What are the Implications for the Global Fund Investment Portfolio?
Conservative Risk Parameters

Preservation of principal is paramount objective.

- Investment strategy is designed to minimize vulnerability to negative returns.
- High-quality credit assets (*subset of those authorized for IBRD and IDA*).
Changes to Adapt to the Financial Crisis Since June 2008

- Shortened duration*
  - From 1.75 years to 1.25 years.

- Reduced bank exposures.
  - From 62% to around 50%

* Duration of non-working capital and non-MBS components.
On January 31, 2005, the assets of Trust Funds were converted into two separate tranches. GFATM participates in both tranches. CY05 return includes pre-tranche returns for January 2005.
The return shown above for 2002 to 2004 is for the total Trust Funds (includes GFATM).
CY08 return is not annualised and is for the period to 30 September 2008.
Investment Income Earned by Global Fund

*Note: CYTD income through September 30, 2008
Conclusion

- Continuing prudent management of Global Fund funds.
- Anticipate lower returns in low yield environment.
