# Country Coordinating Mechanism Evolution: Summary of the Pilot

---

UPDATED APRIL 2020

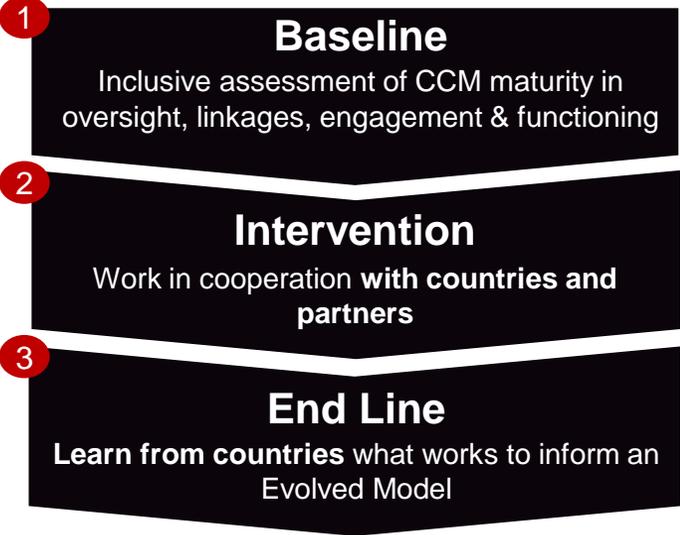

# CCM Evolution Pilot | Increasing CCM maturity across core responsibilities of health governance to collectively ensure impact of investments to end HIV, TB and malaria

## Pilot Overview

- Country Coordinating Mechanisms (CCMs) are a **core part of the Global Fund model**. Despite years of investment in technical assistance, evaluations in 2016 & 2017 identified significant opportunities for improvement
- Global Fund Board approved **CCM Evolution Pilot** in 18 countries (May 2018) to focus on sustainably increasing CCM performance across **core responsibilities of health governance**

## Methodology

*A differentiated approach across a diversity of country contexts utilizing a maturity model to calibrate performance*

## Key Results and Learnings

### Key Results

- ✓ Gains in maturity **across areas of responsibility with greatest growth in oversight**
- ✓ Work remains in how to **ensure meaningful engagement and operationalizing linkages into national structures**

### Lessons Learned

- **Keep it simple.** Streamline the evolution approach and simplify CCMs evaluation
- **Create systemic improvements through the CCM Secretariats** vs. fly in/fly out technical assistance
- **Equip CCMs with the right interventions and incentives** - the clearer the specific tools and the strategic intent, the easier it is for CCMs to change
- **Differentiate CCMs** - not all will mature in the same way so flexibility is critical

**Next Steps:** Launching an **evolved approach for all CCMs in 2020** – incorporating lessons learned from the pilot countries and partners. Driving **more effective development and oversight of grants** and improvements in the mechanisms of **health governance** to end diseases

# 18 Pilot CCMs | 2018-2019

Country	Portfolio
1. Benin	Core
2. Burkina Faso *	High impact
2. Cameroon	Core
4. Lesotho	Core
5. Malawi *	High impact
6. Mozambique **	High impact
7. Nepal	Core
8. Papua New Guinea	Core
9. Tanzania *	High impact
10. Uganda	High impact

## Standard CCMs

- Country is representative (not an outlier)
- B2/C rated grants
- Support of CCM leaders for CCM Evolution

Country	Portfolio
1. Albania **	Focused
2. Colombia	Focused
3. Guatemala	Core
4. Romania	Focused

## Transition Preparedness CCMs

- Country is representative (not an outlier)
- Strong leadership

Country	Portfolio
1. Burundi	Core
2. Congo (Democratic Republic)	High impact
3. Haiti	Core
4. Niger	Core

## CCMs in Challenging Contexts

- Country is representative (not an outlier)
- Fertile political environment
- Strong leadership (preferably)
