

Added value of the Global Fund's Pooled Procurement Mechanism (PPM)/wambo.org

wambo.org simplifies the process of creating and approving procurement requests and invoices and supports access, transparency and compliance

Value-for-money

The Global Fund actively engages in global markets for its key products. It aggregates order volumes to negotiate prices and delivery conditions, no matter the size of the order. The Global Fund offers **framework agreements** for **ARVs, RDTs, ACTs, ITNs, and PPE** and proactively monitors performance of its contracted suppliers.

Easy access

wambo.org enables over 125 organizations from 81 countries to access Global Fund and UN-partner framework catalogues, as well as catalogues maintained by competitively-selected Procurement Services Agents (PSAs). Products can be **accessed regardless of funding source**, supporting **long-term program sustainability**.

Quality assurance

All products meet the Global Fund's quality assurance framework, which is based on **international standards of quality** and compliance to ensure safety and efficacy.

Transparency

The platform offers **real-time visibility into transaction and payment data** via reports and customizable views for all nominated users, with centralized communication channels.

Efficient procurement

With competitive strategic sourcing done in advance, **buyers avoid tendering delays and procurement uncertainty** from having to run individual RFQs. This results in accelerated timelines, consistent and predictable market conditions, and delegated supplier performance management.

Auditability

wambo.org supports **tailored approval chains** per buyer, program and/or funding source, adapting to each organization's existing procurement processes. The platform offers **full tracking of decisions and changes** for auditability.
