

Category and Product-level Procurement and Delivery Planning Guide – Health and non-health products

Indicative Lead Times

19 March 2020 (the latest version)

This document lays out indicative lead-times for planning purposes for key health products, including HIV, malaria, and non-health products, for the Global Fund's Pooled Procurement Mechanism (PPM). This information may also be useful as a reference for other procurement channels.

As of 19 March 2020, the Global Fund and the StopTB Partnership's Global Drug Facility have taken measures to reduce manufacturing and supply chain pressures in the context of the new coronavirus, COVID-19. With delivery delays of a few weeks or more expected, these measures will help us to optimize supply for all Principal Recipients (PRs).

PRs should urgently submit all requisitions for deliveries expected in 2020 by 10 April.

- PRs participating in PPM should submit requisitions in wambo.org by April 10.
- PRs ordering through GDF should submit Procurement Request Forms (PRFs) to StopTB/GDF by April 10.

Please note: new requests for customized labelling will not be accepted to ensure products can be quickly manufactured and efficiently deployed to all countries.

Procurement and delivery lead-time is the time from making a procurement request to delivery in-country and assumes that there are no financing or other challenges that may delay confirming an order. Countries where importation approvals are complex and where the green-light to ship is long, should add the necessary additional weeks to these lead-times.

This information is provided at the category and the detailed product level and is indicative based on current market knowledge to assure on-time delivery and best value procurement in terms of product and freight costs.

This lead-time document is updated regularly and can be found on the [Global Fund's website](#).

A similar lead-time guide for TB products is available on [StopTB Partnership's Global Drug Facility's website](#).

For all deliveries in 2020, please place orders by **10 April**. For deliveries in January 2021 and beyond, please reference lead times below

Non-health	For non-health products lead-time significantly varies, for more details please refer to specific product lead-times below.																		

* Dependent on procurement volumes, country importation requirements and manufacturer production schedules. Actual lead times will be confirmed at time of order confirmation. For planning purposes, please factor in minimum 6 months' timeline.

**Broad product selection available in wambo.org. Programs should plan with minimum 6 months procurement and delivery timeline as lead times vary widely depending on product availability at time of order confirmation.

*** Wide variation – please consult detailed product-level guidance.

For all deliveries in 2020, please place orders by **10 April**. For deliveries in January 2021 and beyond, please reference lead times below.
