Additional Information

I have extensive experience in tuberculosis control, tobacco control and health systems especially in the South Asian context. A lifetime achievement is the co-writing of the first successful civil society tuberculosis control proposal in India through Round 9 of the Global Fund that resulted in Project Axshya implemented by The Union and World Vision India as co-Principal Recipients with the Ministry of Health Government of India. I currently serve as the Senior Regional Project Coordinator with the UN Migration Agency (IOM) leading a team based in Amman, Jordan, implementing the Global Fund Middle East Response Grant for TB, HIV and Malaria in a 'challenging operating environment'.
