the Principal Recipient.

15. The sum of all Grant Funds committed through annual funding decisions, wambo.org orders, and the PPM Internal Order Confirmation Form for the full implementation period and closure period of a grant must not exceed the grant signed amount of the relevant Grant Agreement as approved by the Global Fund Board.

C. PPM Order Request, Approval and Delivery

16. PPM Purchase Requisitions are raised electronically through the wambo.org platform.260

---

258 Reference prices per product category are updated from time to time and are available at: https://www.theglobalfund.org/en/sourcing-management/health-products/

259 The end of participation in PPM would apply to new Price Quotations not yet approved; any Price Quotations approved by the Principal Recipient prior to the desired end date would be fulfilled as per contractual agreements triggered by Principal Recipient approval of the Price Quotation.

260 Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be raised “manually.”
17. A request for procurement should only be initiated by the Principal Recipient and will only be validated by the Country Team and the Sourcing Team after grant signing if:
   a. Principal Recipient registration to participate in PPM has been completed;
   b. the quantification and estimation of the initial order value has been approved by the Global Fund (e.g., as per the List of Health Products, where applicable);
   c. Grant Funds are available in accordance with the signed Grant Agreement and the associated approved budget; and
   d. all relevant grant requirements for the procurement have been fulfilled, or otherwise waived or postponed.\footnote{In accordance with the OPN on Conditions and Management Actions or future OPN providing guidance on management of requirements.}

18. PPM Purchase Requisitions should include a requested delivery date. To achieve better Value for Money and timely delivery of products under PPM, Principal Recipients must place orders taking into account a minimum procurement lead time as defined in the Category and Product-level Procurement and Delivery Planning Guide (as amended from time to time).\footnote{See https://www.theglobalfund.org/media/4754/psm_categoryproductlevelprocurementdeliveryplanning_guide_en.pdf} If the requested lead-time is below the defined minimum lead time, additional costs may be incurred by using air freight instead of the standard sea freight.

19. When the order request is submitted less than three months from the expected delivery date, the Sourcing Team may recommend the use of the RSM. The RSM is an approach that has been agreed with selected suppliers to help mitigate against the risk of stock-outs of certain health products. Through agreements with selected suppliers, suppliers implement Vendor Managed Inventory (VMI) of certain health products to permit increased responsiveness and reduced delivery times compared to the standard order process. Through the RSM, certain health products can be delivered to the port of entry within four to six weeks from order approval. Products available through the RSM include select anti-retroviral medicines and antimalarial medicines through VMI. This product selection may be reviewed from time to time and amended as deemed necessary by the Sourcing Team. The RSM includes a premium fee of the total commodity cost.

20. All order requests should be submitted and planned as per standard lead times to ensure that final deliveries take place no later than the implementation period end-date stipulated in the Grant Agreement. In certain instances, deliveries may span between two implementation periods, in which case relevant guidance should be consulted.\footnote{Guidelines for Grant Budgeting.}

21. Following review and approval of the Purchase Requisition by the Sourcing Team and Country Team per agreed procedures, a Price Quotation is submitted to the Principal Recipient for approval and, if required under the Principal Recipient’s national laws, signature. The Price Quotation may include a buffer amount, which can be used for potential increases in cost; the buffer, if any, is set as described in the PSA’s standard Terms and Conditions. Following approval and, if applicable, signature by the Principal Recipient of the Price Quotation and the Global Fund’s review and clearance process, a Purchase Order is issued on wambo.org, which becomes the legally binding agreement between the PSA and the Principal Recipient.\footnote{Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be raised “manually.”}
Approval limits for purposes of PPM Purchase Orders, including RSM orders, issued to PSAs are broken down into two categories (as outlined in the table below):

<table>
<thead>
<tr>
<th>APPROVAL AUTHORITY</th>
<th>Up to (and including) US$ 10 million</th>
<th>Above US$ 10 million</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPM Purchase Orders, including Rapid Supply Mechanism orders</td>
<td>Manager, Global Sourcing, Sourcing &amp; Supply Chain Department</td>
<td>Senior Manager, Sourcing &amp; Supply Chain Department</td>
</tr>
</tbody>
</table>

22. The issuance of a PPM Purchase Order on wambo.org triggers grant liability recognition in the accounts of the Global Fund.\(^{265}\) Once committed, PPM funds will no longer be available for other purposes (e.g., disbursement to the Principal Recipient or third parties) until the order is finalized and all payments for the relevant PPM Purchase Order are made to the PSA. The Principal Recipient will be notified of every PPM-related commitment made.

23. Under certain circumstances, a Price Quotation for a previously approved order may need to be updated. For material changes (as defined in the PPM Operational Procedures), an updated Price Quotation will be issued to the Principal Recipient for approval and, if applicable, signature, following the initial process followed. For non-material changes, the Principal Recipient will be notified of the changes.

24. PSAs are responsible for issuing Purchase Orders (or their equivalent) and other requested information to suppliers and logistics providers for the fulfilment of PPM Purchase Orders and delivery of the health products to the Principal Recipient. PSAs are also responsible for ensuring that health products meet the quality standards of the Global Fund.

25. Principal Recipients are responsible for ensuring appropriate waivers (e.g., registration and import duty, etc.) are obtained when required and facilitating the import process locally. Principal Recipients must confirm receipt of each order to the corresponding PSA, indicating the goods received and any discrepancies.

D. PPM Payments and Reporting

26. Payments to PSAs for the procurement and delivery of health products and their services under the PPM shall be made from available Grant Funds of PPM-participating Principal Recipients.\(^{266}\) Payments are made to PSAs by the Global Fund on behalf of Principal Recipients upon approval of invoices in accordance with the payment terms stipulated in their respective agreements. All payments made will be charged as disbursements under the respective grants, and the Principal Recipient will be informed of every PPM-related disbursement made. The approved PPM Purchase Orders and related payments will reduce the open value of the Payment Limit Letter for the relevant PSA.

27. For the purposes of procurement management, planning and performance, the PSAs will send to the Global Fund a comprehensive report capturing required financial and operational details for each grant on a regular basis as agreed with the Global Fund. Reports received from PSAs feed into Global Fund organizational reporting.

\(^{265}\) In the case of RSM orders processed outside of wambo.org, the approval of the Internal Order Confirmation Form and related confirmation of funding for the RSM quotation or its equivalent to the PSA triggers grant liability recognition in the accounts of the Global Fund.

\(^{266}\) If a grant is suspended or terminated, no disbursements shall be made without due consideration and relevant authorization in accordance with Global Fund policies and procedures relating to the suspension and termination of grants.
28. PPM Purchase Orders are closed after products have been received by the Principal Recipient and all PSA payments have been made. As described in the PPM Operational Procedures, confirmation of the receipt of goods is made by the Principal Recipient to the PSA within the timeline specified in the Terms and Conditions for the order, after which time the goods are considered received. Once all payments have been made to the PSA, an Invoice Summary Statement is issued to the Principal Recipient, who is granted fifteen days within which to review and to object, or approve the statement; in case of no response within fifteen days, the Invoice Summary Statement is approved in wambo.org on the Principal Recipient’s behalf, and the Purchase Order is closed.\(^{267}\) The Principal Recipients will be notified of any de-commitment.

\(^{267}\) Until system improvements permit the raising of Rapid Supply Mechanism orders through the wambo.org platform, RSM orders may be closed “manually.”
Annex 1. Definition of Terms

1. **List of Health Products**: An outline of the health products and associated costs that will be financed through the funding request. The list contributes to the detailed grant budget and includes for each product, the estimated quantities to be procured for each year of the implementation period, their estimated unit costs and costs related to their management. This is required of ‘High Impact’ countries at the funding request stage and is optional for ‘Core’ countries, depending on the proportion of the funding request allocated to health products.\(^{268}\)

2. **Purchase Requisition**: A procurement request submitted by the Principal Recipient to the Procurement Services Agent containing product information, quantities, requested delivery date, ship-to address, consignee, Incoterm and special requests, if any.

3. **Price Quotation**: A legally binding offer by the Procurement Service Agent to the Principal Recipient to supply and deliver products in accordance with the terms set out therein, specifying the Incoterm applicable to the order, which is either signed manually or approved through wambo.org by the Principal Recipient.

4. **Purchase Order**: The legally binding agreement between the PSA and the Principal Recipient, issued by wambo.org resulting from the Price Quotation approved, and, if required by the Principal Recipient’s national laws, signed by the Principal Recipient and the completion of the Global Fund’s review and clearance process.

5. **Wambo.org**: The electronic purchasing platform through which PPM transactions are processed. More information is available at [https://www.theglobalfund.org/en/wambo/](https://www.theglobalfund.org/en/wambo/).

6. **Invoice Summary Statement**: A final statement summarizing all invoices issued through wambo.org after all payments to the PSA have been processed for a Purchase Order.

Pooled Procurement Mechanism

Approved on: 8 November 2018
Approved by: Executive Grant Management Committee
Process Owner: Sourcing and Supply Chain
Sub-Process Owner: Program Finance and Controlling

Relevant Operational Policies and Guidance:
- OPN on Pooled Procurement Mechanism
- Guidance on Category and Product-level Procurement and Delivery Planning
- Guidance on Transition between Allocation Utilization Periods (Section 2 of the Guidelines for Grant Budgeting)

1. This document provides procedural guidance on the Pooled Procurement Mechanism (PPM). It applies to grants financed under the 2017-2019 allocation period and thereafter. The diagram below provides an overview of the key steps in the PPM process:

2. Detailed procedural guidance is provided below on each of the key steps outlined above for the standard PPM process through the wambo.org platform. An additional section on the full procedures for the Rapid Supply Mechanism, which also essentially progresses from key step A to D, is provided as well.
   - Section A: PPM Registration
   - Section B: Earmarking Funds for PPM
   - Section C: PPM Order Request, Approval and Delivery
   - Section D: PPM Payments and Reporting
   - Section E: Rapid Supply Mechanism

SECTION A: PPM REGISTRATION

3. PPM participation may be initiated by the Principal Recipient or required by the Global Fund.
<table>
<thead>
<tr>

<tr>
<td></td>
<td></td>
<td>• Senior Manager, Sourcing Team</td>
</tr>
</tbody>
</table>
4. Grant funds are earmarked for PPM procurement in the Global Fund Financial System. The initial PPM ceiling and increases to it can be based either on the approved PPM-related procurement budget for the implementation period of the grant or adjusted over time as each PPM order request is received from the Principal Recipient. Only the unutilized PPM ceiling can be reduced (i.e., the amount that has not been committed for specific orders). Such reduction should be processed only if the unutilized PPM ceiling will no longer be required for existing or future PPM orders.

PPM Financial Controlling, who validates that the unutilized PPM ceiling is not required for existing PPM orders  
PPM Focal Point, who validates that no PPM orders are in the pipeline or no incremental commitments on current PPM orders are required  
HPM Specialist, who validates that no additional PPM orders are planned to be placed under the current Implementation Period  
Approval by:  
Finance Specialist/PST Specialist  
Fund Portfolio Manager, based on the above |

269 Please note that for Focused Countries for which no HPM Specialist is assigned, during the onboarding process, the Country Team will determine who will perform this step. In some instances, this may be the Fund Portfolio Manager.
SECTION C: PPM ORDER REQUEST, APPROVAL AND DELIVERY

5. **PPM Order Request and Approval.** The Principal Recipient submits a Purchase Requisition taking into account the minimum procurement lead time as defined in the Category and Product-level Procurement and Delivery Planning Guide (as amended from time to time). For products not listed in the Guide, prior to submission of the Purchase Requisition, consultation with the PPM Focal Point is recommended. For emergency orders, the Global Fund has established the Rapid Supply Mechanism, which is detailed in Section E.

</table>
| **Electronic Price Quotation** issued to the Principal Recipient through wambo.org and attached to the Purchase Requisition | Following approval of a Purchase Requisition | *If* approved Price Quotation is within PPM unutilized ceiling amount: Price Quotation is issued to Principal Recipient via wambo.org  
*If* approved Purchase Requisition exceeds PPM unutilized ceiling amount:  
Review by:  
- FPM, who requests Finance Specialist/PST Specialist to increase the PPM ceiling before issuing the Price Quotation to the Principal Recipient  
Approval by:  
- Principal Recipient  
(Approval may be electronic or may require that the Principal Recipient sign the Price Quotation attached to the Purchase Requisition, scan and upload it onto wambo.org) |

| Electronic Purchase Order issued through wambo.org to the PSA | Following Principal Recipient approval of electronic Price Quotation | Review by:  
- PPM Financial Controlling, who verifies the availability of funding for the grant in the Global Fund Financial System and/or exception approval for initiation of advance procurement is complete and ensures that PPM-related policies and guidance are adhered to, including but not limited to delivery dates  
Approval by:  
- PPM Manager; and  
- Additional approvers in accordance with approval limits defined in the OPN on PPM  
Principal Recipient is informed that the Purchase Order has been issued through a system-generated email. |

| Grant commitment processed in the Global Fund Financial System | Following issuance of electronic Purchase Order to the PSA | Financial Services, who verifies the availability of funding for the grant and approves grant commitment sent by wambo.org to the Global Fund Financial System interface  
The Country Team is informed and sends the Principal Recipient a Commitment Notification Letter. |
6. **Order changes.** In some instances, changes may need to be made to an electronic Price Quotation after it has been approved by the Principal Recipient. For material changes, following a review/approval process similar to that for the issuance of the original electronic Price Quotation, the Principal Recipient will receive an updated electronic Price Quotation for review/approval. For non-material changes, the Principal Recipient will be notified of the changes.

Each of the following shall constitute a non-material change:

(a) Increases in the price originally authorized by the Principal Recipient in an electronic Price Quotation as evidenced by the affirmative consent or signature of its duly authorized representative, where such increases amount to no more than Ten Thousand United States Dollars (USD 10,000) or five percent (5%) of the total value of the electronic Price Quotation, whichever is less. Increases pursuant to the foregoing sentence will be calculated against the price originally authorized by the Principal Recipient and shall not apply with respect to amended prices where the Global Fund has processed increases incrementally or cumulatively.

(b) Unplanned costs related to importation (e.g., demurrage, container detention, warehousing, etc.) for which there are accruing costs and for which further delays to address the import issue may result in additional costs.

A material change is a change where the cost increase is USD 10,000 and above or represents 5% or more of the total value of the electronic Price Quotation (whichever is less). Increases pursuant to the foregoing sentence will be calculated against the price originally authorized by the Principal Recipient and shall not apply with respect to amended prices where the Global Fund has processed increases incrementally or cumulatively.

7. **Order Fulfilment and Delivery.** The PSA is responsible for ensuring that orders are fulfilled and delivered to the Principal Recipient in accordance with the approved order. PSA performance is monitored by the Sourcing Team. When the Global Fund has executed agreements with manufacturers, the performance of such manufacturers is also monitored by the Sourcing Team, in accordance with those agreements, including their ability to meet promised goods-ready-pick-up dates.

Approval by:  
- Financial Services, who approves based on final compliance and due diligence review (including Batch Release Approval for execution of the transaction by the Treasury and banking institution)  
The Country Team is informed and sends the Principal Recipient a Disbursement Notification Letter. |
| **Periodic performance and financial reports** submitted by the PSA to the Global Fund on their procurement activities | Per agreed periodicity | • PPM Category Manager and PPM Manager, Sourcing Team, who validate and approve performance information  
• PPM Financial Controlling, who validates and approves financial information |
| **Electronic Purchase Order** is closed | Following submission of Invoice Statement by PSA | Review by:  
- Wambo Team, who uploads Global Fund Invoice Statement to wambo.org (until full automation is possible)  
- PPM Focal Point, who flags known anomalies, if any  
- PR, who flags known anomalies, if any²⁷³  
Approved by:  
- PPM Financial Controlling, who approves after confirming financial information in the PSA and Global Fund statements are consistent, complete and accurate  
In case of any de-commitment, the Country Team is informed and sends the Principal Recipient a Commitment Notification Letter. |

²⁷³ A non-response by the Principal Recipient after 15 days will be considered concurrence with the Invoice Statement, in which case the PPM Focal Point will approve the Invoice Statement on behalf of the Principal Recipient.
SECTION E: RAPID SUPPLY MECHANISM ORDERS

10. When the order is placed less than three months from the expected delivery date, the Sourcing Team may recommend the Rapid Supply Mechanism (RSM). RSM orders may be raised “manually” until system improvements permit the raising of these orders through the wambo.org platform. If RSM is requested for a non-PPM-registered Principal Recipient, a pre-approval following the exceptions process, as defined in Annex 6 (Managing Exceptions) is required, before the RSM order process is initiated.

<table>

**Acronyms:**

FPM: Fund Portfolio Manager (including Senior FPM and Disease Fund Manager for Nigeria and DRC)

HPM: Health Product Management Specialist
OPERATIONAL POLICY NOTE

Implementing the Quality Assurance Policies for Pharmaceutical, Diagnostics and Other Health Products

Issued on: 10 November 2014
Purpose: To define the monitoring process for compliance with requirements of the Quality Assurance Policies for Pharmaceutical, Diagnostics and other health products, including corrective measures to address non-compliance.

OVERALL OBJECTIVES

1. The Global Fund’s Quality Assurance (QA) Policy for Pharmaceutical Products and Quality Assurance Policy for Diagnostics Products defines the requirements which must be met for finished pharmaceutical products (FPP) and diagnostic products purchased with Global Fund resources. For other health products, the Global Fund has specified requirements for selection and procurement, as listed in the Guide to Global Fund Policies on Procurement and Supply Management of Health Products. The objectives of the QA policies and requirements are to ensure that grant recipients procure quality-assured health products and that value for money is achieved. The QA policies play a critical role in ensuring that risks related to poor quality, substandard products are mitigated for the benefit of those who need them. Ensuring compliance with the policies and requirements is an essential function of the Secretariat.

POLICY AND PRINCIPLES

2. Global Fund quality assurance refers to the management activities required to ensure that the medicines and other health products are of the quality required for their intended use. There are four categories of products:
   A. Pharmaceutical Products
   B. Diagnostic Products
   C. Pesticides
   D. Condoms

3. The quality requirements for each of these categories is summarized below, with reference to the relevant Quality Assurance Policy when relevant and other important documents. For more information, please refer to the Quality Assurance Information section of the Global Fund website.

A. Quality Assurance Policy for Pharmaceutical Products

4. The Quality Assurance Policy for Pharmaceutical Products (“QA Pharmaceutical Policy”) aims to ensure the safety of pharmaceutical products procured with Global Fund resources.

5. The policy defines quality requirements for Finished Pharmaceutical Products (FPPs) that are antiretrovirals (ARVs), anti-malarial and anti-tuberculosis, and for all other FPPs. Currently, all other FPPs only need to comply with the relevant quality standards that are established by the National Drug Regulatory Authority (NDRA) in the country of use. The quality requirements and corrective measures in case of non-compliance described in this OPN apply to all ARVs, antimalarial and anti-TB FPPs.

GF/B22/11 Revision 1, Annex 1, amendments approved by the Board in December 2010 under GF/B22/DP9: Global Fund Quality Assurance Policy for Pharmaceutical Products.
Quality Requirements for ARVs, Antimalarial and Anti-TB FPPs

Marketing authorization in country of use

6. All finished pharmaceutical products (FPPs), must comply with the relevant quality standards established by the National Drug Regulatory Authority (NDRA) in the country of use.

   - For more detailed information, please refer to the QA Pharmaceutical Policy, para. 19-21.

Criteria for the procurement of ARVs, anti-TB products and antimalarials

7. In addition to approval by the NDRA in the country of use, all ARV, anti-TB and anti-malaria pharmaceutical products should meet the following standards:
   i. Prequalified by the WHO Prequalification Programme (“A products”) or authorized for use by a Stringent Drug Regulatory Authority (SRA) (“B products”); or
   ii. Recommended for use by an Expert Review Panel (ERP).

   - For more detailed information, including the processes, please refer to the QA Pharmaceutical Policy, para. 7-16.

Before procuring ERP-reviewed products

8. Before procuring ERP-reviewed products, Principal Recipients (PRs) must inform their Fund Portfolio Manager (FPM) in writing by filling in the “Notification Form”. Procurement can only proceed once the PR receives a “no objection” letter from the Global Fund Secretariat for the requested selection.

   - Notification Form
   - Notification of Additional Order Form

Pre-shipment Quality Control (QC) testing and results

9. The Global Fund is responsible for QC of ERP-reviewed products for which a notification has been received (see above). Testing is performed on random samples by an independent laboratory contracted by the Global Fund. Upon successful QC results, the Secretariat will approve product shipment by issuing a final letter, including the test report, to the PR and concerned manufacturer.

   - For more detailed information, please refer to the QA Pharmaceutical Policy, para. 31.

B. Quality Assurance Policy for Diagnostic Products

10. The Quality Assurance Policy for Diagnostic Products\(^{276}\) (“QA Diagnostics Policy”) applies to all durable and non-durable in vitro diagnostics (IVDs), and imaging equipment and microscopes, used in Global Fund-financed programs for diagnosis, screening, surveillance or monitoring purposes. The PR must ensure that the procurement of Diagnostic Products with Grant Funds is undertaken in compliance with all applicable laws and regulations, as outlined in the QA Diagnostics Policy.

\(^{276}\) GF/SIIC10/6 Revision 1, Annex 1, amendments approved by the SIIC in February 2014 under GF/SIIC10/DP2: Global Fund Quality Assurance Policy for Diagnostic Products.
Quality standards of manufacturing site

11. The PR must ensure that that the manufacturing site is compliant with the requirements of ISO 13485:2003; or ISO 9000 series as applicable; or an equivalent Quality Management System recognized by one of the Regulatory Authorities of the Founding Members of the Global Harmonization Task Force (GHTF), i.e. USA, Japan, EU, Canada, Australia.

- For more detailed information, please refer to the QA Diagnostics Policy, para. 7.

Quality standards of products

12. The PR must ensure that HIV Immunoassays, HIV Virological and CD4 technologies, tuberculosis Diagnostic Products and Malaria Rapid Diagnostic Tests comply with the following requirements:

   i. recommended by WHO for use in HIV, tuberculosis and malaria programs, as applicable, based on a technical review of quality and performance indicators; or

   ii. authorized for use by one of the Regulatory Authorities of the Founding Members of GHTF when stringently assessed (high risk classification). This option is only applicable to HIV Immunoassays Products and HIV Virological Technologies; or

   iii. shall be acceptable for procurement using Grant Funds, as determined by the Global Fund, based on the advice of an Expert Review Panel for Diagnostics (ERPD).

- For more detailed information, please refer to the QA Diagnostics Policy, paras. 8-9 and 17.

C. Quality Assurance requirements for public health pesticides

13. Recipients are only authorized to procure long-lasting insecticidal mosquito nets with grant funds when the products are recommended for use by the WHO Pesticide Evaluation Scheme (WHOPES) and other pesticides are compliant with specifications indicated by WHOPES.277 Below is a summary of the process to ensure that products comply with the quality assurance requirements:

   i. Products to be procured are approved by WHOPES (formulations/manufacturers)

   ii. Random pre-shipment testing by an independent QC lab

   iii. Sampling to be done by an independent sampling agent

   iv. Testing by a QC testing by ISO 17025 certified laboratory, WHO Collaborating Centre for QC of Pesticides and according to WHO Methods and Specifications,

- For more information, please refer to the WHO Guidelines for Procuring Public Health Pesticides.

D. Quality assurance requirements for condoms

It is highly recommended to all PRs to select condoms from the list of prequalified condoms

---

277 The list of pesticide products recommended by WHOPES, including insecticides for indoor residual spraying, insecticides for treatment of nets, LNs and mosquito larvicides is available on the WHO site at https://www.who.int/whopes/resources/en/
published by United Nations Population Fund (UNFPA). If condoms selected are not on the UNFPA list, the PR must ensure that the following specifications are met:

a. The condoms complied with national regulatory policies of the country of use before being imported into a country;
b. The manufacturing facility conforms to ISO 13485 latest specifications;
c. The condoms meet Directive 93/42/CEE or other requirements from a Stringent Regulatory Authority;
d. The pre-shipment QC testing was performed in ISO17025 accredited laboratory that has been accredited for testing condoms; and
e. The testing was done as per ISO4074 (latest edition) as recommended by WHO, and the test report reviewed by the PR for compliance with the above specification.

- For more information, please refer to the Prequalification Section of the Reproductive Health Essential Medicines (RHEM) resource portal.

E. Quality assurance requirements for other health products

16. Health products, other than pharmaceutical products, diagnostic products, long-lasting insecticidal mosquito nets, other pesticides, and condoms, are selected from the applicable list of prequalified products, if any, and comply with the quality standards applicable in the country where such products will be used. This refers to health products for which the Global Fund has not developed a specific quality assurance policy, such as general laboratory items, syringes and therapeutic nutritional support.

Types of non-compliance with quality requirements

17. There are two possible ways in which a PR can breach the grant agreement by not complying with one of the QA Policies:

- **Level 1 “No-notification”:** Product(s) comply with the relevant quality requirement, however:
  i. the ERP(D)-recommended products have been procured without notification; or
  ii. for pesticides, the WHOPES products have been procured without pre-shipment testing.

- **Level 2 “Non-compliant procurement”:** the product(s) procured do not comply with the relevant QA Policy, and the PR fails to send notification(s) required for the procurement of ERP(D)-recommended product(s).

</table>

**Identifying non-compliance**

18. Non-compliance is identified through either: (i) the review of data reported through the Price & Quality Reporting (PQR) tool on a quarterly basis; or (ii) reports from in-country sources, LFA, partners, etc.

19. When a case is reported, the Country Team evaluates the reasons for non-compliance and potential impact.

**Deciding on and monitoring of corrective measures for non-compliance**

20. Based on this analysis, the country team selects the most appropriate course or action. The decision is made at the discretion of the country team, with guidance from the HPM Hub.

**Options of course of action:**

i. Issue a warning letter (first time cases/and non-compliance level 1)
ii. Request for reimbursement for the products procured (non-compliance level 2/or new case of non-compliance after having received a warning letter)
iii. Use a procurement agent for those products
iv. Use a procurement agent for all products procured with grant funds

21. With regards to any corrective measures taken, the Global Fund will make every effort to avoid the interruption of life-saving treatment.

22. Corrective measures are communicated to the PR.²⁷⁸

²⁷⁸ All communications with PRs are routed through the country team with copy to the CCM, LFA and the HPM Hub. The HPM specialist and FPM will keep the HPM Hub informed on any decision made by the country team and any corrective
23. The implementation of corrective measures will be monitored by the Country Teams in collaboration with the HPM Hub.

**Communication to PRs**

24. All PRs must be informed of the quality requirements of the QA Policies and corrective measures described in this OPN.
Supplier Misconduct

Issued on: 11 June 2014

Purpose: Guidance to the Secretariat in Responding to Supplier Misconduct

OVERALL OBJECTIVES

1. The major area in which Global Fund grant resources are expended is procurement. Consequently, it is essential for the Global Fund to enforce the accountability of suppliers and grant recipients in maintaining the integrity of Global Fund-supported grant operations.

2. The Global Fund’s Code of Conduct for Suppliers (the “Supplier Code of Conduct”) describes supplier obligations in this regard and requires Suppliers to inform the Global Fund of any integrity concerns involving or affecting Global Fund resources of which they have knowledge. It also emphasizes the critical role of grant recipients in communicating and ensuring that all suppliers of goods and services to the Global Fund or to the activities it finances, including bidders, suppliers, agents, intermediaries, consultants and contractors and representatives of each of the above (each referred to herein as a “Supplier” and collectively as the “Suppliers”) 279 comply with their obligations and in implementing immediate actions where there are cases of non-compliance. Principal Recipients must also inform the Global Fund about cases of procurement irregularities or other corruption in accordance with their grant agreements.

3. This Operational Policy Note guides the Secretariat in responding, in connection with grant implementation, to instances of non-compliance with the Supplier Code of Conduct and other events concerning suppliers that may place the resources and reputation of the Global Fund at risk. Through the application of a consistent set of procedures, the Global Fund can fairly, consistently and appropriately address any corrupt, fraudulent, collusive, anti-competitive or coercive practices involving Suppliers under Global Fund programs.

POLICY AND PRINCIPLES

Sanctionable Activities

4. The Global Fund may sanction a Supplier or its successor in order to protect the interests, resources and reputation of the Global Fund, including in situations where the Global Fund determines that the Supplier has breached the Supplier Code of Conduct.

5. Activities which constitute supplier misconduct can take many different forms. Potential circumstances that may lead to the Global Fund initiating its sanctions process, which may then result in the imposition of sanctions upon a Supplier or its successor (each a “Sanctionable Activity” or “Sanctionable Event” and collectively referred to herein as “Sanctionable Activities”), include:

   i. **Procurement Irregularities:** When the Inspector General has determined that there is credible and substantive evidence 280 that a Supplier may have directly or indirectly breached the Global Fund Supplier Code of Conduct, including by engaging in corrupt,  

279 Suppliers include suppliers of goods and services to Principal Recipients, Sub recipients, other recipients, Country Coordinating Mechanisms, procurement agents and first-line buyers. Supplier representatives include affiliates, employees, subcontractors, agents and intermediaries of Suppliers.
280 This includes early notification of red flags although such evidence would only be expected to result in the imposition of operational remedial measures pending the finalization of the OIG’s finding through a published report.
fraudulent, collusive, anti-competitive or coercive practices in competing for, or performing under, a Global Fund-financed contract (“Procurement Irregularities”);

ii. **Sanctions by a Partner or Grant Recipient:** When a Supplier has engaged in misconduct which results in a sanction being imposed on a Supplier (and/or its successors) by any Global Fund partner organization, any comparable institution or by a Global Fund grant recipient for conduct which would constitute a breach of the Global Fund Supplier Code of Conduct or any other unethical or unlawful behavior;

iii. **Sanctions by a National or an International Authority:** When a Supplier has engaged in misconduct which results in an investigation, proceeding or finding, either civil, criminal or administrative, or the imposition of sanctions, by another national or international authority for conduct which would constitute a breach of the Global Fund Supplier Code of Conduct;

iv. **Breach of Contract:** When there is a significant and material breach by a Supplier of a contract between the Global Fund and a Supplier or between a grant recipient and a Supplier that in the opinion of the Global Fund places Global Fund resources at risk; and

v. **Assets at Risk:** When credible and substantive information has been received by the Global Fund from any source, including local fund agents, partner organizations and comparable institutions, which indicates that Global Fund resources have been placed at risk by a Supplier’s conduct.

**Reporting and Responding to Sanctionable Activities**

6. The Executive Director decides on the Global Fund’s response to a Sanctionable Activity based on the recommendations of the Executive Grant Management Committee (EGMC) and/or the Sanctions Panel.

7. Upon becoming aware of potential supplier misconduct in connection with Global Fund financed activities, the Country Team shall notify the Office of the Inspector General (OIG) through the relevant Grant Management Department Head.

8. If the OIG notifies the Secretariat of substantive and credible findings of supplier misconduct or in the event that another Sanctionable Activity (such as a supplier engaging in misconduct which results in a sanction being imposed on such Supplier by a partner organization or a comparable institution) has occurred, the EGMC shall be notified, through the appropriate Country Team. As part of the notification to the EGMC, the Legal and Compliance Department will confirm whether the relevant Supplier has breached the Supplier Code of Conduct or any other provision of a contract with the Global Fund or a Principal Recipient. The Country Team will also develop operational remedial measures to propose to the EGMC for approval to safeguard Global Fund resources.

9. In cases where there is an ongoing OIG investigation, operational remedial measures may be submitted to the relevant Grant Management Department Head for interim approval, as needed, or to the EGMC for approval prior to the issuance of a final OIG report. Potential operational remedial measures will vary based on the nature of the irregularities and other contextual factors, but could include procurement through the Pooled Procurement Mechanism or the institution of a Procurement and/or Fiduciary Agent.

---

281 In cases where the OIG has informed the Secretariat that it has identified credible and substantive evidence of fraud, abuse, misappropriation or corruption by a Principle Recipient or a Sub-Recipient, the Country Team shall also comply with the requirements contained in GF/B18/DP23 (Nov 2008) and GF/B19/DP25 (May 2009) regarding the restrictions to be promptly implemented to address the applicable risks to the Global Fund and its resources.
10. The EGMC will consider the OIG’s conclusions and/or the nature of the Sanctionable Activity and, taking into account the criteria listed in paragraph 12 below for when the involvement of the Sanctions Panel is expected, determine whether to recommend to the Executive Director that the case be referred to the Sanctions Panel. The Executive Director will then decide whether to refer the matter to the Sanctions Panel.

Sanctions Panel

11. The Sanctions Panel advises the Executive Director on remedies for Sanctionable Activities with respect to specific cases referred by the Executive Director to the Panel. The operation of the Sanctions Panel is described in the Sanctions Panel Procedures Relating to the Code of Conduct for Suppliers (the “Sanctions Panel Procedures”), as may be amended by Global Fund executive management from time to time.

12. Based upon a recommendation of the EGMC, the Executive Director may decide to refer a case to the Sanctions Panel in any circumstance where a Supplier has, directly or indirectly, engaged in Sanctionable Activities. In particular, involvement of the Sanctions Panel is expected in the following cases:
   i. the egregious nature of the Sanctionable Activities placed a material amount of Global Fund resources at risk and/or created a significant reputational risk for the Global Fund;
   ii. the concerned entity has engaged in Sanctionable Activities and is a Supplier to Global Fund grant programs in several countries;
   iii. the Sanctionable Activities involve an entity which has previously been reviewed by the Sanctions Panel or which has previously been the subject of OIG findings of credible and substantive evidence of fraud or misconduct; and/or
   iv. the concerned entity has violated a Global Fund-led or endorsed/supported integrity pact, such as the integrity pact for long-lasting insecticide treated net suppliers.

Types of Sanctions

13. Sanctions are used for ensuring the accountability of Suppliers. Sanctions protect the integrity of the procurement process through (i) exclusion of specific actors from access to Global Fund financing (i.e., permanent or temporary/conditional debarment), and (ii) deterrence.

14. There are four principal types of sanctions available: (i) Reprimand, (ii) Conditional Continued Engagement, (iii) Debarment with Conditional Release, and (iv) Indefinite Debarment. The Executive Director will decide whether to impose a sanction on a Supplier after receiving a recommendation from the Sanctions Panel.

15. When considering the appropriate sanction to be applied, relevant considerations include: (i) the severity of the misconduct; (ii) harm caused by the misconduct; (iii) the Supplier's level of cooperation with the investigation and sanctions process; (iv) the Supplier's past history of misconduct; and (v) the risk of continued engagement with the Supplier. Annex 1 provides a list of factors for assessing these considerations.

Reprimand

16. A reprimand, in general, shall be used to sanction a Supplier guilty only of a relatively minor or isolated incident of insufficient oversight.
Conditional Continued Engagement

17. This sanction is generally appropriate for:
   i. Individuals/entities that were not directly involved in the misconduct, but which bear some responsibility through, for example, a systemic lack of oversight; or
   ii. Individuals/entities that have demonstrated that they have taken comprehensive corrective measures and/or that there are other mitigating factors, as outlined below, so as to justify not debarring such individuals/entities.

18. The conditions imposed may be similar to those imposed under debarment with conditional release. The Executive Director may decide that if the Supplier fails to demonstrate compliance with the conditions within an established time period, an indefinite debarment or a debarment with conditional release would automatically become effective. The EGMC will verify whether the conditions to continued engagement have been met or if circumstances suggest that a revision to the original decision regarding the sanction may be warranted.

Debarment with Conditional Release

19. Debarment with conditional release is targeted towards Suppliers, rather than individuals. The purpose of the conditional release is to mitigate further risk to Global Fund resources and eventually allow the Supplier to again have an opportunity to act as a Global Fund Supplier once appropriate remedial measures have been implemented. Accordingly, the Supplier will only be released from debarment after the Supplier has demonstrated that it has met the conditions set by the Executive Director.

20. Conditions for lifting the debarment may include, but are not limited to:
   i. implementation or improvement of a compliance and ethics program, anti-corruption training, and/or the engagement of an independent monitor;
   ii. remedial measures to address the misconduct for which the Supplier was sanctioned, including disciplinary action or termination of employee(s)/officer(s) responsible for the misconduct; and
   iii. payment of a monetary sanction commensurate with any financial harm caused by the misconduct.

21. The Executive Director decides on the conditions for release based on the recommendations from the Sanctions Panel. The EGMC will verify whether the conditions for lifting debarment have been met or if circumstances suggest that a revision to the original decision regarding the sanction may be warranted.

Indefinite Debarment

22. Indefinite debarment is generally appropriate in cases of severe misconduct where it is believed that it is unreasonable to expect that the Supplier can use remedial measures to address the cause of the misconduct and to protect against future misconduct, or when the supplier has not meaningfully cooperated with the investigation or sanctioning process.

Communicating Sanctions

23. If the Executive Director decides to impose sanctions, the decision will be communicated, with appropriate confidentiality measures, to the concerned Supplier and, if the sanctionable conduct
affects a Global Fund grant program(s), to the Principal Recipient(s) of the concerned grant(s) and, where needed to give effect to the decision, to the Country Coordinating Mechanism and other Principal Recipients in the relevant market. If the decision is connected to an on-going investigation or audit by the OIG or public disclosure of the final OIG report is restricted in accordance with the Policy for the Disclosure of Reports Issued by the Office of the Inspector General, the Inspector General shall be consulted on the decision being communicated and will retain sole discretion over any factual details which will be included in the communication with the Supplier.

24. For cases referred to the Sanctions Panel by the Executive Director, the Sanctions Panel may, in accordance with the Sanctions Panel Procedures, notify the concerned Supplier of the sanctions under considerations prior to making a recommendation to the Executive Director. Whether or not the Sanctions Panel has sent a previous communication to the concerned Supplier, the Supplier shall be notified of any decision to sanction such Supplier prior to the decision being communicated publicly by the Global Fund.

25. The confidentiality of sanctions decisions is important owing to the legal risks to the Global Fund associated with public disclosure of these decisions. Consequently, all communications on sanctions shall be undertaken in collaboration with the Legal and Compliance Department and, where relevant, the Inspector General.

26. The Global Fund may share the decision on sanctions imposed, as well as information and evidence underlying the decision, with national authorities, partners and other comparable institutions. In order to protect the confidentiality of sanctions decisions, these shall only be communicated to a third party after execution of a confidentiality agreement as required by the Inspector General or the Legal and Compliance Department.

**Monitoring Sanctions**

27. Within the Secretariat, the Grant Management Division and the Legal and Compliance Department will monitor a Supplier’s compliance with conditions related to sanctions imposed by the Global Fund.

28. The Executive Director, with guidance from the EGMC, will decide whether the applicable conditions have been met and whether the sanctioned Supplier can be reinstated. In some cases, the Executive Director may also determine that additional sanctions may be necessary.

29. Reinstatement of a sanctioned Supplier or the imposition of an additional sanction period, may be considered for the following reasons:

   i. Payment of restitution in a manner determined by the Global Fund;
   ii. Changes in management or ownership, including permanent severance of officers and employees responsible for the sanctionable misconduct;
   iii. Installation, by the Supplier concerned, of effective, verifiable mechanisms to improve their business governance, ethics and oversight systems;
   iv. Adoption of ethics and anti-corruption compliance and training programs, including installing an independent monitor;
   v. Further cooperation with the OIG satisfactory to the OIG;
   vi. Initiation of administrative, civil or criminal action by the sanctioned party against the individuals responsible for the sanctionable misconduct, which is commensurate with the severity of the sanctions imposed by the Global Fund; or
   vii. Receipt by the Global Fund of any credible information that the sanctioned party engaged in further sanctionable misconduct after the imposition of sanctions by the Global Fund.
PROCESS, RESPONSIBILITIES

Process
30. Annex 2 defines the general process for identifying, reporting and reviewing supplier misconduct.

Responsibilities
31. Country Team notifies the OIG and Senior Management of supplier misconduct in connection with Global Fund financed activities and other types of Sanctionable Activities and recommends remedial measures.

32. Executive Grant Management Committee determines, based on the OIG findings and/or the Sanctionable Activities, whether to recommend to the Executive Director that he/she refer the case to the Sanctions Panel and whether any operational remedial measure is advisable.

33. Sanctions Panel advises the Executive Director on referred sanctions cases concerning supplier misconduct pursuant to the Sanction Panel Procedures.

34. Executive Director refers cases to the Sanctions Panel and makes a final determination as to whether to impose a sanction on a Supplier. These decisions are informed by the recommendations of the EGMC and the Sanctions Panel.
Annex 1. List of Considerations for Determining Sanctions

Severity of Misconduct

35. Severity may be measured through considerations including the following:
   i. Did the misconduct place a material amount of Global Fund resources at risk?
   ii. Is it a repeated pattern of conduct?
   iii. How sophisticated was the scheme? This includes the complexity of the misconduct (e.g.,
        degree of planning, diversity of techniques applied, level of concealment); whether the scheme
        was developed or lasted over a long period of time; and if the misconduct spanned grant
        programs in more than one country.
   iv. Did management have a role in the misconduct? Have individuals within high-level personnel
       of the organization participated in, condoned, or willfully ignored the misconduct?
   v. Did the misconduct involve a Global Fund or government official?

Harm Caused by the Misconduct

36. Harm may be measured through considerations including the following:
   i. Did the misconduct create a danger to public health/welfare?
   ii. Did the misconduct result in the waste/inefficient use of grant funds?
   iii. Did the misconduct involve corruption?
   iv. Did the misconduct cause harm to any third parties?
   vi. Did the misconduct create a significant reputational risk for the Global Fund?

Voluntary Corrective Actions

37. In evaluating corrective actions, the timing of the action may indicate the degree to which it
    reflects genuine intention to reform, or a calculated step to reduce the severity of the sentence.
    Considerations may include:
   i. Did the Supplier voluntarily disclose the misconduct to the Global Fund?
   ii. Did the Supplier initiate any reforms voluntarily upon becoming aware of the misconduct?
   iii. Did the Supplier initiate an internal action against responsible individual(s)?
   iv. Did the Supplier voluntarily establish or improve a corporate compliance program?

Cooperation with the Investigation

38. Cooperation may be measured through considerations including the following:
   i. Has the OIG concluded that the Supplier provided substantial assistance in the investigation,
      including voluntary disclosure, truthfulness, completeness, reliability of any information or
      testimony, the nature and extent of the assistance, and the timeliness of assistance?
   ii. Did the Supplier’s actions indicate intent to interfere with the investigation, including through
       destroying or concealing evidence; making false statements to investigators or reviewers;
       threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of
       matters relevant to the investigation; or attempting to corrupt individuals in exchange for non-
       cooperation with the investigation?
Prior History of Misconduct

39. Prior history can include debarments or other sanctions applied by the Global Fund and/or other development partners.
## Annex 2. Sanctions Process
### Scenario 1: Procurement Irregularities

Risk Management across the Grant Lifecycle

Issued on: June 2018
Issued by: Risk Department
Approved by: Executive Grant Management Committee

OVERALL OBJECTIVES

1. The Global Fund recognizes that a preventive, focused risk management approach is critical for optimal achievement of the Global Fund’s mission of saving lives. Robust risk management occurs where risks are explicitly considered and decisions are taken consistently per agreed-upon principles. At the same time, it is incumbent on the Global Fund to ensure that the risks encountered in pursuing the Global Fund’s mission to maximize impact and end the three diseases is balanced with the mitigating actions taken and controls put in place to protect grant program resources.

2. Risk management is an integral part of grant management, both at country and Secretariat levels. While risk management initiatives by in-country stakeholders and implementers have significant impact on grant outcomes, the OPN focuses on the risk management framework internal to the Global Fund Secretariat. Country Teams engage implementers on an ongoing basis to facilitate that the outcomes from risk management activities by different stakeholders are aligned, prioritized and translated into mutually complementary actions.

3. Seamlessly embedding risk management into Global Fund culture, strategic planning, decision-making and resource allocation is critical for effective and efficient grant management and to the organization’s achievement of operational and strategic objectives. Effectively embedded risk management throughout the full grant lifecycle will:
   a. promote an environment in which Country Teams are responsible and empowered to manage risk and have a consistent understanding of the principles by which the Global Fund differentiates its approach to risk management;
   b. enable Country Teams to identify and prioritize risks;
   c. empower and encourage Country Teams to escalate identified risks when necessary; and
   d. foster management support to debate and make critical risk-based decisions.

4. The purpose of this OPN is to:
   • define the risk management framework;
   • provide guidance to Country Teams on how to operationalize risk management across the grant lifecycle; and,
   • articulate how the Risk Department and Global Risk Owners provide risk oversight to help achieve optimal outcomes at the grant and portfolio level.
POLICY AND PRINCIPLES

Principles

5. The following principles underpin the embedding of risk management throughout the grant lifecycle. Country Teams must take into account these principles when managing grants and making decisions:

Principle 1 – Updating and maintaining grant specific risks: Country Teams managing High Impact and Core portfolios are responsible for updating risk assessments for their portfolios on an ongoing basis as information becomes available. Teams managing Focused portfolios will review and update risks on an annual basis as part of the Annual Funding Decision process and document financial risks on an ongoing basis in the Financial Risk and Assurance Matrix.

Principle 2 – Prioritizing portfolio-level risks: Risk prioritization is based on country context and grant objectives, taking into account trade-offs between achieving grant objectives and accepting risk in the four main risk categories, i.e. Programmatic and M&E, Financial & Fiduciary, Health Product Management & Supply Chain, and Governance, Oversight & Management. This ensures that both the Country Team and implementers are focused on mission critical risks with appropriate and effective mitigating actions. Key grant risks which will be prioritized will cascade upwards to form prioritized portfolio-level risks.

Principle 3 – Mitigating risk and planning comprehensive assurance: All prioritized root causes must have mitigating actions aimed at managing the associated risk with the view of reaching a target risk level. The types of mitigating actions, and the degree to which risks are mitigated, should be driven by the target risk level and a defined period of time required to reach the target level. Assurance activities will verify whether controls and mitigating actions for key portfolio risks are executed as planned and whether they are effective in reducing risks to the target level. Proper assurance will facilitate the identification of gaps in implementer controls and weaknesses in the design and implementation of mitigating activities.

Principle 4 - Accepting risk when necessary: Defining the amount and type of risk the Global Fund is willing to accept in pursuit of its strategic objectives namely to achieve health outcomes and impact is critical for effective risk management, in particular to drive trade-off decisions and enable resource allocation. The degree to which residual risk is deemed acceptable by the Portfolio Performance Committee for High Impact and Core countries will guide Country Teams in determining the extent of mitigating actions and assurance activities to put in place against prioritized risks.

Principle 5 – Alignment of portfolio and strategic risks: Key thematic organizational risks that can have significant influence on the achievement of grant objectives are captured in the Organizational Risk Register. Country Teams, supported by other departments (particularly the Risk Department

---

282 Controls are generally designed into grant programs (e.g., segregation of duties intended to prevent fraud and error), where mitigation actions reduce the level of identified risk (e.g., strengthening logistic management information systems).
and Global Risk Owners[^283]), should align their approach to mitigating and assuring risks in their portfolios with the organization’s Risk Management Framework described in the section below, to ensure grant implementation supports the Global Fund’s strategic objectives.

**The Risk Management Framework**

6. Risk management is an ongoing process with built-in feedback loops to allow for timely adjustments to the level of risk and the corresponding mitigating actions. The framework below governs this process:

*Figure 1. Risk and assurance planning process.*

---

[^283]: See section on the “Role of Risk Department and Global Risk Owners” for details on the Global Risk Owners.
The Global Fund’s Operational Policy Manual

7. Risk Identification. Grant-specific risks, as well as corresponding controls and mitigating actions, are identified, prioritized, and monitored by Country Teams in High Impact and Core portfolios throughout the grant lifecycle (from country dialogue to closure), using the Integrated Risk Management (IRM) Module in the Grant Operating System (GOS).

8. Identified risks are categorized in four areas:
    (1) Programmatic and M&E Risks;
    (2) Financial & Fiduciary Risks;
    (3) Health Product Management & Supply Chain Risks; and
    (4) Governance, Oversight & Management Risks.

These four Risk Categories are broken down into eight grant-specific Organisational Risks, reflected in the Organizational Risk Register, and then to the 21 individual risks included in the IRM.

9. Capacity Assessment. A capacity assessment is required for:
    (1) all new Principal Recipients (PR) who have not previously implemented the disease component, and
    (2) existing PRs who will be implementing new activities for which their capacity has not been previously assessed (e.g. a PR previously implemented LLIN campaigns and will now also implement case management activities).

Examples of the second scenario include:
- Changes in program scope, including for activities the PR has not previously been assessed for (i.e. community outreach, BCC activities, etc.).
- PRs with specific experience in one disease being selected to manage a disease component where they have not yet evidenced expertise.

---

284 As from May 2018, the IRM has replaced the QUART and CAT tools.
• PRs with no or limited past experience in specific activities (i.e. procurement of non-health products) being tasked to take over such tasks.

10. Outside of the two mandatory situations described above, a Country Team may also conduct a capacity assessment for an existing PR if necessary to manage risks. The following are examples of potential triggers for conducting a capacity assessment of an existing PR:
• Material changes in scale of the program (e.g., expanding from 2 states to 10 states)
• PRs with grants that have been consistently performing at B2 or C level.
• Evidence that the PR’s capacity has significantly changed since the last capacity assessment.

11. In situations where the above potential triggers are present (or other relevant triggers), Country Teams, in consultation with their Risk Specialist, determine if a capacity assessment will be conducted and document the outcome of the decision.

12. If a Capacity Assessment is completed in the context of a process requiring GAC approval (e.g. new grant approval or material reprogramming requiring GAC approval), the outcome of the assessment is submitted to GAC as part of the GAC approval process. If Country Teams, in consultation with their RM/DH/RPM and Risk Specialist, determine a capacity assessment will not be undertaken, the rationale for this decision is submitted to GAC for information as part of its review of standard grant documentation.

13. **On-going Risk Assessment for High Impact and Core Portfolios.** Country Teams follow a standardized methodology to determine a grant’s overall risk rating within a structured risk assessment process using likelihood and severity of 21 pre-defined risks within the four risk categories described above. Risk Assessments are completed at the grant level and maintained up to date as information becomes available to Country Teams in High Impact and Core portfolios throughout the grant lifecycle, from Funding Request to Grant Closure (e.g., as progress reports, audit reports, Health Facility Assessments, mission reports, etc., become available to Country Teams, they will update their Risk Assessment as required to reflect an up-to-date risk profile). Each grant’s risk assessment in High Impact and Core portfolios should be updated as mitigating actions or assurance activities are completed or revised; when a new risk or root cause is identified; when risk levels or implementation arrangements shift; or whenever the Country Teams recognize an important change in the grant risk profile.

14. **Risk Assessments for Focused Portfolios.** FPMs managing Focused portfolios complete Risk Assessments at the grant level as part of the annual funding decision-making process. The Portfolio Services Team (PST) supporting financial analysis within Focused portfolios follow a standardized methodology to determine a grant’s financial risk ratings for the six risks within the Finance and Fiduciary Risk Category.

15. **Risk Prioritization.** Prioritization ensures that both the Country Teams and implementers are focused on mission critical risks. From the grant specific risks captured in their risk assessment, Country Teams further flag risks at the grant level that represent a key risk at the portfolio level. Key Portfolio Risks are those that cut across multiple grants or may be a critical, grant-specific risk that has the potential to prevent the program from achieving key objectives. Risks identified as Key Portfolio Risks in High Impact and Core portfolios are documented in a Key Risk and Assurance Matrix (KRM).

---

285 Risk Specialist only consulted for High Impact and Core portfolios. In case of disagreement, the issue is escalated to the next management level in accordance with the process outlined in the Guidance on Country Team Approach.

286 When a Capacity Assessment is submitted, the Country Team must state whether the PR has the capacity to implement the program or not and document the rationale for their decision. This is recorded as a PDF and automatically saved the Document Management tab within the IRM module. The Country Team can upload this PDF.

287 The Country Team must record whether a Capacity Assessment will be completed for the PR that will implement the program for each new Implementation Period in the Capacity Assessment section of the IRM. This is recorded as a PDF and automatically saved the Document Management tab within the IRM module. The Country Team can upload this PDF with their other GAC required documents.

288 Focus countries are not required to develop a KRM.
Risk Mitigation

16. All root causes identified for risks must have mitigating actions (or “mitigants”) to manage the risks to an acceptable level. A mitigating action must meet the five S.M.A.R.T. criteria; i) Specific, so what must be implemented is clearly understood, ii) Measurable, so its status can be tracked, iii) Attainable, within the span of control of the actor to which it is assigned to, iv) Relevant to the identified risk, and v) Time-bound to ensure exposure to the risk is within agreed limits.

17. In cases where mitigating actions have due dates of more than six months, sub-milestones are recommended to be included as part of the mitigating actions to ensure the mitigant is on track to being completed on time and to an acceptable level.

18. The degree to which risks are mitigated should be driven by the trade-off decisions made at the Portfolio Performance Committee in the context of a portfolio/grant, considering the entire set of risks that can prevent achievement of grant and portfolio objectives. The types of mitigating actions and the degree to which risks are mitigated should be driven by the existing and target risk levels and defined periods of time which are given to reach these target levels.

Assurance and Monitoring

19. Assurance planning is at the heart of robust risk management, providing confidence to the Global Fund, donors, technical partners, and beneficiaries that investments are made strategically, efficiently and effectively. In the Global Fund risk management context, assurance is defined as a holistic framework that gauges whether adequate controls and mitigating actions are in place to manage key portfolio risks, with the ultimate goal of achieving grant objectives. Assurance activities help identify gaps in controls and mitigating actions in a timely manner to ensure corrective action can be taken.

20. Comprehensive Assurance Planning for High Impact and Core Portfolios. The assurance planning process starts with the Key Portfolio Risks identified by the Country Team. Assurance activities and providers are added for the mitigants linked to those Key Portfolio Risks in a grant’s risk assessment and are documented in the Key Risk and Assurance Matrix. Comprehensive portfolio-level assurance planning is required for High Impact and Core countries on an annual basis and is documented in the KRM. For comprehensive guidance on assurance planning, please refer to the Risk and Assurance Handbook.

21. The annual updates of KRM for High Impact and Core portfolios should be completed prior to the annual LFA budgeting exercise, in as much as an LFA’s scope of work will be directly informed by activities assigned to it within the assurance plan. Costed activities by other assurance providers will also be approved as part of the grant budgeting process during grant making.

22. The annual update is reviewed and approved by the Regional Manager (for Core portfolios) or Department Head (for High Impact portfolios), Regional Finance Manager, and relevant Risk Specialist. When a portfolio has been selected for review by the Portfolio Performance Committee (“PPC”), the review is required after the KRM has been validated by the Global Risk Owners,
Disease Advisors and CRG as part of Key Issues meeting of the PPC process. Once signed-off, the KRM is submitted for review to the PPC as described in the PPC ToRs.

23. **In-Country Consultation.** An in-country consultation on the resulting assurance plan captured in the KRM for High Impact and Core portfolio shall be undertaken jointly by the Country Team and Risk Specialist with country-based implementers, partners, beneficiaries and other stakeholders once per implementation period. This exercise is designed to (1) ensure country context is accounted for, and (2) align partners and implementers around an agreed set of prioritized risks, mitigating actions and assurance activities. This consultation when undertaken shall be done before the approval of the KRM.

24. **Financial Risk and Assurance Plans.** Financial assurance planning is performed for individual grants in all portfolios, unless subject to exemptions as defined in Annex 2 of the Guidelines for Financial Assurance Planning on Global Fund Grants. Based on the information in the IRM, grant-specific financial assurance plans can be extracted from the standard grant risk assessment and are approved in accordance with the Guidelines for Financial Assurance Planning on Global Fund Grants.

25. **Monitoring.** Given the importance of assurance activities in determining the effectiveness of mitigation actions, there are a number of ways in which effective monitoring of progress made on implementing mitigating actions and assurance activities will be carried out throughout the grant lifecycle, including but not limited to:
   a. LFA and Country Team review through the Progress Update report
   b. Annual review, update and approval of the KRM
   c. Risk Specialist review of the Annual Funding Decision
   d. Ongoing Risk Specialist review of grant specific risk management plan
   e. Periodic in-country review, update and validation of the KRM

**Reporting**

26. Risk data at the grant level will be available through GOS to aggregate and report at the grant, disease, country, regional and global levels. Such analyses are also incorporated in the Organizational Risk Register and escalated to the Enterprise Risk Committee (ERC), as needed. The Risk Department’s independent analyses are derived from its risk oversight function and contribute to the Chief Risk Officer’s (CRO’s) Annual Assurance Opinion to the Board and Committees.

**Differentiated Requirements**

27. The approach and requirements for risk management are determined according to the differentiation framework (see the Overview of Grant Implementation for details on how risks are considered in portfolio categorization). A general framework has been developed (Table 1) to guide the risk management actions that Country Teams are required to undertake in each category.

---

289 The Key Issues Meeting is a preparation meeting before the PPC and is co-chaired by the Head of Country Risk Management and the GMD Department Head/Regional Manager of the portfolio being reviewed. It is an opportunity to have an open and in-depth conversation to refine articulation of the issues, risks and potential ‘asks’ to the PPC, as well as identify any changes required to supporting data & analyses based on the feedback of various experts, including the Global Risk Owners.

290 An approval process for the Key Risk and Assurance Matrix will be implemented in IRM as part of AIM Phase 2. Until such time as this is deployed, the approval process will be documented via email. The email approvals will be uploaded in the Document Management tab of IRM.

291 Financial Risk and Assurance Plan are generated from the Integrated Risk Management (IRM) module on GOS. There is no duplication of effort in documenting or tracking financial risks.

Governance over Risk Management

28. **Enterprise Risk Committee.** The Risk Department leads enterprise level risk management and carries out the governance and reporting functions over risk management. The Enterprise Risk Committee (ERC) is a forum for senior management to proactively identify and prioritize key organizational risks, assure the quality, strength, and feasibility of associated mitigation actions, and to ensure that appropriate assurances are applied (see ERC ToRs for additional information).

29. **Portfolio Performance Committee.** Considering program performance, progress towards impact and contextual factors, the Portfolio Performance Committee (PPC) reviews country portfolios to ensure that risks have been prioritized correctly, that mitigating actions for key portfolio risks are appropriate, that short-term mitigations have been considered where needed, all with explicit attention to risk acceptance when necessary.

30. High Impact and Core portfolios will in principle be reviewed at least once during a funding cycle, unless otherwise determined by the PPC. Focused portfolios will be reviewed as determined by the PPC. The selection of portfolios to be reviewed by the PPC each year will be informed by semi-annual enterprise reviews to be conducted by the PPC, which will evaluate performance across all portfolios and identify key gaps and opportunities for maximizing impact. PPC also will review relevant CoE (Challenging Operating Environments) exceptions, the related risk exposures and the mitigation measures, as needed.

31. The PPC reports grant related risk management trends to the ERC, as needed (see PPC ToRs for additional information). The PPC will escalate to the ERC risks identified across multiple country

---

292 As part of AIM Phase 2, the Risk Tracker will be simplified for use by Focus countries. Until such time as this is deployed, Focus countries are recommended to use the Risk Tracker in its current form, but it is not required.

293 See the Guidelines for Financial Assurance Planning on Global Fund Grants for additional information and possible exemptions.
portfolios that should inform enterprise-wide risk discussions and resulting policy and enterprise mitigation actions.

32. **Risk Acceptance.** Management’s acceptance of selected risks in portfolios is one of the key outcomes of a PPC review. There are three scenarios where risk can be accepted by management:
   a. Situations where it is difficult for the Global Fund to influence identified risks through effective short or long-term mitigating actions. Management accepts the risks, giving due consideration to the organization’s mission in these contexts (e.g., risk mitigations in countries with long-term conflicts);
   b. While ideal mitigations are long-term, there are temporary short-term mitigations that can be instituted that reduce the near term risk to an acceptable level (e.g., use of fiscal agents when internal controls are weak while capacity building happens over the long-term);
   c. Effective long-term mitigations exist; however, no suitable short-term mitigations are available. Therefore, management accepts the risks for the time being while the long-term mitigations are being implemented (e.g., data quality risks arising from inadequate general health systems capacity).

Overall, the acceptance of a risk is contingent upon the trade-offs involved and the implementation and success of agreed upon mitigation actions and/or controls.

33. Management’s decision to classify certain portfolios as Focused constitutes their acceptance of the residual risks in those portfolios, and associated trade-offs on internal processes and resourcing; including for exemption from some requirements as provided for in this OPN.

**OPERATIONAL GUIDANCE ON RISK MANAGEMENT ACROSS THE GRANT LIFECYCLE**

34. This section outlines the critical milestones across the grant lifecycle where risk analysis feeds directly into grant decision-making processes. While these are standard milestones, there will also be specific issues that arise in the course of the grant lifecycle that will require the use of risk analysis, thus underscoring the principle of updating the Risk Tracker and ensuring appropriate actions are taken in a timely manner on an ongoing basis.

35. Table 2 below summarizes what is required at each stage of the grant lifecycle. Following the table are the details for each of these milestones.
### Table 2:

**Access to Funding (A2F) and Grant Making**

36. **Funding request**: Country Teams for all portfolios are required to provide applicants with the Secretariat’s view of key component-relevant risks to facilitate the development of the Funding Request. For High Impact and Core countries, this summary can be generated as an extract from the IRM and should be shared with applicants at the beginning of the country dialogue process. The applicant will then be required to describe how it will directly address these risks when submitting its Funding Request.

37. **Secretariat Briefing Note (SBN)**. In line with Access to Funding principles of differentiation, for a country undergoing a full or tailored review, once a funding request is received by the Secretariat, the Country Team provides its analysis to the TRP and, when applicable, the GAC in the SBN. An essential component of the SBN is the Country Team’s analysis of the applicant’s proposed actions to address key component-relevant risks identified during Country Dialogue. The Country Team’s analysis in High Impact and Core portfolio shall also include an extract from the Risk Tracker of any residual risks that remain unmitigated and their proposed actions for grant making.

38. As part of finalizing the SBN review for TRP submission for High Impact and Core portfolios, the relevant Risk Specialist and Country Team will agree on a Grant Making Risk Assessment that summarizes risk management actions that should be completed during grant making; progress against actions in the Grant Making Risk Assessment is the basis upon which the Risk Specialist assesses the status of residual risks and provides non-objection to the Grant Making Final Review and Sign-off Form (see section on “After grant making” for additional details).

39. **Grant making**. In line with the GAC Terms of Reference, as needed, the GAC Review will provide guidance on the risks or control issues that must be addressed during grant making, particularly those that may have budgetary implications. During grant making, Country Teams shall work with implementers to ensure that critical risks to the achievement of grant objectives are addressed to the extent possible, and that appropriate controls and mitigating actions are put in place for residual risks that cannot be addressed within the grant making period. Country Teams for High Impact and Core portfolios will update their risk assessment as risks are either identified or addressed throughout the grant making process.

296 Fiduciary and programmatic risk is a consideration for application and review modalities of funding requests in line with Access to Funding Core Guiding Principles for Differentiation (GF/SC01/DP03). For more detailed guidance and context, please refer to the OPN on Access to Funding and Grant Making. Fiduciary and programmatic risk is a consideration for application and review of funding requests.

297 Focused portfolios are not required to share the key component-relevant risks with the applicant as part of country dialogue.
40. **After grant making:** At the end of grant making, the residual risks and their mitigating actions (including associated assurance activities where known) shall be documented in the grant making Final Review and Sign-off Form and presented to GAC. In line with the GAC Terms of Reference, (see the GAC ToRs) an element of the GAC review and approval of the grant is the acceptance of the residual risks and the mitigation strategy to be actioned during grant implementation.

41. For High Impact and Core countries, the Risk Specialist will continue to engage with the Country Teams on an ongoing basis and will review the risk section of the grant making Final Review and Sign-off Form and associated grant documentation on a “no objection” basis within 48 hours of receipt of form to ensure that:

   a. all key risks related to grant objectives have been identified and appropriately prioritized;
   b. mitigation measures are adequate to manage the risks at an acceptable level; and
   c. appropriate assurance mechanisms are identified (to the extent possible based on known implementation arrangements at the time of GAC review).

If the Risk Department does not raise an objection within 48 hours, their agreement with the risk analysis is assumed. If an objection is raised, the issue is escalated to the next management level in accordance with the process outlined in the *Guidance on Country Team Approach*.

**Grant Implementation**

42. **Annual Funding Decisions (AFD).** Following GAC and Board approval of a grant, the critical grant decisions are made when determining the annual funding amounts and disbursement schedule. This is an opportunity to take stock of the status of prioritized risks and the effectiveness of mitigants put in place to address them based on the outcomes of assurance activities. Annual Funding Decisions represent critical points to ensure that any new or amended mitigating actions, as a result of changes to the risk management plan, are fully funded and that appropriate mitigants and controls are in place to safeguard funds being disbursed.

43. Country Teams shall select which risks and mitigating actions from their grant’s risk assessment to include in the Annual Funding Decision-Making Form (ADMF) based on the risks’ relevance to the activities being funded. This information shall form a critical part of the final decision on the funding amount approved, and if any additional actions/safeguards need to be put in place to safeguard the funding. Country Teams and Risk Specialists are expected to collaborate on an ongoing basis throughout the grant lifecycle so that issues or differences of opinion are identified early in the process and resolved. In preparing the annual funding decision, Country Teams for High Impact and Core portfolios should engage Risk Specialists in the review of management issues and risks. Before the ADMF is submitted for the formal approval process, the Risk Department Focal Point will review the risk analysis to ensure that:

   a. all risks related to key grant objectives relevant to the activities being funded have been identified and appropriately prioritized;
   b. mitigation measures are adequate to manage the risks at an acceptable level; and
   c. appropriate assurance mechanisms are identified.

If the Risk Specialist does not raise an objection within 48 hours of receipt of the ADMF, their agreement with the risk analysis is assumed. If an objection is raised and not resolved in a timely manner, the issue is escalated to the next management level in accordance with the process outlined in the *Guidance on Country Team Approach*.

---

298 To the extent possible in 2016-17, depending on whether countries have completed assurance planning by the time of the annual funding decision is processed.
44. In addition, the Performance Letter sent to the implementer shall include (at a minimum) the list of prioritized risks, mitigating actions and assurance activities relevant to the implementer. 299

45. Grant Revisions. Grant Revision requests are opportunities to assess progress to manage key component-relevant risks during grant implementation and determine if programmatic and budgetary adjustments are needed to support new or amended mitigating actions.

46. For Material Program Revisions Requests in High Impact and Core countries, the Risk Specialist will provide input on the grant’s risks and mitigating actions to the Country Team. In some cases, issues will be escalated to GAC for further guidance (see OPN on Grant Revisions and GAC Terms of Reference for additional information).

47. For grant extension requests in High Impact and Core countries requiring GAC and Board approval, the Risk Specialist will provide input on the grant’s risks and mitigating actions to the Country Team (See OPN on Grant Revisions for additional information).

48. Grant Closure. In the majority of cases where a grant continues with the same PR, it is critical that the residual risks not mitigated during the previous implementation period are documented by Country Teams and carried forward into the new grant implementation period. 300 In cases where the PR is being replaced, risks that remain relevant to the new grant and PR (i.e. supply chain, data quality, or accessibility issues, etc.) shall be transferred from the previous PR to the new PR for the next implementation period. In all cases, mitigating actions and assurance activities included in the grant’s risk assessment need to be either closed, waived or transferred for the grant to be closed. Any mitigating actions or assurance activities that remain relevant to address risks in the program should be transferred to the grant or grants that will continue implementing the program.

Role of Risk Department and Global Risk Owners

49. In addition to providing advice and oversight on the Country Team’s execution of risk management at the grant level, the Risk Department leads enterprise level risk management through the ERC and PPC as described above, and provides governance and reporting functions over risk management:

a. Risk Management Group: The Risk Department will coordinate with Global Risk Owners to identify points of collaboration and actions for strengthening success and efficiencies across Programmatic, Financial, PSM and Governance related risk and assurance activities. This will promote collective learning on risk management across the broader “second line of defence” functions.

b. Reporting. The Risk Department’s independent analysis, based on various risk oversight functions, will contribute to the Chief Risk Officer’s Annual Assurance Opinion to the Board and Committees.

c. In-Country Risk Reviews. An in-country risk review by the Risk Department provides the Secretariat with additional information to draw independent conclusions with respect to a portfolio, based on interactions with key stakeholders and beneficiaries. The in-country risk review also develops the Risk Department’s understanding of the risks and root causes facing portfolios, and facilitates evaluation of existing mitigating actions, including their adequacy, feasibility and likelihood of adequately mitigating specific risks.

d. Transfer of best practices across the portfolio. Given its view of risk mitigation practices throughout the Global Fund’s entire portfolio, the Risk Department takes stock

---

299 As described earlier in the section on Mitigating Actions, prioritized risks and mitigating actions should be discussed with implementers on an ongoing basis. The Performance Letter is a means of formally communicating the mitigating actions that particular PR is responsible and accountable for implementing, but can be formally communicated outside of a Performance Letter as necessary.

300 In situations where the same PR continues to implement the disease component in the next implementation period, the Risk Tracker for the new implementation will be automatically cloned from the previous implementation period to ensure that all risk related data is transferred to the next period.
of mitigants that have proven effective in specific contexts and assists in transferring such best practices across Country Teams.

**50. Global Risk Owners.** There are Global Risk Owners for each of the four risk categories, assigned as follows:

- Finance and Fiduciary Risks: Head, Program Finance & Controlling Department
- Programmatic and Monitoring and Evaluation Risks: Head, Technical Advice and Partnerships
- Health Product and Supply Chain Risks: Head, Supply Chain Department
- Governance, Oversight and Management Risks: Head, Grant Portfolio Support and Solutions Department

**51.** Global Risk Owners are responsible for providing policy and technical guidance in their functional area regarding risk identification and prioritization, and best practices for mitigating actions and assurance activities based on country context. Further, as applicable, Program Finance has an additional management control function. The Legal and Compliance Department also advises Country Teams and Global Risk Owners on Governance, Oversight and Management Risks. Global Risk Owners are members of the PPC and are also responsible for the content of risk management systems and tools (i.e. capacity questions, pre-defined root causes and overall design and functionality of the systems and tools).

</tbody>
</table>

| **FPM** | As the manager of the Country Team, the FPM is primarily responsible for risk management by identifying, prioritizing, mitigating and assuring risks for the portfolio of grants that he/she manages. |

| **Technical Specialists** | As the members of the Country Team, technical specialists support the FPM in risk management by identifying, prioritizing, mitigating and assuring risks related to their functional area in the grants that they are responsible for. For Focused portfolios, the FPM requiring the support of a Finance specialist needs to raise a request to PST for obtaining this advice, based on a review and recommendation from the LFAs. |

| **Risk Specialist (“Focal Point”)** | The Risk Specialist provides risk oversight for High Impact and Core portfolios over risk management at the grant level on an ongoing basis, supports enterprise level risk management, facilitates governance and reporting related processes as it pertains to their assigned countries. Any in country engagement of the Risk Specialist will be in consultation with the Country Team. |
The closure process for grant begins six months prior to the end of the implementation period with the submission of a close-out plan and budget. The grant’s final funding decision is approved at the same time as the close-out plan. Following the last disbursement, the grant is placed in financial closure. Once all closure documentation has been submitted the grant is placed in final administrative closure and is de-activated from all Global Fund systems.
Implementation Period Reconciliation and Grant Closure

Approved on: 4 September 2018
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions
Sub-Owner: Program Finance

OVERALL OBJECTIVES

1. When the Global Fund’s support for a particular disease/HSS program continues from one implementation period (“IP”) to the next or a grant ends, the Grantee or Principal Recipient, acting on behalf of the Grantee301, must ensure that:
   a. agreed closure activities are planned, implemented and paid for;
   b. remaining financial commitments and financial obligations are addressed;
   c. remaining grant funds or recoveries are returned302 to the Global Fund;
   d. program assets are accounted for, transferred or disposed of; and
   e. programmatic and financial reports are submitted to the Global Fund.

2. The implementation and finalization of the IP Reconciliation or Grant Closure process must be completed within a maximum of 12 months from the IP end date.

OPERATIONAL POLICY

3. This Operational Policy Note (“OPN”) applies to grants financed under the 2014-2016 allocation period and thereafter. The OPN on Grant Closures issued on 18 December 2014 applies to grants financed prior to the 2014-2016 allocation period.

4. This OPN covers the following types of closure:
   a. IP Reconciliation when the Global Fund’s support for a particular disease/HSS program continues from one IP to the next, with the same Principal Recipient.
   b. Grant Closure means the grant ends due to one of the following reasons:
      i. Change of the Principal Recipient: a decision is taken by the Country Coordinating Mechanism (“CCM”) and/or the Global Fund to change the Principal Recipient;
      ii. Transition from Global Fund Financing: a decision is taken by the Global Fund or the country to end Global Fund financing for a disease component or country; or
      iii. Grant Consolidation: a decision is taken by the CCM and/or the Global Fund to consolidate several grants with the same Principal Recipient into one grant managed by that Principal Recipient.

5. The closure stages and a summary of the closure steps for each stage is set out in the framework below. The steps will vary depending on the type of closure. A separate step-by-step operational

---

301 As such terms are defined in the Global Fund Grant Regulations (2014) available at: https://www.theglobalfund.org/grantregulations.
302 For the purposes of this Operational Policy Note, all references to Principal Recipient includes the Grantee, where the Principal Recipient acts on behalf of such Grantee.

303 In the case of IP Reconciliation, the remaining grant funds may be deducted from the approved grant amount for the next IP.
guidance is detailed in the Operational Procedures on IP Reconciliation and Grant Closure. Annex 1 provides the definition of key terms used in this OPN.

6. The implementation of the IP Reconciliation or Grant Closure process is undertaken following the IP end date. However, the Global Fund may also suspend or terminate a Grant Agreement early in accordance with its terms, in order for example, to change the Principal Recipient or cease Global Fund financing for a disease component or portfolio. In such instances, the Grant Closure process must be initiated immediately after such decision is communicated in writing to the Principal Recipient (as required under Section 10.2 of the Global Fund Grant Regulations (2014)).

7. At the Global Fund Secretariat, the Country Team is responsible for overseeing the completion of the IP Reconciliation or Grant Closure process, as applicable. At country level, under the oversight of the CCM, the Principal Recipient is responsible for undertaking and completing the IP Reconciliation or Grant Closure process, as applicable. It is the Principal Recipient’s sole responsibility to ensure that all Sub-recipient(s) and any other implementing partner(s) complete(s) activities and submit(s) required information in a timely manner so that the Principal Recipient is able to comply with the Grant Agreement and this OPN.
8. Set out below are the stages for IP Reconciliation and Grant Closure:

A. Plan Closure

9. As part of rigorous grant management, closure steps must be planned at least six months in advance of the IP end date to ensure the closure process is finalized in a timely and orderly manner. In the event of an early suspension or termination of the Grant Agreement, planning must begin as soon as the Principal Recipient is informed in writing.

Agree on Closure Approach (including Grant Closure Plan and Grant Closure Budget)

10. During the pre-closure period, the Country Team and the Principal Recipient must agree on the closure steps and timelines specified under the ‘Implement Closure’ stage that apply in the context of the grant. Depending on the closure type, the requirements to finalize the closure process will vary.

11. Under IP Reconciliation, the steps must be planned as part of the grant making process for the new IP. No separate Grant Closure Plan and Grant Closure Budget are required. For Grant Closure cases (with the exception of Grant Consolidation), all closure activities including the timeline for completing and paying those activities within the Closure Period must be clearly documented in the Grant Closure Plan and Grant Closure Budget which must be endorsed by the CCM. The Grant Closure Plan and Budget are approved by the Regional Manager or Department Head, and the Regional Finance Manager, through the Implementation Letter, in accordance with the Global Fund Signature Authority Procedure (“SAP”) (which may be amended from time to time).

12. Subject to the Global Fund’s approval of the Grant Closure Plan and Grant Closure Budget, grant funds may be used to finance closure activities approved in the Grant Closure Plan and Budget to ensure the orderly closure of the grant. The Principal Recipient is responsible for minimizing the costs of closure. Any payment for activities not set forth and approved in the Grant Closure Plan and Grant Closure Budget is non-compliant and the Principal Recipient must reimburse such amount to the Global Fund.

B. Implement Closure

Complete Approved Programmatic Activities

13. Closure activities typically cover the administrative activities required to close the grant. For Grant Closure cases, excluding Grant Consolidations, the Global Fund may, at its discretion, allow time-limited, programmatic activities after the IP end date to facilitate the completion of discrete projects that have already been substantially started (such as the distribution of bed nets already delivered in-country, or the delivery of procured drugs, which may have faced delays in arriving in-country). The Grant Closure Plan and Grant Closure Budget set forth all Grant

---

303 Where a grant is continuing from one IP to the next, the closure of the current IP must form part of the new grant making process.
304 If a Sub-recipient is not continuing under the next IP, the Country Team must discuss and agree with the Principal Recipient the closure activities, timelines and budget pertaining to the outgoing Sub-recipient.
305 The Grant Closure Plan and Budget must be endorsed by the CCM Chair and Vice-Chair. For Regional Coordinating Mechanisms (RCMs), the RCM Chair and Vice-Chair must endorse the Closure Plan and Budget. This requirement does not apply to Non-CCMs and Regional Organizations.
306 Ibid.
307 This is a Global Fund internal document.
Closure activities approved by the Global Fund. Approved activities must be completed and paid for during the Closure Period.

Complete Reporting Requirements

14. To ascertain programmatic and financial achievements of the grant during the last year of the IP and/or during the Closure Period, the Principal Recipient is required to submit the following reports. The reports must conform to the relevant guidelines and will be reviewed and approved by the Country Team. The required reports are the following:

   a. Final Progress Update ("PU") for the IP;
   b. Final Tax Report for the IP;
   c. Audit Report; and
   d. Financial Closure Report

Address Financial Commitments and Obligations

15. At IP end date, the Country Team must confirm the Principal Recipient's outstanding financial commitments and obligations.

16. For IP Reconciliation, financial commitments as at the IP end date must be financed and completed, within six months of the IP end date. Approved financial obligations, however, must be transferred to the next IP of the grant (see Guidance on Transition between Allocation Utilization Period).

17. For Grant Closures, financial commitments and obligations are financed and completed under the expiring grant and must be addressed in the Grant Closure Plan and Budget. All financial commitments incurred during the IP of that grant need to be addressed within six months following the IP end date.

18. Grant Funds remaining and not otherwise budgeted for under the Grant Closure Plan and Budget under the grant nine months after the IP end date will be automatically decommitted and the Purchase Order (PO) will be closed. If the Country Team anticipates any delays beyond nine months to fulfil commitments, the Country Team must request to keep the PO open. Such requests will be reviewed and authorized by the Chief Finance Officer.

Address Non-Compliant Expenditures and Recoveries

19. Non-compliant expenditures, refunds and/or recoveries must be addressed in accordance with

---

312 Section 2.2.1 of the Global Fund Guidelines for Grant Budgeting.
313 Section 5 of the Global Fund Guidelines for Grant Budgeting.
314 This is a Global Fund internal document.
Transfer Program Assets and Receivables

20. After they can no longer be used under the grant for which they have been purchased, program assets must be used exclusively to fight the three diseases that represent the core mandate of the Global Fund. The Principal Recipient must ensure that all program assets and receivables have been accounted for and appropriately transferred or disposed of as per the Guidance on Asset Management (forthcoming).

21. The transfer or disposal of program assets and receivables depends on the type of closure. For IP Reconciliation and Grant Consolidation, the program assets and receivables must be transferred to be used under the next IP or new grant. The List of Program Assets and Receivables will be reviewed by the Country Team as part of the grant making activities for the next IP or new grant.

22. For Change of the Principal Recipient cases, the program assets and receivables must be transferred to the new Principal Recipient or new and continuing Sub-recipients, with oversight from the CCM. For Transition from Global Fund financing cases, the Principal Recipient and the Country Team must ensure that program assets continue to be used exclusively to fight the three diseases that represent the core mandate of the Global Fund. For these two types of grant closure, a List of Program Assets and Receivables as well as a Transfer Plan is submitted to the Country Team together with the Grant Closure Plan and Grant Closure Budget. All such documents need to be endorsed by the CCM[315] they will also be approved by the Regional Manager or Department Head and Regional Finance Manager through an Implementation Letter, in accordance with the SAP (as amended from time to time).

23. During the Closure Period, the Principal Recipient will submit evidence that the program assets have been transferred in accordance with the approved List of Program Assets and Receivables, and Transfer Plan.

C. Finalize Closure

24. The closure process is finalized when the IP is financially closed (for IP Reconciliation) or both financially and administratively closed (for Grant Closures).

<table>
<thead>
<tr>
<th>Definition</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Financially Closed</td>
<td>The IP/Grant is considered “Financially Closed” when all IP Reconciliation or Grant Closure steps and requirements are considered fulfilled or waived by the Global Fund. The Global Fund will not disburse any further grant funds for the IP/Grant. This, however, does not mean that the Principal Recipient’s legal obligations end when the grant ends.316</td>
</tr>
<tr>
<td>Administratively closed (only for Grant)</td>
<td>A grant is considered “Administratively Closed” when the financial closure has been completed and the Grant Closure Notification Letter is sent to the Principal Recipient to confirm both financial and administrative closure of a grant.</td>
</tr>
</tbody>
</table>

315 These documents, alongside the Grant Closure Plan and Grant Closure Budget, must be endorsed by the CCM Chair and Vice-Chair. For Regional Coordinating Mechanisms (“RCMs”), the RCM Chair and Vice-Chair must endorse the Grant Closure Plan and Grant Closure Budget. This requirement does not apply to Non-CCMs and Regional Organizations.

316 Note that the survival provisions which are expected to last beyond the duration of the Grant Agreement are covered in the Framework Agreement entered into between the Global Fund and the relevant Grantee which forms part of the Grant Agreement (or a standalone Grant Agreement where no Framework Agreement has been agreed). This includes, but is not limited to liability for loss, theft or damage of program assets; right of the Global Fund to request for a refund; maintenance of books and records of the program; right of access by the Global Fund, etc.

The Global Fund’s Operational Policy Manual 260

<tbody>
<tr>
<td><strong>Closure</strong></td>
</tr>
</tbody>
</table>

\(^{317}\) For portfolios in High Impact Department
Annex 1. Definition of Terms

1. **Pre-Closure Period** is the six-month period in advance of the IP end date during which the steps required under the ‘Plan Closure’ stage take place.

2. **Closure Period** is the six-month period from the IP end date during which the steps required under the ‘Implement Closure’ stage take place.

3. **Grant Closure Plan** is the detailed description of the activities that need to be implemented under the ‘Implement Closure’ stage to close the grant in an orderly and responsible manner ("Grant Closure Activities"). The Grant Closure Plan must include a rationale and timeline for the Grant Closure Activities.

4. **Grant Closure Budget** is the itemized costed budget for the Grant Closure Activities.

5. **List of Program Assets and Receivables** is the list of: (a) all goods or other tangible or intangible property acquired wholly or partly using grant funds; and (b) receivables which are grant funds owed to the Principal Recipient by a third party (e.g., a deposit put down on a lease).

6. **Transfer Plan** is a plan for the use, transfer and/or disposal of all the items specified in the List of Program Assets and Receivables, including a rationale for each proposed action.

7. **Financial Commitments** are current contractual obligations to pay a specified amount of cash against goods and services already received, but for which the related payment has not yet been made, fully or partially.

8. **Financial Obligations** are current contractual obligations to pay an agreed amount of cash to a third party for goods/services that are to be received at some point in the future.
Implementation Period Reconciliation and Grant Closure

Approved on: 4 September 2018
Approved by: Executive Grant Management Committee
Process Owner: Grant Portfolio Solutions
Sub-process Owner: Program Finance

Relevant Operational Policies:
- OPN on IP Reconciliation and Grant Closure
- OPN on Recovery of Grant Funds
- OPN on Annual Funding Decision and Disbursements
- Guidelines for Grant Budgeting
- Guidelines for Annual Audits of Global Fund Grants
- Guidelines on Asset Management (forthcoming)

11. This document provides procedural guidance on Implementation Period (“IP”) Reconciliation and Grant Closures, for grants financed under the 2014-2016 allocation period and thereafter. The OPN on Grant Closures issued on 18 December 2014 applies to grants financed prior to the 2014-2016 allocation period.

12. Depending on the applicable closure type, Country Teams should refer to the relevant section of this Operational Procedures below:

- IP Reconciliation – Section A
- Grant Closure
  - Change of the Principal Recipient – Section B
  - Transition from Global Fund Financing – Section C
  - Grant Consolidation – Section D

13. Overview of the IP Reconciliation and Grant Closure types:

---

318 This is an internal Global Fund document

The Global Fund’s Operational Policy Manual 263
14. **Triggers.** IP Reconciliation is triggered when the Global Fund’s support for a particular disease/HSS program continues from one IP to the next, with the same Principal Recipient. In such cases, there are requirements that need to be fulfilled as per the Grant Agreement to ensure the closure of the earlier IP.

15. **IP Reconciliation Activities.** The list of steps and requirements with which the Principal Recipient needs to comply to ensure an orderly reconciliation of the IP are presented below:

* Except for the Financial Closure Report, and in specific cases the audit report, which are submitted during the 'Finalize Closure' stage.

** Non-compliant expenditures and recoveries must be addressed as soon as possible during the 'Implement Closure' stage. Depending on timelines agreed with the Global Fund, this activity may extend to the 'Finalize Closure' stage.
## Requirements | Timeline | Review and Approval[^39]
--- | --- | ---
### A. Plan Closure (6 months before the IP end date)
The Country Team prepares and shares with the Principal Recipient the Guidance Letter on IP Reconciliation to ensure the IP is closed in a timely and orderly manner | 6 months before the IP end date | Fund Portfolio Manager

### B. Implement Closure (within 6 months from the IP end date)

<td></td>
</tr>
</tbody>
</table>
SECTION B: GRANT CLOSURE DUE TO A CHANGE OF PRINCIPAL RECIPIENT

16. **Triggers.** This occurs when the CCM and/or the Global Fund decides to transfer implementation responsibilities of an approved program from one Principal Recipient to another, for example where the Grant Agreement with the current Principal Recipient is being terminated or suspended. This might occur during the IP or at the end of the IP. Under this scenario, the Global Fund support to the disease/HSS program continues but the implementation by the existing Principal Recipient is discontinued.

17. When this happens, the grant with the outgoing Principal Recipient is closed and a new grant is signed with the new Principal Recipient. The change in the Principal Recipient is approved by the Regional Manager or Department Head. The Country Team prepares a new Grant Confirmation. The Grant Confirmation is reviewed and signed by the Global Fund and the new Principal Recipient.

18. **Grant Closure Activities.** When the Principal Recipient changes, grant closure activities must focus on the swift and orderly transfer of the program implementation from the outgoing Principal Recipient to the new Principal Recipient to facilitate the continuity of the program.

---

**A. PLAN CLOSURE**
- Agree on closure approach and timelines
- Agree on Grant Closure Plan and Grant Closure Budget, List of Program Assets and Receivables, and Transfer Plan

**B. IMPLEMENT CLOSURE**
- Complete and pay for approved grant closure activities
- Complete reporting requirements*
- Address non-compliant expenditures and recoveries**
- Address Financial Commitments and Financial Obligations
- Transfer program assets and receivables

**C. FINALIZE CLOSURE**
- Determine and return remaining grant funds
- Formalize closure

---

* *Except for the Financial Closure Report, and in specific cases the audit report, which are submitted during the 'Finalize Closure' stage.*

** *Non-compliant expenditures and recoveries must be addressed as soon as possible during the 'Implement Closure'**

---

320 This is an internal Global Fund document.

321 The audit report must also cover the ‘Closure Period’ in the following cases: (a) the financial risk level is documented and validated (by the Regional Finance Manager) in the Integrated Risk Module as high or very high; (b) the Grant Closure Budget is more than 10% of the grant budget or more than US$ 1 million whichever is lower; and/or (c) the previous audit report had a qualified opinion.
stage. Depending on timelines agreed with the Global Fund, this activity may extend to the 'Finalize Closure' stage.
### A. Plan Closure (within 6 months from the IP end date)

### B. Implement Closure (within 6 months from the IP end date)

### Complete Reporting Requirements

#### Final Progress Update for the grant

- covering the last year of the IP (including any extensions)

Includes the:
- programmatic and financial progress report for the period from the last progress update to the IP end date
- Annual Financial Report (AFR) for the period from the last AFR to the IP end date (including any extensions)

See [PU/DR Guidelines](#)

#### Principal Recipient submission due date: Within 2 months from the IP end date

Review by the LFA

Review by the Country Team:
- Finance Specialist/Portfolio Services Team (PST), who validates the financial data based on the LFA review
- Public Health and Monitoring and Evaluation (PHME) Specialist, who validates the programmatic data based on the LFA review
- Health Product Management (HPM) Specialist, who validates the procurement data based on the LFA review

Approval by:
- Fund Portfolio Manager, who approves based on the above

#### Final Tax Report for the grant

- covering the last year of the IP (including any extensions)

See [PU/DR Guidelines](#)

#### Principal Recipient submission due date: 31 July

Review by the LFA (if applicable)

Review by:
- Finance Specialist/PST, who validates the tax report based on the LFA review (if applicable)

Approval by:
- Fund Portfolio Manager, who approves based on the above

#### Audit Report

- covering the last year of the IP (including any extensions).

The Closure Period must be covered in the audit only in the following cases:
  a. the financial risk level is documented and validated (by the

#### Principal Recipient submission due date: Within 3 months from the IP end date or the Closure Period end date, if the Closure Period is covered in the audit

Review by the LFA (if applicable).

Review by:

### C. Finalize Closure (within 7-12 months from the IP end date)

#### Determine and Return Remaining Grant Funds

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
</table>
| Submit and Validate the **Financial Closure Report** which includes the:  
  • reconciliation report of the cash balances at the end of the IP, including the Closure Period;  
  • expenditures report for the Closure Period  
  • updated Financial Commitments and Financial Obligations as at the end of the IP  
  See [Financial Closure Report Guidelines](#) | Within 12 months from the IP end date | Remaining funds to be returned to the Global Fund are determined through the review and validation of the Financial Closure Report. |

Based on the Financial Closure Report:

- return the final in-country cash balance under the closing grant to the Global Fund.
- address non-compliant expenditures from the Closure Period

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
</table>
| Principal Recipient submission due date: Within 7.5 months from the IP end date | Review by the LFA | Approval by:
  • Finance Specialist/PST, who validates the reported information, based on the LFA review | Review by:
  • Fund Portfolio Manager, who approves based on the above |

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
</table>
| The grant is:  
  • financially closed when all the steps and requirements have been considered fulfilled or waived by the Global Fund.  
  • administratively closed when the Closure Notification Letter has | Within 12 months from the IP end date | Regional Manager or Department Head and Regional Finance Manager approve closure by signing a Notification Letter to be sent to the Principal Recipient.  
This does not mean that the Principal Recipient’s legal obligations under the Grant Agreement ends. Please refer to section 25 of the OPN on IP Reconciliation and Grant Closures. |
19. **Transferring contracts.** It is the responsibility of the outgoing Principal Recipient\(^\text{326}\) to take all appropriate and necessary actions to ensure that each Sub-recipient cooperates fully with the new Principal Recipient, the Global Fund and/or the CCM to facilitate any necessary transfers. In addition to the above, the closure process must also determine and implement the best approach for managing existing contracts and agreements with sub-implementers and service providers to ensure continuity of service delivery under the program:

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Timeline</th>
<th>Review and Approval</th>
</tr>
</thead>
<tbody>
<tr>
<td>been sent to the Principal Recipient.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**a. Contracts for Continuing Services:** The outgoing and incoming Principal Recipients should collaborate to determine if existing contracts for services can be assigned or terminated by the outgoing Principal Recipient and re-negotiated by the new Principal Recipient. Assignment of contracts may be appropriate (if allowed under the terms of the contract) if favorable terms have been negotiated for such contracts. Existing contractual terms and contract termination provisions may be analyzed by the outgoing and new Principal Recipients with their respective legal counsel, as appropriate.\(^\text{327}\)

**b. Contracts with Pending Delivery of Goods:** If the outgoing Principal Recipient has contracts for the procurement of goods, which have not yet been delivered, the Country Team will determine if it is more efficient for the outgoing Principal Recipient to receive and transfer the goods. Factors to be considered include:

(i) the termination costs and penalties;

(ii) delays resulting from the termination of the supplier contract, and re-order of goods by the incoming Principal Recipient (which is particularly important for critical health products); and

(iii) tax benefits that may be gained from the outgoing Principal Recipient’s tax exemption status.

If the outgoing Principal Recipient continues to serve as the Principal Recipient for receiving an outstanding shipment, arrangements should be put in place with the new Principal Recipient to jointly address non-conforming goods and transfer arrangements.

**c. Sub-Recipient Agreements:** Outgoing and incoming Principal Recipients should ensure that Sub-recipients that will continue under the program are maintained under contractual arrangements. This may be through an assignment from the outgoing Principal Recipient to the new Principal Recipient, where this is permitted within the terms of the contract, or a simultaneous termination and execution of Sub-recipient agreements on a set closing date. The transfer of Sub-recipients must be coordinated to ensure that Sub-recipients operate under a contract at all times. The particular terms of transfer will depend on the circumstances of each case. If relevant, cash balances at the Sub-recipient level should be documented in the Grant Closure Plan.

\(^{326}\) Section 10.1 of the Grant Regulations

\(^{327}\) The Global Fund and the Global Fund’s legal department do not represent the Principal Recipient in legal matters. The Principal Recipient must seek independent legal counsel for any contractual arrangements, as appropriate, and to the extent advisable or necessary by the Principal Recipient.
d. **Any Pending Activities:** In limited cases, time-limited, programmatic activities that cannot be transferred to the new Principal Recipient may be approved for continuation by the outgoing Principal Recipient to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of procured drugs, which have faced delays in arriving into the country).³²⁸

³²⁸ If approved in the Closure Plan and Budget.
SECTION C: GRANT CLOSURE DUE TO TRANSITION FROM GLOBAL FUND FINANCING

20. **Triggers.** This occurs when the CCM and/or the Global Fund decide:
   a. a country is not eligible for funding from the Global Fund for a disease component, and transition funding is provided. Following completion of the transition funding period, the Global Fund support to the program and implementation arrangements with the Principal Recipient(s) are discontinued; or
   b. the Global Fund decides to no longer support a disease program or a component of the program; or
   c. a country decides to no longer access Global Fund support for a specific or all disease components.

21. **Grant Closure Activities.** When a grant is closing due to transition, the grant closure process must focus on the orderly exit of the Global Fund from the program and take into consideration previously agreed transition plans. The activities will include the following:

   - **A. PLAN CLOSURE**
     - Agree on closure approach and timelines
     - Agree on Grant Closure Plan and Grant Closure Budget, List of Program Assets and Receivables, and Transfer Plan

   - **B. IMPLEMENT CLOSURE**
     - Complete and pay for approved grant closure activities
     - Complete reporting requirements*
     - Address non-compliant expenditures and recoveries**

   - **C. FINALIZE CLOSURE**
     - Determine and return remaining grant funds
     - Formalize closure
     - Address Financial Commitments and Financial Obligations
     - Transfer program assets and receivables

---

* Except for the Financial Closure Report, and in specific cases the audit report, which are submitted during the ‘Finalize Closure’ stage.

** Non-compliant expenditures and recoveries must be addressed as soon as possible during the ‘Implement Closure’ stage. Depending on timelines agreed with the Global Fund, this activity may extend to the ‘Finalize Closure’ stage.

---

³⁰ The audit report must also cover the ‘Closure Period’ in the following cases: (a) the financial risk level is documented and validated (by the Regional Finance Manager) in the Integrated Risk Module as high or very high; (b) the Grant Closure Budget is more than 10% of the grant budget or more than US$ 1 million whichever is lower; and/or (c) the previous audit report had a qualified opinion.
### Requirements | Timeline | Review and Approval
---|---|---
### A. Plan Closure (within 6 months before the IP end date)
The Country Team prepares and shares with the Principal Recipient the Guidance letter on grant closure due to transition from Global Fund financing | 6 months before the IP end date | Fund Portfolio Manager

### Agree on Grant Closure Plan, Grant Closure Budget, List of Program Assets and Receivables, and Transfer Plan (within 6 months before the IP end date)
**Grant Closure Plan and Grant Closure Budget** which includes: Grant closure activities to be implemented during the Closure Period and the required budget to conduct such activities | Principal Recipient submission due date: No later than 3 months from the IP end date | Review by the LFA (if applicable)
Review and recommendation by:
- Fund Portfolio Manager;
- Finance Specialist/PST;
- PHME and HPM Specialists, if programmatic activities will be completed during the Closure Period.
Approval by:
- Regional Manager or Department Head and Regional Finance Manager through the sign-off of the Implementation Letter approving the Grant Closure Plan and Grant Closure Budget.

**List of Program Assets and Receivables and Transfer Plan:** which includes the:
- list of all goods or other tangible or intangible property acquired wholly or partly using grant funds
- list of receivables owed to the Principal Recipient by third parties
- plan of how the Program Assets are going to be transferred to continue to be used for the fight against the three diseases or disposed of
Submitted together with the Grant Closure Plan and Grant Closure Budget | Principal Recipient submission due date: No later than 3 months before the IP end date | Review by the LFA (if applicable)
Review by:
- Fund Portfolio Manager
- Finance Specialist/PST, who validates the List of Program Assets and Receivables and Transfer Plan, based on the LFA review (if applicable)
- HPM Specialist, who validates the List of Program Assets and Receivables and Transfer Plan, based on the LFA review (if applicable)
Approval by:
- Regional Manager or Department Head and Regional Finance Manager through the sign-off of the Implementation Letter approving the Grant Closure Plan and Grant Closure Budget.

</tr>
</thead>
</table>

The Global Fund’s Operational Policy Manual 280
SECTION D: GRANT CLOSURE DUE TO CONSOLIDATION

22. Triggers. This occurs when the CCM and/or the Global Fund decide that several grants implemented by a Principal Recipient are combined into one grant (for example, separate HIV and TB grants are signed into a combined TB/HIV grant) with the same Principal Recipient. If a grant implemented by one Principal Recipient is combined with a grant being implemented by another Principal Recipient, the discontinued grant will be closed using the closure process for the change of Principal Recipient (Section B).

23. Grant Closure Activities. The grant closure activities must focus on closing the separate grants and ensuring a smooth transitioning of the activities to the combined grant.

* Except for the Financial Closure Report, and in specific cases, the audit report, which are submitted during the ‘Finalize Closure’ stage.

** Non-compliant expenditures and recoveries must be addressed as soon as possible during the ‘Implement Closure’ stage. Depending on timelines agreed with the Global Fund, this activity may extend to the ‘Finalize Closure’ stage.

### Requirements | Timeline | Review and Approval
--- | --- | ---
A. Plan Closure (6 months before the IP end date) | 6 months before the IP end date or as soon as the grant consolidation decision is taken | Fund Portfolio Manager

332 The audit report must also cover the ‘Closure Period’ in the following cases: (a) the financial risk level is documented and validated (by the Regional Finance Manager) in the Integrated Risk Module as high or very high; (b) the Grant Closure Budget is more than 10% of the grant budget or more than US$ 1 million whichever is lower; and/or (c) the previous audit report had a qualified opinion.

<td></td>
<td>This does not mean that the Principal Recipient’s legal obligations under the Grant Agreement ends. Please refer to the section 25 of the OPN on IP Reconciliation and Grant Closures.</td>
</tr>
</tbody>
</table>

### MONITORING AND REPORTING

24. The ongoing closure processes will be monitored by the Grant Portfolio Solutions and Services Department.

25. The following data points will be monitored:
   - Closures initiated and completed;
   - Types of closure;
   - Number of grants for which the initial closure period was extended;
   - Approach used for the IP Reconciliation or Grant Closure (full or with exceptions to the requirements);
   - Closure Status. This includes the timeline from IP end date to date when grant is assigned “Financially Closed” and “Administratively Closed” status; and
   - Amount returned to the Global Fund at grant closure.
OPERATIONAL POLICY NOTE

Grant Closures

Issued on: 18 December 2014
Purpose: To provide guidance to Country Teams on closing a grant agreement signed with a Principal Recipient.

OVERALL OBJECTIVES

137. When a grant reaches the end of an implementation period or ends following a decision by the Country Coordinating Mechanism (CCM) and/or the Global Fund Secretariat, the grant needs to be closed. The purpose of this OPN on Grant Closures is to describe the process through which grants are closed in an organized, efficient, and responsible manner.

POLICY AND PRINCIPLES

138. Four "basic principles" govern the grant closure process. These principles are the minimum requirements for grant closure. Country Teams must ensure that the grant closure approach adheres to these four principles. Provided that they comply with these principles, Country Teams should differentiate the details of the closure process whenever appropriate based on the specific context of the grant or portfolio. Once compliance with these principles is ensured, the grant closure is finalized through a notification letter to the Principal Recipient.

Principle 1: Grant funds should not be left earmarked in the Global Fund Finance systems and/or with implementers for longer than necessary for the implementation of program activities. In the context of grant closure, this means that Country Teams should ascertain the outstanding grants payable, contingent liabilities are cleared and take necessary steps for the swift return to the Global Fund of any grant funds that have not been expended as of the grant expiry or termination date. Any ineligible expenditures should be pursued unless expressly authorized by Global Fund Senior Management.

Principle 2: When they can no longer be used under the grant for which they have been purchased, grant assets should continue to be used exclusively for the purposes of the fight against the three diseases. In the context of grant closure, this means Country Teams should work with the PR to ensure that all assets purchased with grant funds have been accounted for and appropriately transferred or disposed of.

Principle 3: Country Teams should ascertain the extent to which grants have achieved their strategic objectives, and that there is sufficient assurance over the program to confirm any such achievement. For closure, this means that Country Teams needs to ensure that the PR has submitted all relevant reports to ascertain programmatic and financial achievements of the grant during the last year of implementation and closure period.

Principle 4: All activities conducted with grant funds should be discussed and agreed between the PR and the Global Fund, and are governed by the terms and conditions of the grant agreement. For grant closures, this means that closure activities, associated costs and timelines should be agreed well ahead of the grant end date. Grant funds may be used to finance grant closure activities that are approved in the closure plan and budget. An amendment to the grant agreement via an implementation letter is required for authorization of closure activities beyond the end of the grant.
DIFFERENTIATION

If a Country Team has never completed a closure process before, it is advised that they familiarize themselves with the full closure approach before deciding on areas of differentiation.

139. Country Teams can follow the full approach to closure, or a differentiated approach. Country Teams should differentiate in the following circumstances in particular:

   a. Where the overall materiality of grant closure does not merit or justify following all the elements of the full approach for grant closure, primarily due to cost in terms of level of effort envisaged compared to amount of refunds and related risk involved; or

   b. When the documentation required for the full approach is unavailable, and where Country Team recommends to use other corroborative evidence on cash balances, grant assets, grant or grant closure expenditures, stocks/inventories financed from the grant to facilitate grant closure.

140. The following steps should be followed in deciding on the closure approach:

   a. Based on the circumstances of the grant and available information (e.g. recent cash balance reports, inventory-checks, audits, etc.), Country Teams determine whether incremental work needs to be undertaken prior to closing the grant;

   b. By filling in the Differentiated Grant-Closure Form, Country Teams make clear what elements of the full/differentiated approach will be used;

   c. If a Country Team opts to follow a differentiated closure process, they should discuss and agree on the approach with their Regional Manager or Department Head prior to following it and document it in the Differentiated Grant Closure Form. The Regional Manager or Department Head will involve other Functional Managers (Finance, MECA, HPM, and Legal Grant Management) when their inputs are needed for specific areas pertaining to closure. The form should be signed by the Regional Manager or Department Head;

141. The implementation of the differentiated closure approach will be monitored and reported on. For additional information please see the “Monitoring and Reporting” section below.
**Differentiated Grant-Closure Form (SAMPLE)**

**Principle 1: Ascertain the outstanding in-country cash-balance**, after clearing commitments and liabilities

- **Option 1:** The Country Team believes that the circumstances of this grant do not warrant any / warrant limited additional steps towards addressing the outstanding in-country cash balance.
- **Option 2:** The Country Team believes the full process for cash should be followed.

If Option 1: Brief description of these circumstances and suggested CT approach:

- Based on the above, the CT recommends requesting the cash balance as already established on ______________ [date] and closing on this basis.
  
Or:
- Based on the above, the CT recommends not pursuing the recovery of the in-country cash balance and moving towards closure without spending additional effort on recovering cash. The CT has liaised with the Recoveries Team and took this to the Recoveries Committee and ED for write-off (see Recoveries Guidance for additional detail).

**Principle 2: Ensure that all assets purchased with grant funds have been accounted for and transferred or disposed of**

- **Option 1:** The Country Team believes that the circumstances of this grant do not warrant conducting a full inventory of assets or establishment of an “asset transfer plan” prior to grant-closure.
- **Option 2:** The Country Team believes the full process for assets should be followed.

If Option 1: Brief description of the grant’s circumstances and of the Country Team’s approach:

**Principle 3: Reporting requirements and timelines**

- **Option 1:** The Country Team believes that through the reports mentioned below, they have sufficient assurances about the last year of the program and the closure period. They therefore recommend grant closure without the submission of additional reports.
- **Option 2:** The Country Team believes the full process for reporting should be followed for this principle.

If Option 1: Brief description of the reports and the situation:

**Principle 4: Planning and financing grant closure**

- **Option 1:** The Country Team has already had the required planning discussions with the PR and CCM and therefore is able to immediately send the grant closure Implementation Letter with agreed high-level milestones rather than a full closure plan and budget.
- **Option 2:** The Country Team believes the full process for planning and financing closure should be followed for this principle.

If Option 1: Brief description of the discussions surrounding milestones for closure:

---

335 This is defined as outstanding cash balance as per GF calculations based on verified PUDRs/other financial reports (after clearing commitments and liabilities, including approved grant closure budget.

The Global Fund’s Operational Policy Manual  287
FULL CLOSURE APPROACH

142. **Types of Grant Closure.** The closure approach differs depending on the type of closure involved. There are three types of closure:

   a. **Closure due to consolidation.** This involves the closure of an ongoing grant as a result of a consolidation either with a new grant resulting from a Concept Note or another ongoing grant implemented by the same PR. Under this scenario, following closure of the grant, Global Fund support to the disease/HSS program continues and the contractual relationship with the PR is maintained under a new grant agreement that consolidates activities from the newly closed grant with those under the new grant resulting from a Concept Note or other ongoing grant implemented by the same PR.

   b. **Closure due to a change in PR.** This occurs when the CCM and/or the Global Fund decide to transfer implementation responsibilities of an approved program from one entity to another. Under this scenario, Global Fund support to the disease/HSS program continues but the contractual relationship with a PR is discontinued.

   c. **Closure due to “transition” from Global Fund financing.** This occurs either when

      i. a country is not eligible for funding from the Global Fund for a disease component, transition funding is provided. Following completion of the transition funding period, the Global Fund support to the program and contractual relationships with the PR(s) are discontinued; or

      ii. the Global Fund decides to no longer support a disease program or a component of a program.

143. **Stages of grant closure.** Grants go through two primary stages of closure:

   b. **Financial Closure.** A grant enters financial closure on the day after the grant end date. Financial closure focuses on completing financial transactions under the grant such as clearing commitments and liabilities, establishing amounts to be returned to the Global Fund, collecting refunds from PR and other parties. After six months from the grant end date, the creation of new commitments, disbursements and liabilities under the grant will no longer be possible by both the Country Team and PR. The Accounting team in Finance will coordinate the automatic clearing of open grants payable (committed not disbursed) and contingent liabilities (signed not committed) within 30 days of the end of financial closure period (i.e. 7 months from the grant end-date) and no later than a maximum of nine month after grant end-date in exceptional circumstances. In exceptional cases, should a payment of commitments made under the grant term need to be paid beyond 6 months after the grant end date, a final payment letter needs to be undertaken. This letter will summarize the full extent of outstanding payments and will be the last financial interaction between the PR or third party entity and the Global Fund under the grant.

---

336 Includes, without limitations, situations where there has been a decision to terminate the contractual relationship with the PR because of credible and substantial findings of fraud; or when an international organization is handing over its role as PR to a local entity.
c. In the event the Country Team anticipate delays in the establishment the disbursements required for program activities and payment to other third parties, Finance should be notified in writing on grantPO@theglobalfund.org to delay the automatic clearing of undisbursed balances in GFS.

d. A grant is assigned a “financially closed” status when all refunds have been received. This status would end all normal financial obligations between the Global Fund and the Principal Recipient under the Grant agreement.

e. Administrative closure. A grant is considered administratively closed when all liabilities and commitments have been fulfilled, cancelled or transferred, all cash and non-cash assets have been accounted for and appropriately transferred or returned and all reporting requirements have been met to the satisfaction of the Global Fund.

f. The Country Team confirms both financial and administrative closure through a notification letter sent to the PR confirming that the cash balance has been received and all closure requirements have been satisfactorily met. The Country Team updates the grant management system when a grant is closed.

</table>

* these timeframes are indicative. Country Teams should strive to complete these phases as soon as possible.

144. **Closure Activities.** While guided by the “basic principles” above, grant closure should generally focus on the following activities. The detailed approach will depend on the type of closure and the specific circumstance of the grant being closed:

a. **Clearing commitments under the closing grants.** Outstanding commitments should be cleared under the closing grants.

b. **Clearing recoverable amounts between the Global Fund and the PR** When applicable, amounts to be recovered from the PR due to ineligible expenditures and verified claims of the PR for reimbursements must be addressed in accordance with Global Fund policies for addressing recoveries and ineligible expenditures.

c. **Determining and transferring or returning cash balances and undisbursed funds.** Funds required for closure (i.e., clearing outstanding commitments and liabilities and other closure activities) must be determined. Remaining cash balance and undisbursed funds should be returned to the Global Fund.

d. **Accounting and transferring/disposing non-cash assets under a closing grant.** All remaining health products with valid shelf life (i.e., health products procured less than three years from grant end date) as well as equipment and infrastructure that are in working condition as of the
grant end date must be accounted for by the PR and the transfer of assets agreed with the Global Fund to ensure that the assets are used to fight the three diseases.

e. **Completing reporting requirements.** PR must submit the programmatic report, annual financial report, and audit report for the last year of the grant and the grant closure period as applicable.

145. Service delivery or programmatic activities should typically stop by the grant end date. In limited cases, time-limited, programmatic activities after the grant end date may be allowed to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of drugs that have already been procured under the program term and that may have faced delays in arriving in country). This should be clearly documented in the closure plan and budget and should be approved by the Regional Manager or Department Head when signing the Implementation Letter approving the closure plan and budget.

**Planning and Financing Grant Closure**

146. **Grant closure should be planned well ahead of the grant end date.** The Country Team and PR must agree on the approach and requirements for grant closure and establish deadlines for the completion of agreed closure activities. The approach and timelines including budget required should be documented through a closure plan and budget endorsed by the CCM and reviewed by the Country Team. Grant funds may be used to finance grant closure activities that are approved in the closure plan and budget. Once agreed, the closure plan and budget (link forthcoming) should be signed into the grant agreement through an Implementation Letter.

147. **For Closures Due to Consolidation.** Closure of existing grants should be planned as a part of grant making. No separate closure plan and budget is required.

148. **For Closures Due to Change in PR.** Existing arrangements that are essential for continuity of programmatic activities must be maintained or properly transferred. It is the responsibility of the PR to take all appropriate and necessary actions to ensure that the PR and each SR cooperates fully with the Global Fund and/or the CCM to facilitate any necessary transfers. The closure plan should focus on how the program will transition from the outgoing entity to the incoming PR. In addition to the closure activities, the transition plan should include the following considerations if applicable:

   a. **Contracts for Continuing Services:** The outgoing PR and the incoming PR should work together to determine if existing contracts for services should be assigned or if they should be terminated by the outgoing PR and re-negotiated by the new PR. Assignment of contracts may be appropriate if favorable terms have been negotiated under renewable or requirements contracts. Existing contract terms and contract termination provisions may be analyzed by the PR with the PR’s counsel, as appropriate.

   b. **Contracts with Pending Delivery of Goods:** If an outgoing PR has contracts for procurement of goods, which have not yet been delivered, the Country Team should consider if it is more efficient for the outgoing PR to receive and transfer the goods. Factors which favor such arrangement are: (i) time delays resulting from the termination of the supplier contract, re-execution and re-order of the goods by the entering PR (particularly important for critical health products); and (ii) tax benefits that may be gained from PR’s tax exempt status. If the outgoing PR continues to serve as PR for receiving an outstanding...

---

337 Article 10.1 of the Grant Regulations.
338 The Global Fund and the Global Fund’s legal department do not represent the PR in legal matters. The PR should seek independent legal counsel for any contractual arrangements, as appropriate and to the extent necessary by the PR.
shipment, arrangements should be put in place with the entering PR to jointly address non-conforming goods and transfer arrangements.

c. **Sub-Recipient Agreements:** Outgoing and entering PRs should ensure that Sub-recipients that will continue under the program are maintained under contractual arrangements. This may be through an assignment from PR to the entering PR, or a simultaneous termination and execution of SR agreements on a set closing date. The transfer of sub-recipients must be coordinated to ensure that they remain under contract at all times. The particular terms of transfer will depend on the circumstances of each case. If relevant, cash balances at the SR level may also be documented in the transition plan.

d. **Inventory:** The PR should complete an inventory of non-cash assets under the closing grant that will be transferred to and managed under the grant signed with the incoming PR.

e. **Any pending activities:** In limited cases, time-limited, programmatic activities\(^3\) that cannot be transferred to the incoming PR may be allowed to facilitate the completion of discrete projects that have already been substantially started (for example, the distribution of bed nets already delivered, or delivery of drugs that have already been procured under the program term and that may have faced delays in arriving in country).

149. **For Closures due to transition from Global Fund financing.** The closure plan should focus on how the program will be continued and sustained using country resources and the completion of the closure activities.

150. **Sub-recipient closures.** The Global Fund has a direct contractual relationship with the PR. It is the sole responsibility of the PR to provide for closure of SR grant agreement. The PR must ensure that the SRs complete activities and submit information in a timely manner so that the PR is able to comply with the grant closure requirements by the Global Fund.

151. **Escalating Issues:** Should Country Teams face significant challenges, which prevent them from progressing on the grant closure, they should escalate these issues to their Regional Managers (and subsequently to Senior Management, as necessary) as soon as possible to facilitate resolution of issues.

**Determining and Recovering In-Cash Balances:**

152. **For Closures Due to Consolidation.** When a grant is being consolidated with a new or ongoing grant, the Country Team should focus on rapidly determining in-country cash balances and undisbursed funds under the closing grant. These will be transferred to the new grant after setting aside funds required to settle outstanding commitments and liabilities under the closing grants. Once the new grant agreement is signed, the old grant is considered financially closed.

153. **For closures due to PR change.** When a grant is being closed due to a change in PR, the focus should be on rapidly determining in-country cash balances, including at SR level, and undisbursed funds under the closing grant. These will be transferred to the new grant after setting aside funds required to settle outstanding commitments and liabilities under the closing grants. Given the goal of facilitating a smooth change between PRs, all activities associated with the closure of the former PR’s grant should be complete within 3 months of the grant end date.
154. **For closures due to transition from Global Fund financing.** During the 6 months following the grant end date, the PR and Country Team should ensure that all outstanding commitments that were made during the grant lifetime are paid. Grants will be considered financially closed 6 months following the grant end date following which time further disbursements cannot be made to the PR.

155. The Country Team cannot close a grant by waiving known ineligible expenditures, known unutilized or outstanding cash balances, or closure steps that will likely to lead to such ineligible expenditures or unutilized cash balances being identified (e.g., waiving audit while knowing that an audit would lead to identification of ineligible expenditures). Waivers or write-offs of ineligible expenditures/refunds/outstanding cash balances should be submitted and approved by the Recoveries Committee.

**Transferring or disposing of assets**

156. **For Closures Due to Consolidation.** Where the grant is being closed but implementation continues with the same PR under a new grant number, the PR should focus on completing an inventory of non-cash assets under the closing grant that will be transferred into the new grant. In these instances, the PR shall maintain ownership over the assets, but in conducting the inventory, will have clear documentation of the assets to be managed under the new grant. The timing for completion of this activity should be discussed and agreed between the Country Team and the PR.

157. **For closures due to PR change.** When the implementation responsibilities are being transferred to another entity, the outgoing PR should complete an inventory of non-cash assets that will be transferred to the new PR. The outgoing PR must transfer all non-cash assets procured under the grant to the new PR using appropriate transfer or assignment agreements.

158. **For closures due to transition from Global Fund financing.** The country should undertake an inventory of non-cash assets procured under the grant (where relevant) and must seek approval of the Global Fund for the disposal or transfer of these non-cash assets to national entities to be used for the fight against the three diseases.

**Fulfilling reporting Requirements**

159. In order for a grant to be considered administratively closed, all reporting requirements need to be met (in addition to all liabilities and commitments have been fulfilled, cancelled or transferred, all cash and non-cash assets have been accounted for and appropriately transferred or returned.) This section outlines the reporting requirements for each type of closure.

160. **For Closures Due to Consolidation.** Once the new grant agreement is signed, the PR should submit the following routine reports related to the old grant as per the outlined timelines\(^{340}\). The grant is administratively closed when the Global Fund has completed the review and approved the reports.

   a. *Programmatic Progress Report*: The PR should submit report(s) on the progress towards program objectives and targets covering from the last Progress Update date until the day before the new NFM grant start date for the constituent grant(s) no later than 60 days after the end of the reporting period agreed for the constituent grant(s).

   b. *Annual Financial Report (AFR)*: The PR should submit AFR(s) for the constituent grant(s) covering the period from the last submitted AFR up to the last day before new grant start.

---

\(^{340}\) The relevant reports should be submitted as per the timeline agreed up on the original constituent grant agreement’s and should not delay the first disbursement of NFM agreement.
date, no later than 60 days after the end of the reporting period agreed for the constituent grant(s).

c. **Audit Report:** The PR should submit audit report(s) for the constituent grant(s) covering the audit of financial statement(s) up to the last day before new grant agreement start date, as per the timeline agreed up-on the original constituent grant agreement(s). However, if the financial statement of the constituent grant(s) to be audited covers less than six months, these periods can be audited with the first audit for the NFM grant.

d. **Inventory:** The PR should complete an inventory of non-cash assets under the closing grant that will be transferred to and managed under the new grant.

161. **For closures due to PR change.** As the new grant is negotiated and signed with the new PR, the outgoing PR should submit the following routine reporting documents. The grant is administratively closed when the Global Fund has completed the review and approved the reports.

a. **Programmatic Progress Report:** The PR should submit programmatic progress report for the period from the last progress report to grant end date, no later than 60 days after the grant end date.

b. **Annual Financial Report (AFR):** The PR should submit AFR(s) covering the period from the last submitted AFR up to the grant end date, no later than 60 days after the grant end date.

c. **Audit Report:** The PR should submit audit report covering the audit of financial statement(s) up to the grant end date, as per the timeline agreed in the grant agreement.

d. **Financial Report for the Closure Period:** The PR should submit a financial report covering expenditures during the closure period.

162. **For closures due to transition from Global Fund financing.** During the 12 months following the grant end date, the PR should work to closing the grant including completing reporting requirements and returning all outstanding cash balances. The grant is administratively closed when the Global Fund has completed the review and approved the reports. The PR is required to submit the following routine reports:

a. **Programmatic Progress Report:** The PR should submit programmatic progress report for the period from the last progress report to grant end date, no later than 60 days after the grant end date.

b. **Annual Financial Report (AFR)\(^{341}\):** The PR should submit AFR(s) covering the period from the last submitted AFR up to the grant end date, no later than 60 days after the grant end date.

c. **Audit Report:** The PR should submit audit report covering the audit of financial statement(s) up to the grant end date, as per the timeline agreed in the grant agreement.

d. **Financial Report for the Closure Period:** The PR should submit a financial report covering expenditures during the closure period.

---

**MONITORING AND REPORTING**

\(^{341}\) Enhanced Financial Report (EFR) for existing grant that have not transitioned to the new funding model.
163. The use of the differentiated approach for closures will be monitored and reported to the EGMC by the Operational Support Team. Reports will be generated once a month for the first six months following the approval of this approach, and then on a quarterly basis thereafter.

164. The following information will be reported:
   a. Number of grant closures completed;
   b. Type of grant closure;
   c. Approach used (differentiated or full);
   d. Timeline from grant end date to date when grant is assigned “financially closed” and “administratively closed” status; and
   e. Amount returned to the Global Fund at grant closure.
