Senior professional with over thirty years of internationally recognized experience bridging health, education, social development and technology globally. This has led to extensive travel to design national and community-based strategies, influence the development of rights-based policies, train human resources, develop institutional capacity, negotiate contracts and support grant implementation in more than eighty countries in Latin America and the Caribbean, Africa, Asia, Europe and Central Asia, and Arab States. Thematic areas of expertise include: HIV and AIDS; adolescent and youth comprehensive programming; sexual and reproductive health and rights (SRHR); maternal, newborn and child health (MNCH); health systems strengthening (HSS) and its linkages to socioeconomic, educational and sustainable development programs; inclusive development and disabilities; mental health; new vaccine introduction and immunization supply chain management (iSCM) within an HSS perspective; and information communications technologies (ICT) for development.

AREAS OF EXPERTISE:

- **Comprehensive public health and international development strategic planning and evidence-based programming** operationally grounded on principles of social justice and strategic partnerships among public, private, academic and community-based sectors.
- **Strengthening the capacity of decentralized government structures and civil society** to address socioeconomic determinants of health and develop equity-based and integrated delivery strategies to reach the poorest and most vulnerable populations especially as related to the health and livelihood of women, children, adolescents and youth.
- **Performance-based program management** requiring strategic allocation of resources, accurate forecasting, on-target disbursement of funds and establishing indicators for monitoring results.
- **Designing innovative, intercultural, gender sensitive and transdisciplinary capacity development systems** utilizing collaborative learning networks, cross-regional knowledge management, participatory methodologies and ICT.
- **Translational innovation** that applies strategically uses ICT (e.g., eHealth, mHealth, eLearning, serious games) and reverse innovation to strengthen and/or restore social capital and accelerate program outcomes.
