

Category and Product-level Procurement and Delivery Planning Guide

Indicative Lead Times

7 January 2019

This document lays out indicative lead-times for planning purposes for key health products for the Global Fund's Pooled Procurement Mechanism. This information may also be useful as a reference for other procurement channels.

Procurement and delivery lead-time information is the time from making a procurement request to delivery in country and assumes that there are no financing or other challenges that may delay confirming an order. This information is provided at the category and the detailed product level and is indicative based on current market knowledge to assure on-time delivery and best value procurement in terms of product and freight costs.

The lead-time information is updated from time to time. The most recent version of this guidance is available [here](#).
