- Global Fund sixth replenishment conference
- What is ahead of us?
- What are the challenges and opportunities for the Global Fund?
SIXTH REPLENISHMENT CONFERENCE
THE PLEDGE

- **US$14.02 billion** pledged for the next three years – the largest amount ever raised for a multilateral health organization, and the largest amount by the Global Fund.

- Many donors significantly increased their pledges: France: +20%; Germany: +17.6%; UK + Canada + EU: +16%

- Expanding its donor base, the Global Fund welcomed 20 new and returning public donors.

- Private donors pledged more than US$1 billion for the first time ever.

- An unprecedented number of implementing countries from Africa – 23 – made pledges to the Global Fund.

- Several heads of state committed to increase domestic resources for health and work towards universal health coverage.
WHAT US$14 BILLION CAN ACHIEVE*

- Save **16 million lives** between 2021 and 2023.

- **Cut the mortality rate by 52%** across the three diseases by 2023, relative to 2017 levels.

- **Avert 234 million infections** or cases, reducing the incidence rate by 42% across the three diseases by 2023, relative to 2017 levels.

- **Reduce the death toll across the three diseases to 1.3 million** in 2023, down from 2.5 million in 2017, and from 4.1 million in 2005.

*With a Sixth Replenishment of at least US$14 billion, the Global Fund would contribute to achieving these results alongside sustained levels of other external funding scaled-up domestic financing, and more innovation, collaboration and rigorous execution.*
ACCELERATE PROGRESS TOWARD SDG 3 AND UNIVERSAL HEALTH COVERAGE

+ **Strengthen health care systems**
  + through directly investing approximately US$4 billion to build capacities such as diagnostic tools, surveillance systems, supply chain management and training for health care workers, and accelerating the shift toward patient-centered, differentiated models of care

**Reinforce health security**
by helping build more resilient health systems, with stronger surveillance, diagnostic and emergency response capabilities, and by directly tackling key threats to global health security, such as multidrug-resistant TB;

**Tackle inequities in health, including gender and human rights-related barriers**
by working with partners, including civil society and affected communities, to build more inclusive health systems that leave no one behind;

**Spur domestic investment of US$46 billion**
toward ending the three diseases and strengthening health systems through co-financing requirements, and technical assistance on health financing

**Yield a return on investment of 1:19**
Every dollar invested will result in US$19 in health gains and economic returns, further contributing to the achievement of the overall SDG agenda.
What is ahead of us?

What are the challenges and opportunities for the Global Fund?
