

Pooled Procurement Mechanism Reference Pricing: RDTs
version: Q4 2023

The Global Fund has established long term agreements with manufacturers of rapid diagnostic tests with the aim to achieve lower sustainable prices and also ensure the sustainable and reliable on-time supply of the full range of the rapid diagnostic tests.

The prices below are the prices at which the Global Fund Pooled Procurement Mechanism aims to deliver the health products at or below. These prices should be used for budgeting purposes.

Actual prices achieved for a grant will depend on how early the orders are placed by Principal Recipients - and additionally the achievement of certain volume thresholds through the pooled volumes to enable us to achieve negotiated prices through the mechanism. Actual prices achieved will be charged to the grant.

For HIV RDTs different price bands are presented to inform countries decisions on testing algorithms.

Some non-optimal products/pack-sizes have been removed from this version of the reference price list: pricing can be provided on request should the product still be commercially available.
