- Global Fund sixth replenishment conference
- What is ahead of us?
- What are the challenges and opportunities for the Global Fund?

# **SIXTH REPLENISHMENT CONFERENCE**

# THE PLEDGE

- **US\$14.02 billion** pledged for the next three years – the largest amount ever raised for a multilateral health organization, and the largest amount by the Global Fund.
- Many donors significantly increased their pledges: France: +20%; Germany: +17.6%; UK + Canada + EU: +16%
- Expanding its donor base, the Global Fund welcomed 20 new and returning public donors.
- Private donors pledged more than US\$1 billion for the first time ever.
- An unprecedented number of implementing countries from Africa – 23 – made pledges to the Global Fund.
- Several heads of state committed to increase domestic resources for health and work towards universal health coverage.

# WHAT US\$14 BILLION CAN ACHIEVE\*

- Save **16 million lives** between 2021 and 2023.
- **Cut the mortality rate by 52%** across the three diseases by 2023, relative to 2017 levels.
- **Avert 234 million infections** or cases, reducing the incidence rate by 42% across the three diseases by 2023, relative to 2017 levels.
- **Reduce the death toll across the three diseases to 1.3 million** in 2023, down from 2.5 million in 2017, and from 4.1 million in 2005.

\*With a Sixth Replenishment of at least US\$14 billion, the Global Fund would contribute to achieving these results alongside sustained levels of other external funding scaled-up domestic financing, and more innovation, collaboration and rigorous execution.

# ACCELERATE PROGRESS TOWARD SDG 3 AND UNIVERSAL HEALTH COVERAGE

## + Strengthen health care systems

+ through directly investing approximately US\$4 billion to build capacities such as diagnostic tools, surveillance systems, supply chain management and training for health care workers, and accelerating the shift toward patient-centered, differentiated models of care

## Reinforce health security

by helping build more resilient health systems, with stronger surveillance, diagnostic and emergency response capabilities, and by directly tackling key threats to global health security, such as multidrug-resistant TB;

## Tackle inequities in health, including gender and human rights-related barriers

by working with partners, including civil society and affected communities, to build more inclusive health systems that leave no one behind;

## Spur domestic investment of US\$46 billion

toward ending the three diseases and strengthening health systems through co-financing requirements, and technical assistance on health financing

## Yield a return on investment of 1:19

Every dollar invested will result in US\$19 in health gains and economic returns, further contributing to the achievement of the overall SDG agenda.
