

LIST OF INDOOR RESIDUAL SPRAYS (IRS) THAT MEET GF QA REQUIREMENTS FOR USE AGAINST MALARIA VECTOR

Edition: Version 19
Date: 21 October 2022

The list is an overview of WHOPES-recommended insecticide products for Indoor Residual Spraying. It also lists manufacturers whose Health pesticides has been listed by WHO Prequalification Program for Vector Control. The list is developed as a tool to assist Principal Recipients (PR) of Global Fund grants in procurement.

Important Note

This List may be used by Principal Recipients of Global Fund grants when considering options with respect to procurement of Indoor Residual Spray. The list aims at providing countries with information that will assist them in their procurement options. Please note that the list is not designed to be a basis for countries to select IRS to replace any applicable and legally required procurement processes. The Global Fund requires its grant recipients to comply with applicable procurement laws and provides the list only for **the identification of products/manufacturers that comply with the Global Fund's requirements**. It is important that the product selected is compliant with the GF requirement criteria (refer to GUIDE TO GLOBAL FUND POLICIES ON Procurement and Supply Management:

https://www.theglobalfund.org/media/5873/psm_procurementssupplymanagement_guidelines_en.pdf Page 17 part 6 of Health Products. Furthermore, the Principal Recipient should not rely solely on the information provided in the list but should obtain evidence of products compliance with the GF requirements. For the above reasons, **we strongly encourage users to ensure they are using the most recent version on our website when conducting procurement.**

REMINDER

As per section 6.4 of the Guide to Global Fund Policies on Procurement and Supply Management of Health Products (June 2021) Recipients shall do a randomized pre-shipment sampling and testing to ensure vector control products comply with Global Fund quality assurance requirements. For WHO PQ approved products, pre-shipment sampling and testing can be alleviated.

Recommendations:

1. Based on quality signals received for soluble bags formulations, The Global Fund advises Grant Recipients to procure non-soluble bags formulations as per QA notice 2021_03
2. Grant Recipients should consider increasing the sample size for QC testing for newly listed products (usually marked in yellow)

Disclaimer:

The Global Fund does not endorse or warrant the fitness of any product on the List, including in regard of its safety and/or efficacy. In addition, the Global Fund assumes no responsibility for any misstatement or omission from the list and directs Principal Recipients of Global Fund grants to conduct their own independent confirmation that the information on a given product on the list is accurate before relying on it to make a purchase order for that product, and to ensure that any purchase is in compliance with all the requirements of the Global Fund's requirements. The Global Fund does not warrant or represent that the products listed have obtained regulatory approval for use in any particular country of the world, or that their use is otherwise in accordance with the national laws and regulations of any country, including, but not limited to, intellectual property laws. The Global Fund disclaims any and all liability and responsibility for any injury, death, damage or loss of any kind whatsoever that may arise as a result of, or in connection with the procurement, distribution and use of any product included in the list.

1. Inclusion in the list does not constitute an endorsement, or warranty of the fitness, of any laboratory for a particular purpose.
2. Global Fund does not furthermore warrant or represent that:
 - a) the list is complete or error free; and/or that
 - b) the products listed have obtained regulatory approval for use in the country, or that their use is in accordance with the national laws and regulations of any country, including but not limited to patent laws.

The List is not exhaustive. Only products for which The Global Fund received information/confirmation from the manufacturers have been listed. The other products that meet WHOPES specifications and/or which are prequalified will be listed and the list will be updated regularly based on evidence received by the Global Fund.
